* Means of five days. † Means of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the la
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numb
are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the p
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fall.

for the week ending Friday, the 17th of January 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1889. Mean for district.	Since 15th May 1889. Normal mean.	Since 15th May 1889. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank

CALCUTTA, *the 21st January* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 17TH JANUARY 1890.

THE meteorology of Bengal for the week calls for few remarks. Ordinary north-east monsoon conditions have generally obtained over the greater part of the province, though there has been a tendency for moist southerly winds to set in at a few of the southern stations, which has caused humidity and also temperature to be rather higher than usual at this season. This setting in of southerly winds has apparently been connected with one or more disturbances which have existed over the north-west Himalayas, but these disturbances have not been sufficiently important, nor have they existed long enough to materially affect the weather in Bengal. For the greater part of the week, therefore, fine clear weather has obtained, except at the stations in and near the hills, where the sky has been somewhat clouded over. Temperature has been moderate, though rather above the normal, and humidity has been decidedly high at some stations. Over the greater part of the province northerly winds have generally been reported, but the current has been rather light and feeble. Pressure has been rather low during the week, but the changes from day to day have not been large, while rainfall has been entirely absent except at the single station of Buxa in the Darjeeling Hills district, where some light showers have fallen.

Pressure.—On the 11th, pressure had fallen over the whole province by amounts which varied from 0·03 inch to 0·07 inch, the fall being largest near the hills. During the following two days the pressure recovered itself slightly, but on the 14th there had been a slight fall which was succeeded by a further rise on the 15th. On the 16th the changes were a little variable, while on the 17th a slight rise was generally reported. For the whole week the mean pressure has been below the normal by amounts which have varied between 0·05 inch and 0·08 inch, the defects being generally largest at the northern stations, and particularly along the line of the hills.

Temperature—Has been rather high throughout the week, and the mean temperature for the whole of the province has been about two and-a-half degrees above the normal. The excess has been even larger than this in Behar, where it has equalled more than three degrees. The distribution of temperature during the week, its range from day to night, and its variation from the normal are best seen in the following table, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with their normal values for the same period. Both day and night temperatures have been decidedly in excess at all these stations except at Cuttack, and as a general rule the day or maximum temperatures have been rather more largely in excess than the night or minimum temperatures. The excess in the day temperature above the normal at Darjeeling has been no less than 8·9°, which is most exceptionally large :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 17th January 1890.

	Normal mean maximum temperature for the week ending 17th January.	Actual mean maximum temperature for the week ending 17th January 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 17th January.	Actual mean minimum temperature for the week ending 17th January 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 17th January.	Actual mean daily temperature for the week ending 17th January 1890.	Variation of actual mean from the normal.

Rainfall.—With the exception of two or three unimportant light showers at Buxa in the Darjeeling Hills district, the whole province has been rainless throughout the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 17th of January 1890 :—

Meteorological Divisions.	Temperature						Rainfall.								
			Averages for week.				Of week.			Rainy days.			Since 1st of month.		Since 16th May 1889

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓ dew; ≡ fog.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 20th January 1890.

MEMORANDUM.

For the week ending 4th January 1890, the returns of the principal Municipalities in Bengal disclosed the following particulars :—

1. Births were registered at the rate of 25·3 per 1,000 of population, and deaths at 23·7 per 1,000 as opposed to 24 and 27·9 per 1,000, respectively, during the preceding week ending 28th December 1889, indicating an improvement in the registration of births with a considerable falling off in that of deaths.

2. In the following Municipalities births and deaths were registered at the highest rates :—

Births.

	Ratio per mille.
Darjiling	51·9
Narainganj	49 7
Durbhanga	40·1
Monghyr	39·8
Bhagulpore	38·0
Utterpara	37·7
Chupra	36·2
Arrah	32 3
Bali	31·6
Serampore	31 4
Comillah	30 8

Deaths.

	Ratio per mille.
Utterpara	84 9
Poori	81·8
Comillah	57 7
Narainganj	53·8
Jessore	49·0
Hughli and Chinsurah	47 6
Burdwan	44·2
Serampore	39·3
Darjiling	37·0
Ranaghat	35·9
Rampore Bauleah	31·5
Chittagong	30 5

3. The subjoined table gives the death-rates from the following specific diseases. The figures denote that, as compared with the results of the preceding week, there was a diminution of mortality from all the diseases excepting small-pox, *vide* figures below :—

	Ratio per *mille* during the weeks ending—	
	4th January 1890.	28th December 1889.
Cholera	2·2	3·2
Small-pox	·5	·4
Fever	9 8	10·4
Bowel-complaints	3 6	4·8
Injury	·2	·6
Other causes	7 3	8·4

4. Of the diseases mentioned above, while small-pox and bowel-complaints were noticeably fatal only in the Poori town, viz., at the rates of 14·7 and 12·5 per 1,000 of population, respectively, cholera, fever and the maladies classed under the head of "Other causes" caused the highest mortality in the following Municipalities :—

Cholera.

	Ratio per mille.
Jessore	24·5
Comillah	19·2
Chittagong	18·8
Narainganj	16·6
Hughli and Chinsurah ...	11 5
Dacca	4·5

Fever.

	Ratio per mille.
Poori	31·5
Burdwan	27·4
Rampore Bauleah ...	23 6

Other causes.

	Ratio per mille.
Utterpara	37·7
Poori	21 0
Serampore	19 6
Comillah	19·2
Midnapore	13 9
Burdwan	12 2
Hughli and Chinsurah ...	11 5
Bhagulpore	10 0

5. It is observable that Poori continues to suffer very severely from small-pox which first appeared in the town a fortnight ago.

6. The mortality of the week classified under the heads of *Sex*, *Class* and *Age* stood as follows :—

According to Sex.

	Ratio per mille.
Males	25·0
Females	22 3
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population	114

According to Class.

	Ratio per mille.
Hindus	23·6
Mahomedans ...	24·2
Buddhists	51·4
Other classes ...	76·8

According to Age.

	Ratio per mille.
Under 1 year ...	202·3
1 and under 5 years ...	20 7
5 „ 10 „ ...	13·7
10 „ 15 „ ...	6·5
15 „ 20 „ ...	16·1
20 „ 30 „ ...	13·5
30 „ 40 „ ...	18 1
40 „ 50 „ ...	15·0
50 „ 60 „ ...	28·2
60 years and upwards ...	69 6

The 20th January 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending 4th January 1890.

	Tons.
INCREASE.	
Hides and skins—	
(1) Hides of cattle—	
(*b*) Undressed	9
The increase is due to greater export.	
Metals—	
(2) Iron	12
Due to greater import for local consumption.	
Oilseeds—	
(2) Mustard and rape	21
Due to greater demand.	
Salt	28
Owing to sudden demand imported by rail.	
Silk, raw—	
(2) Indian	9
Due to greater export to Europe.	
DECREASE.	
Cotton piece-goods—	
(1) European	15
This was imported by the steamer plying between Jeagunge and Calcutta.	
Grains—	
(2) Rice	416
This is due to less export from intermediate stations owing to less demand in North-Western Provinces this year.	
Jute—	
(1) Raw	95
This was despatched by boat.	
Oilseeds—	
(1) Linseed	12
Less exported owing to less demand.	
Railway plant and rolling-stock	68
Less Railway material was carried during the month.	
Sugar—	
(1) Drained	13
This is due to less demand, bazar being dull.	

R. G. MOOKERJEE,
Manager, Nalhati State Railway.

The 27th December 1889.

				49	Chota Karman ...	1	Ditto.

NOTE.—In the above list the names given are those of the villages as demarcated and surveyed by the Revenue Survey Department and as shown in their maps and records.

In consequence of the conversion of thana Joypore into an outpost of thana Jhaldah, and the transfer of certain villages from thana Manbazar to thana Barabhoom, the following are declared to be the revised boundaries of thanas Jhaldah, Barabhoom and Manbazar, in modification of the boundaries defined by the notification, dated the 9th February 1875, published in the *Calcutta Gazette* of the 24th idem :—

THANA JHALDAH.

On the North—The northern boundaries of pergunnahs Joypur and Jaitara, from the village of Kurkura on the west to the Gowaie Nuddee on the east; thence the Gowaie Nuddee eastward to the junction of this Nuddee with the Tusurkow Nuddee at the north-east corner of village Kosamkeari.

On the East—The boundaries of pergunnah Khaspail, from the junction of the Tusurkow Nuddee with the Gowaie Nuddee southward to the village of Gamuria.

On the South—Commencing from the village of Gamuria on the east and running westward, the boundaries of pergunnahs Khaspail, Joypur, Mokundpur, Bygoonkodar, Jhaldah, Hesla and Toorang to the boundary of the district.

On the West—The boundary of the district along the boundaries of pergunnahs Toorang, Hesla, Jhaldah and Joypur.

THANA BARABHOOM.

On the North—Thana Purulia.

On the West—Thana Chandil (formerly Inchaghor.)

On the South—The boundary of the district.

On the East—The boundaries of pergunnahs Koilapal and Barabhoom.

THANA MANBAZAR.

On the North—Thana Purulia.

On the West and South—Thana Barabhoom.

On the East—The boundary of the district along the boundaries of pergunnah Manbhoom.

NOTE.—In the above description the villages and pergunnahs named (with the exception of a portion of pergunnah Khaspail north of the Gowaie Nuddee) are included within the boundaries of the thanas to which reference is made.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 18th January 1890.—Under section 2 of Act II (B C.) of 1867 (an Act to provide for the punishment of public gambling and the keeping of common gaming-houses), the Lieutenant-Governor authorizes the extension, from the 1st February 1890, of the provisions of sections 11 to 14 of the said Act to the town of Rampore Hât (including Brahamanigram, Kalisanra, and Khalasiparah,, in the district of Beerbhoom

2. For the purposes of the above Act, the boundaries of the place shall be as follows:

North—East Indian Railway Rifle Butts.
South—Sanghatta khal.
East—Khair tank.
West—Village Sutialla.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

BALASORE SEA CUSTOM'S OFFICE,
The 30th December 1889.

R. CORNISH,
Collector of Sea Customs,

NOTIFICATION No. 22Mne.

The 28th January 1890.—The following communication, No. 331, dated the 21st January 1890, from the Government of Bombay, regarding the removal of quarantine at Aden and Perim on arrivals from the Arabian Coast between Lith and Lothaia, is published for general information.

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Govt. of Bengal.

No. 331, dated Bombay Castle, the 31st January 1890.

From—J. DEC. ATKINS, Esq., C.S., Acting Under-Secretary to the Govt. of Bombay, General Department.

To—The Secretary to the Government of Bengal.

IN continuation of my letter No. 2959, dated 26th July 1889, I am directed to state that, under instructions from the Government of India, the notification of the Government of Bombay, No. 2956 of the same date, which imposed quarantine at Aden and Perim on arrivals from the Arabian Coast between Lith and Lothaia, has been withdrawn.

AFRICA—NORTH-EAST SHORE.

GULF OF ADEN

Permanent Light-ship off Ras Marbut, Aden Harbour.

Information has been received from the Political Resident at Aden that on the 15th February the temporary Light-vessel moored off Ras Marbut, Aden, Harbour, will be replaced by the permanent Light-ship. The vessel is moored in 18 feet at low water, and shows at an elevation of 89 feet above the sea a flashing White Light visible every minute. The vessel is painted Red, but has no Red Ball at mast-head and exhibits no Red Flag during the day as stated at page 90, Chapter IV, 3rd Edition of the Gulf of Aden Pilot.

By direction of the Government of Bengal,

E. W. PETLEY,
Port Officer of Calcutta.

AUSTRALIA—EAST COAST.

ULLADULLA HARBOUR.

Fixed light on Warden head, and discontinuance of pier light.

THE British Admiralty has given notice (No. 456 of 1889) that on 1st December 1889 a light would be exhibited from a light-house recently erected on Warden head, south side of entrance to Ulladulla harbour.

The light is a *fixed* White light, visible in clear weather from a distance of about 12 miles.

Position: Approximate lat. 35° 22½′ S.; long. 150° 31½′ E.

Also, that on the same date, the light (fixed *green*) previously shown from the pier head, Ulladulla harbour, would be discontinued.

By direction of the Government of Bengal,
EATON W. PETLEY,
Port Officer of Calcutta.

CEYLON—EAST COAST.

A "Torpedo Buoy" placed at the entrance to Trincomalee Harbour.

THE Colonial Government of Ceylon has given notice that on and after 25th December 1889 until 28th February 1890, a Red Buoy, with a red flag and the words "Torpedo Buoy" painted on it, will be placed in the entrance to Trincomalee Harbour between Ostenburg Point and Little Sober Island, and 260 yards from the former.

The water in the triangle formed by this Red Buoy, the E. Point of Small Sober Island and Clappenburg Point, will be obstructed by mines.

All vessels should pass between the Buoy and Ostenburg Point.

By direction of the Government of Bengal,

EATON W. PETLEY,
Port Officer of Calcutta.

JAPAN.

YEZO—SOUTH-WEST COAST.

Non-existence of Waywoda rock.

THE British Admiralty has given notice (No. 422 of 1889) of the non-existence of Waywoda (Voevoda) rock in the sea of Japan.

This rock was originally reported by the Russian corvette *Voevoda*, when proceeding from Hakodate to Peter the Great bay. It was seen at a distance of 3 miles from the ship at 7h. P.M. on 28th June 1859, during thick weather, and estimated to be about 12 feet above water; the position assigned by dead reckoning, being lat. 42° 16′ N., long. 137° 18′ E.

The rock was searched for on two occasions by French vessels of war without success prior to 1886. In September 1886, eight of Her Majesty's ships passed near the assigned position of the rock, in such a manner that an area of 40 miles in latitude and 62 miles in longitude was examined, and no sign of the rock was observed.

In June 1888, an American whaling barque reported having seen two rocks from 8 to 12 feet high, about 500 yards apart, in lat. 42° 30′ N., long. 137° 5′ E., or about 15 miles north-westward of the *Voevoda's* reported position.

Consequent on this latter report a further special search has been made by five of Her Majesty's ships on the China station throughout 7th September 1889. During this search the position of the rocks reported by the American whaling barque, as well as that of the Waywoda rock, was passed over without seeing any signs of a rock above water, or obtaining any soundings indicative of shallow ground.

After a careful review of the above circumstances, it is considered that the objects seen by both the *Voevoda* and the American whaling barque were floating, and therefore the rock has been removed from the Admiralty Charts.

By direction of the Government of Bengal,

EATON W. PETLEY,
Port Officer of Calcutta.

JAPAN.

KIUSIU—NORTH-WEST COAST.

Sunken rocks in Iki Channel, and on south coast Iki sima.

THE British Admiralty has given notice (No. 434 of 1889) of the existence of the undermentioned sunken rocks lying in Iki channel, and on the south coast of Iki sima :—

1. A rock, with a depth of 1¾ fathoms, lies near the fairway in Iki channel, with Yebosi sima light-house bearing S. 75° E., and the eastern extreme of Na sima North.
   Position, lat. 33° 42′ 35″ N., long. 129° 52′ 20″ E.
2. A rock, with a depth of 2¼ fathoms, lies in Iki channel, with the north extreme of Na sima, in line with the Watch-house on Iki sima, bearing N. 87° W, and Akasi saki, the north-east extreme of Iki sima, N. 44° W.
   Position, lat. 33° 44″ 40′ N., long. 129° 54′ 10″ E.
3. A rock, with a depth of 1¾ fathoms, lies off the south coast of Iki sima, with Ko saki bearing S. 73° W., distant 4¼ cables
   Position, lat. 33° 42′ 25″ N., long. 129° 43′ 30″ E.
4. A rock (*Tsurizone rock*), with a depth of 1¾ fathoms, lies 4¼ cables southward of Hira sima, with Ko saki bearing N. 86° E., and western extreme of Naga sima N. 7° W.
   Position, lat. 33° 41′ 35″ N., long. 129° 37′ 50″ E.

5. A rock (*Sorazone rock*), with a depth of 8¼ fathoms, and 5 cables in extent in a north and south direction, lies nearly in the fairway of the southern entrance to Go no Ura, 6 cables distant from Tskuyo sima, and with the north-west extreme of that islet in line with the north extreme of Hira sima.

Position, lat. 33° 43′ 5″ N., long. 129° 39′ 40″ E.

6. A rock (*Ozone rock*), awash at low water spring tides, is an extension of the shoal shown on Admiralty Chart No. 127, on the eastern side of entrance to Go no Ura; it lies 3½ cables from the coast of Iki sima, with the south extreme of Haru sima bearing S. 86° W., and north-east extreme of Oö sima N. 45° W.

7. The rock (*Hirase rock*) in the northern part of Go no Ura, and shown on Admiralty Charts as "Covers," lies a little westward of the position given, with Takuye sima bearing S. 27° W., distant $1\frac{6}{10}$ miles.

CAUTION.—There are many rocks and shoals near the coasts in this locality as yet not charted. Careful navigation is therefore needed.

The depths given are at low water spring tides.

(*The bearings are Magnetic, Variation 4° Westerly in* 1889).

NOTICE TO MARINERS (No. 6).

ARABIAN SEA.

NINE DEGREES CHANNEL.

Unsuccessful search for reef reported north-east of Minikoi Island.

THE following Notice to Mariners (No. 443 of 1889), issued by the British Admiralty, is republished with reference to Nos. 80 and 85, dated, respectively, the 23rd August and 6th September last, issued by this office:—

In consequence of a reef having been stated to exist in the Nine Degrees channel, about 50 miles north-east of Minikoi island, in lat. 8° 48′ N., long 73° 40′ E., by the Master of the S.S. *Noord Braband*, August 1889, who reported it as being 8 miles in length in a south-east and north-west direction, an examination of the locality has been made by

Commander R. F. Hoskyn, R.N., in charge of the India Marine Survey, with the following result :—

The examination, carried out in the I.G.S.S. *Investigator*, and extending over three days, from 2nd to 4th November 1889, embraced the reported position of the reef between lat. 8° 35′ and 9° 5′ N., and long. 73° 15′ to 74° 0′ E. The least depth found on the suspected spot was 1,179 fathoms, gray ooze, and no indication was afforded by the soundings of the existence of shallow water. On one occasion, however, some patches of what appeared to be discoloured water were observed; but they were all examined and proved to be merely the reflection of clouds in smooth streaks of water.

Throughout the time the weather was uniformly fine, and favourable for observations, and the positions of the soundings were satisfactorily determined.

Considering the detailed nature of this examination by Commander Hoskyn, and the fact of the locality being near the track of shipping using the Nine Degrees channel, the existence of this extensive danger is considered disproved.

By direction of the Government of Bengal,

EATON W. PETLEY,
Port Officer of Calcutta.

COURT OF SMALL CAUSES OF CALCUTTA, *the 23rd January* 1890.

EDUCATION DEPARTMENT, BENGAL.

Subordinate Educational Service.

The 21st December 1889.—Babu Ram Das Mookerjea, Departmental Sub-Inspector of Schools, Nuddea (class VI), is declared to have been absent on leave for fifteen days, commencing from the 1st December 1889, under Article 294 of the Civil Service Regulations.

The 8th January 1890.—Babu Kali Kamal Chatterjea, Departmental Sub-Inspector of Schools, Furreedpore (class VI), is allowed leave of absence for three months, under Article 294 of the Civil Service Regulations, with effect from the 10th November 1889.

Babu Gobinda Chandra Dutt, Board Sub-Inspector of Schools, Furreedpore (class VII), is appointed to act as Departmental Sub-Inspector of Schools, Furreedpore, *vice* Babu Kali Kamal Chatterjea, on leave.

The 14th January 1890.—The late Babu Chandra Nath Bhattacharjea, Head Master of the Arrah Zillah School (class III), is declared to have been absent, on leave, from the 23rd to the 30th June 1889, both days inclusive, under Article 306 of the Civil Service Regulations.

Babu Baladeb Ram Jha, B A., Second Master of the Arrah Zillah School (class V), is declared to have acted as Head Master of the same institution, during the absence, on leave, of the late Babu Chandra Nath Bhattacharjea.

The 21st January 1890.—Babu Hari Mohan Sen, B.A., Second Master of the Burrisal Zillah School (class VII, and officiating in class VI), is allowed leave of absence for two months, under Article 306 (*b*) of the Civil Service Regulations, with effect from the 19th December 1889, or any subsequent date on which he availed himself of it.

Babu Syama Charan Gupta, B.A., Third Master of the Burrisal Zillah School, is appointed to act as Second Master of the same institution and in class VI, *vice* Babu Hari Mohan Sen, on leave.

Babu Rajani Kanta Ghosh, B.A., Third Master of the Dacca Collegiate School (class V), is allowed leave of absence for twenty-six days, under Article 306 (*b*) of the Civil Service Regulations, with effect from the 30th December 1889.

Babu Sadhu Charan Sil, Fourth Master of the Dacca Collegiate School (class VI), is appointed to act as Third Master of the same institution and to officiate in class V, *vice* Babu Rajani Kanta Ghosh, B.A., on leave.

Babu Dwarka Nath Bose, Seventh and Officiating Sixth Master of the Dacca Collegiate School, is appointed to act as Fifth Master of the same institution, *vice* Babu Sris Chandra Banerjea, and to act in class VI, *vice* Babu Sadhu Charan Sil.

The 27th January 1890.—Babu Suresh Chandra Deb, Eighth Assistant in the Office of the Director of Public Instruction (class VII), is appointed on probation to be Head Clerk in the Office of the Inspector of European Schools, with effect from the 1st February 1890.

Babu Sarveswar Mookerjea, Third Master of the Bogra Zillah School, is appointed to act as Second Master of the same institution and in class VII, *vice* Babu Harendra Narayan Chakravarti, B.A., promoted.

The 28th January 1890.—Babu Adhar Chandra Mookerjea, Sixth Assistant in the Office of the Director of Public Instruction (*substantive pro tempore* in class V), is allowed leave of absence for two months, under Article 291 of the Civil Service Regulations, with effect from the 1st February 1890, or any subsequent date on which he may avail himself of it.

A. CROFT, *Director of Public Instruction.*

NOTICE.

IN accordance with the Resolution of the Government of Bengal in the General Department, dated the 6th March 1886, published on page 541 of the *Calcutta Gazette* of the 31st of the same month, notice is hereby given that an examination for the admission of female students to the certificate class of the Calcutta Medical College will be held in the Theatre of that College on Tuesday, the 11th February 1890, and following days.

Hours and Subjects of Examination.

Tuesday.—English dictation, Grammar and Composition—from 1 to 4 P.M.

Wednesday.—History of England and India. Geography: General, and of India in particular—from 1 to 4 P.M.

Thursday.—Arithmetic: the first four rules, vulgar and decimal fractions, and proportion—from 1 to 4 P.M.

Candidates should apply in writing to the Principal of the Medical College, Calcutta, not later than Saturday, the 8th February, for permission to appear at the examination.

Applications for permission to reside in the Sarnamayi Hostel should be addressed to the Honorary Secretary to the Bengal Branch of the Countess of Dufferin's Fund, 36, Chowringhee, Calcutta.

A. CROFT,
Director of Public Instruction.

The 6th January 1890.

CIVIL MEDICAL DEPARTMENT, BENGAL.

No. 691.—*The 23rd January* 1890.—Assistant Surgeon Durlabh Chandra Datta, a supernumerary at the Presidency, is allowed leave for two months, under article 369 of the Civil Service Regulations.

No. 728.—*The 24th January* 1890.—Assistant Surgeon Girish Chunder Bhar, in medical charge of the Demagri outpost, in the Chittagong Hill Tracts, is allowed leave for nine months, under article 369 of the Civil Service Regulations.

J. M. COATES, M.D.,
For Inspector-General of Civil Hospitals, Bengal.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1594B.

NOTICE is hereby given that the Second Sale of Opium, the provision of 1887-88, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 3rd February 1890, at 11 A.M., and will comprise 4,750 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory	2,250
Ditto at the Ghazeepore Factory	2,500
Total ...	4,750

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 26th November 1889, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 8th and 18th February 1890, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 P.M. of Saturday, the 8th February 1890, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 18th February 1890.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazeepore Factories will be brought to sale during the year 1890 about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so:—

DATES.			Manufactured at the Patna Factory, about chests.	Manufactured at the Ghazeepore Factory, about chests.	Total, about chests.
On or about Monday, 3rd March	1890	...	2,250	2,500	4,750
On or about Wednesday, 2nd April	,,	...	2,250	2,500	4,750
On or about Thursday, 1st May	,,	...	2,250	2,500	4,750
On or about Monday, 2nd June	,,	...	2,250	2,500	4,750
On or about Wednesday, 2nd July	,,	...	2,250	2,500	4,750
On or about Monday, 4th August	,,	...	2,250	2,500	4,750
On or about Monday, 1st September	,,	...	2,250	2,500	4,750
On or about Wednesday, 1st October	,,	...	2,250	2,500	4,750
On or about Monday, 3rd November	,,	...	2,250	2,500	4,750
On or about Monday, 1st December	,,	...	2,250	2,500	4,750

By order of the Board of Revenue, L. P.,

K. G. GUPTA, *Offg. Secretary.*

BOARD OF REVENUE, L.P., CALCUTTA, *the 30th December* 1889.

No. 113B.

NOTICE is hereby given that the Third Sale of Opium, the Provision of 1887-88, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Monday the 3rd March 1890, at 11 A.M., and will comprise 4,750 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory	2,250
Ditto at the Ghazeepore Factory	2,500
Total ...	4,750

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 26th November 1889, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 8th and 18th March 1890, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 P.M. of Saturday, the 8th March 1890, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 18th March 1890.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazeepore Factories will be brought to sale in the present year about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so :—

NOTIFICATION.

LAND REVENUE.

(Bengal Tenancy Act)

THE HON'BLE F. M. HALLIDAY.

Dated Calcutta, the 24th January 1890.

THE price-lists of staple food-crops in the local areas of Bengal, prepared under section 39 (1) of the Bengal Tenancy Act, VIII of 1885, for the period from the 1st July to the 30th September 1889, having been approved by the Board of Revenue, are published for general information under sub-section 4 of that section.

By order of the Board of Revenue, L.P.,

C. W. BOLTON,

Offg. Secretary.

Price-list (retail) of staple food-crops in the local areas of Bengal, prepared under section 39 of the Bengal Tenancy Act (No. VIII) of 1885, for three months, from July to September 1889.

PUBLIC WORKS DEPARTMENT,—BENGAL.

DISTRICT ROAD FUND.

NOTIFICATION No. 18.

Dated the 21st January 1890.

THE subjoined annual accounts and reports of the Road Cess Committees of the districts of Hazaribagh, Lohardugga, Manbhoom and Singbhoom for the year 1888-89, together with the remarks thereon of the Commissioner of Chota Nagpore, are published for general information.

W. B. BESTIC,

Under-Secy. to the Govt. of Bengal.

No. 58D.R., dated Hazaribagh, the 7th June 1889.

From—LIEUT.-COL. C. H. GARBETT, Chairman, District Road Cess Committee, Hazaribagh,

To—The Commissioner of Chota Nagpore.

I HAVE the honour to submit herewith a detailed account of receipts and expenditure of the District Road Fund for the year ending 31st March 1889, together with the following report on the administration of the fund for the same period.

2. During the year under report the District Committee, consisting of 24 members, held five meetings for the transaction of business, a summary of which is given below. A quorum was obtained at all the meetings.

* * * * * * * *

(1) Preparation of the schedule of all public works under sections 141 and 143 of Act IX (B.C.) of 1880 which are subject to the control of this committee for submission to Government.

(2) Distribution of village road allotments for the year 1888-89.

(3) Passing the estimate of gravelling the Ramgurh and Gola Road.

(4) Preparation of the budget estimates of receipts and expenditure for the year 1889-90.

(5) Passing the annual accounts and reports for the year 1887-88.

3. The accounts were, as usual, audited monthly by a sub-committee appointed under section 174 of the Road Cess Act.

4. *Branch Committee.*—There is only one branch committee at Giridih, which held five meetings during the year, and in which the average attendance of members was 4·2.

5. The year commenced with an arrear balance of Rs. 10,665. This, together with Rs. 46,476, the demand for the year, less the sum of Rs. 514 paid in advance in previous year, gave a total of Rs 56,627 for collection within the year under report. The collections of the year, amounted to Rs. 47,025, leaving a balance of Rs. 9,602 uncollected at its close. In addition to the above a sum of Rs. 1,437 was collected as advance collection on account of future years. The percentage of collection on current demand was 79·1. The cause of this percentage being below the standard rate was the same as reported last year, viz., the default of the Ramgurh estate to pay its last instalment of cesses, amounting to Rs. 17,614-10-5, on the 28th March 1889. This amount has since been realized.

6. *Original works.*—The only original works taken up in hand during the year under review were the construction of a third class inspection bungalow at Gola, and the gravelling of the eight miles of the road between Ramgurh and Gola. The sum of Rs. 400 shown as expended on the Burhee and Gawan road was on account of payment of arrears due to contractors for works done last year.

7. The funds at the disposal of the committee being insufficient even to keep up all the existing district roads, not to mention village roads, very little could be done by way of original works.

8. *Repairs.*—Five metalled roads, aggregating about 58 miles, have been maintained and are generally in good condition. Seventeen fair weather roads, about 302 miles, have been fairly maintained throughout the year and are fit for cart traffic. The steep gradients are gradually being improved, and the approaches down to beds of unbridged rivers and nullahs eased for wheeled traffic.

9 *Village roads.*—Thirty village roads, aggregating about 134 miles, have been repaired and made feasible for cart traffic. For want of funds no new village communications were taken up.

10. *Arboriculture.*—With the exception of filling up vacancies and maintaining existing plants, no new trees were planted during the year. The number of trees already planted (viz., 14,150) is comparatively large considering the means of this committee.

11. *Nursery garden.*—There is only one nursery in the compound of the Road Cess office, containing the following plants:—Mango, jamun, jack, neem, carounge and date, They are well looked after and are doing well.

12. *Staging bungalows and serais.*—There is only one staging bungalow at Ramgurh it yielded Rs. 291 during the year, and its maintenance cost Rs. 564-8-2, including arrear payments of last year.

There is a cart serai at Bagodar on the Grand Trunk Road. It yielded Rs. 91-10-8, and cost Rs. 268-9-9 for its maintenance. As the committee gain nothing by keeping up this serai, but pay more than what it yields, it is desirable that it be closed to prevent further loss in its maintenance. The same may be said of the Ramgurh staging bungalow.

13. The scarcity of labour in the district increases every year, and is mostly felt in the Chatra subdivision, where it has become almost impossible to procure coolies to do road work. Save in the Chatra sub-division, most of the earthwork on the roads was done during the rainy season. In the Chatra subdivision very little of the earthwork was done during the wet season, principally by reason of the dearth and difficulty of procuring labour, and partly owing to the laches of contractors.

14. A sum of Rs. 7,465-11-8 was placed at the disposal of the branch committee at Giridh. Of this sum Rs. 5,997-6-3 were spent in repairing the village roads and Rs. 199-8 in paying the cost of establishment under it, leaving a balance of Rs. 1,268-13-5 unexpended at the end of the year.

* * * * * * * *

H. C. MITTER,
Vice-Chairman.

No. 94DR., dated Ranchi, the 31st May / 13th June 1889.

From—E. G. LILLINGSTON, Esq., Chairman, District Road Cess Committee, Lohardugga,

To—The Commissioner of the Chota Nagpore Division.

I HAVE the honour to submit herewith the annual accounts and report on the working of the Road Cess Act, IX (B. C.) of 1880, for the year ending 31st March 1889.

* * * * * * * *

8. * * * * * The attendance of the official members of the District Committee during the year under report was only satisfactory, for out of four officials three attended six meetings, and one attended two meetings, but out of eight non-official members two attended four meetings, and the other six one or two meetings only. Regarding Palamow Branch Road Cess Committee * * * the attendance of the non-official members was unsatisfactory.

4. A summary of the business transacted at the meetings of the District Road Cess Committee is given below:—

(*a*) Passing the budget estimates.
(*b*) Fixing the rate of road cess to be levied during the year.
(*c*) Passing the annual accounts for 1887-88.
(*d*) Passing estimates submitted by the District Engineer for the repairs of different roads during 1887-88.
(*e*) Appointing contractors for the construction and repairs of different roads for 1888-89.
(*f*) Disposing of other miscellaneous business.

5. Mr. C. F. Manson, Deputy Magistrate, held the office of Vice-Chairman from April 1888 to December 1888, and Officiating Joint-Magistrate, G. W. Place, Esq., C.S., from January to February 1888, on account of there being no senior assistant from March 1889. The office of the Vice-Chairman was under my direct supervision. The cheques were signed by the Executive Engineer in place of the Vice-Chairman as *ex-officio* member of the Committee.

6. The demand on account of cess on lands and mines during the year, including arrears of last year, amounted to Rs. 53,467. Of this Rs. 609 was collected as advance during the previous year, and Rs. 51,738 has been collected within the year under report, thus leaving a balance outstanding on the 31st March 1889 of Rs. 1,120. In addition to the above a sum of Rs. 564 was collected in advance on account of the ensuing year 1889-90.

7. The cess was levied at the maximum rate. There was no difficulty in collecting it at head-quarters in the Palamow subdivision; also the payments appear now to be more punctually made than before.

8. The accounts of the year were duly examined and audited by a sub-committee consisting of the Vice-Chairman and two other English-knowing members.

9. *Original works.*—Three bridges of rubble stone and brick masonry abutments, piers, and wing walls and masonry arched roadway were constructed on Ranchi and Lohardugga road—one over the Kurruk stream, having two spans of 25 feet each; another over the Bara river with three spans of 20 feet each; and the third over the Baratpore stream of two spans, measuring 20 feet each. A diversion on the existing road for the purpose of selecting better sites for these bridges was also under construction, which is expected to be completed by the next rains. Another bridge was intended to be constructed close to Lohardugga, in order to replace a timber-topped bridge, which is much damaged, and provision for this

was made in the budget, but it could not be taken in hand, as it was all but settled that an embankment would be constructed stopping the stream over which the bridge was to be built, with the amount sanctioned for the bridge, in order to improve the water-supply of the locality.

10. A bridge 20 feet span, with rubble stone and brick masonry abutments and wing walls and sal-timber roadway, was constructed over a nulla close to the village of Jhoree on Majwan and Jupla road in the Palamow subdivision.

11. *Survey.*—Survey was taken of Lohardugga-Chattra road, Kuru to Orenga stream road, and Daltongunge and Maharajgunge roads, and plan prepared of them. Some drawing of plans and sections for the preparation of a project for Ranchi and Chandil road were made.

12. *Arboriculture.*—Nine hundred new seedlings of mango, jack and kurrung were planted along the last five miles of Ranchi and Lohardugga road, and protected by bamboo gabions. Plants along 75 miles of the roads were maintained in good condition. Several new gabions were supplied. Some of the plants died and were replaced by fresh seedlings.

13. *Repairs.—Ranchi-Lohardugga Road.*—This very important road, which has considerable cart traffic, was maintained in fair order throughout the year. About eight miles of the road between Ranchi and Brambey in the 12th mile were gravelled during the year. This gravelling has been finished in the road up to Mandur thana on the 17th mile, with the exception of a little over two miles in all at places on high ground. A timber bridge in the 16th mile was thoroughly rebuilt. A parapet with a portion of arch in a culvert in the 20th mile, which was seriously damaged, was thoroughly repaired, and flooring renewed in case of two bridges on the 20th and 21st miles. Wheel guards were put up to protect the parapet walls in almost all the bridges and culverts.

14 *Lohardugga and Chattra Road.*—A temporary bridge, 25 feet span, with dry rubble, abutments and wing walls and timber roadway was constructed. Sal-wood roadways in three bridges were thoroughly repaired. The road was maintained in good order by surface repairs.

15. *Kuru to Orenga Stream Road.*—A temporary bridge of rubble masonry abutment and wing walls and sâl timber roadway with a span, measuring 20 feet, was thoroughly reconstructed, and another 45 feet long was under construction. Road was kept in a fair order.

16. *Orenga to Daltongunge Road.*—The road was much improved upon as regards the gradients at the Charwadih ghât by cutting and filling. Side-drains were renewed along some six miles of road taken altogether. Two bridges of rubble and brick masonry abutments and timber roadway, and another of masonry arched road way, were thoroughly reconstructed. The road was maintained in good order throughout its length.

17. *Daltongunge-Maharajgunge Road.*—About five miles of mere track were converted into road this year. The road which is one of the most important roads in the Palamow sub-division, and has much traffic from Gya district, has now been made practicable for carts throughout its length, specially during the fair weather. Several temporary bridges were renewed. Road was kept passable throughout the year by surface repairs.

18. *Daltongunge and Gurwa Road.*—Road was kept in good order. Some temporary bridges were constructed, and others thoroughly repaired.

19. *Ranchi-Bundgaon Road.*—Some repairs consisting in cutting the road to improve its gradients and those to bridges were effected, as well as some earthwork in petty repairs were done. The maintenance of the road was taken over at the end of the last rainy season by the Public Works Department.

20. *Ranchi-Palkote Road.*—That section of it which extends from Bussia to Palkote, about 12 miles in length, was converted into a properly raised road, with seven temporary culverts, in place of the mere tracks unfit for wheeled traffic. The entire length of the road was maintained in passable condition for purposes of cart traffic.

21. *Khunti-Kamdera Road.*—Earthwork consisting in embankments through the rice lands, at three places were finished during the year. Some temporary bridges were constructed. The road was opened for cart traffic throughout its length, and was maintained in good order.

22 *Ranchi-Chandil Road.*—Reconstruction of the road from Bundu to Penaidih, which was commenced, and in a portion of which work had been done the year before last, was completed Several culverts of temporary nature were constructed. The rubble masonry and jungle wood temporary bridge over Nailgurrah nullah was under reconstruction. The road was maintained in good order.

23. *Ranchi and Palma Road.*—Sal wood platforms of all the three bridges repaired this year were reconstructed. The road was maintained in good order.

24. *Anundi to Gola Road.*—Road was maintained in fair order by patch repairs.

24½. *Ranchi-Pithoria Road.*—The road was kept in passable condition by petty repairs. Some temporary bridges were rebuilt.

25. *Daltongunge-Behar Road; Gurwa to Untari Road; Lesligunge-Pankey Road.*—No contractor was available for repairing these roads. The entire allotments could not be spent. Some jungle-cuttings and petty repairs were executed departmentally.

26. *Gurwa and Majwan Road.*—A little over one-third of the allotment, which was sufficient for reconstruction of the entire length of the road, could only be spent, as the contractors to whom the works were let out on regular contract neglected their works much. In about half the length side drains were renewed and embankments reconstructed.

27. *Majwan and Jupla Road.*—The allotment was almost sufficient for the reconstruction of the whole length of the road, which was a mere track, quite unfit for cart traffic. The work was let out to the same contractors as in case of Gurwa-Majwan road, who failed to complete the work. Only about four miles were renewed.

28. *Lohardugga-Sumbulpore Road.*—About 12 miles of the road were reconstructed during the year. The road was kept in passable condition.

29. *Ranchi-Jhalda Road.*—It was kept passable by patch repairs. Several temporary bridges were constructed.

30. *Daltongunge station roads.*—They were kept in good order by petty repairs, and renewal of gravelling here and there.

31. *Palma to Lohardugga Road vid Bhandra.*—Two temporary bridges of sâl bullah platform abutments, a span measuring 18 feet, and another having a 20 feet span, were built; a third bridge, partly sâl timber and partly sâl bullah platform, having rubble masonry abutments, with three spans, 55 feet long altogether, was also constructed during the year. The road was kept in fair order throughout the year.

32. *Petty roads in the head-quarters subdivision.*—All the roads were maintained in good order during the year under report.

33. *Village roads.*—In the head-quarters subdivision some 69 miles of new road have been constructed, and 100 miles properly maintained, and many temporary bridges constructed. In the Palamow subdivision reconstruction was effected in Daltongunge-Patan road and Kechki road. Some six roads were repaired.

34. *Staging bungalows.*—All the bungalows were maintained in fair order by petty repairs.

35. Generally it may be said that more attention has been paid this year to securing good and lasting works rather than quantity. Drainage is being especially looked after, and care taken that the bad portions of roads are completed before work is done on the better parts. A system has been introduced to finish off such portions of roads as are to be put in order first, and until these are completed the contractors and subordinates employed under the District Engineer are not given credit for any other works executed.

36. *Accounts.*—The monthly accounts of the road fund and of the District Engineer's office were examined by the Vice-Chairman and two other English-knowing members of the committee, who were appointed for the purpose.

37. The local auditor inspected this and the District Engineer's office on the 13th December 1888, and the result was very satisfactory.

* * * * *

42. The roads, bridges and culverts mentioned in the budget estimate for 1889-90 (sanctioned by Government) are the works proposed to be taken in hand during the ensuing year 1889-90.

43. The works have all been executed by contracts during the year under report, and the small sums advanced to the contractors have been adjusted.

E. G. LILLINGSTON,
Chairman, District Road Cess Committee, Lohardugga.

Annual Report of the District Road Committee of Manbhoom for the cess year 1888-89.

1. *Working of Cess Act IX (B.C.) of 1880*—Statement A shows the demands, collections and balances of cesses for 1888-89 as compared with the year previous.

The outstanding balance for 1887-88 was Rs. 43,897, and the demand for the year under report was Rs. 87,762, against Rs. 51,567 and Rs. 89,820, respectively, for the previous years, thus—

			Rs.
Arrears of cesses on lands for 1886-87	...	...	47,397
Ditto on mines and quarries	...	...	2,539
Ditto on jungles ...	...	...	1,631
	Total	...	51,567
Demands of cess on lands for 1887-88	...	...	80,044
Ditto on mines and quarries	...	...	7,180
Ditto on jungles ...	...	...	2,596
	Total	...	89,820

There was a decrease of Rs. 2,058 in the demand owing to reduced assessments on some coal mines, quarries, and jungles. The balance left unrealized at the end of the year was further reduced to Rs. 27,463. The collection of the year was Rs. 1,04,073, against Rs. 97,431 the year previous, showing an *increase* of Rs. 6,642.

Out of the balance, Rs. 27,586, shown in column 10 of the statement, Rs. 123 have been remitted by orders of the Deputy Commissioner and Commissioner of Chota Nagpore. The net balance to be realized is Rs. 27,463, of which Rs 18,065 represents the arrears of the kist falling due on the 28th March 1889, the payment of which could not be enforced till after the lapse of 15 days; deducting the amount of March kist, the balance is reduced to Rs. 9,398, of which Rs. 6,802 are due from the Pachet Raja alone for the last January kist. Certificates have been filed for realization of the January kist in all cases, and applications have been made for sale of the immoveable property of zemindars and lakhirajdars.

The following mines and quarries were assessed during the year as compared with the previous year—

	Coal mines.	Stone quarries.	Ghooting quarries.	Amount of assessment.
1887-88	12	15	7	7,179
1888-89	19	15	6	5,328

The cesses were not paid regularly in all cases. The people of this district generally wait till after the certificate procedure is put in force. The practice of giving intimation to the owners of mines, quarries, and jungles by means of printed post-cards has been found to be useful, as it obviated the necessity of issuing certificates in many cases. The operation of the Cess Act has led to the improvement of roads and communications.

2. *Working of the Committee.*—The Committee met 12 times during the year under report, and there was no meeting without a quorum.

* * * * *

The following is a summary of work done by the Committee during the year :—

(1) Passing monthly Road Fund accounts every month, audited by a standing Sub-Committee.

(2) Considering the plans and estimates for widening and re-aligning portions of the Purulia-Bankura and Purulia-Manbazar roads within the town of Purulia to a width of 24 feet.

(3) Discussion over the Commissioner's letter regarding the appointment of a Superintendent of Works, as well as over the Chairman's draft resolution on the same subject.

(4) Passing Annual Accounts and Reports of the Cess year 1887-88.

(5) Nominating three additional members for the Sudder Committee.

(6) Passing of the budget estimates of receipts and expenditure for the cess year 1889-90, and proposal for an application to be made for sanction to levy cess on the Bengal-Nagpore Railway when opened for traffic.

(7) Discussion over the Government enquiry as to whether the Committee are prepared to take over the Purulia-Burrakur Road and Committee's resolution to undertake the same, provided Government takes over as a provincial work the construction and maintenance of the Bolorampore-Burrabazar-Koilapal Roads.

3. *Branch Committees.*—A Branch Committee was established at Govindpore during the year under report, and Baboo Akhoy Kumar Ghose was appointed sub-overseer.

4. *Working establishment.*—There have been no changes during the year.

* * * * * * * *

5. *Works done during the year.*—Abstract of all works done during the year and the respective cost is shown in Appendix B.

(*a*). *Sudder Sub-division.*—The provision under head *original works* consisted of (1) construction of the Bolorampore-Burrabazar road; (2) metalling some of the Purulia station roads with quartz stone metal; and (3) improving and widening portions of the Manbazar and Bankura roads within the town of Purulia. These works have been finished very satisfactorily, excepting the construction of the Bolorampore and Burrabazar road, which is in progress.

Repair works—In the Sudder sub-division consisted of the following :—The roads from Purulia towards Chybassa and Bankura have been repaired and improved with quartz stone metal and screened gravel. The Roghoonathpore and Ranigunge road, Roghoonathpore-Bankura road, Charrah Branch road, first and second sections of the Jhapra and Govindpore road have been maintained in fair order generally by earthwork, turfing and gravelling. A good deal of earthwork has been done in the Hura-Manbazar section of the Roghoonathpore-Manbazar road, and five temporary culverts constructed in it. The road is now fit for cart traffic all along. The Roghoonathpore-Hazaribagh road has been extended as far as Chandra. The Ledhoorka and Gourandi road (an old famine road) was taken up for repairs last year only. A good deal of earthw rk has been done in this road, and it is quite fit for cart traffic as far as Kassipore, and somewhat passable for carts all the way to Gourandi. The Damdah-Burrabazar and Burrabazar-Koilapal roads have been maintained in very fair order, and the latter extended to some extent. The construction of the Chota Talpat bundh, the embankment of which now forms part of Burrabazar and Koilapal road, is

no doubt a great improvement to this road. This road is now quite fit for carts as far as village Chirudi, only four miles from Koilapal. All other roads have been kept in repairs.

(*b*) *Village roads.*—The work on the Manbazar and Burrabazar village road was done as far as Sindree. This portion of the road is fit for cart traffic. A new village road from Jeypore to Begoonkodar was started this year, and works done on it as far as funds permitted. All other village roads were taken in hand and kept in repairs.

(*c*) *Cart serais.*—Two new cart serais—one at Chandil, the other at Bolorampore—were constructed this year. The roofs of these two serais are tiled. The Hurra and Jainagar cart serais were thoroughly improved by roofing the sheds with tiles. General repairs were done to all other serais and their compounds.

6 *Govindpore Sub-division.*—There was no original work. The works were wholly restricted to repairs to existing roads. The Govindpore and Toondi road was repaired as usual and extended towards the boundary of the district. All other roads in the sub-division were maintained properly and improved by gravelling the muddy places. *The village roads* in the Govindpore sub-division were maintained and repaired properly. The Govindpore and Jherriya village road has been taken up for repairs during the year under report in order to make it a district road. Half of the cost of this road has been borne by the Jherriya estate.

The cart serais—In this sub-division were maintained properly.

H. W. HILL, M.B, *Surgeon-Major,*
Vice-Chairman, District Road Committee, Manbhoom.

STATEMENT A.

H. W. HILL, M.B.,
Vice-Chairman.

NUNDO GOPAL BANERJEE,
District Engineer, Manbhoom.

The 15th June 1889.

Supplement to the Annual Report of the Manbhoom District Road Committee for the year 1888-89.

Arboriculture.—Some young trees were planted along the station roads of Purulia and Govindpore during the year under report, and old ones along the Purulia station roads were maintained by watering, repairing gabions, &c. Nothing could be done towards planting trees extensively along the district roads for want of funds.

E. N. BAKER,
Chairman, District Road Committee.

H. W. HILL,
Vice-Chairman.

Audit Certificate.

We hereby certify that the books and accounts specified below,* prescribed for the Road Cess Office and for the office of the District Engineer, are duly kept up, and that they have been posted for the year 1888-89, and they have been duly scrutinized by the sub-committee.

Also that the treasury officer's abstract of the account of the committee for the year has been duly received and checked with the cash and pass-books, and found to agree therewith, except in respect of the amount of imprest in the hands of the accountant, which has been duly noted in the cash-book.

That the vouchers for the payments of the year have been cancelled, that none but duly sanctioned expenditure has been incurred, and that in the case of original works the register of monthly expenditure shows clearly the amount of sanctioned estimate, the grant for the year, and generally that the work of the office has been performed with a due observance of the rules prescribed by Government.

* Road Cess office :—(1) Cash book ; (2) Cash abstract book ; (3) Register of monthly receipts and expenditure ; (4) Account of deposits ; (5) Account of advances.
District Engineer's office :—I—Accounts, viz (1) Files of contract certificates ; (2) Files of bills for purchases or purchase lists ; (3) Files of day-book ; (4) Files of establishment bills ; (5) Files of acquittance rolls ; II Books, viz : (2) Register of bills passed ; (3) Register of works and repairs ; (4) Register of tools and plant ; (5) Account of advances ; (7) Account of deposits.

Explanatory Note.

1. The excess expenditure of Rs. 55-7-8 under head *Percentage cost of establishment* is on account of the payment made during the year for the previous year.

2 The excess expenditure under head *Stationery and Printing* is on account of the extra demand of printed forms for the Committee's and that of the District Engineer's offices.

3. The excess expenditure in some of the items of *repair works*, and under head *Petty construction and repairs* is apparent, but not actual, as the budget provision shown is for the year under report, whereas the expenditure includes payments for works provided for in the previous year.

H. W. HILL,
Vice-Chairman.

Annual Report on Road Cess Operations for the cess year 1888-89.

Midnapore road—Is a second class road. This is the only communication between Midnapore and Chybassa. It extends from Chybassa to district boundary in Bend, or more properly Kopun nullah, and is 71 miles in length. The surface of the road received petty repairs. Portions of road in the 20th, 21st, and 32nd to 37th miles have been gravelled. It has been found that the portions gravelled remain in a very good condition throughout the year, especially during the rains, when, owing to the peculiar plastic nature of the soil, the roads become very miry. The culverts and bridges have also been maintained. New mileposts have been fixed.

Original work.—One inspection bungalow has been erected at Ghatsilla on the 50th mile.

Nursinggurh to Bhairagora road—Branches off from the Midnapore road on the 56th mile. It is a fifth class road, and is 21 miles in length. Petty repairs were done to the surface of the road, and the wooden culverts and bridges have been maintained.

Chybassa to Subornorekha river (*Burrakur road*)—Leads to Purulia. This is a third class road, 30 miles in length. Till the opening of the Bengal-Nagpore Railway, it will continue to be the most important road in this district. Surface dressing has been done throughout the road. Earthwork was also executed to improve the most rugged portions. Gravelling has been done in portions of the 9th to 16th miles, where the road becomes muddy during the rains. Side drains have also been cut to carry the drainage from the hills. The old metalled parts that got out of orders have also been repaired. This road crosses two big hill-streams—Rorho in the 5th and Sanjoy in the 20th miles. Besides the above, there are three more unbridged nullahs, and there should be bridges, as during heavy floods all sorts of traffic get stopped. Waterways of a number of culverts are insufficient, and there had been scours on the down stream sides. Stone pitching has been done in these places to prevent the foundation of the culverts being undermined. The bridges and culverts, almost all of which are of masonry, were in a good condition, and no repairs were necessary. New mileposts have also been fixed on the road

Original works.—Subornorekha Ghât improvement.—(*a*) Nearly the whole of the earthwork on the south side of the hill is finished. The rock-cutting on the top of the hill remains to be done, and when completed the new road will be fit for use. The work is in progress.

(*b*). *Thulko shelter-house.*—A bungalow at Thulko on the 8th mile has nearly been furnished.

Chybassa to Khursowan road—Is a fourth class road, 16 miles in length. The surface of the road and the culverts therein have received petty repairs. Portions of road in the 2nd and 3rd and 9th miles have been gravelled.

Chybassa to Fooljuri (*Bandgaon road*)—Is a second class road according to the road list lately received from Government, and is in length 44 miles. This road leads to Ranchi, the head quarters of the division. The surface of the road received petty repairs throughout. A portion of the road in the 8th mile was under flood during the last rain, and the same has been raised. Two new platform culverts have also been made at that place for passage of drainage. Portions of road in the 7th to 14th miles have been gravelled. The culverts were in good condition, and no repairs were necessary. New mileposts have been fixed.

This road crosses Sanjoy nullah on the 13th mile, and during the rains a ferry is kept at the crossing for passage of traffic.

The portion between Bandgaon and the district boundary, a length of two miles, is being improved by the Public Works Department, and the improvement of the portion up to Chuckradhurpore will be taken up shortly.

Bridge over Rorho nullah.—The platform bridge over Rorho nullah was in a dilapidated condition, and to prevent any accident it has been dismantled. Fifteen rolled iron joists have also been brought from Calcutta for using instead of wooden beams. The repairs are being pushed on vigorously. Finding the sum available from the current year's budget inadequate to complete the work, an application for an additional grant of Rs. 1,500 has been made by me in my letter No. $\frac{\text{R.C.}}{23}$, dated the 12th May 1889, to the address of the Commissioner of the Division, and I hope Government will grant this amount, considering the importance of the work.

Original work.—An inspection bungalow has been constructed at Chuckradhurpore.

Chuckradhurpore to Koksinga road—Is a fourth class road, and is in length 51 miles. The portion of the road up to Dalaikola, a length of 18 miles, has been maintained during the year under review. The surface of the road and a few of the timber culverts received only petty repairs. The whole of the timber culverts could not be repaired owing to the dearness of local labour caused by the great demand on the railway.

Chybassa to Joyntigurh road—Is a second class road, and is in length 35 miles. Surface dressing was done throughout. Necessary repairs were also done to the wooden culverts. Portions of the road in 2nd to 6th miles were improved by gravelling. Some rugged portions of the road were also improved by spreading earth. Some urgent petty repairs were done to the following village roads:—

(1) Chybassa to Katbary. | (2) Gamaria to Jamda.

(3) Gamaria to Mujgaon.

Road Cess and Municipal Office building.—The office building, half the cost of which is to be borne by the Municipality here, has nearly been finished. The account will be closed with the Municipality, when the final payment will be made to the contractor for the works done by him.

Arboriculture.—Some new plants have been planted in the Burrakur, Bandgaon, Midnapore, and Joyntigurh roads. Fencings for trees planted in previous years have been repaired. Some dead plants have been replaced by new ones.

The general feature of the maintenance works that are being done at present is the introduction of gravelling portions of the roads every year instead of putting earth (surface dressing). This system improves generally the muddy nature of the soil, and have been tried in the worst portions with success. During my last cold weather tour, I inspected some of the roads, and came to the conclusion that money spent on gravelling is money well spent, and that on roads where there is constant traffic an additional portion should be gravelled every year until the whole road is gravelled. On the ungravelled portions of those roads, and on other roads which are not important enough to be gravelled, surface dressing should be done after the close of the rains by gangs of coolies under a road sircar, and not by giving out the work at so much per mile to contractors, as in the latter case no check can be exercised over the work. Only earthwork repairs, which are more than what would be called surface dressing, should be given out on contract. There was no District Engineer for the last five months of the year, and the works suffered much in consequence.

Considering the mileage extent of the roads in this district, the income available for expenditure annually is quite inadequate to meet the necessary wants. Nearly the whole of the income is taken up for maintenance, and in consequence very little can be done towards repairing or replacing broken culverts or constructing new ones, and on the principal roads there are many works required of this kind, but which for want of funds cannot be undertaken.

November 1888 and March 1889.	Road cess and municipal combined office building.	1,200	The work is nearly completed, and the amount will be adjusted shortly.
	Total ...	2,238	

Memorandum showing in detail the balances of deposits outstanding on the 31*st March* 1889.

Date.	Nature of deposit.	Amount.	REMARKS.
		Rs.	
3 th March 1889	Chairman, Chyebassa Municipality, on account of payment in part for the combined road cess and municipal office building.	1,000	The amount is to be transferred to the District Road Fund, as soon as the final payment for the work is made.
	Total ...	1,000	

S. J. MANOOK,
Vice-Chairman.

W. L. SAMUELLS,
Chairman, District Road Cess Committee, Singbhoom

No. 125D.R., dated Chota Nagpore, the 12th August 1889.

From—W. H. GRIMLEY, ESQ., C.S., Offg. Commr. of the Chota Nagpore Divn.,
To—The Secretary to the Government of Bengal, Public Works Department.

I HAVE the honour to submit, in original, the annual accounts and reports of the several District Road Committees of this division for the year ending 31st March 1889.

* * * * * * *

3. The aggregate receipts amounted to Rs. 2,81,910-3-1, inclusive of Rs. 93,633-13-9, the closing balance of the previous year, and of Rs. 20,684-3-5, the receipts under the heads of "Advances" and "Deposits." The total expenditure, including advances and re-payments, amounted to Rs. 1,97,151-5. There was thus a balance of Rs. 84,758-14-1 when the year ended.

4. *Original works.*—In Hazaribagh, original works were limited to the construction of an inspection bungalow at Golah and the gravelling of eight miles of the Ramgurh-Golah road. In Lohardugga, three rubble stone and brick masonry bridges of two or three spans each were constructed on the Ranchi-Lohardugga road. In the Palamow sub-division a small bridge of rubble stone and brick masonry abutments and wing walls with sâl timber roadway was constructed. The survey, including the preparation of the plans and sections of the Lohardugga-Chuttra, Ranchi-Chandil, Kuru-Orenga and Daltongunge-Moharajgunge roads was completed. In Manbhoom, the original works consisted of (1) the construction of the Balarampore-Burrabazar road, (2) the metalling of some of the Purulia station roads with quartz, and (3) improving and widening portions of the Manbazar and Bankoora roads within the town of Purulia. In Singbhoom, some masonry culverts were built on the Midnapore road; the work of improving the Subornorekha ghât on the Purulia road was continued and some inspection bungalows were constructed.

5. *Repairs* —In Hazaribagh, 58 miles of five metalled roads, 302 miles of 17 fair-weather roads, and 134 miles of village roads have been maintained and kept in fair order. Approaches to beds of rivers and nullahs crossed by all village roads have been sloped and rendered passable for wheeled traffic. In Lohardugga most of the district roads have been thoroughly maintained by the renewal of wooden platform bridges, the renewal of culverts and the re-excavation of side drains. In some cases the rubble stone and brick masonry abutments of bridges with timber-topped roadways have been thoroughly renewed. Surface repairs have been made wherever necessary. Most of the roads in the Sudder sub-division of the Manbhoom district were repaired and maintained in very fair order. In Singhboom, only surface repairs of the district roads have been made, as owing to the very limited resources of the District Road Committee and the large extent of the roads to be maintained nothing more could be done.

6. Village roads in all the districts have been maintained so far as funds permitted.

7. Attention seems to have been given by every District Committee to arboriculture. New trees have been planted along road sides and those planted in previous years have, in most cases, been maintained.

* * * *

LAND SALE NOTICES.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1859, that the undermentioned estates, or shares of estates, in the district of Chittagong, will be put up for sale at the Collector's Office of that district on the 31st January 1890, for arrears of revenue and other demands, which, by the Regulations and Acts in force, are directed to be realized in the same manner as arrears of revenue.

When in columns 5, 7 and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share, and the other share or shares in the estate are excluded from the sale:—

Patna Collectorate, the 6th January 1890. PEARY MOHAN BANERJEE, Dy. Collr., for Offg. Collector.

NOTICE is hereby given that the undermentioned plot of the Nizamut lakhraj State lands, situate in the district of 24-Pergunnahs, will be put up to sale at the Collectorate of the 24-Pergunnahs on Friday, the 28th March 1890—

The purchaser of the plot will be subject to the following conditions :—

I.—The plot will be sold revenue-free to the highest bidder above the upset price.

II.—The sale to be subject to existing leases, and to the rights conferred by the settlement proceedings and by the laws in force, and purchaser to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the plot to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

V.—The purchaser shall be put in possession on receipt of the orders of the Collector approving of the sale, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Road Cess Notification.

DISTRICT PUBNA.

IT is hereby notified that under section 38 of the Cess Act, as amended by the second schedule of the Local Self-Government Act III (B.C.) of 1885, the District Board of Pubna have determined that road cess in that district for the cess year 1890-91 shall be levied at the maximum rate, viz., one-half anna on each rupee of the annual value of lands, and of the annual net profits from mines, quarries, tramways, railways and other immoveable property as enumerated in section 6 of the Cess Act.

W. FIDDIAN, Chairman.

Road Cess Notification.

IT is hereby notified for general information that, under section 46 of the Bengal Local Self-Government Act No. III (B.C.) of 1885, the District Board of Shahabad have, by a resolution of their meeting held on the 13th of January 1890, determined to levy road cess for the year 1890-91 at the maximum rate of six pies in the rupee on the annual value of lands, mines, &c.

S. M. NASSIRUDDIN, Vice-Chairman, District Board, Shahabad.

Dated Arrah, the 18th January 1890.

Excise.

NOTIFICATION.

1. The right of retail sale of the Liquors and Drugs specified below will be put up to auction at the Opium Sale-room, Board of Revenue, 2, Bankshall Street, on Tuesday, the 11th February 1890, and subsequent days, in the following order :—

Name of article.	Date of sale.			
Country Spirit	Tuesday,	11th February 1890, commencing at 11 A.M.		
	Wednesday,	12th	ditto	ditto ditto.
	Thursday,	13th	ditto	ditto ditto.
Rum and Imported Liquor by glass ...	Friday,	14th	ditto	ditto ditto.
Ganja, Siddhi, Charas, Majum ...	Monday	17th	ditto	ditto ditto.
	Tuesday,	18th	ditto	ditto ditto.
Opium, Madak, Chandu	Wednesday	19th	ditto	ditto ditto.
	Thursday,	20th	ditto	ditto ditto.
Tari	Friday,	21st	ditto	ditto ditto.
	Saturday,	22nd	ditto	ditto ditto.

2. A complete list of all the shops for which licenses will be offered and a copy of each form of license are open to general inspection at the Office of the Superintendent of Excise Revenue, 4, Bankshall Street, and the number of these shops is not under any circumstances to be increased during the term of three years ending the 31st March 1893, except under the sanction of the Commissioner of Excise, Bengal, in each case. The Superintendent of Excise Revenue, however, reserves to himself the right, in case of combination, or for other cause, to transfer, before its settlement, any shop from the locality specified, to some other locality in the neighbourhood, being within a distance of 150 yards from the advertised shop or premises, provided that in cases of re-sale the transfer does not bring the shop within a quarter of a mile of any other similar shop which has been settled at any previous sale and the term of whose license is unexpired.

3. It is not at present intended to open any other shop during the term of the license; but the Superintendent of Excise Revenue does not absolutely bind himself in this respect. On special cause shown, and with the sanction of the Commissioner of Excise, Bengal, in each case, the number of shops may be increased : provided, however, that, whenever a new shop is opened, it will be optional to the holder of a similar license for the sale of Liquor or Drugs, if his shop is within a quarter of a mile of the new shop, to surrender his license without forfeiting his advance, when the Superintendent of Excise Revenue is to re-settle the shop by auction or otherwise.

4. The right of retail sale of the Liquors and Drugs is to be put up to auction at upset prices sanctioned by the Commissioner of Excise, Bengal.

5. The right of retail sale of the Liquors and Drugs is to be put up to auction in separate lots of one or more shops either in the order specified in the list, or in such other order as the officer conducting the sale may deem fit. When one lot has been sold, the next lot is not to be put up until the sum payable in advance on account of the lot already sold has been actually paid : provided, however, that where the sum payable exceeds Rs. 25, a promissory note may be taken from any respectable and well-known purchaser in lieu of cash payment.

6. The purchasers of the right of retail sale of Country Spirit, Rum, and Imported Liquors are entitled to sell Imported Liquors by the glass only, the liquor to be drunk *on* the premises

7. The auction is to be held subject to the following conditions :—

(*a*)—That the Superintendent of Excise Revenue does not bind himself to accept the highest or any bid.

(*b*)—That the settlement with each accepted purchaser will, in Calcutta and the Suburbs, be contingent on the production by him of the usual Police certificate or license as the case may be, viz.—

For Excise licenses for—	If to be held in Calcutta, a Police certificate in the form prescribed by section 30, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police certificate in the form prescribed by section 19, Act II (B.C.) of 1866, must be produced.
Doasta	
Rum	
Imported Liquors by glass	
Tari	
Ganja	
Siddhi	
Charas	
Majum	
For Excise licenses for—	If to be held in Calcutta, a Police license in the from prescribed by section 39, Act IV (B C.) of 1866, must be produced; and if to be held in the Suburbs, a Police license in the form prescribed by section 22 of Act II (B.C.) of 1866 must be produced..
Opium	
Madak	
Chandu	

(*c*)—That the person accepted as the purchaser is to state in writing, within seven days from the date of settlement, in what building he purposes to open his shop, and is at the same time to submit a plan showing clearly and distinctly what building or portion thereof he desires to be covered by the license, it being understood that the removal of shops to other premises than those named in the list attached to this notification will be contingent on the approval of both the Excise and Police authorities, and that any sum which has been paid as an advance of the license fee under the provisions of clause (*d*) of these conditions will be returned to any person to whom a license may be subsequently refused for Police reasons.

(*d*)—That the term of the license is to be for three years ending the 31st March 1893, and that, except in the case of Tari, the license fee for that period is to be paid in advance in the following instalments:—namely, the sum equivalent to the fee for two months, at the time of sale, and one month's fee on the date on which the currency of the license commences, and one month's fee on the 1st day of every succeeding month, until the whole of the fee due on the license shall have been paid. In the case of Tari only one month's fee is to be paid in advance at the time of sale, and fifteen days' fee on the date on which the currency of the license commences, and the rest of the fee in half-monthly instalments, viz., on the 1st and 16th day of every month, until the whole of the fee due on the license shall have been paid. This condition is to be strictly enforced in future, and failure to comply with it is to be met by immediate cancelment of the license.

(*e*)—That the purchaser is not to be entitled to receive back any portion of his advance in the event of his shop being closed before the expiration of the term of the license on violation of any of the conditions of the license, or his being convicted of a non-bailable criminal offence, or of any offence against the Excise laws or rules; and in the case of the surrender of a license under Act VII (B.C.) of 1878, the licensee is to give fifteen days' previous notice in writing to the Superintendent of Excise Revenue, and pay a sum equal to the license fee for fifteen days, over and above the amounts already paid in advance; and in the case of the surrender of a license under Act I of 1878, the licensee is to give one month's previous notice in writing to the Superintendent of Excise Revenue, and pay such fine not exceeding six months' license fees as the Superintendent of Excise Revenue may adjudge, over and above the amounts already paid in advance.

(*f*)—That the currency of the license is to commence on the 1st April 1890 on which date the purchaser is to open his shop, in all respects prepared for the accommodation of customers, to be certified by an Excise Officer—failure to comply with this condition is to be met by the immediate cancelment of the license and the forfeiture of the deposit, except in the case of delay caused by the non-issue of the Police certificate or Police license, for which a reasonable extension of time may be allowed upon application and cause shown to the Superintendent of Excise Revenue.

(*g*)—That where the amount of the sum payable in advance is required to be paid at once in cash, and the bidder fails to make such payment, the officer conducting the sale is either immediately to put up the lot again for sale, or after the other lots in the list have been disposed of, or he may postpone the sale to such future date as he shall then and there notify; and the defaulting purchaser is to be debarred from bidding for such lot or for any other lot, and he is not to be allowed to remain in the auction-room; and that the defaulting purchaser will be liable for any loss that may accrue to Government in case it becomes necessary to re-sell a lot at a lower rate either in consequence of his failure to deposit the sum payable at the time of sale, or to redeem his promissory note on or before 4 P.M. on the day following that on which the note was signed.

(*h*)—That the purchasers are to adhere to all the provisions of the Opium, Excise and Police laws, and of the rules which have been or may from time to time be prescribed by the Board of Revenue.

8. All sales subsequent to the date of the triennial sale in March are to be held subject to the conditions contained in this notification, so far as they may be applicable.

9. Any further information regarding the auction may be had on application at the Office of the Superintendent of Excise Revenue.

D. G. BONNERJEE,
Superintendent of Excise Revenue,
Calcutta, the Suburbs, Howrah, and Bally.

OFFICE OF THE SUPDT. OF EXCISE REVENUE; 4, BANKSHALL STREET, CALCUTTA, *the* 15*th January* 1890.

Arcattipore Tea Company, Limited.

NOTICE.

THE Ordinary Annual General Meeting of Shareholders of the above Company will be held at the Registered Office of the Company, No. 7, Church Lane, Calcutta, at noon of Friday, the 30th January current.

J. MACKILLICAN & Co., Secretaries
CALCUTTA, 21st January 1890. (3483—1)

Notification.

TO be peremptorily sold by the Registrar of the Calcutta High Court, Original Civil Jurisdiction, on the 1st of March, at the hour of 12 o'clock at noon, pursuant to a decree and order made in suit No. 48 of 1883 (wherein Haran Chunder Nye is plaintiff and Moulvie Zohurrul Hossein is defendant), and dated respectively the 5th March 1883 and 22nd May 1889, the following properties :—

1. No. 9, European Asylum Lane at Taltollah in Calcutta, being a parcel of tenanted land in holding No. 220, Block 2, South Division, the area of which is by estimation 1 bigha 5 cottahs 15 chittacks and 2 feet, be the same a little more or less, and the annual jumma or revenue in respect of which, payable to the Calcutta Collectorate, is Rs. 7-14-6, and which property is bounded on the north by a Government drain; on the south by the said European Asylum Lane; on the east by the house and premises of Mr Gordon, now the property of Mahomed Yussuff, and on the west by the house and premises of Mr. Bigg, now the property of Gobeer Wahid Khan.

2. Nos. 28 and 29, formerly Nos. 23 and 24, Taltollah Lane in Calcutta, being all those two messuages, tenements or tenanted houses, together with a piece or parcel of land in holding No. 153, Block No. 9, South Division, the area of which is by estimation 10 cottahs 4 chittacks and 24 feet, be the same a little more or less, and the annual jumma or revenue in respect thereof, payable to Government, is Rs. 1-14-11, and which property is bounded on the south and east by the said Taltollah Lane; on the west by the premises and land of the defendant Moulvie Zohurrul Hossein, and on the north partly by the land of Jan Khan, and partly by the land of Gour Moody, and partly by the land of Mashoor Barber.

The abstract of title and conditions of sale may be seen at the Office of the Registrar of the High Court (Original Jurisdiction), and at the Office of Baboo Gonesh Chunder Chunder, Attorney for the plaintiff, on any day before the sale, and will be produced at the sale.

R. BELCHAMBERS, Registrar.

G. C Chunder, Plaintiff's Attorney.
Calcutta High Court, Original Jurisdiction, the 16th January 1890. (3485—1)

NOTICE is hereby given that Mary Stephen, who obtained a decree *nisi* on the 23rd January 1890 in the High Court for dissolution of marriage against her husband S. S. Stephen, has revoked and cancelled the power-of-attorney which she executed in his favour, and that the said S. S. Stephen has no authority to act as her attorney in any matter whatsoever. Any payment of money therefore to the said S. S. Stephen on account of the said Mary Stephen will not be recognised.

GONESH CHUNDER CHUNDER, Attorney for Mary Stephen.
Calcutta, the 27th January 1890. (3494—3)

W. BAGCHI, Head Clerk,

for Exe. Engr., Nuddea Rivers Division.

Berhampore, the 27th January 1890.

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage. Rs. A. P.	With postage. Rs. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
,, each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
,, a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	2 0 0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ..	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.

	For town. Rs. A. P.	For mufasil. Rs. A. P.
For the Calcutta Series per copy ...	0 8 9	0 10 3
,, each of the Madras, Bombay and Allahabad Series per copy	0 5 3	0 6 9
,, the Calcutta Series. For the year ...	7 3 6	8 6 3
,, each of the Madras, Bombay and Allahabad Series. For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Reports should apply to—

Superintendent, Government Press, Madras

The Government Central Book Depot, Bombay.

,, Curator of Government Books, North-Western Provinces and Oudh.

,, Superintendent of Government Printing, Bengal

Orders and subscriptions for 1889 *should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.*

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance—

	One page.	Half page.	Quarter page
For one issue ...	Rs. 20	Rs. 14	Rs. 8
,, three issues ...	,, 55	,, 36	,, 24
,, six ,, ...	,, 100	,, 68	,, 45
,, nine ,, ...	,, 145	,, 96	,, 64

N. B.—All cheques, money-orders, &c., must be made payable to the "Treasurer Asiatic Society" only.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observation taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i. e.*, from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal, Daily Report, and to the Accountant and Treasurer Bengal Secretariat, for the other reports.

ALEX. PEDLER,
Offg. Meteorological Reporter to the Govt. of Bengal.

Trial of Civil Suits. In Urdu. 4*a* (1*a.*)

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

****No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

Archæological Survey of India. Reports on the. By GENL. A. CUNNINGHAM, C.S.I. Super royal 8vo, full cloth. Vols. VI and XIX to XXIII only available. Rs. 6 (6*a*.) each. General Index to Volumes I to XXIII. Rs. 6 (6*a*.)

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 18th January, 1890.

Present:

The HON'BLE SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding.*

The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General.*

The HON'BLE F. B. PEACOCK.

The HON'BLE P. NOLAN.

The HON'BLE T. T. ALLEN.

The HON'BLE SIR HENRY HARRISON, KT.

The HON'BLE SIR ALFRED CROFT, K.C.I.E.

The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.

The HON'BLE C. H. MOORE.

The HON'BLE H. PRATT.

The HON'BLE SHAHZADA MAHOMMED FURROKH SHAH.

The HON'BLE DR. RASH BEHARY GHOSE.

The HON'BLE RAJA RAMESHWAR SING BAHADUR.

RULES FOR THE CONDUCT OF BUSINESS.

THE HON'BLE SIR CHARLES PAUL moved that the Report of the Select Committee appointed to consider and amend the Rules for the Conduct of Business at the Meetings of the Council be taken into consideration.

The Motion was put and agreed to.

The HON'BLE SIR CHARLES PAUL also moved that the Rules be considered for settlement in the form recommended by the Select Committee.

The Motion was put and agreed to.

HIS HONOUR THE PRESIDENT said :—"Before putting the next question to the vote, I wish to say a few words. I am sure we are much indebted to the Select Committee for the care they have taken in considering these rules for the conduct of business.

"In going through the details there is only one point which struck me, on which I thought an alteration might possibly be made; and about that, as I am not quite sure I have understood the Rules correctly, I should like to have the opinion of the learned Advocate-General, or any other legal Member of the Council. It is a point which concerns me as President.

"In Rule 25 it is stated that 'when an amendment upon any motion is moved, or when two or more such amendments are moved, the President, when taking the sense of the Council thereon, shall read the terms of the original motion and of the amendment or amendments proposed.' So far it is all right, and I have no objection to it.

"Then the Rule goes on to say, 'and before putting any other question, shall put the question that the original motion shall stand without amendment.' After that it says:—'If that question is decided in the affirmative, the motion shall be put to the vote without amendment;' and in Rule 26 it says: 'When any one amendment is affirmed, the question shall be put to the vote and amended accordingly.'

"Now, if I have read this rule correctly, it imposes upon the President the necessity of first taking the opinion of the Council not on any one of the amendments, but upon the motion as it originally stood; that is to say, on a section of a Bill probably as amended by a Select Committee. In nine cases out of ten it would be that.

"If there is a question which strongly divides public opinion, we shall find, as a matter of practice, that a Select Committee generally takes a view which is a mean between two extremes Let us say as an illustration, though it is not likely to happen, that a Select Committee recommends that a certain appointment shall carry a salary of Rs. 500 a month. That would probably be the mean between two extremes—one extreme being that the appointment shall not be a paid appointment at all, and another extreme that the appointment shall be paid Rs. 1,000 per mensem. If I have understood this rule correctly, I shall first have to put the motion to the Council that the pay of the appointment shall be Rs. 500. The effect of that, of course, would be to combine against that motion the advocates of the two extremes that the appointment shall not be paid, and that it shall be paid Rs 1,000. Clearly the middle term would be thrown out. Whereas we know well from our own experience that when either of the extreme parties find that they cannot have their own way, they would much rather adopt the middle term than that the opposite extreme party shall have their way.

"If, on the other hand, it is at the discretion of the President to put any one of the amendments or the original term first as he chooses, it will then give an opportunity of taking the opinion of the Council as to the views of the two extreme parties without forcing them to combine against the middle term. But if you begin by voting upon the middle term, and then go to the extremes, if the two combine first against the one, and then against the other, you will be left in a dilemma, out of which you cannot possibly extricate yourself, and there will be no means of getting the views of the two opposite parties upon the recommendation of the Select Committee.

"The proposal I shall make to you will be that in Rule 25 after the first word 'proposed,' the next ten lines be left out down to the words 'amended

accordingly'; and that the following words be substituted for them, namely:—'It shall be in the discretion of the President to put first to the vote either the original motion or any of the amendments which may have been put forward.'

"I should like to have the opinion of gentlemen who are more accustomed than I am to the way of doing business at public meetings, and as to the legal effect of the words which I have proposed, before I ask you to accept them. I only throw this proposal out for discussion, and not as one which I ask you to accept on my authority."

THE HON'BLE SIR ALFRED CROFT said:—"This proposal seems to me likely to get rid of a difficulty which is presented by the amended Rules as proposed by the Select Committee. These Rules (25 and 26) are a reproduction, without any change, of the existing rules. But they present certain inconsistencies which arise, as it seems to me, from the use of the word 'amendment' in two senses. It is well known that in Parliamentary usage the word 'amendment' means one thing, while in the popular sense it means quite another. According to the usage of Parliament the word 'amendment' means a proposal to alter the terms of a question by adding certain words, by omitting certain words, or by substituting certain words for certain other words. And then in voting on that amendment, you are in fact not voting on any substantive question, but only upon the form that you wish that question to take on which you are afterwards to vote as soon as its terms are settled. Dr. Smith in his 'Handy Book on Public Meetings' describes the practice of Parliament as follows:—

'The object of an amendment is to change more or less the nature of the question before the House. . . . Thus, in voting upon any amendment, whichever way a man votes he does not help to carry any question, but only decides what the question shall be which he shall have an opportunity of carrying. He does not support the original question by voting against its being amended;'

to which it may be added that, in voting for an amendment, he may do so with the object of afterwards voting against the question as so amended.

"Such then is the Parliamentary usage. The popular meaning of the word 'amendment' as it is used in India, and often at public meetings in England, is different. A proposal is put before the meeting, and against that is brought forward a counter or rival proposal, which is called an amendment. Both are discussed together, and then at the close of the debate the Chairman puts one of the two propositions (generally the amendment) to the vote of the meeting. If it is carried, the substantive question is carried; if it is lost, the original proposition is put to the vote with a similar object and result. The two meanings of the term 'amendment' are perfectly clear and distinct, but the word seems to be used in these rules sometimes in one sense and sometimes in another.

"In Rule 23, which provides that 'any member may, by motion, propose for the determination of the Council any original question or any amendment of such question,' it is probable, though the point is not quite clear, that the intention is to employ the term 'amendment' in the Parliamentary sense, namely, an alteration of the terms of the question.

"Now go on to Rule 25 which says:—'When an amendment upon any motion is moved, or when two or more such amendments are moved, the President, when taking the sense of the Council thereon, shall read the terms of the original motion and of the amendment or amendments proposed, and before putting any other question shall put the question that the original motion do stand without amendment.' That clearly points to the Parliamentary usage. The President first puts the question, that the original motion do stand without amendment; in other words, he asks the Council to decide the form which the question shall take. Then the rule goes on to say:—'If that question is decided in the affirmative, the motion shall be put to the vote without amendment;' that is to say, when it has been decided that the form of the question shall not be altered, the motion is to be put to the vote in the form in which it originally stood, and at this second stage it is put of course as a substantive motion.

"If, on the other hand, the rule goes on to say, the question that the original motion do stand without amendment is decided in the negative, that is, if it is decided that the question shall be amended, you would naturally expect that the next point to be settled would be the form the question should take. But that is not so, we find; for at this point the rule changes over to the popular method of procedure. It says:—'If not (that is, if there is to be an alteration in the terms of the question) the motion shall be put to the vote as proposed to be amended;' that is to say, the motion is at once to be put to the vote in its alternative form, and the voting on it will decide the substantive question.

"But now go on to Rule 26 which says:—'When any one amendment is affirmed, the question shall be put to the vote and amended accordingly.' On neither interpretation of the word 'amendment' can I attach any sort of meaning to that clause. The question has already been amended, because the amended question has been before the meeting. More than that, the question has been put to the vote and disposed of, so that there is nothing more to be done; and consequently Rule 26 seems to me to have no meaning whatever as it stands. If, indeed, the rule means, as is probably the case, 'when any one amendment is affirmed, the question *shall be amended accordingly and put to the vote*,' this would no doubt be in accordance with Parliamentary practice, but it would be in direct contradiction with what has preceded in Rule 25, according to which the question has already been put to the vote and disposed of.

"The rules as they stand are consequently open to serious objection. It would, perhaps, not be difficult so to alter them as to bring them into consistency both with Parliamentary usage and with one another. But I am not sure that it is necessary to adopt the Parliamentary usage here; and on the whole it seems to me that the difficulty can be removed quite as effectually by the proposal which His Honour the President has made, and which is in conformity with popular practice."

THE HON'BLE SIR HENRY HARRISON said:—"The Hon'ble Sir Alfred Croft has given an excellent dissertation on the academical or theoretical side of the question before the Council, and I am glad to say that my experience of the practical side of the question bears out the wisdom of adopting the amendment proposed by His Honour the President.

"I have had considerable experience for some time of the practical way of dealing with a large number of simultaneous amendments; and I may say that the difficulty is partially insoluble, because sometimes you have amendments of such a kind that you cannot get the real view of the meeting upon them, as each party will vote for their own particular proposal. But the best solution lies in the amendment now proposed, because it is necessary when there are many amendments to select and to put them in such order that the views of the meeting may be clearly obtained; and it seems best that the power to do so should rest with the President of the assembly.

"For example, in the Municipality we had a certain rule for electing candidates to office. Each candidate whose name was proposed was put up and voted for; then the next and the next, till some one candidate got an absolute majority of votes. The result was that the candidate whose name was put up first had no chance, because the supporters of all the other candidates combined against him, and so on, each successive candidate having a better chance as he would get some support from the friends of the candidates already rejected. And therefore the candidates made careful calculations as to the order in which their applications should be sent in and appear in the lists, as upon that depended their chance of obtaining a number of votes from amongst the supporters of those whose names were put forward before. Similar manœuvring may be practised as regards amendments if they have to be put according to any hard-and-fast rule.

"Much the best remedy therefore is that which leaves it entirely to the President to decide which shall be put first, whether the first, second, or third amendment, or the original motion, in order to get at the sense of the meeting."

[His Honour the President asked Sir Charles Paul, as the oldest Member of the Council, whether in his experience Rules 25 and 26 have ever once been worked?]

THE HON'BLE SIR CHARLES PAUL said:—"I do not know about these Rules having been used in practice. The Select Committee adopted the existing rules with such modifications as presented themselves for consideration. They did not turn their attention to these Rules from the point of view which His Honour the President has put before the Council, and it appears to me that the proposal framed to amend these Rules is a perfectly correct proposal, namely, to give the President the right to put amendments to the Council in any order he thinks proper.

"There are cases in which it is necessary to put the amendment first, and that could not be done under the existing rule, but I may add that in point of practice the rule does not seem to be generally followed; and under these circumstances I have no objection to these Rules being amended as proposed, and it seems to me most expedient to do so."

His Honour the President then moved that, the words 'It shall be in the discretion of the President to put first to the vote either the original motion or any of the amendments which may have been brought forward' be substituted for the following in Rules 25 and 26:—

'And before putting any other question shall put the question that the original motion do stand without amendment.

'If that question is decided in the affirmative, the motion shall be put to the vote without amendment. If not, and there be but one amendment proposed, the motion shall be put to the vote as proposed to be amended; or if there be more than one amendment proposed, the question shall be put that the motion be put to the vote as proposed by the amendment which the President thinks may most conveniently be first disposed of, and so, if necessary, of all the others.

'When any one amendment is affirmed, the question shall be put to the vote and amended accordingly.'

The Motion was put and agreed to.

The HON'BLE SIR ALFRED CROFT moved that in Rule 13, the words 'No Member in debate shall name another Member' be omitted.

He said:—"I do not know whether it is desirable to retain these words as the rule has never been observed in practice."

The HON'BLE MR. NOLAN said:—"I submit that it will be better to alter the practice; naming a Member in a certain stage of a discussion may be objectionable."

The HON'BLE SIR HENRY HARRISON said:—"In a rowdy assembly there would be objections to naming a Member, and in such a case it would be better to preserve the rule. But if you have a well-ordered assembly, it is better to have no such rule. It all depends upon the character of the assembly. I do not think any actual inconvenience will result from naming members in this Council."

The amendment being put, the Council divided:—

Ayes.	*Noes.*

The Hon'ble F. B. Peacock.	
The Hon'ble Sir Charles Paul.	

So the Motion was carried.

The HON'BLE SIR CHARLES PAUL moved that the Rules, as now settled in Council, be passed.

The Motion was put and agreed to.

CALCUTTA AND THE SUBURBAN POLICE SUPERANNUATION FUNDS BILL.

THE HON'BLE SIR HENRY HARRISON moved that the Bill to consolidate the Calcutta and the Suburban Police Superannuation Funds, as settled in Council, be passed.

He said:—"The Bill was discussed and passed at the last meeting of the Council with a small amendment of a formal character proposed by myself, and I see no possible objection to its being passed now"

The Motion was put and agreed to.

CALCUTTA PORT BILL.

HIS HONOUR THE PRESIDENT said:—"The next question on the notice paper is the discussion upon the motion that, the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Port of Calcutta, and to the appointment of Commissioners for the said Port, be taken into consideration.

"But I might mention that in considering the dissents of the two Hon'ble Members who have affixed separate memoranda to the Report of the Select Committee, I got the very valuable assistance of the learned Advocate-General, and we had an informal meeting last week with the Members of the former Select Committee, who were by that time *functi officio*. The result was that a fresh clause was drafted to meet, as far as possible, the objections taken to the original one. It is the clause which you see in the notice paper in the name of the Hon'ble Sir Henry Harrison.

"But in the course of this week the Hon'ble Mr Moore applied to me, requesting that the discussion of the matter might be postponed, as the Chamber of Commerce wished to consider the section in its latest form and to take legal opinion upon it. I am quite sure you will all agree with me that it is better to give ample time for consideration rather than to have a debate in this Council which can be avoided, and certainly rather than to have it said that we are hurrying the measure through the Council unnecessarily.

"I therefore took it upon myself to tell the Hon'ble Member that there will be no discussion to-day, and that the consideration of the measure will be postponed to the next meeting of the Council."

The consideration of the Report was, therefore, further postponed.

BENGAL VACCINATION BILL.

THE HON'BLE SIR HENRY HARRISON presented the Report of the Select Committee on the Bill to amend the Bengal Vaccination Act, 1880, and Bengal Act II, 1887.

He said:—"As a matter of fact, although this Bill is mainly a formal one, the Select Committee have made considerable changes in it. Our colleague, the Hon'ble Mr. Nolan, whom I am now permitted to name without any breach of rules, pointed out the effect of the various provisions of the Act, and has recorded a note on the subject; and the result of our consideration has been that we found first that the formal object of the Bill would be better attained not by substituting 'Calcutta' for the 'Town of Calcutta,' but by simply altering the definition of the 'Town of Calcutta,' and omitting the definition of 'the Suburbs:' and then we found no necessity for touching the amended Act at all. Because though the amending Act does refer to the Suburbs, it refers to it in a sense which requires no actual definition; it merely applies to sailors coming to the Suburbs or the Town of Howrah.

"The effect of removing the definition of the 'Suburbs of Calcutta' would not raise any difficulty in the two places in which the words are found. The words would merely remain as meaning (precincts), thus giving that protection to the precincts of Calcutta which ought to be given."

The Council adjourned to Saturday, the 1st February, 1890.

CALCUTTA;
The 24th January, 1890.

C. H REILY,
Assistant Secretary to the Govt. of Bengal, Legislative Dept.

NOTE.—The meeting fixed for the 11th January, 1890, was subsequently postponed to the 18th idem.

FAMINE RELIEF BY DISTRICT AND LOCAL BOARDS.

REVENUE DEPARTMENT—FAMINE.

Calcutta, the 24th January, 1890.

RESOLUTION.

UNDER section 99 of the Local Self-Government Act III (B.C.) of 1885 District Boards are empowered to incur expenditure on measures for the relief of famine within such financial limits as may be prescribed by the Commissioner of the Division concerned, and the Bengal Famine Code provides that in districts to which this section of the Act has been extended, relief operations should be governed by rules to be issued under section 138. Section 99 has been already extended to Furreedpore and the districts of the Patna Division, and a notification will now issue rendering its provisions applicable to the remaining District Boards of the Province.

2. For the guidance of District Boards in the discharge of the duty of affording relief in time of distress, the Lieutenant-Governor desires to emphasise the principle which has already been enunciated in the course of the correspondence relating to the recent scarcity in Behar, and which has gained the approval of the Government of India as being in accord with the views expressed in paragraph 21 of the Resolution of that Government, No. 44Fam., dated the 9th June, 1883, on the issue of the Provisional Famine Code. That principle is that the duty of providing relief in the way of work should fall in a gradual scale with the deepening of distress, first on Local, secondly on Provincial, and lastly on Imperial Funds. District Boards must be regarded as forming an integral part of the administration, and it becomes their duty, as it is that of other departments of Government in time of serious scarcity, to subordinate the ordinary objects and methods of their expenditure to the special consideration of saving life. District Boards are the primary agency available for coping with famine, and must be expected in such crises to direct their whole resources, subject only to the maintenance of absolutely necessary works in non-affected tracts, to affording relief. This primary obligation having been carried out, it remains for Government to supplement the resources of Boards, if necessary, so as to enable them not only to combat famine, but also to perform their ordinary functions connected with the up-keep of district communications. Before, then, an appeal is made by the Boards to Government for funds, all possible expenditure, beyond that absolutely necessary for bare maintenance and establishment charges, should be diverted from non-affected to affected areas, and on the opening of relief operations, the District budgets should be remodelled with this object.

3. In order to make the action of Boards conform with the provisions of the Famine Code, the annexed rules are, under section 138 of the Local Self-Government Act, issued for their guidance.

1. In the administration of the relief of scarcity or famine, District Boards should follow the principles of the Bengal Famine Code so far as such principles apply to them. Their attention is specially required to the following rules, which should be carefully observed.

2. On relief works opened and maintained by District Boards, the wages paid to labourers should be fixed with reference to the following provisions of the Bengal Famine Code:—

"124. The full ration prescribed under this Code as sufficient to maintain able-bodied labourers in health and strength is—

	For a man.		For a woman		For children.
	lb.	oz.	lb.	oz.	
Flour of the common grain used in the country, or cleaned rice ...	1	8	1	4	¾, ½ and ¼ rations according to age and requirements.
Pulse	0	4	0	4	
Salt	0	½	0	½	
Ghee or oil	0	1	0	½	
Condiments and vegetables ...	0	1	0	1	

"125. The minimum ration for labourers under this Code is—

	For a man.	For a woman.	For children, not being infants, below 14.
	lb. oz.	lb. oz.	
* Flour of the common grain used in the country, or cleaned rice ...	1 0	0 14	$\frac{1}{2}$, $\frac{1}{3}$ and $\frac{1}{4}$ rations according to age and requirements.
Pulse	0 2	0 2	
Salt	0 $\frac{1}{2}$	0 $\frac{1}{2}$	
Ghee or oil	0 $\frac{1}{2}$	0 $\frac{1}{2}$	
Condiments and vegetables ...	0 $\frac{1}{2}$	0 $\frac{1}{2}$	

"126. The penal ration prescribed for labourers sent to a poor-house for refusing to work is—

	For a man.	For woman.
	lb. oz.	lb. oz.
Flour, grain or rice	0 14	0 12
Pulse	0 1	0 1
Salt	0 $\frac{1}{2}$	0 $\frac{1}{2}$

"127. The minimum wage under this Code is the amount of money which at the current rates authorised by the District Officer is sufficient to purchase a minimum ration.

"128. The full wage under this Code is the amount of money which at the current prices is sufficient to purchase a full ration.

"129. Payment for labour on Professional Agency works may be made at the rates ordinarily given under the rules in force in the Public Works Department, provided that the sum which a labourer can ordinarily be expected to earn by a fair day's labour shall in no case be less than the full wage prescribed in section 128.

"130. Payment for labour on Civil Agency works, where payment is made by results, shall be so arranged that the sum which able-bodied-labourers can ordinarily be expected to earn shall be as nearly as possible equal to the full wage prescribed by section 128.

"131. Payment for labour on Civil Agency works, where made according to task, shall be arranged at the discretion of the civil officer in charge:

"Provided that in no case it be greater than 75 per cent. of the full wage, nor less than the minimum wage prescribed in this chapter."

3. Every District Board maintaining a relief work shall make a progress return to the District Officer for each week ending on Saturday night in the annexed form.

4. In making the above return, the District Board shall also note—

(*a*) the physical condition of the labourers, and of those seeking relief;
(*b*) the numbers who have been rejected from the work, and the reasons for rejection;
(*c*) the causes of any refusal to work or failure to accomplish the full task, and the action taken;
(*d*) the sufficiency or insufficiency of the scale of wages of payment for piece-work;
(*e*) any other information which it is expedient to communicate.

5. When a District Board opens and maintains temporary poor-houses and places for the distribution of food, gratuitous relief shall be limited to the following classes of persons, and shall be given to them only when they have no relatives able and, by the custom of the country, bound to support them:—

(*a*) Idiots and lunatics.
(*b*) Cripples.
(*c*) Blind persons.
(*d*) All who from age or physical weakness are incapable of earning their living.
(*e*) All persons whose attendance on the sick, or on infant children in their own homes, is absolutely necessary.

6. No person may be admitted to a poor-house except—

(1) persons who, being unfit for employment on works, cannot be conveniently sent to their homes;
(2) persons who, being fit for employment on works, refuse to labour.

7. The site of the poor-house should be chosen with regard to the following circumstances:—

(1) It should be within easy reach of the head-quarters of the District Board, or of some official delegated to act as visitor.
(2) It should be situated on the outskirts of a village or town.
(3) The situation should be healthy.
(4) The drainage should be good.
(5) An ample supply of water for drinking and bathing purposes should be available.

* The flour should be that of the coarsest cereal or millet ordinarily consumed and commonly purchaseable in the bazar: where rice is made the standard of age it should be cleaned rice. The price should be that at which the flour or rice is sold at the bazar attached to or nearest to the relief work: if flour is not sold, the price should be based on that at which the grain is sold. In calculating the price of flour, it should be remembered that flour is always dearer than the grain of which it is composed. This seems a simple method for instruction, but it had recently been forgotten, and wages have been based on the price of the grain not of the flour. Thus, if barley is selling at one anna a pound, a pound of barley should be priced about $1\frac{1}{2}$ anna (*Mr. Elliott's Draft Code of Famine Relief, Chapter II, paragraph* 13).

8. Arrangements shall be made to ensure that relief is not unnecessarily given, and that, when given, it reaches the persons for whom it is intended.

9. So far as may be, consideration shall be shown to persons of respectable position and family who are reduced to starvation. Such persons shall not be forced to labour on the works, but shall, wherever possible, be employed as overseers of gangs, supervisors, accountants or clerks on the works. If no suitable work can be found for them, they may be admitted to gratuitous relief. A list of all such persons so admitted shall be sent weekly to the District Officer.

10. In cases where District Boards undertake the whole system of charitable relief, the following further rules will apply :—

(*i*) Artizans who require relief shall be employed, as far as possible, in their own trades and in localities where the members of any particular trade or calling are numerous. Preference may be given to works which will provide employment for men of such trade or calling.

(*ii*) In localities where weavers are numerous, the District Board may arrange for the distribution of thread, and the payment for cloth woven, at the market price.

(*iii*) If the market price is so low that a weaver cannot support himself, the price given may be raised, with the sanction of the Commissioner, to such an extent as may be necessary.

11. In order that the expenditure on account of the relief of scarcity or famine may be clearly shown in the budget estimates, the major head "Famine relief" is to be divided into the following minor heads :—

(*i*) Relief works.
(*ii*) Temporary hospitals, poor-houses, orphanages.
(*iii*) Gratuitous relief.
(*iv*) Extra medical or other assistance.

Form No. II, referred to in Rule 11 of the rules under section 138, clauses (*i*) and (*r*) of the Local Self-Government Act, published under notification dated 16th September 1886, in the Municipal Department, is to be corrected accordingly.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Commissioners and District Officers, and, through the latter, to all District Boards, for information and guidance.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

FORM OF PROGRESS RETURN.

See Rule 3.

FAMINE RELIEF WORKS.

DISTRICT OF_____

*Progress Return for the week ending on night of Saturday, the*_____ _____.

Serial number of work.	Description of work.	Date of the week.	Number of persons employed.									Quantity or portion of work done during the week.	Total amount disbursed as wages.									Total number of infirm persons unfit to work and dependent on labourers employed on the work during the week.	Total amount of wages paid to such persons during the week.	How long the work is likely to give employment.	Remarks.

"Class C" stands for persons not able-bodied, but fit for light employment of the kind required at the work.

LIBERALITY OF RAJAH RUN BAHADUR SINGH, OF TIKARI.

Dated Calcutta, the 28th January 1890.

From—Sir John Edgar, K.C.I.E., C.S.I., Chief Secretary to the Government of Bengal,

To—The Commissioner of Patna.

I am directed to acknowledge the receipt of your letter No 21G, dated the 9th instant, in which you report that Rajah Run Bahadur Singh, of Tikari, has contributed a sum of Rs. 25,000 to form the nucleus of a trust fund for the purpose of establishing a lady doctor in Gya.

2. In reply, I am to request that you will be so good as to convey to Rajah Run Bahadur Singh an expression of the Lieutenant-Governor's appreciation of his public spirit and liberality. The correspondence will be published in the *Calcutta Gazette*.

No. 21G, dated Bankipore, the 9th January 1890.

From—John Boxwell, Esq., Offg Commissioner of the Patna Division,

To—The Secretary to the Government of Bengal, Medical and Municipal Depts.

I have the honour to report, for the information of Government, that Babu (now Rajah), Run Bahadur Singh, of Tikari, has contributed a sum of Rs. 25,000 to form the nucleus of a trust fund for the purpose of establishing a lady doctor in Gya.

2. Other subscriptions have raised the total to over Rs. 28,000. Under the Magistrate's care the fund is likely to grow rapidly.

3. The Magistrate has requested me to bring specially to the notice of Government this most generous action of Rajah Run Bahadur Singh.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 25th January, 1890.

	Bagirhat ...	0·5	
9	Jessore „ 25, '90	1·55	Rain on the 24th. Harvesting of *amun* rice nearly completed except on low lands. Cold-weather crops doing fairly well. Prices of rice stationary.
	Jehanabad ...	0·18	
	Magura ...	0·25	
	Narail ...	0·03	
10	Moorshedabad „ 25, '90	0·12	Weather—clear and cold. *Amun* harvesting almost completed. *Rubbi* promises well.
Rajshahye Divn. 11	Dinagepur „ 25, '90	Nil	Weather—very cloudy yesterday (24th), and this (25th) morning very foggy. Rice harvest almost over, and prospects favourable. Mustard crop in the subdivision expected to be very poor. Pressing of sugarcane continues.
12	Rajshahye „ 25, '90	0·14	Weather—partially cloudy and cold. The shower of rain on the 19th has done much good to the spring crops. Harvesting of *amun* is nearly over with good results. Prospects of standing crops good. Condition of *ganja* good at Nowgong. Price of rice almost stationary.
13	Rungpur „ 25, '90	0·5	Weather—cool and cloudy with light showers of rain. Mustard is being gathered. Prospects of *rubbi* crops good. Ploughing facilitated by rain.
	Gaibanda ...	0·18	
14	Bogra „ 25, '90	0·79	Weather—seasonable. Rain on two days; on the 20th it rained with hail-stones. Reaping of *amun* nearly finished. Other crops are also being reaped. A little damage was caused by the hail of the 20th. Rice is being sold at 21 seers per rupee at head-quarters.
	Nowkhilla ...	1·14	
15	Pubna „ 25, '90	0·33	Weather—seasonable and cloudy at the latter part of the week. *Amun* crop is still being reaped. Mustard and tobacco are expected to be 12 annas crops. Recent rain has done good to crops.
16	Darjeeling „ 25, '90	0·95	Weather—cold and cloudy with occasional rain and snow. In the hills wheat and barley continue to progress favourably, and fields are being prepared for potatoes. In the Terai harvesting of *amun,* mustard, and potatoes continues. Transplanting of tobacco nearly completed.
17	Jalpigoree „ 25, '90	0·13	Weather—cloudy and cold. Cutting of *haimanti* paddy completed; outturn good. *Rubbi* crops doing well. Prices stationary.

No.	District and date of return.	Rainfall at under Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—*concluded.*			
	Eastern Districts.		
Dacca Divn. 18	Dacca Jan. 25, '90	Figures not given.	Weather—seasonable. Sowing of *boro* paddy continues. Winter crops doing well. Recent rain has done good to the standing crops. Mustard and pulses are being gathered. Fodder is available. No special change in the prices of food-grains. Common rice sold at from 14 to 16½ seers per rupee during the week.
19	Furreedpur „ 25, '90	1·45	Weather seasonable. Mornings occasionally foggy and cloudy. State and prospects of *rabbi* crops continue fair. Cultivation and sowing of *jol* and *boro* in progress. Rain has done much good to the standing crops. Coarse rice selling at 14 seers per rupee in Sudder, 17 seers in Goalundo, and 14½ seers in Madaripur. Outturn of *aman* paddy did not exceed 10 annas in Sudder owing to the damage done by unusual flood. From Goalundo and Madaripur it is reported to be 16 and 14 annas respectively.
20	Backergunge ...	...	Report not received.
21	Mymensingh „ 25, '90	1·16	On the night of the 19th rain fell accompanied by strong wind and hailstones, and there was rain also on the 24th. Weather cool and sometimes cloudy. Rain has done much good to standing crops. Harvesting of *aman* paddy nearly completed. Mustard and pulses are still being gathered. Transplanting of *boro dhan* continues. Common rice sells at 13 seers 5 chittacks per rupee.
Chittagong Divn. 22	Chittagong „ 25, '90	0·66	Weather—seasonable. Prospects and state of winter crops good.
23	Noakholly „ 25, '90	0·39	Weather—cloudy; rather warm for the season. *Rabbi* crops getting on well. Late rain has done some good to the crops.
24	Tipperah „ 25, '90	0·45	Weather—seasonable. Recent rain has benefited the winter crops. Mustard is being collected. Transplanting of *boro dhan* going on.
	Brahmanberiah ...	1·19	
	Chandpur ..	0·55	
25	Chittagong Hill Tracts. „ 24, '90	0·08	Weather—very cold with dense fogs in the mornings throughout the week, except on the morning of the 20th, which was cloudy with drizzling rain. Tobacco, chillies, and other winter crops progressing. Gathering of mustard commenced in some places.
	Hill Tipperah Jan 25, '90	0·30	Weather—cloudy. Reaping of *aman* paddy finished Chillies and tobacco doing well.
BEHAR.			
Patna Divn. 26	Patna „ 25, '90	0·03	Weather—cloudy towards the end of the week. Slight showers of rain on the night of the 23rd. Harvesting of paddy over. Prospects of *rabbi* continue good. Mustard promising. Poppy flowering and looks well. Prices of food-grains almost stationary.
27	Gya „ 25, '90	Nil	Weather—cold and cloudy. Prospects of poppy and *rabbi* good. Harvesting of paddy still going on. Food-stock sufficient.
28	Shahabad „ 25, '90	Nil	Weather—cloudy with north-easterly wind. Prospects of all *rabbi* crops continue good. They are now in ear. A shower of rain would be beneficial. Poppy thriving and coming into flower. Pressing of sugarcane going on. Prices stationary.
29	Durbhunga „ 25, '90	0·23	Weather—latter part of the week cloudy throughout district. Rain last night (24th) at head-quarters. It will greatly benefit the *rabbi* crops, wheat and barley, the prospects of which are very favourable. Tobacco is being harvested. Poppy doing well. Price of common rice ranges from 19 to 21½ seers per rupee.
30	Mozufferpur „ 25, '90	Figures not given.	Weather—cloudy; slight rain on the 24th. All standing crops doing well. Mustard crop commencing to be cut.
31	Sarun „ 25, '90	Nil	Weather—clear, but occasionally cloudy. Weather unfavourable for poppy. Prospects of this crop, however, continue good. *Rabbi* crops, including mustard, look well. Sugarcane pressing is in full progress.
32	Chumparun „ 25, '90	0·99	Weather—clear and cold to-day (25th). Rain fell on the 23rd and on the night of the 24th, immensely benefiting the standing crops of *rabbi* and poppy, but slight damage is apprehended to wheat Indigo fields are being prepared Sugarcane is being pressed. Prices of food-grains stationary.
Bhagulpur Divn. 33	Monghyr „ 25, '90	Nil	Weather—cold and cloudy at the latter part of the week. *Rabbi* crops doing well. Prospects of poppy fair.
34	Bhagulpur „ 25 '90	Nil	Weather—rather too warm and cloudy. Mornings foggy. Prospects promising, but rain wanted for *rabbi* crops.
35	Purneah „ 25, '90	0·02	Weather—cloudy and cold with west wind. Mustard is being harvested. Tobacco and *rabbi* crops doing well, but want a shower of rain. Early ploughings going on.
36	Maldah „ 25, '90	Nil	Weather—mornings foggy and occasionally cloudy. Days and nights hot. Harvesting of winter rice over. *Kalai* and mustard are still being gathered. Transplanting of *boro* paddy going on. Wheat promising. Prospects of other standing crops good. Common rice selling at an average of 17 seers per rupee
37	Santhal Perghs. „ 25, '90	0·02	Weather—cold and seasonable. Threshing of paddy continues with average outturn. Prospects of *rabbi* crops good.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Jan. 25, '90	Nil	Weather—seasonable. Prospects of crops continue good.
	39	Pooree „ 24, '90	Nil	Weather—seasonable Harvesting of winter rice (late *sarad*) still continues in the Sudder subdivision, but is finished in the Khorda subdivision. *Dalua* and *mung* crops doing well. Price of common rice varies from 21 to 29 seers per rupee in the Sudder subdivision and 20 to 27 seers in the Khorda subdivision.
	40	Balasore „ 25, '90	Nil	Weather—seasonable. *Rubbi* crops doing fairly well.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Jan. 25, '90	Nil	Weather—cold and seasonable. Crops generally very promising. A little rain is needed.
	42	Lohardugga „ 25, '90	0·01	Weather—cloudy. Prospects of *rubbi* crops good. Rain much wanted in the subdivision. Lac gathering finished in Palamow; yield 12 annas on the average.
	43	Singbhoom „ 25, '90	Nil	Weather—seasonable. Oilseeds and pulses are expected to give an outturn of from 12 to 16 annas. Prospects favourable.
	44	Manbhoom „ 26, '90	Nil	Weather—seasonable. Prospects of *rubbi* crops good. Sugarcane is being pressed; probable outturn 12 annas. Coarse rice selling in the Purulia market at 22 seers per rupee.

* Means of six days. † Means of five days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the pas stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 24th of January 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 1st May 1889. Mean for district.	Since 1st May 1889. Normal mean.	Since 1st May 1889. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Divisions.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 28th January* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 24TH JANUARY 1890.

THE meteorological conditions for the previous week had been fairly normal except that for a certain time southerly breezes had set in over parts of the province, and temperature and humidity had become decidedly above the normal On the 18th and 19th of January the changes in the general meteorological conditions over Bengal were unimportant, but on the latter date there was evidence of the formation of a barometric depression, over the North-West Provinces. By the morning of the 20th this feeble depression, which was rather irregularly defined, had apparently travelled south-eastwards into South-West Bengal, and pressure was decidedly low at such stations as Calcutta and Saugor Island, round which area also there was a distinct but feeble cyclonic circulation of winds. With these disturbed conditions a number of rain showers occurred on the 20th in South-West and East Bengal and a few in North Bengal, but the rainfall was only important in East Bengal. On the morning of the 21st this feeble depression had passed away, and conditions became more normal for the north-east monsoon, and continued so in Bengal for the next two or three days; but in the meantime another depression was formed on the 22nd over North-Western India, and on this date its centre was apparently between Sirsa, Multan, and Jacobabad. On the morning of the 23rd the depression had moved in a south-easterly direction, and the centre on this day was apparently between Lucknow and Agra; while on the morning of the 24th the depression had again advanced in a south-easterly direction, and was beginning to make itself felt over Behar and Bengal. On this day, in fact, pressure was from a fifth to a quarter of an inch below the normal over a considerable part of Behar, Chutia Nagpur, and South-West and Central Bengal, but no very definite centre could be assigned to the depression from the observations made in the Bengal Presidency. Winds also appeared to show a rather irregular cyclonic circulation, or perhaps two circulations, the centre of one being in South Behar, and of the other in Chutia Nagpur. This, again, caused conditions to become disturbed over parts of Bengal, and rather numerous showers were reported on the morning of Friday, the 24th, over North Bengal and North Behar; but up to this time the disturbance had not advanced sufficiently far over Bengal to cause rain over the remainder of the province. At the close of the week, therefore, conditions were distinctly favourable for rain over a considerable part of the province. As is usual during the passage of barometric depressions, temperature became abnormally high, while the air was also rather largely saturated with moisture; the sky also became more or less clouded over during the passage of these depressions, so that as two of these depressions have affected the weather in the province during the week under review, the meteorological conditions have been decidedly abnormal.

Pressure—Has been below the normal almost throughout the week, and the mean pressure has been about a tenth of an inch lower than usual. The actual variations in the mean pressure are from a defect of 0 132 inch at Berhampur to one of 0 078 inch at Rungpur.

Temperature—As stated previously, has been decidedly high, particularly during the passage of the depressions, when on some days, such as the 24th, the mean temperature of most of the stations in the west and south-west of the province became from five to nearly nine degrees above the normal The mean temperature for the whole province for the week has been 3·7° above the normal for the period; and while the excess has been fairly equally distributed, the excess temperatures have been largest in Behar and Chutia Nagpur, where they have equalled from four to four and-a-half degrees.

The actual temperatures during the week, the range from day to night, and their variations from the normal values, are best seen in the following table, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are given, together with the normal values. In both day and night temperatures in all districts of the province it will be seen that temperatures have been decidedly high:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 24th January 1890.

	Normal mean maximum temperature for the week ending 24th January.	Actual mean maximum temperature for the week ending 24th January 1890.	Variation of actual mean from the normal. Rainfall.—The rainfall in East Bengal during the week has averaged almost half an inch, in North Bengal about a quarter of an inch, and in North Behar about a fifth of an inch. The falls in South-West Bengal only averaged a few hundredths of an inch, while in Orissa, Chutia Nagpur, and South Behar there was no rain. The districts receiving the largest amounts of rain were—in East Bengal, Furreedpur, Comillah, Mymensingh, and Dacca; in North Bengal, Julpigoree, Rungpur, and Bogra; in North Behar, Chumparun and Purneah; and in South-West Bengal, the Jessore and Khoolna districts.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 24th of January 1890:—

Meteorological Divisions.	Temperature						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day. The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, p passing temporary showers, ⌓ dew; ≡ fog.

MEMORANDUM.

BIRTHS and deaths were registered in the principal Municipalities in Bengal during the week ending 11th January 1890, at the rates, respectively, of 22·8 and 25·9 per 1,000 of population, against 25·8 and 23·7 per 1,000 during the preceding week ending 4th January, indicating a retrogression in the registration of births and an increase in that of deaths.

2. The highest proportions of births and deaths were returned from the following Municipalities :—

Births.

	Ratio per *mille.*
Chupra	42·3
Bali	42·1
Arrah	38·3
Rampore Beauleah	36 8
Midnapore	31·0
Comillah	30·8
Durbhanga	30 7
Jessore	30 6

Deaths.

	Ratio per *mille.*
Poori	58·7
Arrah	58 6
Jessore	55·1
Darjiling	44 5
Chittagong	42·3
Ranaghat	41·9
Burdwan	39 7
Comillah	38·5
Hughli and Chinsurah	36·1
Dacca	33·7

3. The specific diseases, as noted below, proved fatal at the rates exhibited opposite them :—

	Ratio per *mille* during the weeks ending—	
	11th January 1890.	4th January 1890.
Cholera	2·4	2·2
Small-pox	·4	·5
Fever	11·5	9 8
Bowel-complaints	3·1	3·6
Injury	·4	·2
Other causes	8·1	7·3

indicating chiefly, that the mortality from fever was higher during the week under notice than during the preceding week ending 4th January.

4. Of the diseases mentioned above, small-pox was noticeably severe in Poori town, there being seven deaths (mortality 14·7 per 1,000 of population), and bowel-complaints prevailed in Hughli and Chinsurah Municipality (mortality 14·7 per 1,000 population), while cholera, fever and the maladies coming under the head of "Other causes" were reported to have been notably fatal in the following Municipalities :—

Cholera.

	Ratio per *mille.*
Jessore	36·7
Chittagong	9·4
Burdwan	9 2
Howrah	6·3
Dacca	3·9

Fever.

	Ratio per *mille.*
Arrah	49·0
Darjiling	44·5
Purneah	24·2
Rampore Beauleah ...	23·6
Chittagong	21·1

Other causes.

	Ratio per *mille.*
Midnapore	23·2
Poori	18·9
Dacca	14 9
Durbhanga	12 6
Bhagulpore	11·8
Gya	10·2
Chupra	10·1

5. The death-rates under the heads of *Sex*, *Class* and *Age* stood as follows :—

According to Sex.

	Ratio per *mille.*
Males	30·4
Females	21·2
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	143

According to Class.

	Ratio per *mille.*
Christians	14·9
Hindus	25·8
Mahomedans ...	26·5
Budhists	25·7
Other classes ...	76·8

According to Age.

	Ratio per *mille.*
Under 1 year ...	172 1
1 and under 5 years ...	25·2
5 „ 10 „ ...	13·7
10 „ 15 „ ...	9·7
15 „ 20 „ ...	14·1
20 „ 30 „ ...	16·0
30 „ 40 „ ...	23·7
40 „ 50 „ ...	22·4
50 „ 60 „ ...	32·9
60 years and upwards ...	66·4

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 27th January 1890.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending 11th January 1890.

Increase.	Tons.
Cotton piece-goods—	
(1) European	7
This increase is due to steamer service between Jeaganj and Calcutta being stopped for want of sufficient water.	
Grains—	
(2) ice	386
This increase is due to greater export owing to high market rate at Calcutta.	
Jute —	
(1) Raw	101
This increase is due to greater export owing to high rate in some parts of Hooghly district.	

	Tons.
(2) Gunny-bags and cloths	16
This increase is due to the import of gunny-bags for export of rice.	
Oilseeds—	
(3) Til or gingelly	7
This increase is due to there being no traffic under this head last year.	
Silk, raw—	
(2) Indian	28
This increase is due to import of tussur silk cocoons from Raniganj district.	
Sugar—	
(2) Undrained	81
This increase is due to greater import owing to high rate at Azimganj.	
DECREASE.	
Coal	145
This decrease is due to less import owing to previous stock not being exhausted.	
Cotton, raw	19
This decrease is due to previous stock not being exhausted.	
Grains—	
(4) Others	31
This decrease is due to failure of kollyee crops this year.	
Hides and skins—	
(1) Hides of cattle—	
(*a*) Dressed	7
This decrease is due to non-carriage of such articles this year.	
Metals—	
(2) Iron	19
This decrease is due to less demand this year.	
Oilseeds—	
(1) Linseed	16
This decrease is due to non-export this year owing to high rate at Azimganj.	
(2) Mustard and rape	70
This decrease is due to less import owing to local dull market rate.	
Salt	11
The decrease is due to import by boat in previous months.	
Tobacco	6
The decrease is due to non-carriage this year.	

R. G. MOOKERJEE,
Manager, Nalhati State Railway.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 161A.

GENERAL.—*The 24th January* 1890.—Baboo Bhoirub Nath Palit, Deputy Collector is appointed to perform the functions of a Collector under the Public Demands Recovrey Act VII (B C.) of 1880 in the district of Julpigoree.

The 29th January 1890.—Mr. M. Finucane, Director of Land Records, Bengal, acted in the first grade of Magistrates and Collectors from the 14th to the 19th instant, both days inclusive.

Mr. W. Fiddian, Magistrate and Collector, Pubna, acted in the first grade of Magistrates and Collectors from the 14th to the 19th instant, both days inclusive.

Mr. B. Dé, Officiating Magistrate and Collector, Khoolna, acted in the second grade of Magistrates and Collectors from the 14th to the 19th instant, both days inclusive, *vice* Mr. W. Fiddian.

The 31st January 1890.—Mr. J. B. Worgan, District and Sessions Judge, Cuttack, is allowed leave for fifteen days, under article 308 of the Civil Service Regulations, with effect from the date on which he availed himself of it.

Baboo Hurry Mohun Sen, Deputy Magistrate and Deputy Collector, Dacca, is allowed leave for six months, under article 369 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 23rd September 1889.

The 3rd February 1890.—Baboo Gossain Das Hazra, Sub-Deputy Collector, Barh, Patna, is allowed leave for three months, under article 291 of the Civil Service Regulations, with effect from the date on which he may be relieved.

Moulvie Fazlar Rahman, Sub-Deputy Collector, Alipore, Julpigoree, is transferred to Patna, and is posted to the Barh sub-division of that district.

In modification of previous notifications, Mr. R. C. Sterndale is hereby appointed substantively *pro tempore* Cantonment Magistrate of Dum-Dum, and to have charge as Sub-divisional Officer of the villages outside Cantonment limits which constitute the Dum-Dum sub-division.

Mr. C. H. Vowell, C.S., reported his departure from India on furlough on the 19th January 1890.

The 4th February 1890.—Captain W. H. Chase, Northern Bengal Volunteer Rifle Corps, is allowed leave of absence for eight months, with effect from the 1st instant.

Mr. F. J. Monahan, Officiating Joint-Magistrate and Deputy Collector, Serajgunge, Pubna, is vested with the powers of a Collector under Act X of 1870 in that district.

POLICE.—*The 3rd February* 1890.—In modification of the order of the 28th January 1890, first class Inspector E. Robertson, of the Calcutta Police, is appointed to act for Mr. J. E. Millard, Superintendent of the Detective Department, but will remain in charge of the First Division, Town Police, during the absence of Mr. J. Costello, on leave, or until further orders.

Mr. J. E. Millard, Superintendent of the Detective Department, Calcutta Police, in charge of the Third Division, Town Police, is appointed to act for Mr. James Costello, Superintendent of the First Division, Town Police, during his absence on privilege leave. Mr. Millard will, however, continue to hold charge of the Third Division, Town Police.

The 4th February 1890.—Mr. W. H. Cornish, District Superintendent of Police, Maldah, is allowed leave for two days, under article 291 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 17th December last.

Mr. W. A. Gayer, Officiating Assistant Superintendent of Police, Moorshedabad, is transferred to Backergunge.

REGISTRATION.—*The 31st January* 1890.—Moulvi Gowhar Ally, Deputy Magistrate and Deputy Collector, Maldah, is appointed to be also Sudder Sub-Registrar of Maldah, with retrospective effect from the 22nd May last, *vice* Moulvi Zakir Hossein, transferred.

EDUCATION.—*The 4th February* 1890.—Baboo Madhu Sudan Das, Law Lecturer, Ravenshaw College, Cuttack, is allowed leave for six weeks, without allowances, with effect from the 24th ultimo.

Baboo Jogneswar Chandra is appointed to act as Law Lecturer, Ravenshaw College, Cuttack, during the absence, on leave, of Baboo Madhu Sudan Das, or until further orders.

The following notifications are republished from the *Assam Gazette* :—

No. 434*G.*—*The 23rd January* 1890.—Mr. E. Muspratt is appointed to act as Commandant of the Naga Hills Military Police Battalion during the absence, on medical leave, of Lieutenant D. C. F. Macintyre, with effect from the 1st May 1889.

No. 435*G.*—Mr. J. Kennedy, C.S., Deputy Commissioner of Sylhet, was employed on special duty at Shillong from the 1st to the 5th September 1889, both days inclusive.

This reduces the amount of privilege leave granted to Mr. Kennedy in General Department notification No. 289, dated the 12th July 1889, by five days.

No. 1.—*The 23rd January* 1890.—Baboo Nritya Gopal Chatterji, B.L., Extra Assistant Commissioner, made over the executive charge of the Cachar Treasury to Mr. H. Le Mesurier, C.S., on the 31st December 1889.

No. 2.—Mr. L. St. J. Brodrick, Assistant Superintendent of Police, made over the executive charge of the Naga Hills Treasury to Surgeon W. W. White, M.D., on the 31st December 1889.

No. 4.—Mr. R. R. Pope, C.S., reported his return to duty from furlough in the forenoon of the 7th January 1890.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT—(OPIUM).

Baboo Keshri Narain, Officiating Assistant Sub-Deputy Opium Agent, to be Assistant Sub-Deputy Opium Agent, probationary grade, *sub. pro tem.*

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 4th February 1890.—The following rules framed by the Board of Revenue under clause (*c*), section 9 of the Sea Customs Act VIII of 1878, to provide for the weighment of salt by licensed weighmen at the Port of Calcutta, having received the sanction of the Lieutenant-Governor, are published for general information :—

I. From the date of the publication of these rules, no person, other than a weighman licensed under them, shall be employed to weigh salt either on board importing vessels or at the Sulkea warehouses.

II. A weighman includes an assistant.

III. The duty of supplying licensed weighmen may be entrusted to contractors or sirdar weighmen, who will be appointed on the recommendation of the Superintendent of the Preventive Service and receive a license. Contractors and sirdars who have not been licensed by the Collector of Customs will not be recognised by Customs officers.

IV. Any person wishing to become a licensed weighman will be supplied, on application to the Collector of Customs, with a form which he will be required to fill up, and such application should ordinarily be supported by a recommendation from some person directly interested in the importation and weighment of salt. If he is considered suitable, a license will then be granted to the applicant.

V. A licensed weighman, who is guilty of refusal or neglect of duty, may be suspended or dismissed.

VI. Licensed weighmen will make their own arrangements with those persons who require their services, and in this respect Government will not exercise any control over them ; but they are strictly prohibited from receiving any reward or present from the buyers, or their representatives, under penalty of dismissal and of a criminal prosecution.

VII. When on duty a licensed weighman will be required to wear a brass badge, and will be bound to produce his license if asked to do so.

VIII. A complete list of licensed contractors, sirdar weighmen, and weighmen will be supplied to any person interested in the weighment of salt upon application.

Form of Contractor's License.

A. B. is hereby appointed a licensed contractor for the supply of licensed weighmen under the rules prescribed by the Board of Revenue.

Form of Application for Weighman's License.

I, , son of , resident of in the district of , at present residing at , desiring to obtain a license authorizing me to weigh salt on board ships as well as at the Sulkea warehouses, beg respectfully to submit this petition.

I undertake to perform my duties faithfully to Government, and to obey any lawful commands that I may receive.

Form of Weighman's License.

A. B. is hereby appointed a licensed weighman under the rules prescribed by the Board of Revenue.

Descriptive Roll.

NAME.	Father's name.	Residence.	Present residence.	By whom recommended.

K. G. GUPTA, *Offg. Secretary.*

BOARD OF REVENUE, L.P.; CALCUTTA.

DECLARATION.

The 31st January 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of the proposed central distillery at Khoolna, in the village of Tootpara, pergunnah Hogla, zillah Khoolna, it is hereby declared that for the above purpose a piece of land measuring, more or less, 8 beegahs 9 cottahs and 10 chittacks of standard measurement, bounded on the North by the house of Ram Charan Ghose; East by the Strand Road on the bank of the river Roopsa; South by the land of Ram Charan Ghose and others; and West by Kali Charan Boona's land, is required within the aforesaid village of Tootpara.

A plan of the required land may be inspected at the Collector's office.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 31st January 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for a distillery in the village of Bankoora-Rampore, pergunnah Bishanpore, thana Bankoora, zillah Bankoora, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 beegahs and 4 gandas of standard measurement, bounded on the North by Dasu Bauri's house and a piece of waste land; East by Jagat Baishnabi's garden; South by waste *debattar* land of "Raghu Nath Jieu"; and West by the tank called "Duber Band," is required within the aforesaid village of Bankoora-Rampore.

A plan of the required land may be inspected at the Collector's office.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 162A.

The 30th January 1890.—The following gentlemen are appointed to be Honorary Magistrates of the Bench at Khoorda, in the district of Pooree, and are vested with the powers of a Magistrate of the third class:—

Chowdhury Aziz Mohamed. | Pandit Jogobandhu Mohapater.
Baboo Khrustna Mohan Patnaik.

The Lieutenant-Governor accepts the resignation tendered by Ray Bhagbut Mohanti Bahadur of his appointment as an Honorary Magistrate of the Bench at Khoorda, in the district of Pooree.

Baboo Kherod Chundra Roy is appointed to be an Honorary Magistrate of the Independent Bench at the head-quarters of the Madaripore sub-division of the district of Furreedpore, and is vested with the powers of a Magistrate of the third class.

The 31st January 1890.—Baboo Hemango Chandra Bose, Subordinate Judge, Hooghly, is allowed leave for six months, under article 369 of the Civil Service Regulations, with effect from the afternoon of the 14th December 1889.

Baboo Jodu Nath Das, Subordinate Judge of Patna, is allowed leave for one month and twelve days, under article 306(*b*) of the Civil Service Regulations, with effect from the date on which he availed himself of it.

The 1st February 1890.—Mr. Taheiruddin Ahmed, substantive *pro tempore* Munsif of Arrareah, in the district of Purneah, is appointed to be a substantive *pro tempore* Additional Munsif in the district of Dacca, to be ordinarily stationed at the Sudder station.

Baboo Nibarun Chandra Banerjee, Additional Munsif of Dacca, is appointed to be a Munsif in the district of Purneah, to be ordinarily stationed at Arrareah.

Baboo Sri Hari Lahiri, B.L., is appointed to act, until further orders, as a Munsif in the district of Purneah, to be ordinarily stationed at Arrareah, *vice* Baboo Nibarun Chandra Banerjee.

Baboo Ashutosh Chatterjee is appointed to be an Honorary Magistrate of the Kooshtea Bench, in the district of Nuddea, and is vested with the powers of a Magistrate of the third class.

The Lieutenant-Governor accepts the resignation tendered by Baboo Upendra Chundra Roy of his appointment as an Honorary Magistrate of the Narail Bench, in the district of Jessore.

Baboo Mohendro Nath Banerjee is appointed to be an Honorary Magistrate of the Municipal Bench at Kotrung, in the district of Hooghly, and is vested with the powers of a Magistrate of the third class.

Baboo Bungshidhur Sen is appointed to be an Honorary Magistrate of the Narail Bench, in the district of Jessore, and is vested with the powers of a Magistrate of the third class.

The 4th February 1890.—Baboo Rajendra Lal Ghosh, B.L., is appointed to act as a Munsif in the district of Gya, to be ordinarily stationed at the Sudder station of that district, during the absence, on leave, of Shah Latafut Hossein, or until further orders.

Baboo Bepin Behary Mookerjee, Deputy Magistrate and Deputy Collector, Bhagulpore, is vested with powers under sections 110, 133, 143, 144, 174, 186, 191 and 524 of the Code of Criminal Procedure.

Baboo Bepin Behary Bose is appointed to be an Honorary Magistrate of the Independent Bench at Jessore, and is vested with the powers of a Magistrate of the third class.

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Moulvie Sarfraz Hossein Khan and Moulvie Mohamad Quaim, Honorary Magistrates of the Jhowgunge Bench, Patna, to take down evidence in criminal cases in the English language.

GRANT OF LEAVE TO MUNSIFS.—*The 31st January* 1890.—Shah Latafut Hossein, Munsif of Gya, is allowed leave for two months, under article 369 of the Civil Service Regulations, with effect from the date on which he may be relieved.

The 1st February 1890.—Baboo Gobind Deb Mukerjee, Munsif of Sudharam, in the district of Noakholly, is allowed leave for six months, under articles 266 and 369 of the Civil Service Regulations, with effect from the 25th January 1890.

Baboo Hari Narain Roy, Munsif of Sibgunge, in the district of Rajshahye, is allowed leave for one year, under article 371 of the Civil Service Regulations, with effect from the date on which he may be relieved.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—The following revised rule is substituted for Rule XV of the Rules made by the Lieutenant-Governor under the power vested in him by section 4 of Act III (B.C.) of 1879 (entitled "an Act to provide for the periodical inspection of Steam-boilers and Prime-movers attached thereto in the Town and Suburbs of Calcutta and in Howrah"), and since extended by notifications to places in the districts of Hooghly, Howrah, and the 24-Pergunnahs, within a radius of 30 miles from Calcutta, to the sub-divisions of Raneegunge, Giridhi, and Gobindpore, and the district of the Sonthal Pergunnahs :—

XV. The Inspector shall give one week's notice of every such intended thorough examination ; and if after that notice the boilers are not empty, cool, clean, and ready for inspection on the date named, the Inspector shall prohibit the boilers from working, and shall report the case to the Commissioners. Further, if any request be made to remove fittings or settings, and such be not complied with, the Inspector shall in like manner stop the working of the boilers.

Provided that the inspection of boilers in the Raneegunge, Giridhi, and Gobindpore sub-divisions, and in the district of the Sonthal Pergunnahs, shall be made during the months of November to May inclusive, and the Inspector shall give 14 days' notice of the day when he will make such inspection.

If any boiler needs inspection in the Raneegunge, Giridhi, and Gobindpore sub-divisions, and in the district of the Sonthal Pergunnahs, during the months of June to October inclusive, either as being a new boiler requiring a certificate, or as being a boiler which the owner for any other reason wishes to have inspected, it may, on the application of the owner, manager, or agent, be inspected during that period.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 21st January 1890.—Under section 2 of Act II (B.C.) of 1867 (an Act to provide for the punishment of public gambling and the keeping of common gaming houses), the Lieutenant-Governor is pleased to authorize the extension, from the 1st February 1890, of the provisions of the said Act to the villages of Saidpore and Kuja Saidpore (commonly known as the town and bazar of Saidpore), within the jurisdiction of the police-station of Nilphamari and the district of Rungpore. The boundaries of the tract within which the said Act shall be in force are as follows:—

North—A straight line drawn from the Saidpore Rifle Range to Penduram Bairagi's house.

South—A straight line drawn from the east of Baboopara to the village road east of Nanku Havildar's para.

East—A straight line drawn from Penduram Bairagi's house to the east of Baboopara.

West—A straight line drawn from the village road east of Nanku Havildar's para to the Saidpore Rifle Range.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 22nd January 1890.—It is hereby notified that the Lieutenant-Governor authorises the extension of the provisions of section 34 of Act V of 1861 to the town comprising the places known as Makundprosad, Jagarsing and Gurujang, in the district of Pooree, within the boundaries noted below, with effect from the 1st April 1890—

Bounded on the north by Tangiapara, Nuagan, Kumbharbast and Kunjiama; on the south by Sanpala, Khorda, and Jaganathpur; on the east by Bartola and Kholadwar; on the west by Sardhapur.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 18th January 1890.—Under section 2 of Act II (B.C.) of 1867 (an Act to provide for the punishment of public gambling and the keeping of common gaming-houses), the Lieutenant-Governor authorizes the extension, from the 1st February 1890, of the provisions of sections 11 to 14 of the said Act to the town of Rampore Hât (including Brahamanigram, Kalisaura, and Khalasiparah), in the district of Beerbhoom.

2. For the purposes of the above Act, the boundaries of the place shall be as follows:—

North—East Indian Railway Rifle Butts.
South—Sanghatta khal.
East—Khair tank.
West—Village Suitalla.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

DECLARATION.

The 4th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a police outpost in the village of Khaprail Bazar, pergunnah Midnapore, zillah Midnapore, it is hereby declared that for the above purpose a piece of land measuring, more or less, 7 cottahs and 8 chittaks of standard measurement, bounded on the east by the house of Issur Panday, on the north and west by public roads, and on the south by Ram Moyra and Baburam Garari's house, is required within the aforesaid village of Khaprail Bazar.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

IRRIGATION.

The 4th February 1890.

No. 31.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a chowkidar's shed on the Lathan Distributary at the 7th mile 30th chain, it is hereby declared that for the above purpose a piece of land measuring about 243 feet in length and 140 feet in width, and containing an area of 8 roods and 5 poles, more or less,

situate in mouzah Katarea, pergunnah Pero, bounded on the north by lands belonging to Ramdeyal Rai and Ramtahal Rai; on the east by lands belonging to Ramdeyal Rai; on the south by lands belonging to Loochal Churihor; and on the west by the Lathan Distributary, is required in the district of Shahabad.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Govt. of Bengal, P. W. Dept.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 29th January 1890.—Whereas a notification dated the 27th September 1889, declaring the intention of the Lieutenant-Governor to extend the provisions of Act IV (B.C.) of 1865 (an Act for the prohibition of the practice of inoculation) to the whole of the district of Chumparun was published at page 217, Part IB. of the *Calcutta Gazette* of the 2nd October 1889, and whereas no valid objection has been raised within one month from the date of the publication of the notification within the district, it is hereby notified that, in the exercise of the powers vested in the Local Government under section 3 of the Act, the Lieutenant-Governor declares that the provisions of the Act be extended to the said district.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Dr. E. Bovill, Civil Surgeon of Chumparun, to be a Commissioner of the Motihari Municipality in that district, *vice* Dr. R. D. Murray, transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Sudder Local Board, in the district of Bhagulpore, under section 29 of Act III (B.C.) of 1885, of Baboo Kanai Lall Singh to be their Chairman, *vice* Mr. C. P. Caspersz, C.S., transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that the Lieutenant-Governor approves the election, under section 27 of Act III (B C.) of 1884, by the Commissioners of the Naraingunge Municipality, in the district of Dacca, of Mr. W. Rattray to be their Chairman, *vice* Mr. H. F. Wilson, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that the Lieutenant-Governor approves the election, under section 27, Act III (B.C) of 1884, by the Commissioners of the Manicktollah Municipality, in the district of the 24-Pergunnahs, of Kumar Gopendra Krishna Deb Bahadur, C.S., to be their Chairman, *vice* Mr. Kedar Nath Roy, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd February 1890.—Whereas a notification, dated the 18th October 1889, declaring the intention of the Lieutenant-Governor to sanction the imposition, under section 85 (*b*), Act III (B.C.) of 1884, by the Commissioners of the South Suburban Municipality, in the district of the 24-Pergunnahs, of a rate on the annual value of all holdings situated within the Municipality, in lieu of the tax upon persons under clause (*a*) of the said section now imposed, was published at page 226, Part IB of the *Calcutta Gazette* of the 23rd idem, and whereas no objection has been raised to the proposed measure, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 85 of the said Act, and in accordance with the recommendation of the Commissioners of the South Suburban Municipality made at a meeting, the Lieutenant-Governor sanctions the imposition by the Municipal Commissioners of the said rate within the limits of the said Municipality.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd February 1890.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of Act III (B.C.) of 1884, and in accordance with the recommendation of the Commissioners of the North Dum-Dum Municipality, in the district of the 24-Pergunnahs, made at a meeting, to extend the provisions of Part IX of the said Act to the villages of Kadihatti and Nimta in Wards I and II respectively of the above Municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal

NOTIFICATION.

The 3rd February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Mr. J. Windsor, C.S., to be the Chairman of the Bettiah Municipality, in the district of Chumparun, *vice* Mr. H. Luson, transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd February 1890.—It is hereby notified for general information that in accordance with the recommendation of the Commissioners of the Garwah Municipality in the district of Lohardugga, made at a meeting, and in the exercise of the power conferred on him by section 9 of Act III (B.C.) of 1884, the Lieutenant-Governor intends to revise the southern and eastern boundaries of the said Municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality. The revised southern and eastern boundaries are as follows:—

On the South.—From Jhanukia Ahar to the northern boundary land-mark of pucca terrace of mouzah Tenar on the right bank of the river Danroo, and thence along the right bank of the same river to the point where it meets and is crossed by the Gurwa-Peska village road.

On the East.—The Hariyara Sote from the trijunction of villages Sone Purwa, Bhoratia, and Chetna to the junction of the Hariyara Sote with the Danroo river, and thence straight to the point of Jhanukia Ahar, where it meets the southern boundary.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

ERRATUM.

The 4th February 1890.—In the notification dated 7th January 1890, containing the names of the elected and appointed members of Local Boards in the Bankoora district, published at pages 6 and 7 of Part IB of the *Calcutta Gazette* of the 8th idem, *for* "Baboo Soron Chandra Pal" *read* Baboo "Poran Chundra Pal."

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 30th January 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Dacca Municipality for a public purpose, viz. for the extension of the Jubilee Street in Uari, in the town of Dacca, pergunnah Jahangirnagar, zillah Dacca, it is hereby declared that for the above purpose a piece of land, measuring more or less, 3 cottahs of standard measurement, is required. The land is bounded on the North by Uari Khal; on the East by Jagabandhu Karmakar's house; on the South by Bhojohari Shaha's Street; and on the West by Dwarika Nath Chakravarti's land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

WEDNESDAY, FEBRUARY 5, 1890.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of the Nizamut lakhiraj State lands situated in the district of Nuddea will be put up to sale at the Collectorate of Nuddea on the 13th March 1890, corresponding with 1st Chyte 1296 B.S.

The purchasers of the plots will be subject to the following conditions :—

I.—The plots will be sold revenue free to the highest bidders above the upset price.

II.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up for sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

V.—The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

N. K. Bose, for Collector.

NOTICE is hereby given that the undermentioned plot of the Nizamut lakhraj State lands, situate in the district of 24-Pergunnahs, will be put up to sale at the Collectorate of the 24-Pergunnahs on Friday, the 28th March 1890—

The purchaser of the plot will be subject to the following conditions :—

I.—The plot will be sold revenue-free to the highest bidder above the upset price.

II.—The sale to be subject to existing leases, and to the rights conferred by the settlement proceedings and by the laws in force, and purchaser to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the plot to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

V.—The purchaser shall be put in possession on receipt of the orders of the Collector approving of the sale, but such possession shall be liable to be disturbed in case the final confirmaton of the Board of Revenue should not be accorded to the proceedings.

Port Commrs.' Office, Calcutta, the 1st February 1890. (3500—1) G. H. SIMMONS, Vice-Chairman.

Notice.

IN continuation of notice, dated the 9th October 1889 published at page 1656, Part II of the *Calcutta Gazette* of 30th October 1889, regarding the Barque *Grosvenor*, it is further notified that the said vessel, with all her masts, sails, gear, and appurtenances which may be on board her on the 19th day of April 1890, will be sold by auction to the highest bidder on Saturday, the 19th of April 1890.

The sale will be held at the Port Office, Chittagong, and will commence at 3 P.M.

Terms—25 per cent. on fall of the hammer if desired by Receiver of Wrecks: the balance within a week of sale and before taking delivery. If the purchaser fails to pay the balance within seven days from date of sale, the vessel will be re-sold at his risk and expense. The vessel can be inspected at Chittagong by application to the Receiver of Wrecks.

E. GOOD, Receiver of Wrecks.

(3498—4)

WANTED a Sub-Overseer for the District Works, Maldah, on Rs 40 pay and Rs. 10 horse allowance. None need apply who is not a passed Sub-Overseer and has sufficient practical experience in road works. All applications, with copies of testimonials, must reach the undersigned on or before the 10th February 1890.

JOGENDRO NATH GHOSE, District Engineer.

(3473—2)

Notice.

WANTED a Record-keeper for the Maldah Collectorate on a salary of Rs. 40 rising to Rs. 60 by biennial increments of Rs. 2.

No one need apply who has not had previous experience in a similar post. The selected candidate is to furnish security to the extent of Rs. 500, either in Government Promissory Notes or in cash.

Applications will be received up to 25th February next.

POORNO CHUNDRA CHATTERJEE,
Deputy Collector in charge.

Excise.

NOTIFICATION.

1. The right of retail sale of the Liquors and Drugs specified below will be put up to auction at the Opium Sale-room, Board of Revenue, 2, Bankshall Street, on Tuesday, the 11th February 1890, and subsequent days, in the following order :—

Name of article.	Date of sale.
Country Spirit	Tuesday, 11th February 1890, commencing at 11 A.M. Wednesday, 12th ditto ditto ditto. Thursday, 13th ditto ditto ditto.
Rum and Imported Liquor by glass ...	Friday, 14th ditto ditto ditto.
Ganja, Siddhi, Charas, Majum ...	Monday 17th ditto ditto ditto. Tuesday, 18th ditto ditto ditto.
Opium, Madak, Chandu	Wednesday 19th ditto ditto ditto. Thursday, 20th ditto ditto ditto.
Tari	Friday, 21st ditto ditto ditto. Saturday, 22nd ditto ditto ditto.

2. A complete list of all the shops for which licenses will be offered and a copy of each form of license are open to general inspection at the Office of the Superintendent of Excise Revenue, 4, Bankshall Street, and the number of these shops is not under any circumstances to be increased during the term of three years ending the 31st March 1893, except under the sanction of the Commissioner of Excise, Bengal, in each case. The Superintendent of Excise Revenue, however, reserves to himself the right, in case of combination, or for other cause, to transfer, before its settlement, any shop from the locality specified, to some other locality in the neighbourhood, being within a distance of 150 yards from the advertised shop or premises, provided that in cases of re-sale the transfer does not bring the shop within a quarter of a mile of any other similar shop which has been settled at any previous sale and the term of whose license is unexpired.

3. It is not at present intended to open any other shop during the term of the license; but the Superintendent of Excise Revenue does not absolutely bind himself in this respect. On special cause shown, and with the sanction of the Commissioner of Excise, Bengal, in each case, the number of shops may be increased: provided, however, that, whenever a new shop is opened, it will be optional to the holder of a similar license for the sale of Liquor or Drugs, if his shop is within a quarter of a mile of the new shop, to surrender his license without forfeiting his advance, when the Superintendent of Excise Revenue is to re-settle the shop by auction or otherwise.

4. The right of retail sale of the Liquors and Drugs is to be put up to auction at upset prices sanctioned by the Commissioner of Excise, Bengal.

5. The right of retail sale of the Liquors and Drugs is to be put up to auction in separate lots of one or more shops either in the order specified in the list, or in such other order as the officer conducting the sale may deem fit. When one lot has been sold, the next lot is not to be put up until the sum payable in advance on account of the lot already sold has been actually paid: provided, however, that where the sum payable exceeds Rs. 25, a promissory note may be taken from any respectable and well-known purchaser in lieu of cash payment.

6. The purchasers of the right of retail sale of Country Spirit, Rum, and Imported Liquors are entitled to sell Imported Liquors by the glass only, the liquor to be drunk *on* the premises.

7. The auction is to be held subject to the following conditions :—

(*a*)—That the Superintendent of Excise Revenue does not bind himself to accept the highest or any bid.

(*b*)—That the settlement with each accepted purchaser will, in Calcutta and the Suburbs, be contingent on the production by him of the usual Police certificate or license as the case may be, viz.—

For Excise licenses for— Dosta ... ... Rum ... ... Imported Liquors by glass ... ... Tari ... ... Ganja ... ... Siddhi ... ... Charas ... ... Majum	If to be held in Calcutta, a Police certificate in the form prescribed by section 30, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police certificate in the form prescribed by section 19, Act II (B.C.) of 1866, must be produced.
For Excise licenses for— Opium ... ... Madak ... ... Chandu	If to be held in Calcutta, a Police license in the from prescribed by section 39, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police license in the form prescribed by section 22 of Act II (B.C.) of 1866 must be produced.

(*c*)—That the person accepted as the purchaser is to state in writing, within seven days from the date of settlement, in what building he purposes to open his shop, and is at the same time to submit a plan showing clearly and distinctly what building or portion thereof he desires to be covered by the license, it being understood that the removal of shops to other premises than those named in the list attached to this notification will be contingent on the approval of both the Excise and Police authorities, and that any sum which has been paid as an advance of the license fee under the provisions of clause (*d*) of these conditions will be returned to any person to whom a license may be subsequently refused for Police reasons.

(*d*)—That the term of the license is to be for three years ending the 31st March 1893, and that, except in the case of Tari, the license fee for that period is to be paid in advance in the following instalments:—namely, the sum equivalent to the fee for two months, at the time of sale, and one month's fee on the date on which the currency of the license commences, and one month's fee on the 1st day of every succeeding month, until the whole of the fee due on the license shall have been paid. In the case of Tari only one month's fee is to be paid in advance at the time of sale, and fifteen days' fee on the date on which the currency of the license commences, and the rest of the fee in half-monthly instalments, viz., on the 1st and 16th day of every month, until the whole of the fee due on the license shall have been paid. This condition is to be strictly enforced in future, and failure to comply with it is to be met by immediate cancelment of the license.

(*e*)—That the purchaser is not to be entitled to receive back any portion of his advance in the event of his shop being closed before the expiration of the term of the license on violation of any of the conditions of the license, or his being convicted of a non-bailable criminal offence, or of any offence against the Excise laws or rules; and in the case of the surrender of a license under Act VII (B.C.) of 1878, the licensee is to give fifteen days' previous notice in writing to the Superintendent of Excise Revenue, and pay a sum equal to the license fee for fifteen days, over and above the amounts already paid in advance; and in the case of the surrender of a license under Act I of 1878, the licensee is to give one month's previous notice in writing to the Superintendent of Excise Revenue, and pay such fine not exceeding six months' license fees as the Superintendent of Excise Revenue may adjudge, over and above the amounts already paid in advance.

(*f*)—That the currency of the license is to commence on the 1st April 1890 on which date the purchaser is to open his shop, in all respects prepared for the accommodation of customers, to be certified by an Excise Officer—failure to comply with this condition is to be met by the immediate cancelment of the license and the forfeiture of the deposit, except in the case of delay caused by the non-issue of the Police certificate or Police license, for which a reasonable extension of time may be allowed upon application and cause shown to the Superintendent of Excise Revenue.

(*g*)—That where the amount of the sum payable in advance is required to be paid at once in cash, and the bidder fails to make such payment, the officer conducting the sale is either immediately to put up the lot again for sale, or after the other lots in the list have been disposed of, or he may postpone the sale to such future date as he shall then and there notify; and the defaulting purchaser is to be debarred from bidding for such lot or for any other lot, and he is not to be allowed to remain in the auction-room; and that the defaulting purchaser will be liable for any loss that may accrue to Government in case it becomes necessary to re-sell a lot at a lower rate either in consequence of his failure to deposit the sum payable at the time of sale, or to redeem his promissory note on or before 4 P.M. on the day following that on which the note was signed.

(*h*)—That the purchasers are to adhere to all the provisions of the Opium, Excise and Police laws, and of the rules which have been or may from time to time be prescribed by the Board of Revenue.

8. All sales subsequent to the date of the triennial sale in March are to be held subject to the conditions contained in this notification, so far as they may be applicable.

9. Any further information regarding the auction may be had on application at the Office of the Superintendent of Excise Revenue.

D. G. BONNERJEE,
Superintendent of Excise Revenue,
Calcutta, the Suburbs, Howrah, and Bally.

OFFICE OF THE SUPDT. OF EXCISE REVENUE; 4, BANKSHALL STREET, CALCUTTA, *the* 15*th January* 1890.

Notification.

IT is hereby notified that under section 46 of the Local Self-Government Act III (B.C.) of 1885, the District Board of Dacca have at their Special Meeting, held on the 11th January 1890, determined to levy the road cess in this district for the ensuing financial year 1890-91 at the maximum rate of one-half anna or six pies in the rupee on the annual value of lands.

L. HARE, Chairman.

Dacca District Board's Office, the 11th January 1890.

NOTICE is hereby given that Mary Stephen, who obtained a decree *nisi* on the 23rd January 1890 in the High Court for dissolution of marriage against her husband S. S. Stephen, has revoked and cancelled the power-of-attorney which she executed in his favour, and that the said S. S. Stephen has no authority to act as her attorney in any matter whatsoever. Any payment of money therefore to the said S. S. Stephen on account of the said Mary Stephen will not be recognised.

GONESH CHUNDER CHUNDER, Attorney for Mary Stephen.

Calcutta, the 27th January 1890. (3491—3)

Stolen.

THE Government Promissory Note No. 160426, of the 4 per cent. of 1865, for Rs. 1,000, and the Government Promissory Note No. 205964, of the 4 per cent. of 1865, for Rs. 1,000, the former originally standing in the name of the Bank of Bengal, last endorsed to Soorendra Nath Mookerji, who in January 1889 endorsed to his wife Shrimoti Khiroda Debya, the proprietor, by whom it was never endorsed to any other person; the latter originally standing in the name of the Comptroller-General, last endorsed to Soorendra Nath Mookerji, who in January 1889 endorsed to his wife Shrimoti Khiroda Debya, by whom it was never endorsed to any other person. Payment of the above Notes, and the interest thereupon, have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicates in favour of the proprietor.

SOORENDRA NATH MOOKERJI, Resident of Berijhatty under Serampore, zillah Hooghly, at present residing at Dholy *vid* Dholy P. O., zillah Mozufferpore.

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt. of Bengal.*

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observation taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e.*, from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal, Daily Report, and to the Accountant and Treasurer Bengal Secretariat, for the other reports.

ALEX. PEDLER,
Offg. Meteorological Reporter to the Govt. of Bengal.

Meteorological Office, Bengal, the 17th March 1886.

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage. Rs. A. P.	With postage. Rs. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ..	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.

	For town. Rs. A. P.	For mufasil. Rs. A. P.
For the Calcutta Series per copy ...	0 8 9	0 10 3
„ each of the Madras, Bombay and Allahabad Series per copy	0 5 3	0 5 9
„ the Calcutta Series. For the year ...	7 2 6	8 6 3
„ each of the Madras, Bombay and Allahabad Series. For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Reports should apply to—

Superintendent, Government Press, Madras.
The Government Central Book Depôt, Bombay.
„ Curator of Government Books, North-Western Provinces and Oudh.
„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1889 *should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.*

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance—

	One page.	Half page.	Quarter page.
For one issue ...	Rs. 20	Rs. 14	Rs. 9
„ three issues ...	„ 55	„ 36	„ 24
„ six „ ...	„ 100	„ 68	„ 45
„ nine „ ...	„ 145	„ 96	„ 64
„ twelve „ ...	„ 180	„ 120	„ 80

NOTICE.

IT is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

Trial of Civil Suits. In Urdu. 4*a.* (1*a.*)

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

*** *No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs 45 in India, and 3 guineas in England, exclusive of packing and postage.*

Archæological Survey of India. Reports on the. By GENL. A. CUNNINGHAM, C.S.I. Super royal 8vo, full cloth. Vols. VI and XIX to XXIII only available. Rs. 6 (6*a*.) each. General Index to Volumes I to XXIII. Rs. 6 (6*a*.)

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 31st January, 1890:—

No. 3 OF 1890.

A Bill to Amend the Indian Factories Act, 1881.

WHEREAS it is expedient to amend the Indian Factories Act, 1881; It is hereby enacted as follows:— of 1881.

1. For the words "one hundred" in section 2 of the said Act the word "twenty" shall be substituted.

Amendment of definition of "factory" in section 2, Act XV, 1881.

2. For the word "seven" in sections 4, 5, 6 and 16 of the said Act the word "nine" shall be substituted.

Amendment of sections 4, 5, 6 and 16, Act XV, 1881.

3. To section 4 of the said Act the following shall be added, namely:—

Addition to section 4, Act XV, 1881.

"or for more than the time allowed by this Act for the employment of women."

4. (1) For the first clause of section 7 of the said Act the following shall be substituted, namely:—

Amendment of section 7, Act XV, 1881.

"No woman shall be actually employed more than eleven hours, nor any child more than nine hours, in any factory in any one day."

(2) In the second clause of the same section, before the word "child" the words "woman or", and between the words "allowed to" and the word "him" the words "her or" shall be inserted.

(3) In the last clause of the same section, for the words "A child shall not be deemed to be employed" the words "A woman or child shall not be deemed to be actually employed" shall be substituted.

5. For section 8 of the said Act the following shall be substituted, namely:—

Substitution of new section for section 8, Act XV, 1881.

"8. Every occupier of a factory in which women or children are employed shall, before the beginning of each month, fix, according to the castes or classes to which such women or children belong or otherwise, not less than four days in such month to be observed as holidays by each woman or child employed in the factory, and shall forthwith give notice of the days so fixed to such officer as the Local Government may, from time to time, appoint in this behalf.

Allowance of holidays to women and children.

"An occupier of a factory may, with the previous sanction of the Inspector, substitute, for any day fixed under this section, another day in the same month.

"A woman or child shall not be employed in such factory on a day fixed under this section as a day to be observed as a holiday by the woman or child, unless when another day has been substituted for such day as hereinbefore provided, in which event the woman or child shall not be employed in such factory on the day so substituted."

6. In section 9 of the said Act, before the word "child" the words "woman or" shall be inserted.

Amendment of section 9, Act XV, 1881.

Amendment of section 15, Act XV, 1881.

7. (1) In clause (*a*) of, and the second proviso to, section 15 of the said Act, between the words "any" and "each" respectively and the word "child" the words "woman or", and in the same proviso between the words "two or more" and the word "children" the words "women or", shall be inserted.

(2) For clauses (*e*) and (*f*) of the same section the following shall be substituted, namely:—

"(*e*) neglects to fence any machinery or mill-gearing in any factory;

(*f*) neglects to maintain a supply of water for the use of persons employed in any factory;

(*g*) neglects to ventilate any factory or to keep any factory in a cleanly state and free from effluvia arising from any drain, privy or other nuisance;

(*h*) suffers any factory to be so overcrowded, while work is carried on therein, as to be injurious to the health of the persons employed therein; or

(*i*) neglects to give any notice or furnish any return,".

Amendment of section 18, Act XV, 1881.

8. (1) For clauses (*b*), (*c*) and (*d*) of section 18 of the said Act the following shall be substituted, namely:—

"(*b*) the water-supply to be maintained for the use of persons employed in factories;

[41 Vict. c. 16, s. 61 (1).] (*c*) the ventilation of factories and their cleanliness (including lime-washing, painting, varnishing and washing) and freedom from effluvia arising from any drain, privy or other nuisance;

(*d*) the prevention of such overcrowding of factories, while work is carried on therein, as is likely to be injurious to the health of the persons employed therein;

(*e*) the obligation of occupiers of factories to furnish true returns, occasional or periodical, on and in accordance with the requisition of the local Inspector or the Local Government;

(*f*) the inspection of factories;

(*g*) the manner in which appeals under this Act are to be presented and heard; and

(*h*) otherwise carrying out the purposes of this Act."

(2) To the same section the following shall be added, namely:—

"Before making rules under clause (*b*), clause (*c*) or clause (*d*) of this section, the Local Government shall publish in such manner as may in its opinion be sufficient for giving information to persons interested a draft of the proposed rules, with a notice specifying a date at or after which the draft will be taken into consideration, and shall consider any objection or suggestion which may be received from any person with respect to the draft before the date so specified."

References to Act XV of 1881 to be read as references to that Act as amended by this Act.

9. A reference in any enactment or document to the Indian Factories Act, 1881, shall be read as a reference to that Act as amended by this Act.

[Cf. Ind. Act XIII 1887, s. 3 Bom. Act 1888, s. (2); and Act IV, s. 10 (2) (iii) and (1).]

IV of 18

STATEMENT OF OBJECTS AND REASONS.

THE Government of India, having recently had under its consideration the reports of Local Governments on the operation of the Indian Factories Act, 1881, and the proceedings of the Commission appointed in 1884 to consider the working of factories in the Bombay Presidency, is of opinion that the Act of 1881 should be so amended as to—

(*a*) bring within its scope any factory in which not fewer than twenty hands are employed,

(*b*) raise from seven to nine years the age below which a child may not be employed in a factory,

(*c*) limit the hours of work for women to eleven in any one day,

(*d*) extend to women the provisions of the Act with respect to the allowance of holidays to children, and enable occupiers of factories to fix such days as holidays for the women and children employed therein as, having regard to the different classes or castes to which they belong, may be most convenient for them,

(*e*) authorise Local Governments to make sanitary rules suited to local requirements, and

(*f*) render it obligatory on occupiers of factories to furnish such statistics as may from time to time be required by the Government.

The object of the Bill is to amend the Act accordingly.

Among the enactments which will be incidentally affected by the Bill (section 9) are the Electricity Act, 1887, the City of Bombay Municipal Act, 1888, and the Indian Merchandise Marks Act, 1889.

A reprint of Act XV of 1881, with the proposed amendments set forth in italics, is appended to this Statement.

The 31st January, 1890. ANDREW R. SCOBLE.

APPENDIX.

ACT No. XV of 1881.

(As amended by the Bill.)

An Act to regulate labour in Factories.

Preamble. WHEREAS it is expedient to regulate labour in factories: It is hereby enacted as follows:—

Preliminary.

Short title. 1. This Act may be called the Indian Factories Act, 1881.

Local extent. Commencement. It applies to the whole of British India, and shall come into force on the first day of July, 1881.

Interpretation-clause. 2. In this Act, unless there is something repugnant in the subject or context,—

"factory" means any premises (other than indigo-factories or premises situated on, and used for the purposes of, a tea or coffee plantation) wherein or within the precincts of which manual labour is carried on, for not less than four months in the year, in any one year, any process for, or incidental to, making, altering, repairing, ornamenting, finishing or otherwise adapting for use, transport or sale, any article or part of an article; and

(*a*) wherein steam, water or other mechanical power is used in aid of any such process; and

(*b*) wherein not less than *twenty* persons are on any day simultaneously employed in any manual labour in, or incidental to, any such process; and

every part of a factory shall be deemed to be a factory, except any part used exclusively as a dwelling:

"child:" "child" means a person under the age of twelve years:

"mill-gearing:" "mill-gearing" includes every shaft, whether upright, oblique or horizontal, and every wheel, drum, pulley, rope, driving strap or band, by which the motion of the first moving power is communicated to any machine:

"employed." a child who works in a factory, whether for wages or not, either in a manufacturing process or handicraft, or in cleaning any part of the factory used for any manufacturing process or handicraft, or in cleaning or oiling any part of the machinery, or in any other kind of work whatsoever incidental to, or connected with, the manufacturing process or handicraft, or connected with the article made or otherwise the subject of the manufacturing process or handicraft therein, shall be deemed to be employed therein within the meaning of this Act.

Inspectors and certifying Surgeons.

Inspectors. 3. The Local Government may in its discretion, by notification in the official Gazette, appoint such persons as it thinks fit to be Inspectors of factories within such local limits as it may assign to such Inspectors, and may suspend or dismiss any person so appointed.

In default of such appointment, the Magistrate of the district shall, in virtue of his office, be Inspector of all factories (if any) in the district.

Such Inspectors shall be deemed public servants within the meaning of the Indian Penal Code; and shall be officially subordinate to such authority as the Local Government may, from time to time, indicate in this behalf.

Powers of Inspector. 4. An Inspector of factories may, within the local limits for which he is appointed,—

(*a*) enter, with such assistants (if any) as he thinks fit, any factory whenever he has reason to believe that any person is employed therein;

(*b*) make such examination of the premises and machinery, and of the registers hereinafter prescribed, and take on the spot or otherwise such evidence of any person, as such Inspector may deem necessary for carrying out the provisions of this Act;

(c) order that any person shall not be employed in a factory when he has reason to believe that such employment would be in contravention of this Act—

until the age of such person has been certified, in the manner hereinafter provided, to be above *nine* years; or,

for more than the time allowed by this Act for the employment of children until his age has been so certified to be above twelve years; *or*

for more than the time allowed by this Act for the employment of women.

Certifying surgeons.

5. The civil surgeon or such other person practising medicine or surgery as the Local Government may, from time to time, appoint in this behalf for any local area (hereinafter called the certifying surgeon) shall, at the request of any person employed or desirous of being employed in a factory situate in such local area, or of the parent or guardian of such person, examine such person and grant him a certificate, stating whether his age, as nearly as it can be ascertained from such examination, is above or below *nine* years, or twelve years, as the case may be.

Women and Children.

Age *for* employment *of children.*

6. No child shall be employed in any factory if he is under the age of *nine* years.

Hours of employment for *women and* children.

7. No *woman* shall be actually employed *more than eleven hours, nor any child more than nine hours, in any factory* in any one day.

And no *woman or* child shall be employed in any factory on any day without an interval, or intervals, amounting in the whole to at least an hour, being allowed to *her or* him for food and rest.

The times at which such intervals shall be allowed, and the length of each interval, shall be fixed by the Local Government for each factory, after ascertaining, as far as possible, the existing practice in such factory and the wishes of the occupier thereof.

The occupier shall set up and maintain, in some conspicuous place in the factory, a printed or written notice, in English and the languages of the district in which the factory is situate, showing the times at which such intervals shall be allowed and the length of each interval.

A *woman or* child shall not be deemed to be *actually* employed within the meaning of the first clause of this section during any interval allowed for food or rest.

Allowance of holidays to women and children.

8. *Every occupier of a factory in which women or children are employed shall, before the beginning of each month, fix, according to the castes or classes to which such women or children belong or otherwise, not less than four days in such month to be observed as holidays by each woman or child employed in the factory, and shall forthwith give notice of the days so fixed to such officer as the Local Government may, from time to time, appoint in this behalf.*

An occupier of a factory may, with the previous sanction of the Inspector, substitute, for any day fixed under this section, another day in the same month.

A woman or child shall not be employed in such factory on a day fixed under this section as a day to be observed as a holiday by the woman or child, unless when another day has been substituted for such day as hereinbefore provided, in which event the woman or child shall not be employed in such factory on the day so substituted.

Prohibition of employment of woman or child in two factories on same day.

9. No occupier of a factory shall employ therein on any day any *woman or* child who has to his knowledge already been employed on the same day in any other factory.

Prohibition of employment of child in certain dangerous work.

10. No occupier of a factory shall allow any child to clean any part of the mill-gearing or machinery of such factory while the same is in motion, or to work between the fixed and traversing parts of any self-acting machine while such machine is in motion by the action of the steam-engine, water-wheel or other mechanical power, as the case may be.

Register of children in a factory.

11. The Local Government may direct any occupier of a factory to keep, in such form and with such particulars as such Government may, from time to time, prescribe, registers of the children (if any) employed in such factory, and of their respective employments.

Fencing.

Fencing.

12. (*a*) Every fly-wheel directly connected with a steam-engine, or water-wheel or other mechanical power in any part of a factory, and every part of a steam-engine or water-wheel,

(*b*) every hoist or teagle near which any person is liable to pass or be employed, and

(*c*) every other part of the machinery or mill-gearing of a factory which may, in the opinion of the local Inspector, be dangerous if left unfenced, and which he may have ordered to be fenced,

shall, while the same is in motion, be kept by the occupier of such factory securely fenced.

Any order under clause (*c*) may be set aside, on appeal or otherwise, by the Local Government or such authority as it may appoint in this behalf

Notices.

Notice to be given of accidents.

13 When any accident occurs in a factory causing death or bodily injury whereby the person injured is prevented from returning to his work in the factory during forty-eight hours after the occurrence of the accident, the occupier of such factory, or, in his absence, his principal agent in the management of such factory, shall send such notice of such accident to such authorities in such form and within such time as the Local Government may, from time to time, by rule, direct.

Person beginning to occupy factory to give notice.

14. Every person shall, within one month after he begins to occupy a factory, send to the local Inspector a written notice containing the name of the factory, the place where it is situate, the address to which he desires his letters to be addressed, the nature of the work performed in such factory, the nature and amount of the moving power therein, and the name of the person (if any) under whom the business of the factory is to be carried on.

Penalties.

Penalties.

15. Any person who, in breach of this Act, or of any order or rule made hereunder,—

(*a*) employs any *woman or* child in any factory;

(*b*) neglects to set up or maintain the notice required by section seven, or to fix the days referred to in section eight;

(*c*) allows any child to perform the work forbidden by, or to work in contravention of, section ten;

(*d*) neglects to keep a register in manner prescribed under section eleven,

(*e*) neglects to fence any machinery or mill-gearing in any factory;

(*f*) *neglects to maintain a supply of water for the use of persons employed in any factory.*

(*g*) *neglects to ventilate any factory or to keep any factory in a cleanly state and free from effluvia arising from any drain, privy or other nuisance;*

(*h*) *suffers any factory to be so overcrowded, while work is carried on therein, as to be injurious to the health of the persons employed therein; or*

(*i*) *neglects to give any notice or furnish any return,*

shall be punished with fine which may extend to two hundred rupees:

Provided that—

1st, no prosecution under this section shall be instituted except by, or with the previous sanction of, the local Inspector; and

Only one penalty for same kind of offence on one day.

2nd, no person shall be liable under this section to more than one penalty for any one description of offence committed on the same day, except where two or more *women or* children are employed contrary to the provisions of this Act, in which case one penalty may be imposed in respect of each *woman or* child so employed.

Burden of proof as to age.

16. Where an act or omission would, if a person were under *nine* or twelve years of age, be an offence punishable under this Act, and such person is, in the opinion of the Court, apparently under such age, it shall lie on the accused to prove that such person is not under such age.

Certifying surgeon's declaration in writing.

A declaration in writing by a certifying surgeon that he has personally examined a person employed in a factory, and believes him to be under or over the age set forth in such declaration, shall, for the purposes of this Act, be admissible as evidence of the age of that person.

Occupier primarily liable for breaches of Act.

17. Every occupier of a factory shall be deemed primarily liable for any breach therein of the provisions of this Act; but he may discharge himself from such liability by proof to the satisfaction of the local Inspector, before prosecution therefor, that such breach was committed by some other person without his knowledge or consent; and the person committing such breach shall be liable therefor.

Miscelluneous.

Power to make rules.

18. The Local Government may, from time to time, make rules consistent with this Act, to provide for—

(*a*) the fencing of machinery and mill-gearing in factories;

(*b the water-supply to be maintained for the use of persons employed in factories;*

(*c*) *the ventilation of factories and their cleanliness (including lime-washing, painting, varnishing and washing) and freedom from effluvia arising from any drain, privy or other nuisance;*

(*d*) *the prevention of such overcrowding of factories, while work is carried on therein, as is likely to be injurious to the health of the persons employed therein;*

(*e*) *the obligation of occupiers of factories to furnish true returns, occasional or periodical, on and in accordance with the requisition of the local Inspector or the Local Government;*

(*f*) *the inspection of factories;*

(*g*) *the manner in which appeals under this Act are to be presented and heard, and*

(*h*) *otherwise carrying out the purposes of this Act.*

Such rules shall be published in the official Gazette, and shall thereupon have the force of law.

Before making rules under clause (b), clause (c) or clause (d) of this section, the Local Government shall publish in such manner as may in its opinion be sufficient for giving information to persons interested a draft of the proposed rules, with a notice specifying a date at or after which the draft will be taken into consideration, and shall consider any objection or suggestion which may be received from any person with respect to the draft before the date so specified.

Crown factories.

19. This Act shall apply to factories belonging to the Crown: provided that, in case of any public emergency, the Governor General in Council or the Local Government may, by an order in writing, exempt any such factory from this Act to such extent and during such period as the Governor General in Council or the Local Government, as the case may be, thinks fit.

S. HARVEY JAMES,
Secretary to the Government of India.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 5, 1890.

PUBLIC WORKS DEPARTMENT,—MARINE.

NOTIFICATION.

No. 23 Marine, dated Calcutta, the 30th January 1890

NOTIFICATION—By the Govt of Bengal, P. W. Dept.

UNDER the powers conferred upon him by section 36 of the Indian Steam-ships Act, 1884, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the granting of certificates of competency to Engineers of sea-going steam-ships :—

Certificates of competency granted to persons who pass requisite examinations.

1. Certificates of competency will be granted to those persons who pass the requisite examinations, and otherwise comply with the requisite conditions. For this purpose Examiners have been appointed, and arrangements have been made for holding the examinations periodically at the Port of Calcutta. The examinations will be held twice a quarter, or at such other times as the Government may appoint

Examinations continued till all the candidates are examined

2. The examinations will commence early in the forenoon, and will be continued from day to day until all the candidates who have then presented themselves and whose names appear upon the Port Officer's list on the day of examination are examined.

Application how to be made.

3. The application for examination is to be made on Form Exn. 3, which must be filled up at the Port Office. The Form Exn. 3 properly filled in, together with the Candidate's Indentures of Apprenticeship, testimonials, and discharges, must be lodged with the Port Officer not later than the day before the day of examination.

Testimonials required.

4. Applicants will be required to produce, in addition to the usual Forms of Discharge, satisfactory testimonials as to sobriety, experience, ability, and general good conduct for at least the 12 months immediately preceding the date of application to be examined, and without producing them no person will be examined. If the service has been on shore, the testimonial must be signed by an Employer; if at sea, by the Master and Chief Engineer.

5. In cases where a testimonial from the Chief Engineer, or from the Master, is for any sufficient reason not obtainable, one may be submitted from the Superintending Engineer in place of that of the Chief Engineer, and one from the Managing Owner or Secretary or Chairman of a large Company in place of that of the Master, but in every such instance the testimonial must declare that the facts stated are in accordance with the reports made by the Chief Engineer or the Master, as the case may be, or else that the facts are within the writer's personal knowledge.

6. As such testimonials may have to be verified before the Candidate can be examined, it is desirable that they should be handed in, together with the Form Exn. 3, as early as possible.

Testimonials of Foreigners.

7. The testimonials of servitude of Foreigners and of British Seamen serving in foreign vessels which cannot be verified by the Port Officer must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country; or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Government.

Certificate as to age.

8. Should any doubt exist as to the age of a Candidate, he will be required to produce a Certificate of Birth or Baptism.

Foreigners to know English.

9. Foreigners must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel.

Verification of services, &c., by Articles

10. Services which cannot be verified by proper entries in the Articles of the Ships in which the Candidates have served cannot be counted.

Service on a lake or river.

11. In addition to the required workshop time, service on a lake or river, in a steamer in which the aggregate piston area of the propelling engines proper amounts to at least 2,000 (two thousand) circular inches will be accepted towards qualifying a candidate to be examined for a certificate of competency as follows:—

Two months of river or lake service, in a capacity not lower than that of Third Engineer, may be deemed equivalent to one month of sea service, provided that,

For a Second Class Certificate, not less than three months of the qualifying service must be actual sea service, and that,

For a First Class Certificate, at least six months of the qualifying service must have been at sea in a grade not below that of Third Engineer, where an engineer of a lower grade is carried. During the last 18 months of this service the candidate must have been in possession of a Second Class Engineer's Certificate of competency.

Assistant Engineer.

12. Service entered upon a ship's Articles as having been performed in the capacity of Assistant Engineer must be supported by proof of the Candidate having acted as Second, Third, or Fourth Engineer, as the case may be.

Service in home or coasting trade.

13 The service required by the Regulations to qualify a candidate for examination is to be regarded as referring to service in the Foreign Trade only. Service in the Home or Coasting Trade must amount to at least half as much again as that required by the Regulations to make up for the time spent in Port, *e g.*, for every twelve months' service under the Regulations, eighteen months' service in the Home or Coasting Trade will be required. In all cases the length of service is deemed to commence on the date of signing of the articles of agreement, and to end on the date of discharge.

Service as Engineer only accepted as qualifying service.

14. Service in the engine-room (afterwards referred to) for qualifying a candidate to be examined for a Second-class Engineer's Certificate must be only in those capacities which afford opportunities of obtaining practical experience as an engineer; and service in the capacity of fireman, stoker, donkeyman, greaser, winchman, labourer, engineer's steward, or any other capacity than that of engineer taking watch on engines and boilers for propelling will not be accepted

Service as Third and Fourth Engineer.

15. Service as Third and Fourth Engineer in Foreign-going steamers, where more than three or four engineers, as the case may be, are carried, their names being all entered on the Articles in their respective ratings, may be accepted equally with service as Second Engineer to qualify a Candidate for examination for a First-class Engineer's Certificate, provided he has, during the whole of such service, been in possession of a Second-class Engineer's Certificate (Imperial, or under Order in Council), and provided also that he was regularly in charge of a watch. In the case of Fourth Engineers, however, eighteen months of such service must be proved for every twelve months required by the Regulations.

16. Service in a capacity below that of Fourth Engineer cannot be accepted as qualifying for any class of certificate unless the testimonials of the candidate explicitly certify that during such service he has been taking regular watch in the engine-room, and that the Chief Engineer or Superintending Engineer considers him properly qualified by that experience to act as Chief Engineer of a Foreign-going steamer of 99 horse-power nominal. *In any case the applicant must prove that he has had the responsible charge of the engines or boilers on regular watch for at least twelve months of sea service, of which for not less than six months he must have been in charge of the propelling engines and rated on the articles not lower than Fourth Engineer.* Service below the grade of Fourth Engineer

17. Having "responsible charge" will be understood to imply, in regard to the engines, that the applicant, for the time specified, was, on regular watch, the person responsible for carrying out the orders of the engine-room telegraph, and, in regard to the boilers, that he was, similarly for the period specified, the person responsible for regulating the feeds.

18. When the workshop service has been performed in a place *where steam-engines are not made*, and the class of work done is similar to that required in engine-making, the service may be accepted with an additional year in the engine-room; that is, three years' workshop service and two years in the engine-room, of which one year must have been at sea. The approval of the Government must be obtained in every such case before the authority to receive a certificate is issued by the Examiners. Workshop service.

19. When the workshop service has been performed in a place *where engines are made*, and the department in which the applicant has been principally engaged is not "*fitting*" or "*erecting*," if the nature of the service be such as is useful training for an Engineer, the Government may, on proper representation of the circumstances, see fit to accept the service as qualifying along with subsequent experience, but in every such case the applicant must prove additional engine-room service as required above. The approval of the Government must likewise be obtained.

20. If a candidate has served in the Engine Room with a Second class Certificate in the capacity of a Second Engineer in Foreign-going Steam-Ships under 100 horse-power, or in Home Trade Passenger Steam-Ships, which are not required by law to carry a certificated Second Engineer, his service may be accepted without reference to the vessel's horse-power, provided he has been on the ship's articles as Second Engineer, and produces certificates of discharge as Second Engineer, for the required period. Service as Second Engineer where certificate not required

21. The Government may see fit to allow an applicant who, in consequence of service abroad, has been unable to obtain a Second-class Certificate, to be examined for a First-class Certificate, although he has not obtained a Certificate of the lower grade, provided he is able to satisfy them as to the satisfactory character of his services. First-class certificates without second.

22. In such cases (para. 21) or in cases where the candidate is already in possession of a Certificate of Service, should he fail to pass the examination for the higher grade, but passes the examination for the lower grade, he may receive a Certificate accordingly, but no part of the fee will be returned. Unsuccessful candidates may in certain cases receive certificates for inferior grade.

23. A candidate who under the above regulation (para. 21) has been permitted to be examined for a First-class Certificate without first obtaining a Second-class Certificate of Competency, and who fails in his examination in practical knowledge, may not be re-examined for a Certificate of the higher grade until he has served 12 months as Second Engineer with a Second-class Engineer's certificate of competency as required by the Regulations. Consequence of failure in such cases.

24. If the candidate fails altogether, *i.e.*, both in the examination for the lower as well as for the higher grade of Certificate (para. 21), he may be re-examined for a *Second-class Certificate only*, subject to the usual regulations relating to failure.

If after passing examination services are found to have been insufficient.

25. If after a Candidate has passed his Examination it is discovered on further investigation, *e.g.*, by verification on the part of the Port Officer, that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, it will not be granted to him; but if the Government are satisfied that the error in the calculation of his services did not occur through any fault or wilful misrepresentation on his part, the Certificate may be issued to him, or he may be allowed to go up for re-examination without payment of further fee, when he has performed the amount of service in which he was deficient as the Government may direct.

Certificate of lower grade may be granted on certain conditions.

26. If, in such a case, the applicant's services are sufficient to entitle him to receive a Certificate of a lower grade, provided as aforesaid he has not wilfully misrepresented the amount of his services, an Inferior Certificate may be granted to him, and the difference between the fee paid by him for the Superior Certificate and the fee payable for the Inferior Certificate may be placed to his credit.

May have to be re-examined for certificate of higher grade

27. In such a case when the applicant has by further service made up the time in which he was found to be short, he may be required, before he can receive the higher certificate, to be re-examined in all the subjects.

Qualifications for Certificates of Competency.

Qualification of candidate for Second-class Engineer's Certificate.

28. SECOND-CLASS ENGINEER.—A candidate for a Second-class Engineer's certificate must be not less than 21 years of age;

(*a*) He must have served an apprenticeship to an Engineer for three years in England or five in India at least, and prove that during the period of his apprenticeship he has been employed on the making and repairing of engines:—Or if he has not served an apprenticeship, he must prove that for not less than three years in England or five in India he has been employed as a journeyman mechanic in some factory or workshop* on the making or repairing of engines.† In either case he must also have served one year at sea in the Engine Room as an Engineer on regular Watch in the Foreign, Home or Coasting Trade‡; or

(*b*) He must have served at least four years at sea in the Engine Room as an Engineer on regular Watch in the Foreign, Home or Coasting Trade.

(*c*) He must be able to give a description of boilers, and the methods of staying them, together with the use and management of the different valves, cocks, pipes, and connections.

(*d*) He must understand how to correct defects from accident, decay, &c., and the means of repairing such defects.

(*e*) He must understand the use of the barometer, thermometer, and salinometer, and the principles on which they are constructed.

(*f*) He must state the causes, effects, and usual remedies for incrustation and corrosion.

(*g*) He must be able to state how a temporary or permanent repair could be effected in case of derangement of a part of the machinery, or total break-down.

(*h*) He must write a legible hand, and understand the first five rules of arithmetic, and decimals, and their application to questions about consumption of stores, and full capacities of tanks and bunkers, the duty of pumps, and the direct strains in engines and boilers.

(*i*) He must be able to pass a creditable examination as to the various constructions of paddle and screw engines in general use; as to the details of the different working parts, external and internal, and the use of each part.

---

* No period of service in a drawing office can be allowed to count for more than six months workshop time.

† These may be either land or marine engines.

‡ *See* paragraph 13 as to service in Home or Coasting Trade.

29. First-class Engineer.—A candidate for a First-class Engineer's Certificate must be not less than 22 years of age. Qualification of candidate for First-class Engineer's certificate.

30. In addition to the qualification required for a Second-class Engineer—

(*a*) He must either possess, or be entitled to, a First-class Engineer's certificate of service; or, in the event of his not being so possessed or entitled, he must have served for one year at sea as Second Engineer with a Second-class Engineer's Certificate of Competency, or for two years at sea as Second Engineer with a Second-class Engineer's Certificate of Service: or having served one year at sea as Second Engineer with a Second-class Engineer's certificate of Service, he must show, in addition, at least six months' service as Chief Engineer in a vessel required by law to carry at least one Engineer holding a certificate. (*See also paragraph* 15 *as regards service as Third and Fourth Engineer.*)

The Examiner should therefore be satisfied that an applicant for a First-class Engineer's Certificate has not only been *in possession* of a Second-class Certificate for the periods above stated, but that he has actually *served* for such periods in the Engine Room at sea with a Second-class Certificate in the capacities referred to, and that his name has been entered in the articles of agreement accordingly. (*See also para* 21.)

(*b*) He will be required to make an intelligible hand sketch, or a working drawing of some one or more of the principal parts of a steam-engine; and to mark in, without a copy, all the necessary dimensions in figures, so that the sketch or drawing could be worked from.*

(*c*) He must also be able to take off and calculate indicator diagrams

(*d*) He must be able to calculate safety-valve pressures and the strength of the boiler shell, stays, and riveting.

(*e*) He must be able to state the general proportions borne by the principal parts of the machinery to each other, and to calculate the direct stress, the torsional stress, and the bending stress in round bars, and the direct stress and the bending stress in rectangular bars with given loads.

(*f*) He must be able to explain the method of testing and altering the setting of the slide valves, and to sketch about what difference any alteration in the slide valve will make in the indicator diagram, and also the method of testing the fairness of shafts and of adjusting them.

(*g*) He must be conversant with surface condensation, superheating, and the working of steam expansively.

(*h*) His knowledge of arithmetic must include the mensuration of superficies and solids and the extraction of the square root, and the application of these rules to questions relating to the power, duty, and economy of engines and boilers, and to the stresses in rods, shafts, and levers of the engine.

Service in the Royal Navy.

31. Engineers and Assistant Engineers of the Royal Navy are at liberty to apply for Certificates of Service, and to be examined for Certificates of Competency in the Mercantile Marine; but they must submit their applications in the manner directed by the Lords Commissioners of the Admiralty. Engineers

32. As regards the grades of Certificates of Competency for which Officers of the Royal Navy can be examined, the rule is—"First-class Assistant," or "Assistant Engineers" of the Royal Navy may be examined for Second-class Engineers' Certificates of "Competency"; "Engineers" of the Royal Navy for First-class Certificates of Competency. Grades.

* *See* Appendix B.

Temporary service in the Royal Navy.

33. Temporary active service as Engineer in the Royal Navy counts in applications for Certificates of Competency in the same way and to the same extent only as in the case of the service of Mercantile Marine Engineers, that is to say, so much of the applicant's time as is spent in active service at sea, or in a ship commissioned for sea service, counts as "sea service;" and so much of the applicant's time as is spent in active service on boardship in harbour, and not commissioned for sea, counts as workshop time—*See* paragraph 28, sub-section (*a*).

Engineer Artificer.

34 Service performed in the capacity of Engineer Artificer may count to qualify a Candidate for examination for a Second-class Engineer's Certificate of Competency in the Mercantile Marine. If the service has been on shore, it will count only as workshop time. If in the Engine Room at sea, the Candidate must prove that during such service he had charge of an Engine Room watch.

Fees.

Fees to be paid by applicants for examination. (Exn. 17.)

35. Candidates for examination, in making their Application on Form Exn. 3, will be required to pay the Examination fees before any step is taken, whether by inquiring into their services or testing their qualifications, &c. No part of the fee will under any circumstances be returned to them, but should it be found that their service is not sufficient to entitle them to be examined, or that their testimonials are unsatisfactory, they will be allowed to present themselves for examination without paying any further fee, when they have fulfilled the requisite service, or are able to produce satisfactory testimonials, as the case may be.

36. The fee for examination must be paid to the Port Officer. In any case in which a candidate offers money to any other officer, and in any place but in the Port Office, the candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be examined for twelve months.

37. If a candidate fails in his examination, *no part of the fee he has paid will be returned to him.*

38. The fees are as follow:—

Second-class Engineer's Certificate	...	Rs.	12
First-class Engineer's Certificate	...	„	24
First-class Engineer's Certificate if candidate is already in possession of a Second-class Certificate of competency granted by the Board of Trade, or by the Government of a British possession under Section 8 of the Merchant Shipping (Colonial) Act, 1869	...	Rs.	12
Renewal of any certificate	... ...	„	5

General Rules as to Examinations.

Candidates not to take books, &c., into examination room.

39. All books necessary for the use of candidates under examination will be provided by the Government, and applicants are not permitted to take into the examination room any book, paper, document, or memoranda of any description whatever.

40. Candidates will be allowed in the time allotted to cancel any part of their work, and when required additional papers will be supplied by the Examiners, but they will not be allowed to work out the problems on a slate or on waste paper. The additional sheets must be attached to, and form part of, the examination papers.

41. Candidates for First-class Certificates have to pass an examination in Rough Working Drawing, which may, at the candidates' option, be either hand sketches clearly dimensioned and complete in the necessary *views* and *sections*, or drawings to a scale Drawing boards and T squares will be provided by the Government, but the applicants will have to bring with them any drawing instruments they may require.*

* *See* Appendix B.

42. In the event of any candidate being discovered copying from another, or affording any assistance or giving any information to another, or communicating in any way with another during the time of examination, he will be regarded as having failed in his examination, and will be turned back for three months, in the same manner as if he had failed in the practical part of the examination ; and no part of the fees he may have paid for examination will be returned to him. This penalty also applies to any breach of paragraph 34. Punishment for breaking rules.

43. If a candidate leaves the room before answering any question which has been given to him, he cannot afterwards be permitted to answer it, but the Examiners may substitute other data or another question. Leaving examination room.

44. All applicants presenting themselves for examination will be required to give written answers to ten questions selected from Form Exn. 15*a*,* "Elementary Questions for the first examinations of Engineers for certificates of competency, and of Masters and Mates for certificates in steam." These questions are intended to furnish a record to some extent of the candidate's knowledge at the time of his examination, and also to induce the candidates to pay more attention to their handwriting and spelling. Questions from Form Exn 15*a*

45. The Form Exn. 15*b*., on which these answers will be written, contains also some questions as to the experience of the applicant, to be answered by him in writing.

46. Examiners may add to their *vivâ voce* questions on the practical management of steam-engines and boilers any of those contained in Exn 15*a*.

47. If at the expiration of the time allowed the candidate has worked out and answered correctly the whole of the questions set to him, and given satisfactory answers in the *vivâ voce* examination, he will be declared to have passed.

48. If at the expiration of the time allowed he has not worked out the whole of the questions set to him, but if the result of the *vivâ voce* examination taken in connection with the answers to such of the questions as he has worked out is sufficient to satisfy the Examiners that the applicant is competent to take charge of engines of 100 nominal horse power or upwards, he will be declared to have passed.

49. In other cases he will be declared to have failed.

50. A report of the examination, and the examination papers, will be forwarded to the Port Officer on the Form (Exn. 15). Exn 15.)

51. If the candidate passes, he will receive the Form Exn. 16, upon which the Government will issue the certificate to the candidate, whose testimonials, &c., will be returned at the same time. Notification of having passed will be given to successful candidates. (Exn. 16.)

Failure.

52. If the applicant fails in practical knowledge, he may not present himself for re-examination until he can produce proofs of THREE MONTHS' further service at sea as Engineer from the date of failure. If he fails in arithmetic or drawing only, he may come up again at any time.

General.

53. Certificates of Competency shall be made and issued by the Government in the forms hereunto annexed.

54. Every Certificate of Competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the Certificate, and the other shall be kept and recorded by the Port Officer of Calcutta.

55. No application from the holder of a certificate granted by the Government of any other British Possession or by the Board of Trade to be examined for a certificate of the same legal value shall be entertained.

---

* *See* Appendix A.

APPENDIX A.

Form **Exn. 15a.**

Elementary Questions for the First Examinations of Engineers for Certificates of Competency and of Master and Mates for certificates in steam.

TO ENGINEER EXAMINERS.

EXAMINERS will require all candidates to fill up a form, Exn. 15*b*., of which a copy is enclosed, and they will forward the same to the Port Officer for transmission to the Government along with the report of the examination.

It is intended to issue questions of a more advanced character for first-class candidates, but in the meantime the questions for both classes of Engineers and also for Masters and Mates passing a Voluntary Examination in steam will be taken from the same book of "Elementary Questions," and candidates for first-class certificates are expected to show their superiority by giving answers more complete than those of the other candidates.

The arithmetical questions for Engineers and the *viva voce* examinations for all candidates will be continued as heretofore, and failure in the elementary questions will be treated as failure in arithmetic.

The numbers of the questions for each examination will be selected by the examiners, and they are not to be communicated to the candidate until his examination commences.

Masters and Mates may cancel questions A, B, and C, but they should fill up the form for questions D, E, F, and G, as evidence of their practical knowledge.

Exn. 15b.

Port	Class for which examined
Date	Candidate's name

A. Where and how long did you serve in works at the making or at the repairing of Engines, and in what capacities?

B. How long have you served as fireman or trimmer?

C. How long have you served in the engine-room at sea, and in what capacities?

D. With what descriptions of Engines have you served at sea—Paddle or Screw or both, Jet Condensing, Surface Condensing, or Non-condensing Engines, Compounds, Trunks, Inverted Cylinders, or Horizontal Engines? What size were the engines?

E. With what descriptions of Boilers have you served at sea—Rectangular or Cylindrical, Wet-bottomed or Dry-bottomed, Multitubular, Sectional or Flue Boilers?

F. What Engine defects have come under your notice at sea, what caused these defects, and how were they remedied? Give the names of the Steamers for verification.

G. What Boiler defects have come under your notice at sea, what caused these defects, and how were they remedied? Give the names of the Steamers for verification.

For the questions to be answered on the following pages, *see* the book of Elementary Questions. The questions need not be written; only the answers to them.

What parts of an engine are generally made of cast-iron?

3

For what parts of an engine is steel sometimes used?

4.

What parts of an engine are generally made of brass or gun-metal?

5.

Where is "white metal" sometimes used? On account of what property possessed by it is it adopted? What objection is there to its more general use?

6.

For what parts is Muntz metal sometimes used? Is it malleable? For what properties is it valued?

7.

What difference is there in the composition of cast-iron, of wrought-iron, and of steel?

8.

How can cast-iron, wrought-iron, and steel be distinguished from each other?

9.

What are the different properties of cast-iron, of wrought-iron and of steel?

10.

What is meant by the terms "breaking stress," "proof stress," "safe working stress"?

11.

What is the cohesive strength or breaking stress of good ordinary wrought-iron?

12.

Tempering steel: how is it done, and in what order do the colours come?

13.

What is case-hardening?

14.

Which of the common metals or alloys can be forged, and which of them are brittle or "short"?

15.

What is meant by "welding"? Which of the common metals can be welded?

16.

The expansion of metals by heat: give examples of this in the engine and in the boiler.

17.

In the construction of cylindrical marine boilers, for what parts have the plates to be worked hot? When the material is steel, what precautionary treatment of these plates is afterwards necessary?

18.

What is double riveting? In what parts of cylindrical marine boilers is double riveting employed? In which of the shell seams is it most necessary?

19.

What is "caulking," and how are seams prepared for caulking?

20.

Describe the different ways of fastening the ends of the main stays of a boiler. What are the merits of, or objections to, the different plans?

21.

What strain per square inch is allowed on boiler stays?

22.

Describe a riveted stay, and state where such stays are commonly used.

23.

Where are thin plates to be looked for in a boiler as it wears, and how is the thinness to be detected?

24.

How are boiler tubes fixed? What are "stay tubes," and how are they secured?

25.

Where is it generally that boiler tubes leak? How is this defect raired? What are the causes of this leaking?

26.

What are the causes of cracked tube plates? Where are the cracks situated? How are they repaired?

27.

What is the difference between a "dry uptake" and a "wet uptake"? Which requires most repair? Why? Where have you seen a wet uptake?

28.

What is a superheater? What is its construction? What valves are on it? There is sometimes a gauge glass on it; what is that for?

29.

What parts of a marine tubular boiler are first injured by shortness of water?

30.

Where are angle irons sometimes used in the construction of a boiler, and where are flanged plates used?

31.

Priming: to what causes is it attributed? What means are applied to prevent it? What evils may be produced by it?

32.

Funnel draught: what makes it? What checks it?

33.

Flame is sometimes seen at the top of the funnel: what causes this appearance? Is it beneficial or is it detrimental? Why so?

34.

A blast pipe: what is its construction? Where is it placed? For what is it used?

35.

How many bottom blow-off cocks are generally fitted to each boiler, and why are they so fitted?

36.

Blow-off cocks are sometimes fitted with a spanner guard: for what purpose is this? Describe how the guard is formed?

37.

Test cocks or water-gauge cocks: where are they placed? At what heights? Must the cocks themselves be at those heights? What provision is made for cleaning these cocks should they ever become choked? When there are no test cocks how is the height of the water ascertained?

38.

What is a dead-weight safety valve? Of what are the rubbing surfaces formed? How is a lock-up valve arranged to admit of lifting it or of turning it round, and to prevent adding to the weight?

39.

About what area of safety valve is now required by the Board of Trade? What area was formerly required, and on what ground has that been altered? What is the effect of suddenly opening a safety valve when steam is up? To about what extent do safety valves rise when blowing off without being eased by hand?

40.

Spring-loaded safety valves: what advantages have they that are not possessed by dead-weight valves? What are the disadvantages as compared with dead-weight valves?

41.

Of what pieces does a glass water gauge mounting consist? How does it act? Where is it placed? At what height? Is it liable to derangement? How is its working tested?

42.

Glass water gauges have sometimes pipe connections top and bottom: what is the object of this arrangement? Should there be cocks at the extremities of these pipes?

43.

Describe a Bourdon's steam gauge. Some gauges have an inverted syphon pipe below them: what is its use?

44.

Why is a small cock sometimes put on the pipe leading to a steam gauge? Where should it be placed, and what error might be made by omitting to use it?

45.

Do steam gauges indicate the total pressure of the steam, or only a portion of that pressure? What is the pressure measured from?

46.

What is meant by the salting of the boiler? How is this prevented? What is the density of ordinary sea water? How is the density ascertained? What is the difference between the formation of scale and the salting of the boiler? What is the maximum density at which boilers should be worked at sea?

47.

Scum cocks and pipes: how are they arranged? Where are they placed? At what height in the boiler? When are they used? When must they be shut? Neglect of these cocks lead to what dangers?

48.

Scale: of what does it consist? Where is it most objectionable? How is it removed? How is its formation prevented? What evil effects are produced by it?

49.

What is a salinometer? Of what does it consist? How does it act? How is it graduated? Can it be used at any temperature indiscriminately?

50.

What harm may be done through the check valve of one of a set of boilers being defective while under way? How would you work to avoid this harm?

51.

How is the leak from a split tube stopped in a boiler at sea? Describe the operation?

52.

What is the use of dampers? Where are they fitted? When should they be used?

53.

When there are no dampers fitted, what is used instead? What evil to the boiler is sometimes attributed to this? When the heating surfaces are clean does this occur?

54.

Describe the piston of a steam cylinder, with its different rings and their uses? There are generally round pieces let in flush on one side of a piston: what are they? How are these pieces fixed?

55.

Cylinder drain cocks: what is their use? There is sometimes a valve upon each cock: what purpose does it serve?

56.

Cylinder escape valves: of what do they consist? How protected? How regulated? When are they most needed? To what danger do they expose the Engineer? What precaution is sometimes used to obviate this danger?

57.

What is a compound engine? What different kinds are there for screw steamers, in respect to the number and arrangement of their cranks and cylinders? What is a triple expansion engine?

58.

What is link motion? What are some of its advantages? In modern engines for the screw propeller when there is no link motion, what takes its place?

59.

What is a separate expansion valve? Why is it not fitted to all engines? What effect has an expansion valve upon the starting and upon the reversing of the engine?

60.

What arrangement is applied to reduce the friction of a slide valve? To what is the friction due?

61.

Describe a loose eccentric; how does it act? In what engines is the loose eccentric still employed?

62.

What is the travel of the eccentric rod? How is it measured on the eccentric? What is the travel of the slide valve when the link motion is in mid gear, and the engine still moving?

63.

What are "double beat valves"? Why are they not generally used for safety valves? Are they ever used instead of the slide valve? What objections are there to their use?

64

What is a circulating pump? Is it always worked by the main engine? Give an example from your last steamer of the three water temperatures generally noted by careful engineers?

65.

An air valve is sometimes fitted to a circulating reciprocating pump: what purpose does it serve?

66.

What is the difference between a bucket air-pump, a piston air-pump, and a plunger air-pump?

67.

Whether are double-acting air-pumps made with plungers, with pistons, or with buckets?

68.

What is an air-pump trunk? When is it necessary? How is it attached to the bucket?

69.

What class of air-pump requires both foot and delivery valves, and in what other class can either of these valves be in some cases dispensed with?

70.

When under way, when the air-pump bucket is at the top of its stroke, at what height is the water in the condenser?

71.

With a surface condenser and a single acting air-pump, what is the effect of a leaky foot valve, and what is the effect of a leaky bucket when there is also a foot valve?

72.

Air-pump pet cock or valve: where is it placed? How does it act? What is its object? Does it in every case reduce the effective capacity of the pump? Is it equally applicable to double-acting pumps?

73.

At what temperature is the hot well worked? What is the effect of higher temperatures? What is the effect of lower temperatures? What limits the lowness of temperature? Has a very low temperature any disadvantages?

74.

Bilge injection with common condensers: what are the fittings required? When is it used? What precautions are necessary in using it?

75.

When surface condensers are used, what takes the place of the bilge injection? To what is the connection made? How is its valve formed? Why is this necessary?

76.

What are the practical guides to the proper amount of opening of the inlet valve for the circulating pump?

77.

Feed-pump pet cock or valve: where is it placed? What is its use? How does it act? Is it always a necessary fitting?

78.

What are some of the ways of fastening the ends of surface condenser tubes? About what size and about what thickness are condenser tubes? What parts of a surface condenser are made of brass?

79.

What is a blow-through valve or cock? To what is it attached? There is sometimes a valve that, when opened, admits steam from the slide valve casing to the exhaust port; what is its use? To which cylinder is it fitted?

80.

What is a snifting valve? What is its use? Where is it placed? Can it be placed too high? Can it be placed too low? At what height should it be placed? Was there one in your last steamer; if so, where was it? Why are snifting valves generally omitted now?

81.

What connections are generally fitted to the donkey-pump, and to what services can it be applied?

82.

When the engines are stopped with steam up, what are to be shut and what are to be opened?

83.

How is an engine heated up before starting? What precautionary examinations are made before starting?

84.

What is an interceptor or catch-water? Where is it fixed; what is its construction; how does it act; and what attention does it require?

85.

Describe an air-pump bucket, with its valve or valves and its packing? Of what are the valves generally made?

86.

Of what materials are air-pump rods made? Why so?

87.

What is the racing of the engine? When does it occur? What danger attaches to it? What is done to prevent it?

88.

What are marine governors? What is their general construction? How do they act?

89.

What is meant by the "pitch" of a screw propeller? How is it measured?

90.

Explain the difference between a "right hand" and a "left hand" propeller, and state how each of them revolves.

91.

What is the slip of a screw propeller? How is its amount expressed in figures?

92.

Which of the valves about engines and boilers have to be worked by hand, which of them work self-actingly, and which are worked by the motion of the engine?

93.

Why is soda sometimes put into a boiler, and how is it put in when under way? What is the kind of soda used?

94.

Tallow cups for cylinders were sometimes made with two small cocks, or with only one small cock, or with one large hollow plug cock, or with one small cock and a valve; which of these is suitable for a high-pressure cylinder, and which for the cylinder of a condensing engine? Describe how the cup with only one small cock is used? What is now generally used instead of these? How has this change come about?

95.

Does a cylinder escape valve, self-acting, allow all the water to escape; if not, how much is left in the cylinder?

96.

What is a "Steam Lubricator" (sometimes called an Impermeator)? Explain its action? To what part of the engine is it connected? Whether will throwing cold water over it make it work faster or slower? Describe the one used in your last steamer?

97.

A common paddle wheel: of what is the centre made? Of what are the arms formed? What is the form of the bolts which attach the floats to the arms? How are the arms attached to the centres?

98.

Why have some paddle wheels one or more cast-iron floats in each wheel? With what engines are these most required? At what part of the circumference are they placed?

99.

Why are paddle wheel floats sometimes made of different breadths in the same wheel? With what description of engine is this most needed? Where are the broad floats placed, and where are the narrow floats placed in the circumference of the wheel?

100.

What difference is there between a radial paddle wheel and one with feathering floats? What is the object of feathering floats? Are all the eccentric rods attached in the same way, and are they all of the same form?

101.

Whereabout is the centre of the eccentric of a paddle wheel with feathering floats placed? In that case are the feathering levers on the striking face or on the back of the float? When the paddle shaft has an outer bearing, how is the eccentric made?

102.

Of what materials are the working surfaces of a paddle wheel with feathering floats? Are they all lubricated? With what?

103.

What is a "Disconnecting Paddle Engine"? At what place is the disconnecting effected? How is it accomplished? In which of the cranks of a disconnecting engine are the crank pins fixed?

104.

Whether is link motion valve gear or the loose eccentric generally used for disconnecting paddle engines? For what steamers are disconnecting paddle engines frequently employed?

105.

What are expansion joints? Where are they necessary? What attention do they require? Of what should the working surfaces be made?

106.

What omission in the construction of expansion joints may lead to a serious accident when steam is first applied? How is this prevented in the construction of a steam trunion pipe for an oscillating engine?

107.

Describe an oil cup with a syphon worsted? How is the worsted arranged? How is it cleaned? How far down the tube does it extend?

108.

Describe a thrust bearing; which of the surfaces wears? Why are there sometimes a number of oil tubes for one thrust bearing?

109.

What parts of a screw shaft are generally covered with brass? Why is this necessary? About what thickness is the brass?

110.

What is the stern tube or screw shaft pipe? Why is a pipe of such a length required? Of what is it made? How is it fixed at each end?

111.

What is a lignum vitæ bearing? How is the wood fitted? Where is such a bearing generally used?

112.

How is a screw propeller fixed on the shaft? What means are used to prevent its getting loose at sea?

113.

Where are sluice valves placed? What large sluice valve is there in almost all screw steamers? From what position should this valve be worked? Why so? What attention should it receive?

114.

With a condensing engine, what valves or cocks are on the skin of the ship in the engine-room and in the stokehole?

115.

What are the necessary fittings of a marine boiler?

116.

With a surface condensing engine, what cocks or valves are open some time before the engine is started so as to be ready for starting whenever the order is given?

117.

What is a steam jacket? What cocks are on it? In what engines are jackets most generally used? Do they require to be felted?

118.

What parts of an engine or its fittings should be felted or otherwise protected from radiation?

119.

What are the small cylinders sometimes fitted on the slide valve casing cover of vertical engines? Explain their action? To what are they connected by a pipe? Why so?

120.

Name the principal pipes in connection with the engines and boilers of a steamer, and state to what the ends of these pipes are connected?

121.

Through what cocks or valves, pipes and chambers does the water pass on its way from the sea inlet rose plate to the water space of the boiler, with a jet condenser?

122.

Through what cocks or valves, pipes and chambers does the circulating water of a surface condenser pass?

123.

Through what cocks or valves, pipes and chambers does the steam pass from the boiler until it is in the form of water in the hot well?

124.

Name the pieces of the engine through which the pressure of the steam is transmitted from the piston to the screw propeller. Name them in the order in which they act.

125.

What is an air vessel? How does it act? At what parts of an engine or of its fittings are air vessels generally applied?

126.

What is the construction of a mud box? Where should mud boxes be placed? Why are they necessary? How should the space be divided by the rose plate, and why?

127.

What is a trunk engine? When used in a horizontal engine for a right-hand screw propeller, at which side of the vessel should the cylinders be placed? Why so?

128.

What is an oscillating engine? For what steamers are oscillating engines generally adopted? Why? How is the steam conveyed to and from the slide valve casing?

129.

Of what parts does the valve motion gear of an oscillating engine consist?

130.

For what have geared engines sometimes been used? Of what were the cogs of the large wheel made?

131.

At what part of a screw steamer is the pressure that propels it applied to the hull?

132.

At what part of a paddle steamer is the pressure that propels it applied to the hull?

133.

About how much fuel per indicated horse power per hour is required by modern steam engines, common, compound and triple expansion ?

134.

What is the explanation of the economy of the surface condenser ?

135.

What is the construction of a surface condenser ? Of what are its tubes made ? How are they fixed ? How are they kept tight ? What is done with a split tube ?

136.

Where do surface condensers foul ? How are they cleaned ?

137.

What non-conducting substances are employed to prevent radiation, and how are they applied ?

138.

In the construction of smoke-box doors and of dry uptakes, what provision is made to lessen the amount of radiation ?

139.

How can the formation of black smoke be prevented ? Describe smoke preventing apparatus ?

140.

What is meant by "circulation" in a boiler, and what are the results of defective circulation ?

141.

What means are sometimes adopted to improve the circulation in a boiler ?

142.

By what arrangement is the circulation promoted in a "hay-stack" boiler ?

143.

Describe a ship's side air-pump discharge valve ? In what respects does it sometimes differ from a common stop valve, and what attention does it require ?

144.

What is the construction of a feed escape valve, to what is its discharge connected, and how is its loading regulated ?

145.

When there is no feed escape valve, what is the arrangement of the feed valves or cocks ?

146.

What is the measure of a horse power ? How is indicated horse power ascertained ?

147.

Has "nominal horse power" a fixed meaning ? What is the use of this expression ? What is generally taken as the measure of one horse-power nominal ?

148.

What is "back pressure" in a cylinder ? About how much is it in each of the cylinders in your last steamer ? Is excessive cushioning ever a trouble under certain conditions in modern engines ? Say when and why and in which cylinder this occurs ?

149.

What is meant by "speed of piston" ? About how much is the speed of piston in modern marine engines ?

150.

What is "atmospheric pressure" ? What is its average amount ? What instrument tells this amount ?

151.

What is "gross pressure" or "absolute pressure"? What pressure is it that is shown by the steam gauge?

152.

What is meant by "cutting off" steam? How is it done? What part of the valve regulates the cut off?

153.

What is a piston slide valve? Describe its construction? Why are such frequently employed in place of the common slide valve? What is a great drawback to the use of these valves?

154.

What fixes the time of closing the exhaust? After the exhaust is closed and before the port opens for steam, what becomes of the steam that is in the cylinder?

155.

What is the "lead" of the valve? What is its object? About what amount is it?

156.

What is the "cover" or "lap" of the valve? What is its object? About what proportion of the stroke of the valve is it made?

157.

What is the "exhaust cover" of a slide valve? What is its effect upon cushioning and upon exhaust?

158.

What is "minus cover" or "minus lap" on the exhaust? What is its effect upon the exhaust and upon cushioning?

159.

What is "cushioning" or "compression" in a steam cylinder? How is it affected by the amount of cover or of minus cover there may be upon the exhaust? How is it affected by the exhaust pressure?

160.

What is "mean effective pressure"? How is its amount ascertained?

161.

What is a dial vacuum gauge? What is its construction? For what is it used? About what amount should it show when the engine is working all right? What effect has the variations it indicates on the performance of the engine?

162.

Does the vacuum gauge enable you to tell what pressure there is in the condenser, or must you have recourse also to the barometer to arrive at that? How would you ascertain the actual amount of back pressure there is in the condenser?

163.

What is a barometer? What is its construction? Is a barometer sometimes used instead of a vacuum gauge? In what respect does the weather barometer differ from the vacuum gauge barometer?

164.

The common vacuum gauge and the common steam gauge: in which of them are the graduations marked from atmospheric pressure? Does either of them tell what is the true actual pressure in the boiler or in the condenser?

165.

Do steam and vacuum gauges vary with the variations of the weather barometer? When the weather barometer varies from 29 to 31, how much will the vacuum gauge vary, and how will that affect the working of the engine? Why so?

166.

Vacuum is generally stated as so many inches. What is meant by, say, 20 inches vacuum? What does that tell us about the absolute pressure of the vapour then in the condenser?

167.

From what depth will a pump draw water? Is there any limit? Why?

168.

What is vacuum? Can vacuum move a piston? When the temperature of the water in the condenser is 212°, what is the greatest degree of vacuum there can then be in the condenser?

169.

What is a thermometer; its construction? What is the property of matter that is the principle of its construction? What temperatures are regularly noted by careful engineers?

170.

What is the temperature of (1) melting ice, (2) of boiling water, (3) of steam about 60 lbs. pressure by the steam gauge, (4) of steam about 100 lbs., and (5) of strain about 150 lbs.; also (6) of smoke in the funnel, and (7) of water in the hot well?

171.

What is meant by the "conduction" of heat? Give examples of it in the boiler and in the engine.

172.

What is meant by the "convection" of heat? Give examples of it in the boiler and in the engine.

173.

What is meant by "radiation" of heat? Give examples of it in the boiler and in the engine.

174.

Which is convection, which is radiation, and which is conduction in the following cases: (1) Heat from the glowing fuel to the furnace crown. (2) Heat passing from one side of the furnace crown plate to the other. (3) Heat passing from the steam pipes in the engine-room. (4) The heat of evaporation?

175.

What are the effective heating surfaces of a marine boiler? What is an objection to vertical heating surfaces?

176.

What parts of a marine engine are exposed to danger when the temperature is below freezing point?

177.

What precautions are necessary in cold climates when the temperature is below freezing point?

178.

State as many ways as you can by which a boiler might not get its full feed; that is, a boiler, or one of a set of boilers, gets short of water although the feed valve is open its proper amount; to what causes might this be due?

179.

Of what are furnace bars generally made? About what thickness are they at top? About what space is between them? Whether are the bars put further apart for Newcastle coal or for Welsh coal?

180.

Which burns faster, Newcastle coal or Welsh coal? Which is the flaming coal? Which makes most smoke?

181.

About how many tons of steam coal will be burnt per day in four furnaces each 3′ 0″ wide, and of about the usual length? On what grounds do you say so?

182.

About how many tons of steam coal will be burnt per day with good compound engines to drive an ordinary steamer of 40 ft. beam 10 knots an hour by steam alone? On what grounds do you say so? What percentage more coal would be required to propel the same steamer one knot faster?

183.

About how many tons of steam coal will be burnt per day with a good compound engine, surface condensers, the low pressure cylinder 70 inches diameter, doing average work? On what grounds do you say so?

184.

A pair of inverted cylinder direct acting engines, there is a liner half an inch thick between the ahead eccentric rod and the eccentric strap, in overhauling the engine this piece is lost and forgotten; what difference will its omission make in the working of the engine, on the admission, on the cut off, and on the exhaust of the steam? Which will take place earlier, and which later distinguishing between the up stroke and the down stroke?

185.

A pair of inverted cylinder direct acting engines driving a right-hand screw; on which of the crosshead guide bars is the pressure greatest in the up stroke, and on which in the down stroke?

186.

A screw propeller is getting loose; it has a little play on the shaft, sideways on the key or feather; how will this show in the engine-room?

187.

How would you prove whether the centre line of the trunions of an oscillating cylinder be fair with the centre line of the main shaft?

188.

How can the fairness of a line of screw shafting be tested without lifting the shafts?

APPENDIX B.

Form Exn. 17.

Examination in Rough Working Drawing for a First-Class Engineer's Certificate of Competency.

1. The regulations in regard to the qualifications of a candidate for a first-class Engineer's Certificate of Competency specify that—

> "He must be able to make rough working drawings of the different parts of the engines and boilers."
>
> "He must be able to state the general proportions borne by the principal parts of the machinery to each other."

2. In accordance with these clauses, a candidate for a first-class certificate is required to make a rough working drawing of the parts specified on the other side of this leaf. A mechanic who has been some years in charge of marine engines and boilers ought by this time to have familiarly in his mind the general construction of at least one set of engines and boilers, say that set he was

last with. Fine drawing is not expected, and in the proportions of the parts a wide margin will be allowed ; absurd dimensions will be failure in practical knowledge.

3. The drawing must, however, be practically a working drawing, giving a sufficient number of views to show the parts fully—sections, plans, or elevations, just as the candidate would require to be supplied to him if he had to make the parts to the design of another person.

4. A clear hand sketch showing the construction, completely and fully dimensioned, will be accepted if the candidate prefers this alternative.

5. A portion only of the parts specified may be accepted in place of the whole, if that portion is sufficient to show that the candidate has a good practical idea of the construction of the parts, and a fair notion of their general proportions or dimensions.

6. Candidates are hereby cautioned not to put on paper what they have not fully considered, and deliberately intend to be understood, as their statement of what they know about the construction of any part required.

7. The statements given in by a candidate may be in themselves, apparently, of little importance, but as sample material from which the state of the candidate's knowledge of engines and boilers is to be inferred, every detail which is glaringly inconsistent with a sound knowledge of the use of the part, or in which an essential consideration has evidently been overlooked, is an important element in the description which the candidate is giving of his own qualifications.

8. The candidate is advised not to begin more than he can clearly finish in the time allowed. An important object in this part of the examination is to ascertain whether the candidate can be trusted to mark all necessary dimensions upon a sketch or a drawing. The test of this is, practically, the making of the part from the sketch without having to supply additional dimensions, and without measuring the drawing. To prove this ability the candidate must fully dimension the parts shown in his sketch or drawing, notwithstanding that the parts may be correctly drawn to scale. A drawing is fully dimensioned when no part of it is left to the option of the party who is to work to the drawing.

9. To prevent misunderstanding, however, when the candidate has been led into showing more of the details than he has time fully to finish, he should name, in the statement on the other side, the particular parts which he has fully dimensioned.

10. All dimensions should have lines and darts, to indicate distinctly the points between which the dimensions are given.

11. Beware of writing cross dimensions upon centre lines, or upon longitudinal dimension lines. This is not an order but a recommendation.

12. The candidate is not expected to design anything; he has merely to sketch or draw a something with which he is expected to be already familiar.

13. Pencil in nothing after half-past 8 ; all the dimensions, the figures, and the darts must be inked in; employ the remaining time in examining the drawing and in inking in any figures which may have been before overlooked, and in checking the dimensions.

14 Make sure that you will have sufficient room on the drawing sheet to show all the necessary views. You can have another sheet or drawing paper if necessary. All the paper used must be forwarded with the drawing.

15 Fill in and sign the following statement.

(Specimen.)

Form Exn. 17a.

Subject for Examination in Rough Working Drawing.

(Read the foregoing general instructions.)

A common slide valve with its spindle. Show also an outline section of the ports at the cylinder face. Show the provision for connecting the slide valve to the spindle.

The candidate is requested to fill up the following, and to attach this paper to his drawing.

STATEMENT BY THE CANDIDATE.

The accompanying drawing, made by me this day, without referring to any document, and without the assistance of any person, is intended by me to be sufficient for the new construction of the parts above described to fit the places of similar parts which are to be removed. The construction is similar to what I have been with in the_____steamer_____, but the dimensions may be different.

The diameter of the cylinder is_____

The stroke of the piston is_____

The stroke of the valve is_____

The cover at top end on steam side is_____

The cover at bottom end on steam side is_____

The lead at top is intended to be_____

The lead at bottom is intended to be_____

The inside cover is +_____or____.

The thickness of the face of valve is_____

The thickness of the body of valve is_____

The greatest opening for steam will be_____

That gives an area equal to one_____

The opening for exhaust when the crank is on the top centre is_____

That gives an area equal to_____th of piston.

The length of the connecting rod is_____

The valve will cut off steam on the down stroke at_____

The valve will cut off steam on the up stroke at_____

The Candidate may omit this part if he chooses.

The parts fully dimensioned, in ink, are_____

This Certificate is given upon an ORDINARY EXAMINATION passed at———————*on the*———

day of———————18—.

Any ENGINEER who fails to deliver up a Certificate which has been cancelled or suspended, is liable to a penalty not exceeding Rs. 500. This Certificate is liable to be cancelled or suspended by any Court or Tribunal which has power under the Imperial Act 25 and 26 Vic., cap. 63, sec. 23, to cancel or suspend Certificates.

N.B.—Any person other than the owner thereof becoming possessed of this Certificate is required to transmit it forthwith to the Port Officer, Calcutta.

Issued at the Port of Calcutta on the———————*day of*———————18—.

Registered,
Port Officer of Calcutta.

No. 24 Marine, dated Calcutta, the 30th January 1890.

NOTIFICATION—By the Govt. of Bengal, P. W. Dept

UNDER the powers conferred upon him by section 36 of Act VII of 1884 (the Indian Steam-ships Act), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the granting of certificates of competency to engine-drivers of sea-going steam-ships having engines of under 50 nominal horse-power :—

1. Certificates of competency will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose examiners have been appointed and arrangements have been made for holding the examinations periodically at the port of Calcutta. The examinations will be held twice a quarter, or at such other times as the Government may appoint.

2. The application for examination is to be made in Form Exn. 3*a*, which must be filled up at the Port Office. The Exn. 3*a* properly filled in, together with the candidate's testimonials, must be lodged with the Port Officer not later than the day before the day of examination.

3. A candidate for a certificate of competency under these rules must be not less than 22 years of age.

4. He must have served three years as principal serang or tindal in the engine-room of a sea-going steamer under a certificated Engineer.

5. He must have the testimonial shown in Appendix A filled up by the Engineer with whom he has last served, or his other testimonials must contain all the particulars therein required.

6. He must pass a *vivâ voce* examination before the Board of Examiners as to the working of an engine and the use of its different parts.

7. He must, if required, be able to show his practical qualifications by one week's trial in a steamer, after fulfilling the other tests to which he will be subjected.

8 He must show a knowledge of the use of brine cocks and blowing off, of the salinometer, and of the care of the boiler in salt-water.

9. Candidates for examination, in making the application on Form Exn. 3*a*, will be required to pay the examination fee before any step is taken, whether by enquiring into their services or testing their qualifications, &c. No part of the fee will under any circumstances be returned to them; but should it be found that their service is not sufficient to entitle them to be examined, or that their testimonials are unsatisfactory, they will be allowed to present themselves for examination without paying any further fee, when they have fulfilled the requisite service or are able to produce satisfactory testimonials, as the case may be.

10. The fee for examination under these rules is ten rupees, and the amount must be remitted with the application to the Port Officer. In any case in which a candidate offers money to any other officer than the Port Officer, and in any place but the Port Office, the candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be examined for twelve months.

11. If a candidate fails in his examination, *no part of the fee he has paid will be returned to him.*

12. In case of failure, candidates may be re-examined *de novo* after a lapse of six months, if the past examination showed that they might reasonably be expected to qualify.

13. Certificates of competency shall be made and issued by the Government in the form hereunto annexed.

14 Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate and the other shall be kept and recorded by the Port Officer of Calcutta.

APPENDIX A.

TESTIMONIAL.

I *hereby certify that* *has served with me in the engine-room of* *as principal serang or tindal for a period of* *, during which time he has discharged his duties to my entire satisfaction.*

I consider that he fully understands the working of an engine, and has sufficient tact, presence of mind, and energy to look after and manage the working of the engines of a sea-going steamer having engines of under 50 *nominal horse-power.*

Signed

No. and description of Certificate.

Note—Any Engineer giving a testimonial in this form should be very careful in doing so, as the document may materially influence the applicant's eligibility as a candidate.

No. 25 Marine, dated Calcutta, the 30th January 1890.

NOTIFICATION—By the Govt of Bengal, P. W. Dept.

UNDER section 10 of the Indian Merchant Shipping Act, 1859, the Lieutenant-Governor is pleased, with the sanction of the Governor-General in Council, to make the following rules for the conduct of examinations for Masters and Mates of foreign-going ships and as to the qualifications to be required. These rules are in supersession of the rules issued under the notification dated the 28th of August 1877.

Certificates granted to persons who pass examinations.

1. *Certificates of Competency* will be granted to those persons who pass the requisite examinations, and otherwise comply with the requisite conditions. For this purpose examiners have been appointed, and arrangements have been made for holding the examinations periodically at the port of Calcutta. The examinations will be held twice a quarter, or at such other times as the Government may appoint.

Examinations continued till all the Candidates are examined.

2. The examinations will commence early in the forenoon, and will be continued from day to day until all the Candidates whose names appear upon the Port Officer's list on the day of examination are examined.

Notice of application for examination to be given to the Port Officer.

3. Candidates for examination must make their application upon the appropriate Form (Exn. 2), which must be filled up at the Port Office. The Exn. 2, properly filled in, together with the Candidate's testimonials and discharges, must be lodged with the Port Officer of Calcutta not later than the day before the day of examination, and the Candidate must conform to any regulations in this respect which may be laid down by the Government, as, if this be not done, delay may be occasioned.

Testimonials of character, conduct, and ability required.

4. Testimonials of character, and of sobriety, experience, ability, and good conduct on board ship for at least the twelve months of service immediately preceding the date of application to be examined, will be required of all applicants, and without producing them no person will be examined. As such testimonials and discharges may have to be verified before the Candidate can be examined, it is desirable that they should be handed in together with the Form, Exn. 2, as early as possible.

Testimonials of Foreigners.

5. The testimonials of servitude of Foreigners, and of British Seamen serving in foreign vessels, which cannot be verified by the Port Officer, must be confirmed either by the Consul of the country to which the ship in which the Candidate served belonged, or by some other recognized official authority of that country, or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case will be decided on its own merits, and if the sufficiency of the proofs given appears to be at all doubtful, it must be referred to the Government.

Certificates as to age.

6. Should any doubt exist as to the age of a Candidate, he will be required to produce a certificate of birth or baptism.

Foreigners to know English.

7. Foreigners must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British Vessel. In the case of natives of India, who may not be able to speak English, their Certificates will be endorsed to the effect that they are only valid for vessels manned and officered entirely by Asiatics.

8. The time for which length of service as Seaman or Officer in the Mercantile Marine is to be reckoned in all cases referred to in the following paragraphs is to commence at the date when the Articles of Agreement were signed by the Applicant, and to end at the date when he was discharged as shown on the Articles of Agreement. The Certificates of Discharge will generally be sufficient evidence of this, but great care must be exercised by the Port Officer and Examiners to detect any tampering in any way with the information contained in them, and to report to the Government at once any suspicious cases.

Verification of services, &c., by Articles

9. Services, which cannot be verified by proper Entries in the Articles of the Ships in which the Candidates have served, cannot be counted. For instance, a man will state his

service to have been as Second or Only Mate, and to support his assertion will produce a Certificate of Discharge or of employment by the Master, to the effect that he served as Mate, when, on reference to the Articles, it appears that he has actually been rated as Boatswain; the service in such a case will not be regarded as having been in the capacity of Mate.

Promotion during Voyage

10. Whenever a man has, from any cause, been regularly promoted on a vacancy in the course of the Voyage from the rank in which he first shipped, and such promotion, with the ground on which it has been made, is properly entered in the Articles and in the Official Log Book, he will of course receive credit for his service in the higher grade for the period subsequent to his promotion.

Service in the coasting trade

11. Service in the coasting trade may be allowed to count as service, in order to qualify a Candidate for examination for a Certificate of Competency for Foreign-going Ships, it being understood, however, that service in the coasting trade must amount to half as much again as service in the foreign trade, and that service in a lower grade than that of First or Only Mate in the coasting trade will not be recognised as officer's service.

12. Three years' service as Mate in the coasting trade, together with at least nine months' service as Master, may be allowed to count as service for a Master's Certificate, provided the Candidates' entire service at sea calculated as above is sufficient, and that his services as Mate and Master in the coasting trade can be proved by the Articles, and provided he has already passed an examination *for the Foreign Trade*, unless, *under special circumstances*, the Government see fit to dispense with this latter provision.

13. Service in Pleasure Yachts under 80 tons, if performed within Home Trade limits, will not be accepted towards qualifying a Candidate for examination.

14. Service in Pleasure Yachts will not be accepted at all unless verified by satisfactory proofs, and it must be distinctly understood that accepted service is confined to *actual sea service*, service in harbour or port being inadmissible. *See also para.* 21.

Service as an Apprentice.

15. Time for which Indentures of Apprenticeship are in force will be accepted as sea service, provided that the Apprentice has remained by the ship for at least four-fifths of the time covered by the Indentures, and the Indentures of the applicant are endorsed by the Owner or Master to whom he has been bound, to the effect that he has performed his service faithfully for the whole time agreed upon.

Service as 3rd or 4th Mate to qualify for 1st Mate.

16. Service as Third or Fourth Mate may be accepted as equivalent to service as Second Mate to qualify a Candidate for examination for a Certificate of Competency as First Mate, provided he is able to produce a satisfactory testimonial from the Master or owner of the vessel in which the service was performed, showing that he has had charge of a watch while serving as such Third or Fourth Mate, and that during the whole of the time claimed he was in possession of a Second Mate's Certificate of Competency, valid in the United Kingdom.

Service as 3rd or 4th Mate to qualify for Master.

17. Service as Third or Fourth Mate may also be accepted on the same conditions to qualify a Candidate for examination for a Master's Certificate of Competency, provided he can produce satisfactory evidence of his having served at sea 12 months as Second Mate of a Foreign-going Ship while in possession of a First Mate's Certificate of Competency, valid in the United Kingdom. If a Candidate has had no service as First Mate he must have been six and-a-half years at sea, of which two and-a-half years must have been as Mate of a lower grade under the above-named conditions. It will also be noted that occasional service in charge of a watch in the daytime will not be accepted as Mate's service under the Regulations.

Service on board a Training Ship

18. Part of the time served on board a training ship will be allowed to count as service at sea, provided that the Candidate can produce amongst his testimonials a Certificate from the Committee that he has conducted himself creditably, and passed a good examination in seamanship so

far as practised in the training ship as well as in other matters down to the time of his leaving the ship.

19. No period of service on board a training ship will be allowed to count for more than one year's sea service, nor can it be accepted as equivalent to service in square-rigged vessels.

Service in Auxiliary Screw Whaling ships.

20. Service in Auxiliary Screw Whaling Ships and other Vessels with auxiliary steam power, which use their screws only in calms or during light winds, is considered as service performed in Sailing Vessels. Such service is not to be accepted in cases where service on board Foreign-going Steam-ships is required.

Service in Trawlers, Yachts, &c.

21. Service performed in Trawlers, Yachts, &c., *alone* will not qualify a Candidate for examination for a Foreign-going Certificate. He must show that he has served, in addition thereto, 18 months in an ordinary trading vessel.

Service in capacities other than as Apprentice or Seaman.

22. Candidates whose services have been in capacities other than Apprentice, Ordinary Seaman, or Able Seaman, *e.g.*, Cook, Steward, Carpenter, &c., will be required to satisfy the Port Officer that they have a good knowledge of Seamanship. This may possibly be proved by the production of satisfactory Certificates from Masters with whom the Applicants have served. Failing satisfactory evidence, the Applicant may be required to perform additional service, which must be in the capacity of Ordinary Seaman or Able Seaman.

Service on rivers and in smooth-waters.

23. Service performed on rivers, no matter of what size, or in smooth-water or partially smooth-water cannot be accepted.

Loss of sight.

24. A person who has lost the sight of one eye cannot be allowed to be examined for a Certificate of Competency. If he already holds a Certificate, he will not be allowed to be examined for a Certificate of a higher grade.

Service in Light Ships and Engine-room.

25. Service in Light Ships or in an Engine-room will not be accepted as sea service for a Master's or Mate's Certificate of Competency.

26. In the case of service on board Excursion Steamers only such service as has been performed actually at sea can be accepted.

27. A First Class Pilot, with one year's Sea Service since he obtained his Pilot's Certificate, may be examined for a First Mate's Certificate for Foreign-going Ships. A Hooghly Master Pilot is for the purpose of this rule to be considerd a First Class Pilot.

Services as Pilot's Apprentice.

28. Half the amount of service performed as an Apprentice in a Pilot Vessel propelled by sails may count as actual Sea Service to quality for examination for a Certificate of Competency.

Desertion and gross misconduct.

29. Candidates who have neglected to join their vessels after having signed Articles, or who have deserted their vessels after having joined, or who have been found guilty of gross misconduct on board, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Local Government after having investigated the matter should see fit to reduce the time.

If after passing examination services are found to have been insufficient.

30. If after a Candidate has passed his Examination it is discovered on further investigation, *e.g.*, by verification on the part of the Port Officer, that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, it will not be granted to him; but if the Government is satisfied that the error in the calculation of his services did not occur through any fault or wilful misrepresentation on his part, he will be allowed to go up for re-examination without payment of further fee when he has performed the amount of service in which he was deficient.

Certificate of a lower grade may be granted in certain conditions.

31. If, in such a case, the applicant's services are sufficient to entitle him to receive a Certificate of a lower grade, provided as aforesaid he has not wilfully misrepresented the amount of his services, an Inferior Certificate may be granted to him, and the difference, if any, between the fee paid by him for the Superior Certificate and the fee payable for the Inferior Certificate, may be placed to his credit.

Must be re-examined for certificate of higher grade.

32. In such a case when the applicant has by further service made up the amount in which he was found to be short, he must, before he can receive the higher Certificate, be re-examined in all the subjects.

Colour Tests.

33. The Government have made the following arrangements for the Examination of persons as to their ability to distinguish Colours :—*

34. Examinations in Colour are open to any person serving or about to serve in the Mercantile Marine.

35. Any person, including the holders of Certificate of Competency, or persons about to apply for Certificates of Competency, if desirous of being examined *in colours only*, must make application to the Port Officer on Form Exn. 2ª, and pay a fee of one rupee.

36. He must on the appointed day attend for examination at the Examiner's Office ; and if he passes he will receive a Certificate to that effect.

37. If he fails it will be open to him to be examined again in Colours as often as he pleases on payment of the fee of one rupee at each fresh attempt.

38. The application of a *Candidate who is presenting himself for Examination for a Master's or Mate's Certificate* must be made on Form Exn. 2.—Such examination will commence with the Colour test; and if the Candidate does not, at the time of making application, hold a Certificate of Competency of any grade, and should fail to distinguish correctly any one of the colours used in the test, he will not be allowed to proceed with the examination in Navigation and Seamanship.

39. The fee he has paid for Examination for a Certificate of Competency will include the fee for the Colour test, and, with the exception of one rupee, will, in such event, be returned to him.

40. A Candidate for Examination for a Certificate of Competency who, at the time of making application, does not possess a Certificate, and who fails to pass the colour test, may not be re-examined until after the lapse of three months from the date of his first failure. If he fails a second time, he will be allowed a third trial at the expiration of another three months from the date of his second failure. A fresh fee must be paid at each succeeding examination.

41. It is therefore obviously to the advantage of Candidates for Certificates of Competency to apply in the first instance to be examined in *Colours only* on Form 2ª.

42. A Candidate who holds a Certificate of Competency, and who, on presenting himself for Examination for a Certificate of a higher grade, is unable to pass the Colour test, will notwithstanding be permitted to proceed with the Examination in Navigation and Seamanship for the Certificate of the higher grade.

43. Should he pass this Examination the following statement will be written on the face of the higher Certificate which may be granted to him, viz. : "This officer has failed to pass the 'Examination in Colours.'"

44. Should he ultimately fail to pass the Examination in Navigation and Seamanship a like statement, relating to his being Colour blind, will be made by the Port Officer on his existing Certificate before it is returned to him.

45. Holders of Certificates which bear the statement of their having failed to pass in Colours, and who may desire to have the statement removed from their Certificates, must obtain the special permission of the Government.

Qualifications for Certificates of Competency for a "Foreign-going Ship."

Foreign-going Sailing Ships

46. EXAMINATION IN COLOURS —All Candidates for Certificates of Competency must first be examined in colours.*

47. A SECOND MATE must be not less than seventeen years of age, and must have been four years at sea. He must also prove that he has served at least one year in a square-rigged sailing vessel within the last five years. *See also para.* 11. Second Mate.

On and after the 1st April 1890, no Candidate will be allowed to be examined unless he has served at sea two years

* *See* Appendix L.

within the last six years, and six months within the last three years immediately preceding the date of his application to be examined.

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the Candidate is allowed to be examined.

48. IN NAVIGATION, &c.—He must write a legible hand, and will be required to give in writing, *vide supplementary viva voce* test, page 37, definitions of various astronomical and other terms used in navigation.* He must have a competent knowledge of the first five rules of arithmetic, and the use of logarithms. He must be able to work a day's work complete, correcting the courses for deviation, leeway, and variation. He will be required to find the latitude by meridian altitude of the sun, and the difference of longitude from a given departure by parallel sailing; also to find the course and distance from one position to another by Mercator's method. He will be required to find the time of high water at a given port, to observe and calculate the amplitude of the sun, and to find the error of the ship's compass therefrom, and also the deviation, the variation being given. He must be able to find the daily rate of the chronometer from error observed, and to find the longitude from altitude of the sun by the usual methods. He must understand the use of the sextant, with its adjustments, and be able to observe with it, find the index error by the horizon, and *read off* and *on the arc*.† He must also pass a satisfactory examination in the International Code of Signals.‡

49. IN SEAMANSHIP, &c.—He must give satisfactory answers as to the standing and running rigging of ships; as to bending, unbending, setting, reefing, taking in and furling sail; as to sending masts and yards up and down, &c., &c.; as to the management of a ship when under canvas; of a ship's boat in heavy weather, and as to dunnaging and stowing cargo, &c. He must have a thorough knowledge of the rule of the road as regards both steamers and sailing vessels, their regulation lights, and fog, and sound signals,§ and be able to describe the signals of distress, and the signals to be made by ships wanting a pilot, and the liabilities and penalties incurred by the misuse of these signals ‖ He must be able to mark and use the lead and log lines. He must also understand the use and management of the rocket apparatus in the event of his vessel being stranded, and other questions of a like nature appertaining to the duties of the Second Mate of a ship, which the Examiners may think necessary to put to him. He will also be required to give satisfactory answers as to his knowledge of the additional subjects (applying more particularly to steam-ships) which are specified in the Rules of Examination for Second Mates' Certificates of Competency for Foreign-going Steam-ships.

50. AN ONLY AND FIRST MATE.—An Only Mate and a First Mate must be not less than nineteen years of age, and must have served five years at sea, of which in the case of a First Mate, one year must have been as Second or Only Mate. *See* also paras. 11, 16 and 27.

On and after the 1st April 1890, no Candidate will be allowed to be examined unless he has served at sea two years within the last six years, and six months within the last three years immediataly preceding the date of his application to be examined.

Only and First Mate.

A Candidate for an Ordinary Certificate of *any* grade, who does not already hold an Ordinary Certificate of a lower grade, must prove that he has served 12 months in a square-rigged sailing vessel within the last five years.

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the Candidate is allowed to be examined.

51. IN NAVIGATION.—In addition to the qualifications required for a Second Mate, an Only and First Mate must be

---

* *See* Appendix A.

† *See* Appendix B.
‡ *See* Appendix C.
§ *See* Appendix D.
‖ *See* Appendix E.

able to find the true bearing of the sun and the error of the ship's compass from an observed azimuth of the sun, both from an altitude and also from the "Time Azimuth Tables," and with the variation given compute the deviation; to find the latitude from a single altitude of the sun off the meridian, and be able to use and adjust the sextant,* and to find the index error by the sun; also to ascertain the true bearing of the sun, &c., and the ship's position by Sumner's Method by Projection.† He must also be conversant with the use of Mercator's Chart, and be able to find, on either a "true" or "magnetic" chart,‡ the course to steer and the distance from one given position to another; and find the ship's position on the chart from cross bearings of two objects; from two bearings of the same object, the course and distance run between taking the bearings being given; and the distance of ship from the object at the time of taking the second bearing. He must also understand how to keep a ship's Log Book. He will also be required to answer certain questions in writing (*and orally*) relative to cyclones or revolving storms.§

52. In Seamanship, &c.—In addition to the qualifications required for a Second Mate, a more extensive knowledge of seamanship will be required, as to shifting large spars, rigging sheers, taking lower masts in and out, how to moor and unmoor ship, and to keep a clear anchor; to carry out an anchor; how to manage a ship in stormy weather; how to cast a ship on a lee shore; how to secure the masts in the event of accident to the bowsprit; and how to rig purchases for getting heavy weights, anchors, machinery, &c., in and out. He must give satisfactory answers as to the ventilation of holds and the stowage of explosives. He must also know how to rig a sea anchor, and what means to apply to keep a vessel disabled or unmanageable out of the trough of the sea, and lessen her lee drift; how to get a cast of deep sea lead in heavy weather; and answer any other questions appertaining to the duties of an Only and First Mate of a ship which the Examiners may think necessary to put to him. He will also be required to give satisfactory answers as to his knowledge of the additional subjects (applying more particularly to steam-ships) which are specified in the Rules of Examination for Only and First Mate's Certificates of Competency for Foreign-going Steam-ships.

53. A MASTER must be twenty-one years of age, and have been six years at sea, of which one year must have been as First or Only Mate in a Foreign-going Ship, and one year as Second or Only Mate; or he must have been six and-a-half years at sea, of which two and-a-half years must have been as Second Mate of a Foreign-going Ship, during the last twelve months of which service as Second Mate he must have been in possession of a First Mate's Certificate. *Vide also paras.* 11, 12 and 17. Master.

On and after the 1st June 1889, no Candidate will be allowed to be examined unless he has served at sea two years within the last six years, and six months within the last three years immediately preceding the date of his application to be examined.

A Candidate for an Ordinary Certificate of any grade, who does not already hold an Ordinary Certificate of a lower grade, must prove that he has served 12 months in a square-rigged sailing vessel within the last five years.

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the Candidate is allowed to be examined.

54. In Navigation.—In addition to the qualifications required for a Second, Only, and First Mate, a Master must be able to compute the latitude from the meridian altitude of a star, &c. He must be able to find the magnetic bearing from

---

* *See* Appendix B.

† *See* Appendix I.

‡ *See* Appendix F. The terms "true" and "magnetic" are used throughout the Regulations for the sake of brevity and convenience for indicating charts that have compasses engraved upon them showing the "true" or "magnetic" points of the compass respectively.

§ *See* Appendix K.

equidistant compass bearings of any fixed object when at sea, and compute the deviation therefrom. He must construct a deviation curve upon a "Napier's" diagram, which will be furnished by the Examiner, and understand the practical application of the same, and give satisfactory written (*and oral*) answers to certain practical questions on the effect of the ship's iron upon the compasses, the method of determining the deviation, and compensating same by magnets and soft iron.* He will be required to find the course to steer by compass in order to counteract the effect of a given current, and find the distance the ship will make good towards a given point in a certain time and to work out practically the correction to apply to soundings taken at a given time and place to compare with the depth marked on the chart.†

55. In Seamanship, &c.—In addition to the qualifications required of a Second, Only, and First Mate, he must be able to construct jury rudders for both wooden and iron vessels, and also rafts. He will be examined as to his resources for the preservation of the ship's crew in the event of wreck; as to the management of ships in heavy weather; as to rescuing the crew of a disabled ship; as to steps to be taken when a ship is on her beam ends, or in any danger or difficulty; or if disabled or unmanageable and on a lee shore; heaving a keel out, &c. He must explain the mode of procedure when placing ship in dry dock, directing repairs, and if putting in to port in distress with damage to cargo and ship. He must possess a sufficient knowledge of what he is required to do by law, as to entry and discharge, and the management of his crew, and as to penalties, and entries to be made in the official log, and a knowledge of the measures for preventing and checking the outbreak of scurvy on board ship, and the law as to load line marks, and the entries and reports to be made respecting them. He will be questioned as to his knowledge of invoices, charter party, bills-of-lading, Lloyd's agent, and as to the nature of bottomry, also bills-of-exchange, surveys, averages, &c., and must answer any other questions of a like nature appertaining to the management of a ship which the Examiners may consider it necessary to touch upon. He will also be required to give satisfactory answers as to his knowledge of the additional subjects (applying more particularly to steam-ships) which are specified in the Rules of Examination for Masters' Certificates of Competency for Foreign-going Steam-ships.

Fore and Aft rigged ships.

Certificates for Fore and Aft rigged Vessels.

56. Certificates for the grades of Master, First Mate, Only Mate, and Second Mate, on which the words "for Fore and Aft rigged vessels only" will be written, will be issued to Candidates who have not complied with the regulation which requires them to have served at least one year in square-rigged *sailing* vessels, or who prove in course of examination that they are ignorant of the management of square-rigged ships.

57. A certificate "for Fore and Aft rigged vessels only" will not entitle the possessor to act in a capacity for which a certificate is required in square-rigged vessels, amongst which are classed full-rigged ships, barques, brig, barquentines, brigantines, and steam-ships carrying square sails.

58. A Candidate possessing a certificate "for Fore and Aft rigged vessels only," and desiring to obtain an ordinary certificate of the same grade, must prove that he has served at sea at least one year in a square-rigged *sailing* vessel, and will be re-examined both in navigation and seamanship.

Foreign-going Steam-Ships.

Qualifications for Certificates of Competency for Foreign-going Steam-ships only.

59. Certificates of Competency will be issued, subject to the examinations hereinafter described, for officers who have served in steam-ships, and who, owing to absence of service in square-rigged sailing ships, cannot under the

* *See* Appendices G and M.
† *See* Appendix F.

existing regulations obtain Certificates of Competency to act in the capacity of Masters or Mates of square-rigged ships.

60. These certificates will entitle the holders to go to sea as Masters and Mates of foreign-going steam-ships, but will not entitle the holders to go to sea as Masters or Mates of foreign-going sailing ships.

61. There will be no distinction in respect of "Fore and Aft" and "Square-rigged" steam-ships.

62. EXAMINATION IN COLOURS.—All Candidates for Certificates of Competency must pass the examination in Colours.

63. A SECOND MATE must be not less than seventeen years of age, and must have been four years at sea. *See* also para. 11. Second Mate.

On and after the 1st April 1890, no candidate will be allowed to be examined unless he has served at sea two years within the last six years, and six months within the last three years immediately preceding the date of his application to be examined.

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the candidate is allowed to be examined.

64. IN NAVIGATION, &c.—He must write a legible hand, and will be required to give in writing (*vide supplementary viva voce test, page* 39) definitions of various astronomical and other terms used in navigation.* He must have a competent knowledge of the first five rules of arithmetic, and the use of logarithms. He must be able to work a day's work complete, correcting the courses for deviation, leeway, and variation. He will be required to find the latitude by meridian altitude of the sun, and the difference of longitude from a given departure by a parallel sailing; also to find the course and distance from one position to another by Mercator's method. He will be required to find the time of high water at a given port, to observe and calculate the amplitude of the sun, and to find the error of the ship's compass therefrom, and also the deviation, the variation being given. He must be able to find the daily rate of the chronometer from error observed, and to find the longitude from altitude of the sun by the usual methods. He must understand the use of the sextant with its adjustments, and be able to observe with it, find the index error by the horizon, and read *off* and *on* the arc.† He must also pass a satisfactory examination in the International Code of Signals.‡

65. IN SEAMANSHIP, &c.—He must give satisfactory answers as to the standing and running rigging of steam-ships; as to bending, unbending, setting, reefing, taking in and furling sail; as to sending masts and yards up and down, &c., &c., as to seeing everything in readiness and clear for getting under way, and as to the precautions to be then observed with regard to engines, propellers, &c.; as to the management of a steam-ship when under canvas; and of a ship's boat in heavy weather, and as to dunnaging and stowing cargo, &c. He must have a thorough knowledge of the rule of the road as regards both steamers and sailing vessels, their regulation lights, and fog, and sound signals,§ and be able to describe the signals of distress and the signals to be made by ships wanting a pilot, and the liabilities and penalties incurred by the misuse of these signals.‖ He must be able to mark and use the lead and log lines. He must also understand the construction, use, and action of the sluices, and of the water-ballast tanks, engine-room, telegraph, &c.; the use and management of the rocket apparatus in the event of his vessel being stranded, and other questions of a like nature, appertaining to the duties of the Second Mate of a steam-ship, which the Examiners may think necessary to put to him.

66. AN ONLY AND FIRST MATE.—An Only Mate must be not less than nineteen years of age, and must have served five years at sea. A First Mate must be nineteen years of age, and must have served five years at sea, of which Only and First Mate.

---

* *See* Appendix A. † *See* Appendix B. ‡ *See* Appendix C.
§ *See* Appendix D. ‖ *See* Appendix E.

one year must have been as Second or Only Mate of a Foreign-going Steam-ship. *See also paras.* 11, 16 *and* 27.

On and after the 1st April 1890, no candidate will be allowed to be examined unless he has served at sea two years within the last three years immediately preceding the date of his application to be examined

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the candidate is allowed to be examined.

67. In Navigation.—In addition to the qualifications required for a Second Mate, an Only or First Mate must be able to find the true bearing of the sun and the error of the ship's compass from an observed azimuth of the sun both from an altitude and also from the "Time Azimuth Tables," and with the variation given compute the deviation; to find the latitude from a single altitude of the sun off the meridian, and to be able to use and adjust the sextant,* and to find the index error by the sun; and also to ascertain the true bearing of the sun, &c., and the ship's position by Sumner's Method by Projection.† He must also be conversant with the use of Mercator's Chart, and be able to find on either a "true" or "magnetic" chart,‡ the course to steer and the distance from one given position to another; and find the ship's position on the chart from cross bearings of two objects; from two bearings of the same object, the course and distance run between taking the bearings being given; and the distance of ship from the object at the time of taking the second bearing. He must also understand how to keep a ship's Log Book. He will also be required to answer certain questions in writing (*and orally*) relating to cyclones or revolving storms.

68. In Seamanship.—In addition to the qualifications required for a Second Mate, a more extensive knowledge of seamanship will be required, as to shifting large spars, rigging sheers, taking lower masts in and out, how to moor and unmoor ship and to keep a clear anchor, to carry out an anchor; how to manage a steam-ship in stormy weather, and how to rig purchases for getting heavy weights, anchors, machinery, &c., in and out. He must give satisfactory answers as to the ventilation of holds, and the stowage of explosives. He must be able to describe the effects of the screw race upon the rudder; and the effect produced on the direction of the head of the ship by going [ahead] [astern] with a [right] [left] handed screw when the rudder is [ported] [starboarded]. He must also know how to rig a sea anchor, and what means to apply to keep a steamer with machinery disabled out of the trough of the sea, and lessen her lee drift. How to turn a steam-ship short round; how to get cast of deep sea lead in heavy weather, and other questions of a like nature appertaining to the duties of an Only and First Mate of a steam-ship, which the Examiners may think necessary to put to him.

Master.

69. A MASTER—Must be not less than twenty-one years of age, and have been six years at sea, of which one year must have been as First or Only Mate in a Foreign-going Steam-ship, and one year as Second or Only Mate; or he must have been six and-a-half years at sea, of which two and-a-half years must have been as Second or Only Mate in a Foreign-going Steam-ship, during the last twelve months of which he must have been in possession of a First Mate's Certificate. *See also paras.* 11, 12 *and* 17.

On and after the 1st April 1890, no candidate will be allowed to be examined unless he has served at sea two years within the last six years, and six months within the last three years immediately preceding the date of his application to be examined.

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the candidate is allowed to be examined.

70. In Navigation.—In addition to the qualification required for a Second, Only, and First Mate, he must be able

---

* *See* Appendix B. † *See* Appendix I. ‡ *See* Appendix F.
Also page 24 foot-note ‡.

to compute the latitude from the meridian altitude of a star, he must be able to find the magnetic bearing from equidistant compass bearings of any fixed object when at sea, and compute the deviation therefrom. He must construct a deviation curve upon a "Napier's" diagram which will be furnished by the Examiner, and understand the practical application of the same, and give satisfactory written (*and oral*) answers to certain practical questions on the effect of the ship's iron upon the compasses, the method of determining the deviation, and compensating same by magnets and soft iron * He will be required to find the course to steer by compass in order to counteract the effect of a given current, and find the distance the ship will make good towards a given point in a certain time, and to work out practically the correction to apply to soundings taken at a given time and place, to compare with the depth marked on the chart.†

71. In Seamanship, &c.—In addition to the qualifications required of a Second, Only, and First Mate, he must be able to construct rafts and jury rudders suitable for a screw steam-ship. He will be examined as to his resources for the preservation of the ship's crew in the event of wreck; as to the management of steam-ships in heavy weather; as to rescuing the crew of a disabled ship; as to steps to be taken when a ship is on her beam ends; or if disabled and on a lee shore. How to use steam appliances in the event of fire, and the best arrangement for towing vessels under different circumstances, placing ship in dry dock, directing repairs, and the mode of procedure if putting into port in distress with damage to cargo and ship. He must possess a sufficient knowledge of what he is required to do by law, as to entry and discharge, and the management of his crew, and as to penalties and entries to be made in the official log, and a knowledge of the measures for preventing and checking the outbreak of scurvy on board ship, and the law as to load line marks, and the entries and reports to be made respecting them. He will be questioned as to his knowledge of invoices, charter-party, bills-of-lading, Lloyd's agent, and as to the nature of bottomry; also bills-of-exchange, surveys, averages, &c., and answer any other questions of a like nature, appertaining to the management of a steam-ship, which the Examiners may consider it necessary to touch upon.

Service in Royal Navy.

Service in Royal Navy.

72. Officers of the Royal Navy are at liberty to apply for Certificates of service and to be examined for Certificates of Competency in the Mercantile Marine, but they must submit their applications in the manner directed by the Lords Commissioners of the Admiralty.

73 Officers of the Royal Navy desirous of being examined for Certificates of Competency in the Mercantile Marine will be required to prove the following service, of which twelve months must have been sea service under sail alone.

74. For Second Mate.—A Candidate must produce satisfactory evidence of four years' service at sea, or that he has attained the rank of acting Sub-Lieutenant.

75. For Only Mate.—A Candidate must prove five years' service at sea.

76. For First Mate or Masters.—A Candidate must show that he has attained the rank of Sub-Lieutenant, or Navigating Sub-Lieutenant.

Voluntary Examination in the Laws of the Deviation of the Compasses of Iron Ships.

Voluntary Examination of Masters and Mates in the Syllabus.

77. Any Master or Mate who wishes to pass a *voluntary* examination in the Syllabus* of examination on the Laws of the Deviation of the Compasses of an Iron Ship, &c., can at any time be examined upon filling up the form of application, and the payment to the Port Officer of the prescribed fee. If the candidate passes the examination successfully, an endorsement to that effect will be duly made upon the Master's or Mate's Certificate held by him.

---

* *See* Appendices G and M. † *See* Appendix F. ‡ *See* Appendix A.

Failure.

Re-examination in case of failure

78. In all cases of failure the Candidate must be examined *de novo*. If a Candidate fails in *Seamanship* he will not be re-examined *until after a lapse* of SIX MONTHS. Whether the whole or part of this period must be served at sea must depend upon the subjects in Seamanship in which the Candidate failed, but what amount (if any) of sea service will be required will be left to the discretion of the Port Officer, subject, however, to revision by the Government, should they see fit.

79. The Examiners in making out their report on Form Exn. 14 should state what amount (if any) of further sea service the Candidate must perform, and they should also insert this information under Division II. in Form Exn. 2.*

80. If he fails three times in *Navigation* he will not be re-examined until after a lapse of THREE MONTHS from the date of the *last failure*.

Certificate of lower grade.

81. If a Candidate has failed in his Examination, but the subjects in which he has failed are not included in the subjects required for a Certificate of a lower grade, he may, if he desires it, receive a Certificate of such lower grade.

82. No part, however, of the fee he has paid will be returned to him, and on presenting himself, when entitled, for re-examination for the higher grade of Certificate he will be required to pay a further full fee.

83. If a Candidate fails for bad spelling or writing, he will not be re-examined until after a lapse of at least three months.

84. If a Candidate fails in his examination for an ordinary Certificate, he may, if qualified, and upon payment of another fee, &c, be examined for a Certificate of Competency for Foreign-going Steam-ships without waiting the usual time after failure.

Fees.

85. Candidates for examination, in making their application on Form Exn. 2, will be required to pay the examination fee before any step is taken, whether by enquiring into their services or testing their qualifications, &c. Should it be found that their service is not sufficient to entitle them to be examined, or should their testimonials be unsatisfactory, or should they from any other cause, except failure to pass the colour tests, not be examined, no part of the fee will be returned to them, but when they have fulfilled the requisite service, or are able to produce satisfactory testimonials, as the case may be, they will be allowed to again present themselves for examination for a Certificate of the same grade without paying any further fee.

Fees to be paid by applicants for examination, s. 133.

86. The fee for examination must be paid to the Port Officer. In any case in which a Candidate offers money to any other officer, and in any place but in the Port office, the Candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be again examined for twelve months.

87. If a Candidate fail in his examination *no part of the fee will be returned to him.*

88. The fees are as follow:—

FOR "FOREIGN-GOING SAILING AND STEAM SHIPS."

	Rs.
Second Mate	12
First and Only Mate, if previously possessing an inferior certificate, either granted by the Board of Trade, or by the Government of a British Possession *under section* 8 *of the* "*Merchant Shipping (Colonial) Act*, 1869"	6
If not	12
Master	24
Where a Candidate is in possession of a Certificate for Fore and Aft rigged Vessels, for an Ordinary or Steam-ship Certificate of the same grade	12

* *See* Appendix H.

FOR "VOLUNTARY EXAMINATION IN STEAM."

	Rs
Mate (Only or First)	12
Master	12

FOR "VOLUNTARY EXAMINATION IN DEVIATION OF THE COMPASS."

	Rs.
Mate (Second, Only or First)... ...	12
Master	12

GENERAL.

89. Certificates of Competency shall be made and issued by the Government in the forms hereunto annexed

90. Every Certificate of Competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the Certificate and the other shall be kept and recorded by the Port Officer of Calcutta

90A. No application from the holder of a certificate granted by the Government of any other British Possession or by the Board of Trade to be examined for a certificate of the same legal value shall be entertained.

General Instructions to Examiners and Candidates

Prohibited books and papers.

91. All instruments necessary for use in the examinations are supplied by the Government.

92. Before commencing the examination, the tables or desks must be cleared of all scraps of paper, or books that are not used in the examination, and care should be taken that the candidates do not bring into the examination room any book, paper, document, or memoranda of any description whatever. No person whatever should be allowed in the room during the time of examination, but those whose duties require them to be present.

93. No instructors will be allowed on the premises.

Candidates not to leave premises during examination.

94. Candidates will under no pretence whatever be allowed to leave the premises while the examination is proceeding. If a Candidate has occasion to visit the retiring room he will only be allowed to do so on the completion of the paper on which he may be engaged, when he will be required to enter in a book, kept for the purpose, the exact time of his leaving and returning to the examination room. When only a few Candidates are under examination, two persons will not be allowed to leave the room at the same time.

Position of Candidates at examination.

95. Candidates should be so placed as to prevent one copying from the other, and no communication whatever between the Candidates should be allowed.

Blotting paper

96. If any blotting paper is allowed it should be black; and when the first examination paper is issued each Candidate should be furnished with a piece which should be returned to the Examiner upon the completion of the last paper.

How examination papers should be issued.

97. The examination papers should be issued to the Candidates in half sheets only, and one at a time. This will prevent a Candidate from spreading out the sheets on the table in an apparently careless manner, but so as to enable his nearest neighbour to look over and copy, or examine the problems. It will also enable the Examiner to look over and report upon the work on one half sheet, while the Candidate is at work upon another, and so on. When the errors are not too numerous, or when they are not from ignorance of the subject, the incorrect problems may be returned to the Candidate for correction, but in no case should the errors be pointed out by the Examiner, neither should any marks be made on the correct work of the problem, which would at once indicate how far or to what extent the work is correct. Should the problems be returned to the Examiner the second time incorrect, this would be a failure; and as the time allowed is considered ample for working out the papers carefully, this rule is expected to be strictly observed.

In certain cases problems may be corrected on morning following examination day.

98. When from the large number of the Candidates, it may be found impossible to look over the work, on the day of examination during the office hours, an hour in the morning of the following day may be allotted for the purpose of correcting the problems, but in no case should a Candidate have his problem returned to him for correction after he has made the second attempt.

Re Exn 4A

99. The paper (Exn. 4A) is only for those Candidates who present themselves for examination for the first time. It is intended not only to ensure on the part of the Candidate a knowledge of the meaning of a variety of terms of great use to the Navigator respecting which much ignorance exists at present, but at the same time to test his handwriting and spelling.

100. In using this paper, the Examiner will place a mark against the numbers of the particular questions which he selects for answers, and not less than ten questions should be selected. The Candidate will then write against the questions so marked his definition of the terms in a clear and legible hand, so as to prevent the possibility of any letter being mistaken. Attention should be paid to the spelling and writing of all grades of Candidates. The *supplementary viva voce* test should also be applied as usual.

Re-questions on Deviation of the Compass. (Exn 7, Appendix G.)

101. In the questions on Deviation of the Compass (Exn. 7, Appendix G) the Examiner should indicate by a mark against at least twelve of the questions for answers, and those indicated must be correctly answered. The selected questions should be varied frequently, and no two Candidates should have precisely the same questions. The Candidate should be furnished with sheets of blank ruled paper which is supplied for that purpose with instructions that he is to write only on one side of the paper, and to answer each of the questions against which a mark is placed in a clear and legible hand, and to commence each answer by writing down the number of the question to which it relates in the margin left for that purpose. In answering question 19, besides giving a full explanation in writing, of the *tentative* method* of compass adjustment (accompanied by the usual *supplementary viva voce* test), the Candidates should be required to illustrate by diagrams how the poles of the magnets are placed with regard to the compass needle for correcting the semi-circular deviation, as well as the heeling error, and also how the soft iron should be placed for correcting the quadrantal deviation, or the Candidate may be tested by "Beall's Compass Deviascope," in which case it will not be necessary for him to give the written answer and sketches.

Viva voce examination.

102. In the *viva voce* examination a reasonable time should be allowed for the Candidate to give his answers. No assistance should be given or leading question put.

Adjustment of sextant.

103. Particular attention should be paid to the adjustments of the sextant, and the written answers should be given on the ruled paper in the same manner as the answers to the questions on Exn. 7, and the *supplementary viva voce* test applied as usual. Every Candidate should have a practical knowledge of what is known as the first three adjustments, and be able to read correctly *off* the arc, a supposed index error to be given by the Examiner as additive, as well as reading *on* the arc in the usual way.

Minor corrections.

104. All outstanding or minor corrections should appear in the margin of each problem paper; also on the chart papers Exn 9C and Exn. 9D; and unless all these corrections appear on the papers of the Candidate they will not be considered complete.

Examination to commence with that for Second Mate.

105. In every case the Examination, whether for Only Mate, First Mate, or Master, is to commence with the problems for Second Mate.

Problems required as tests.

106. Examiners should bear in mind that the problems to be performed are required as tests, and for the purposes of an Examination, and not for sea-going or practical purposes alone.

107. The Candidates will be allowed to work out the various problems according to the method and the tables they have been accustomed to use.

Time allowed for Problems and Writings.

Time allowed for working problems.

108. *Candidates for Second Mates' Certificates of Competency* must complete the whole of their Examination in Navigation in *eight hours*, including the time allowed for writing the definitions (Exn. 4*a*), the paper on the adjustment of the sextant, and the correction of *all* errors and oversights; but

* See Appendix M.

the nautical problems on Forms "Exn. 4" and "Exn. 5" must be completed within *six hours*, and without the Candidates leaving the premises during that period.

109. *Candidates for Only and First Mates' Certificates* must complete the whole of their examination in Navigation in *twelve and-a-half hours*,* including the time allowed for the papers on the sextant; the chart; cyclones or revolving storms; and for the correction of *all* errors and oversights; but the nautical problems on Forms "Exn. 4," "Exn. 5," and "Exn. 6" must be completed within *six hours*, and without the Candidates leaving the premises during that period.

110. *Candidates for Certificates as Masters,' Ordinary*, must complete the whole of their examination in Navigation in *fifteen hours*; including the time allowed for the papers on the sextant; the chart; compass deviation; cyclones or revolving storms; and for the correction of *all* errors and oversights; but the problems on Forms "Exn. 4," "Exn. 5," and "Exn. 6," must be completed within *six hours*, and without the Candidates leaving the premises during that period

111. *Candidates after finishing the problems required of the respective grades* on the first day of examination should proceed, until the end of that day, with such subjects as the definitions, sextant, chart, and Question 19 of Form "Exn. 7."

112. *The Sumner Problem* (*Exn. 6a*) must on no account be given out to any of the grades on the first day of the examination, but should be the commencement of the Candidate's work on the second day, and on completion of this problem the Candidates for Masters' Certificates should proceed with the problems on paper "Exn. 7."

113. *Candidates for Foreign-going Steam-ship Certificates of Competency* will be allowed the same amount of time to perform their navigation, &c., as hereinbefore laid down for the respective grades for the Ordinary Foreign-going Certificates.

114. *Deviation of the Compass.*—A period not exceeding eleven hours will be allowed to Candidates for the completion of the whole of the examination in the Syllabus, including the correction of all errors and oversights in both the problems and writings.

Additional time allowed in special cases.

115. Punctually at the expiration of the prescribed time all the papers should be called up, whether completed or not, and if not completed, the Candidate will be declared to have failed, unless the Port Officer or the Examiner see fit to lengthen the period in any special case If, however, the period is lengthened in any case, the special circumstances of that case, and the reasons for lenthening the period, together with the time allowed, must be reported to the Government by the Examiners, in the column for "remarks" on the Form Exn 14. It should be noted that the periods prescribed in the foregoing paragraphs are not intended to include the time occupied by the *viva voce* part of the examination.

116. It is anticipated that but few of the Candidates for Certificates of Competency for any of the foregoing grades will require the whole of the time herein allowed for completing their Examination in Navigation; and ample time has been prescribed, so that Candidates may perform their work in a careful, clear, and legible manner, and to the entire satisfaction of the Examiners.

Degree of Precision required in the Solution of the Problems.

117. In order to prevent any misapprehension as to the degree of precision required by the Regulations in working out the various problems in the Examinations for Masters' and Mates' Certificates, the attention of Examiners and Candidates is particularly directed to the following Instructions:—

(*a.*) Candidates are expected to work out their answers to all problems within or not to exceed a margin of *one mile of position* from a correct result (*e.g.*, in problems where the answer required is a latitude, longitude, or distance), excepting in finding the

* A Candidate other than Second Mate who may not previously have passed an examination may be allowed the time occupied in writing his definitions on Exn. 4a, in addition to the above.

ship's position by "Sumner's" method, where a margin of 2½ miles will be allowed.

(*b.*) In such problems as the "Amplitude" and "Alt-Azimuth," where the bearings, deviations, &c, only are required, a margin of 2′, or 3′, from a correct result will be sufficiently accurate

(*c.*) In no problem is the Candidate for an "ordinary" Certificate required by the Regulations to correct for *second differences* in taking out the quantities from the Nautical Almanac.

(*d.*) In solving the "Time Azimuth" problem, an answer not exceeding half a degree from the exact result will be sufficiently near. But in all cases the actual latitude, declination, and time used, together with the exact bearing (from the North or South) as given in the tables, must be clearly shown by the Candidate on his papers.

(*e.*) In interpolating for the correct deviation to be applied in solving the Chart question, Papers "Exn. 9 C." and "Exn. 9 D," it will usually be sufficiently near if the Candidate works throughout with the nearest degree of deviation taken from the "Deviation Card," and even in cases where the deviations may vary but little, the nearest half degree used throughout will be sufficiently precise, and will at the same time prove whether the Candidate understands the method of arriving at the amount of, and applying, deviations. It is not necessary that the Candidate should waste his time in solving the course to *odd minutes* as is sometimes done.

(*f.*) In calculating the correction to apply to the Soundings, Question 5 of Paper "Exn 9 D," the Candidate is not required to work out to the exact inch, as is sometimes done. It will be sufficiently near if he brings his answer within half a foot or so of a precise result.

It must be clearly understood in reading the foregoing Instructions that it is always provided the work of the Candidate is correct in principle.

Supplementary vivâ voce *Examination on written Papers.*

118 An impression prevails in regard to the examination of Masters and Mates, that so long as a Candidate can commit to paper correct answers to the various questions requiring written answers (*e.g.*, *Forms Exn.* 4*a*, *Exn.* 7, *Exn.* 9*a*, *Exn* 9*c*, *Exn.* 32 70, *&c.*), no matter how indicative the answers may be of their having been learnt off by rote *only*, the duty and responsibility of the Examiners are at an end, and that they have no power or authority to reject a Candidate should his written answers be correct.

119. Lest, therefore, such an impression should prevail, Candidates for Certificates of Competency should bear in mind that they are not only expected to give correct written answers, which may merely be learnt off by rote, but they are expected to possess an intelligent knowledge of the various subjects prescibed in the Regulations, particularly as regards the important subject of the Deviation of the Compass.

120. This result may be easily attained by the Examiner putting a few *vivâ voce* questions to the Candidate as the papers are brought up for inspection, or at any subsequent time if more convenient. The oral questions (suggested by the printed questions and the answers given) should be such that the Examiner may satisfy himself that the candidate possesses a real knowledge of what he has written, and should be confined strictly to the subjects of the printed questions. Should the candidate then exhibit ignorance of the subjects, the Examiner (who is in a position to judge of the real knowledge the man before him possesses) should deal with him at his discretion, notwithstanding that the candidate may have written all the answers correctly by rote.

121. When an Examiner finds it necessary to fail a Candidate in this *supplementary vivâ voce* test, a memorandum containing the particulars of the points on which the candidate was ignorant, *i.e.*, *the identical questions and the identica*

answers given, must in each case be attached to his examination papers, when forwarded in the usual course to the Port Officer, or the particulars may be set forth by the Examiner in the margins of the candidate's papers in red ink.

122. If the Candidate passes, he will receive the Form Exn. 16, upon which the Government, will issue the Certificate to the candidate, whose testimonials, &c., will be returned at the same time. Form Exn. 16 Completion of examination

Special Notice to Candidates.

123. The attention of Candidates is specially called to the following Regulations :—

124. Candidates are required to appear at the examination-room punctually at the time appointed.

125. Candidates are prohibited from bringing into the examination-room books, paper, or memoranda of any kind whatever. The slightest infringement of this regulation will subject the offender to all the penalties of a failure, and he will not be allowed to present himself for re-examination for a period of three months.

126. In the event of any Candidate being detected in defacing, blotting, writing in, or otherwise injuring any book or books belonging to the Government, the papers of such Candidate will be detained until the book or books so defaced be replaced by him. He will not, however, be at liberty to remove the damaged book, which will still remain the property of the Government.

127. In the event of any Candidate being discovered referring to any book or memoranda. copying from another, or affording any assistance or giving any information to another, or communicating in any way with another, during the time of examination or copying any part of the problems for the purpose of taking out of the Examination rooms, he will subject himself to all the penalties of a failure, and he will not be allowed to be examined for a period of six months.

128. No Candidate will be allowed to work out his problems on a slate or on waste paper.

129. No Candidate will be permitted to leave the room until he has given up the paper on which he is engaged.

130. Candidates will find it more convenient both here and at sea, to correct the declination and other elements from the Nautical Almanac by the "hourly differences" which have been given in that work in order to facilitate such calculations ; they will thereby render themselves independent of any proportional or logarithmic table for such purpose.

131. The corrections by inspection from tables given in some of the works on Navigation will not be allowed (*see* Tables IX, XI and XXI in Norie's Epitome, &c.) ; every correction must appear on the papers of the Candidates.

132. Any candidate who may be guilty of insolence to the Examiner or of other misconduct will render himself liable to the postponement of his examination, or, if he has passed, to the detention of his Certificate for such period as the Government may direct

133. For rules as to amount of time allowed to perform the work, *see* page 36.

Masters' and Mates' Voluntary Examinations in Steam.

134. These examinations are limited to Masters and First or Only Mates who are possessed of or entitled to Certificates of Competency, and are provided for the purpose of giving them an opportunity of undergoing a voluntary examination as to their practical knowledge of the use and working of the steam engine. They are conducted under the superintendence of the Port Officer at such times as they may appoint for the purpose ; and the Examiners are selected by the Government from the Engineer-Surveyors appointed under the Indian Steam Ships Act, 1884. *Voluntary Examinations in Steam.*

135. Any Master or Mate desiring to be examined in Steam must deliver to the Port Officer a statement in writing to that effect, upon the Form of Application (Exn. 2), and the applicant's Certificate of Competency must be delivered to the Port Officer along with his statement. If he is about to pass an examination for a Certificate of Competency at the same time, the applications should be sent in together. Application, how to be made. Exn. 2.

136. A fee of Rs. 12 must be paid by the applicant for the examination *in Steam*, and the Port Officer will thereupon inform him of the time and place at which he is to attend to Fee to be pai Conduct of examination, &c.

be examined, and the examination will then and there proceed in the same manner as the other examinations. If the applicant fails, and has given in his Certificate, it will be at once returned to him.

Record of Certificate. Exn. 14.

137. If the applicant passes, the Report (Exn. 14.) and the Certificate of Competency with the Form (Exn. 2.) will be sent to the Government; the words "*Passed in Steam,*" with the date and place of examination, will then be entered on the Certificate and its counterpart, and the Certificate will be sent to the Port Officer to be delivered to the applicant in the usual manner.

Failure.

138. If the applicant fails he may not present himself for re-examination until the expiration of three months from the date of failure.

Extent of examination.

139. The examination is for the most part *vivâvoce*, and extends to a general knowledge of the practical use and working of the steam engine, and of the various valves, fittings, and pieces of machinery connected with it. Intricate theoritical questions on calculations of horse-power or areas of cylinders and valves, or any of the more difficult questions which appertain to steam engines and boilers, will not be asked. The examination will in fact be confined to what a Master of a steam-vessel may be called upon to perform in the case of the death, incapacity, or delinquency of the engineer.

140. Examiners are to be careful in their examinations to satisfy themselves that applicants really do know the names and uses of the various parts of engines and boilers, and their connecting pipes, valves, cocks, &c. Practical knowledge, as distinguished from theories, abstruse calculations, and book learning, is to be the test of the applicant's fitness to have his Certificate indorsed.

Where examination to be conducted

141. The Examiner should arrange to conduct part of the examination in the engine-room of a Steam-ship, unless from circumstances he finds it impossible to do so; and if an oppportunity offer the applicant should be permitted, under the guidance of the Examiner, to start and stop the engine of some vessel which may have her steam up.

142. The Examiner, in sending in his report of examinations of Masters and Mates in steam, should state where the examination has been held.

Examination in elementary questions.

143. Candidates will be required to give written answers to sixteen out of twenty questions taken from a book of Elementary Questions pulished by the Government.* These questions will be altered from time to time without notice. The twenty questions are not to be difficult, theoretical, or book questions, but are to be such as any man of ordinary capacity ought to answer who has any "*practical knowledge of the use and working of the steam-engine.*"

Answers to be sent to the Board of Trade.

144. These questions, with the Candidate's answers, should be sent to the Government, with the reports, after each examination

145. These answers will also assist in enabling the Government to decide any question that may hereafter arise in cases where it is alleged that applicants have been improperly passed, or improperly rejected.

Candidates referring to books, &c., to be put down as failed.

146. The Examiners will be careful that if any Candidate refers to any book or paper or memorandum, or obtains information from another Candidate during the examination, he will be treated as having failed, will forfeit his fee, and will not be allowed to be re-examined for a period of three months.

In cases of failure Examiner to report questions that decided it.

147. The Examiners will report in the case of failure, the nature of the question or questions that decided the failure, or the point in the management of the engine in which the Candidate was deficient.

Service on board Steam-Ship unnecessary.

148. There is nothing in the Regulations requiring that applicants for the voluntary examination shall have served on board Steam-Ships; all that is required is that they shall have a "practical knowledge." Examiners will, of course, not fail to appreciate the fact, when passing applicants, that practical knowledge is best gained in the engine-room; and the examination of an Officer who does not produce official evidence of service in Steam Ships, and of experience of engines, must necessarily be more searching than in the case of one who produces evidence of such service and experience.

---

* See Appendix. Q.

APPENDIX A.

N.B.—*The Candidate is to write a short definition against as many of the following terms as may be marked with a cross by the Examiner. The Examiner will not mark less than* 10. *The writing should be clear, and the spelling should not be disregarded.*

1. The Equator.
2. The Poles.
3. A Meridian.
4. The Ecliptic.
5. The Tropics.
6. Latitude.
7. Parallels of Latitude.
8. Longitude.
9. The Visible Horizon.
10. The Sensible Horizon.
11. The Rational Horizon.
12. Artificial Horizon and its use.
13. True Course of a Ship.
14. Magnetic Course.
15. Compass Course.
16. Variation of the Compass.
17. Deviation of the Compass.
18. The Error of the Compass.
19. Lee Way.
20. Meridian Altitude of a Celestial Object.
21. Azimuth.
22. Amplitude.
23. Declination.
24. Polar Distance.
25. Right Ascension.
26. Dip or Depression of the Horizon.
27. Refraction.
28. Parallax.
29. Semi-diameter.
30. Augmentation of Moon's Semi-diameter.
31. Observed Altitude.
32. Apparent Altitude.
33. True Altitude.
34. Zenith Distance.
35. Vertical Circles.
36. Prime Vertical.
37. Civil Time.
38. Astronomical Time.
39. Sidereal Time.
40. Mean Time.
41. Apparent Time.
42. Equation of Time.
43. Hour Angle of a Celestial Object.
44. Complement of an Arc or Angle.
45. Supplement of ditto.

APPENDIX B.

Adjustments of the Sextant.

The Applicant will answer in writing, on paper which will be given him by the Examiner, all the following questions, numbering his answers with the numbers corresponding to the questions :—

Question.

1. What is the first adjustment of the sextant ?
2. How do you make that adjustment ?
3. What is the second adjustment ?
4. Describe how you make that adjustment ?
5. What is the third adjustment ?
6. How would you make the third adjustment ?
7. In the absence of a screw how would you proceed ?
8. How would you find the index error by the horizon ?
9. How is it to be applied ?
10. Place the index at error of minutes to be added, clamp it, and leave it.

(Note.—The Examiner will see that it is correct).

11. The Examiner will then place the zero of the vernier on the arc, not near any of the marked divisions, and the Candidate will read it.

Note.—In all cases the applicants will name or otherwise point out the screws used in the various adjustments.

(*The above completes the Examination of Second Mates.*)

Candidates for Only Mates', First Mates', and Masters' Certificates will be required to give, in writing, replies to the following questions, *in addition* to those required of Candidates for Second Mates' Certificates as above.

1. How do you find the index error by the Sun ?
2. The readings being { } What is the Index Error, and how do you apply it ?
3. What proof have you that those measurements or angles have been taken with tolerable accuracy ?

APPENDIX C.

EXAMINATION OF MASTERS AND MATES IN THE INTERNATIONAL CODE OF SIGNALS.

Instructions to Examiners.

The Government desire to direct the attention of the Examiners to the principal points connected with the International Code of Signals (which is to be treated as a subject in Navigation) as to which Candidates for Examination should be questioned in order to qualify for Certificates of Competency.

The Government would recommend to the Examiners a perusal of the *Report of the Signal Committee* of 1855 (which will be found at the commencement of the Signal Book), and also the *first few pages of the Book*. The information therein given will be found sufficient to make the Examiners theoretically acquainted with the characteristics of the Code, and the advantages it claims to possess over other Codes, and will enable them to appreciate and urge upon Candidates for Examination the facilities which this System of Signalling affords for easy and rapid communication.

The "comprehensiveness" and "distinctness" of the International Code are its chief recommendations.

The form of the Hoist generally indicates the nature of the Signal made, so that an observer can at sight understand the character of the Signal he sees flying.

The annexed plate gives examples which illustrate this.

The Examinations should tend to elicit a knowledge of the distinctive features of the Code above alluded to.

With this object the Examiners should make the 2, 3, and 4 Flag Signals on the Frame board which is furnished for the purpose *(always taking care first to show the Ensign and the Code Pennant at the Gaff)*,* questioning the Candidates as to the distinguishing Forms of the respective Hoists (*See Plate annexed)*, which will be indicated according as a Burgee, or a Pennant, or a Square Flag, is uppermost.

The Candidate ought to know how to find in the Signal Book the communication or the inquiry he desires to make, and how to make the Signal. The Signal to be made should *invariably* be sought for by the Candidate in the Vocabulary and Index, Part II, and never in Part I.

The Candidate ought to know how to interpret a Signal.

The Examiner should place a Signal on the Frame board and vary the Signal by showing a 2 or 3 Flag Signal, or a "Geographical" or a "Vocabulary" Signal, or the name of a Merchant Ship or a Ship of War.

The two latter signals would not of course be found in the Signal Book. The Candidate ought to point them out in the *Code List of Ships*.

A Candidate ought to be able to read off a Signal at sight, so far as to name the Flags composing the Hoist.

He ought to know the use of the Code Pennant, and of the Pennants C. and D., "Yes" and "No."

The Candidate should be practised in the use of the Spelling Table, by being made to spell his own name, or some word not in the Vocabulary of the Code.

A knowledge of the Distant Signals should be required of the Candidate, their object and the mode of signalling by the Distant Code, which will be found at the end of the Signal Book.

For this purpose two Black Balls, two Black Square Flags, and two Black Pennants will be furnished with the Frame board, and the Candidate should be required to make one or two Distant Signals, and to read off one or two made by the Examiners.

The Ball being the distinguishing symbol of the Distant Signal, any Pennants or Flags of the Code may be employed in conjunction with it, irrespective of colour. The Black Pennants and Flags are merely sent as showing best in the light background of the Frame board.

The Examiners should be careful to ascertain that the Candidate possesses a knowledge of the Distress Signals which came into operation November 1st, 1873.

Semaphores.

A plate at the end of the Signal Book explains the method by which the arms of the Semaphore are made to represent by their position (up, down, or horizontal,) the three symbols used for Distant Signalling, viz. a Flag, a Ball, or a Pennant. Before making Signals with the Semaphore, the Black Disc with the white rim should be placed on the top of the Semaphore Mast, as it properly forms a part of the Mast itself.

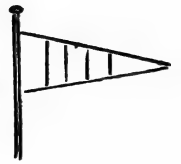
The International Code is used on board Her Majesty's Ships and it has been adopted by all the principal maritime powers for their Imperial as well as for their Mercantile Navies.

Note.—The International Code of Signals, with the Code List, as prepared by the Registrar-General of Shipping and Seamen, and may be had of the Publishers, Messrs. Spottiswood & Co., 54, Gracechurch Street, London, and the principal Booksellers at the various ports.

The Official Mercantile Navy List and Maritime Directory published for the use of Merchants, Shipowners, Shipbrokers, and others, may be obtained in like manner, price 12*s*.

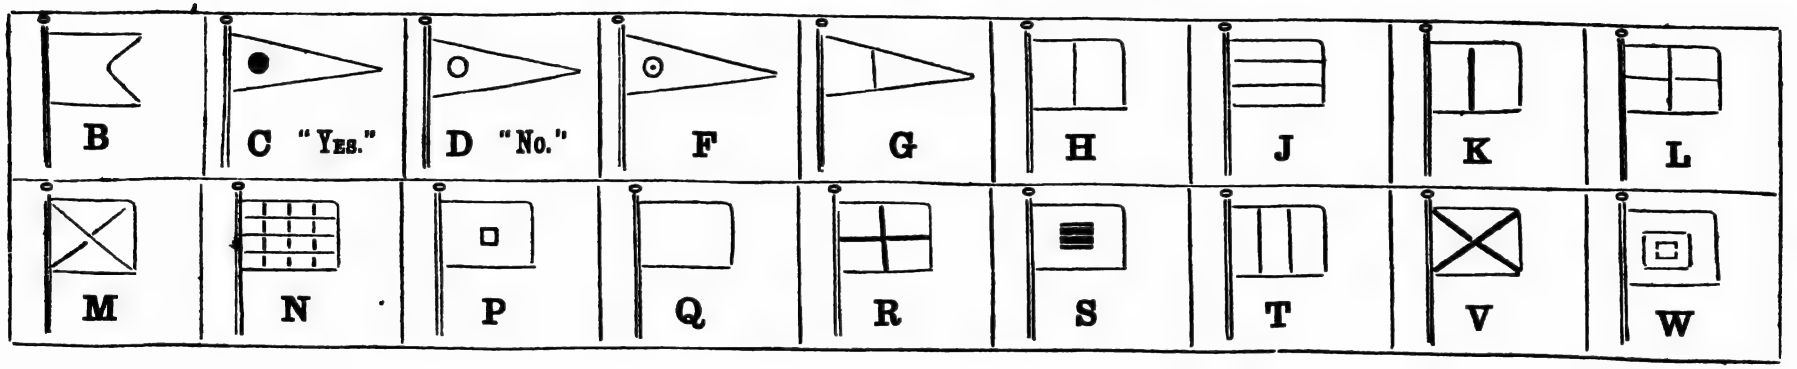
* The object of this is, of course, to distinguish the Signals from those o another Code.

FLAGS OF THE INTERNATIONAL CODE OF SIGNALS.

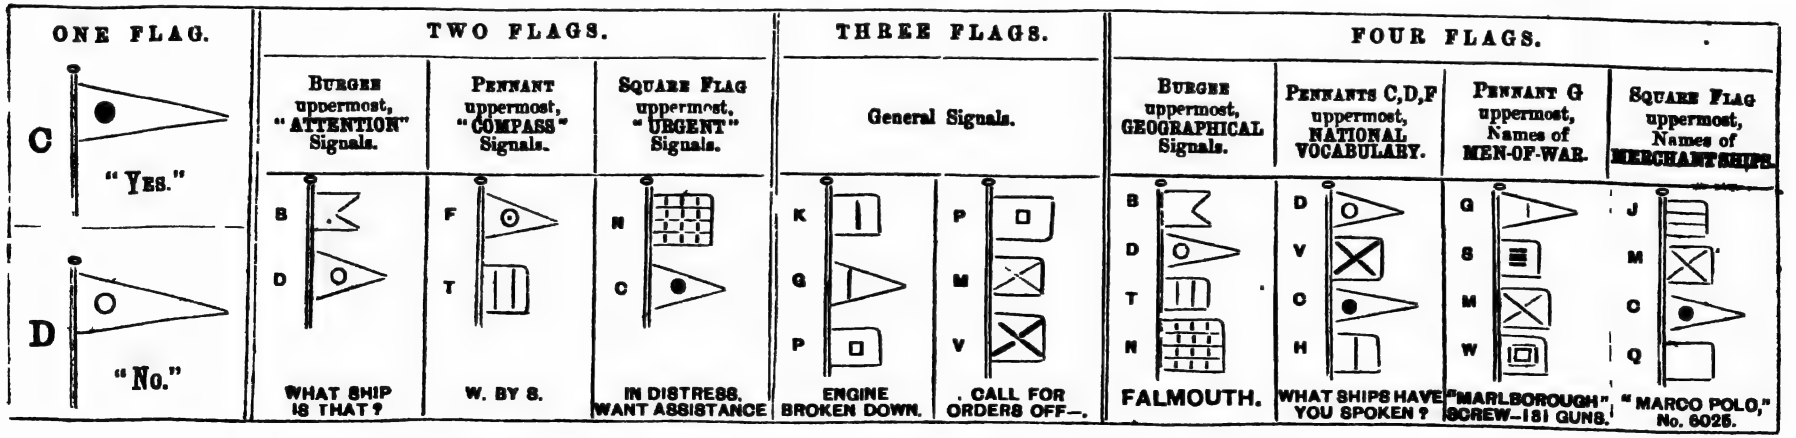


"CODE SIGNAL" AND "ANSWERING PENNANT."

N.B.—When used as the "Code Signal," this Pennant is to be hoisted under the "Ensign;" when used as the "Answering Pennant," where best seen.



The following examples will serve to illustrate how the *form of a Hoist* will usually denote the *nature of the Signal* made :—



APPENDIX D.

Regulations respecting Lights and Fog Signals and Steering and Sailing Rules Issued by the Board of Trade.

NOTICE.

The Board of Trade have had their attention drawn to the necessity of a more strict examination of applicants for Certificates of Competency in their knowledge of the regulations for preventing collisions at sea.

In order that the rule of the road at sea may be better understood, and that a uniform system of examination may prevail, the Board of Trade have issued the following catechism.

This catechism has received the approval of the Trinity House and Admiralty in England, and of the Council of the Admiralty of France.

The Board of Trade attach very great importance to a thorough knowledge of the steering and sailing rules on the part of every applicant for a Certificate of Competency, and a thorough examination on the part of the examiners.

All applicants for examination, whether for certificates as masters or mates, are to be examined as to their knowledge of the steering and sailing rules each time they present themselves for examination.

Questions suggested by the following heads of Examination are to be asked in addition to, and are not to supersede, any other questions proper and necessary to be asked by the Examiner.

The following questions need not be adhered to literally by the Examiner, and are not all to be asked ; but the substance of the leading questions should be asked, and all that are asked should be satisfactorily answered, before an applicant is reported to have passed his examination. The Examiner should make such a selection of the questions as each case appears to him to require.

Thomas Gray,
Assistant Secretary.

Board of Trade,
Marine Department.

Heads of Examination in Regulations respecting Lights and Fog Signals and in the Steering and Sailing Rules.

1. What light or lights are required by the regulations to be exhibited by sailing vessels at anchor ?

One light only, viz., a white light.

2. What light or lights are required by the regulations to be exhibited by steam-ships at anchor ?

The same as for sailing vessels.

3. Where is the anchor light to be exhibited ?

Where it can best be seen. It must of course be placed where there is the least possible chance of obstruction from spars, ropes, &c., &c.

4. To what height may the anchor light be hoisted ?

It may be exhibited at any height where it can best be seen not exceeding 20 feet above the deck.

5. What is the description of the lantern containing the anchor light required by the regulations ?

A globular lantern of not less than eight inches in diameter.

6. In what direction or directions must the anchor light show ?

It must show a clear, uniform, and unbroken light, visible all round the horizon.

7. At what distance must it be visible ?

At least one mile.

8. What is the number of lights required by the regulations to be carried by sailing ships when under weigh at night ?

Two side-lights, and to have in readiness a white light or a flare-up light to show from their stern to any vessel overtaking them.

9. Of what colour are these lights, and how are they to be placed on board the ship ?

A green light on the starboard side, and a red light on the port side.

10. What description of light must be shown from the sides of sailing vessels under weigh ; and over how many points of the compass, and in what directions, and how far, are they required to show ?

Each light must be so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass ; so fixed as to throw the light from right ahead to two points abaft the beam on the starboard and port sides respectively

and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

11. What lights are they to carry when being towed at night?

The same.

12. Are the side-lights required to be fitted with screens; and if so, of what length, and how?

Yes, on the inboard side; at least three feet in length, measuring forward from the light. They are to be so fitted as to prevent the coloured lights from being seen across the bows.

13. What is the number of lights required by the regulations to be carried by steam ships when under steam at night?

Three lights, and to have in readiness a white light or flare-up light to show from their stern to any vessel overtaking them.

14. Of what colour are these lights, and how are they to be placed on board the ship?

A white light on or in front of the foremast at a height above the hull of not less than 20 feet, and if the breadth of the ship exceeds 20 feet, then at a height above the hull not less than such breadth. A green light on the starboard side, and a red one on the port side.

15. Over how many points of the compass, in what direction, and how far, is the foremast-head light of a steamer required to show?

Over 20 points, viz., from right ahead to two points abaft the beam on both sides. It must be of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.

16. Are the side-lights required to be fitted with screens; and if so, of what length?

The green and red lights are to be fitted with screens on the inboard side, extending at least three feet forward from the light, as in the case of sailing vessels.

17. Over how many points of the compass, in what directions, and how far, are the coloured side-lights of steamers required to show?

The side-lights must be so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass, on each side of the ship, *i.e.*, from right ahead to two points abaft the beam on the starboard and port sides respectively, and of such a character as to be visible on a dark night with a clear atmosphere at a distance of at least two miles.

18. What description of lights are steamers required by the regulations to carry when they are not under steam, but under sail only?

Side-lights only, the same as sailing vessels.

19. What exceptional lights are to be carried by small sailing vessels in certain cases?

Whenever, as in the case of small vessels during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept on deck, on their respective sides of the vessel, ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

20. What description of lights are pilot vessels required to carry when on their stations on pilotage duty?

A pilot vessel, when engaged on her station on pilotage duty, shall not carry the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

21. What description of lights are pilot vessels required to carry when not on their station on pilotage duty?

A pilot vessel, when not engaged on her station on pilotage duty, shall carry lights similar to those of other ships.

22. What lights are open boats and fishing vessels of less than 20 tons net register required to carry when under way, and not actually engaged in fishing.

Open boats and fishing vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side-lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side and a red glass on the other side, and on approaching to, or being approached by another vessel, such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side, nor the red light on the starboard side.

23. What lights are fishing vessels and fishing boats of 20 tons net register, or upwards, required to carry when under way and not actually engaged in fishing?

They must carry similar lights to those of other ships when under way.

24. What lights are steam trawlers of 20 tons gross register, or upwards, whilst actually engaged in trawling, and not being stationary, required to carry?

All steam-vessels engaged in trawling must carry either one of the two following arrangements of lights, whichever of the two may be the more convenient:—

(*a*) The usual green and red side-lights, and foremast-head light, similar to those carried by other steam-ships; or

(*b*) They must carry on or in front of the foremast-head, and in the same position as the white light which other steam-ships are required to carry, a lanthorn showing a white light ahead, a green light on the starboard side, and a red light on the port side; such lanthorn shall be so constructed, fitted, and arranged as to show an uniform and unbroken white light over an arc of the horizon of four points of the compass, an uniform and unbroken green light over an arc of the horizon of 10 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: and (2) a white light in a gobular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon; the lanthorn containing such white light shall be carried lower than the lanthorn showing the green, white, and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet, nor more than 12 feet.

25. What lights are sailing trawlers whilst actually engaged in trawling, and not being stationary, required to carry?

All sailing vessels, of whatever tonnage, whilst engaged in trawling, must carry either one of the three following arrangements of lights, whichever of the three, (*a*), (*b*), or (*c*), may be the most convenient:—

(*a*) They may carry the green and red side-lights similar to those of other sailing ships; or

(*b*) They may carry on or in front of the foremast-head a lanthorn having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show an uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side and the red light from right ahead to four points abaft the beam on the port side; and (2) a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear, uniform and unbroken light all round the horizon; the lanthorn containing such white light shall be carried lower than the lanthorn showing the green and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet; or

(*c*) They may carry a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear, uniform and unbroken light all round the horizon, and visible on a dark night, with a clear atmosphere, for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 30 seconds, and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by, another ship or vessel in sufficient time to prevent collision.

26. What lights are vessels whilst actually engaged in drift net fishing required to carry?

All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of the vessel shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character and contained in lanterns of such construction as to show all round the horizon, on a dark night, with a clear atmosphere, for a distance not less than three miles.

27. What lights are vessels whilst actually engaged in line fishing required to carry?

A vessel engaged in line fishing is required to carry the same lights as a vessel engaged in drift net fishing.

28. If a vessel, when fishing, becomes stationary in consequence of her gear getting fast to a rock or other obstruction, what signal must she make?

She must show the same light, and if a fog, mist, or falling snow prevail, she must make the same fog signals as if she were at anchor.

29. What lights are fishing vessels and open boats required to exhibit when at anchor?

Between sunset and sunrise they must exhibit a white light, visible all round the horizon at a distance of at least one mile, the same as any other vessel.

30. What sound signals are fishing vessels required to make whilst engaged in fishing in thick weather?

In fog, mist, or falling snow, a drift net vessel attached to her nets, and a vessel when trawling, dredging, or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog-horn and ring her bell alternately.

31. May fishing vessels and open boats use flare-up lights, and if so, at what part, or parts, of the vessel should they be exhibited?

Yes. Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are by this article required to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after part of the vessel, excepting that, if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

32. Do these regulations referring specially to fishing vessels and boats apply to foreign vessels, and to all parts of the world?

No, with the exception of the *first paragraph* of Article 10 of the regulations, they apply only to British vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre.

33. What lights are steam-ships required to carry when towing other ships?

A steam-ship, when towing another ship, shall, in addition to her side-lights, carry two bright white lights in a vertical line one over the other, not less than three feet apart, so as to distinguish her from other steam-ships. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light which other steam-ships are required to carry.

34. What light is a ship which is being overtaken by another required to show?

A ship which is being overtaken by another shall show from her stern to such last-mentioned ship a white light or a flare-up light.

35. Describe the lights and the day signals that vessels employed in laying or picking up a telegraph cable are required to carry.

A ship, whether a steam-ship or a sailing ship employed in laying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line over one another, not less than six feet apart: the highest and lowest of these lights shall be red and the middle light shall be white, and they shall be of such a character that the red lights shall be visible at the same distance as the white light. By day she shall carry in a vertical line one over the other, not less than six feet apart, in front of, but not lower than her foremast-head, three shapes not less than two feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

36. Describe the lights and the day signals that vessels which from any cause are not under command are required to carry.

A ship, whether a steam-ship or a sailing ship, which from any accident is not under command, shall at night carry, in the same

position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three red lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line one over the other, not less than three feet apart, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles; and shall by day carry in a vertical line, one over the other, not less than three feet apart, in front of but not lower than her foremast-head, three black balls or shapes, each two feet in diameter.

37. Are the above-mentioned ships to carry side-lights?

The above ships, when not making any way through the water, shall not carry the side-lights, but when making way shall carry them.

38. What are the previous mentioned shapes and lights intended to indicate to approaching ships?

These shapes and lights are to be taken by approaching ships as signals that the ship using them is not under command, and cannot therefore get out of the way.

39. Do these rules prevent squadrons and convoys from carrying special lights?

No. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war, or for ships sailing under convoy.

40. What sound signals are steam-ships and sailing ships required by the regulations to be provided with?

A steam-ship shall be provided with a steam whistle or other efficient steam sound signal, so placed that the sound may not be intercepted by any obstructions, and with an efficient fog-horn to be sounded by bellows or other mechanical means, and also with an efficient bell. A sailing ship shall be provided with a similar fog-horn and bell.

41. When are these signals to be used?

In fog, mist, or falling snow, whether by day or night.

42. What sound signal is to be made by steam-ships and sailing ships when not under way?

A steam-ship and a sailing ship when not under way shall, at intervals of not more than two minutes, ring the bell.

43. What sound signal is required to be made by a steam-ship when under way?

A steam-ship under way shall make with her steam whistle, or other steam sound signal, at intervals of not more than two minutes, a prolonged blast.

44. What sound signals are required to be made by sailing ships when under way?

A sailing ship under way shall make with her fog-horn, at intervals of not more than two minutes, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

45. Do the regulations require ships to take any other precaution during thick weather?

Yes. Art. 18 says every ship, whether a sailing ship or steam-ship, shall, in a fog, mist, or falling snow, go at a moderate speed.

46. Is it optional for a steam-ship to make any other signals with her steam whistle?

Yes; but only to vessels in sight, *i.e.*, not to vessels which are so obscured by fog, mist, or falling snow that they cannot be seen, though their whistles may be heard.

Art. 19 provides that in taking any course authorised or required by the regulations, a steam-ship under way may indicate that course to any other ship which she has in sight by the following signals on her steam whistle, viz.:—

One short blast to mean "I am directing my course to starboard:"

Two short blasts to mean "I am directing my course to port:"

Three short blasts to mean "I am going full speed astern."

The use of these signals is optional; but if they are used, the course of the ship must be in accordance with the signal made.

47. What precaution is to be taken by steamers approaching another vessel?

If there is risk of collision, the steamer is to slacken speed, or, if necessary, stop and reverse.

48. If you see two white lights in a vertical line one over the other, what do they denote as regards the vessel carrying them?

They denote the presence of a steamer towing with her side lights not within sight on account of distance, fog, &c.; or a vessel end on to me engaged in drift net fishing, or in line fishing, or it may be a steam trawler end on, or within 2 points of being end on, to me.

49. If you see a green, or a red, light with a white light below, what do they denote?

They denote the presence of either a sailing, or a steam, vessel engaged in trawling.

50. If you see both the green and red lights with a white light below them, what do they denote?

They denote the presence of a sailing trawler coming end on to me.

51. If you see a white light alone, what does it denote as regards the ship carrying it?

It denotes the presence of a vessel or boat at anchor; or a pilot vessel on her station; or the mast-head light of a vessel, under steam, with her side-lights not within sight on account of distance, fog, &c., or a fishing vessel stationary through her gear getting fast to some obstruction, or a sailing traveller engaged in trawling (1) under one arrangement of lights heading so that her side-lights or obscured, (2) under another arrangement from the red pyrotechnic light not having been exhibited, or it may be a light shown from the stern of a vessel which is being overtaken.

52. If you see a green or a red light without a white light, or both a green and a red light without a white light, is the vessel carrying the light or lights seen, a vessel under steam or a vessel under sail?

A vessel under sail.

53. How do you know?

Because there is no white mast-head light.

54. If you see a white light over a coloured light, is the vessel a vessel under sail or a vessel under steam?

A vessel under steam. The mast-head light denotes that the vessel is under steam.

[The Examiner will then take one model of a vessel, which he will place on the table, and call it A. He will then take the mast or stand with a white and a red ball on it, and place it at the other end of the table and call it B.

The Examiner should be careful that the model of one vessel only is used when the questions numbered 55 to 60 are asked.]

55. A is a steamer going north, seeing a white light and red light right ahead at B. Are A and the vessel B showing the two lights meeting end on or nearly end on, or is B passing A, or is B crossing the path of A, and in what direction, and how do you know?

Passing to port, because if I see a red light ahead, I know that the head of the vessel carrying that red light must be pointing away in some direction to my own port or left hand. The ship showing the red light has her port or left side more or less open to A.

56. If A is going north, within what points of the compass must the vessel B showing the white and red lights be steering?

B must be going from a little W. of S. to W.N.-W.

57. How do you know this?

Because the screens being properly fitted, I could not see the red light of B at all with the vessel's head in any other direction.

58. A is a steamer going north, and seeing a white and green light ahead. Are A and B meeting, or is B passing A, or is B crossing the course of A, and in what direction; and how do you know?

B is passing to starboard of A, because if I see a green light ahead, I know that the head of the vessel carrying that green light must be pointing away in some direction to my starboard or right hand. The ship showing the green light has her right or starboard side more or less open to me.

59. As A is going north, within what points of the compass must the vessel showing the white and green lights be steering?

B must be going from a little E. of South to E.N.-E.

60. How do you know?

Because the screens being properly fitted, I cannot see the green light at all with the vessel's head in any other direction.

61. If a steamer A sees the *three* lights of another steamer B ahead or nearly ahead, are the two steamers meeting, passing, or crossing?

Meeting end on, or nearly end on.

62. Do the regulations expressly require the course of a ship to be altered to starboard in any case; and if so, when?

Yes; in the case of two steamers meeting end on, or nearly end on.

63. Do they expressly require the course of a ship to be altered to starboard in any other case; and if so, in what other?

No. It is not in any other case expressly required by the regulations.

[The Examiner should see that the candidate puts the models in the position indicated by the question 64, and following.]

64. If a steamer A sees another steamer's red light B on her own starboard side, are the steamers meeting, passing, or crossing; and how do you know?

Crossing, because the red light of one is opposed to the green light of the other; and whenever a green light is opposed to a red light, or a red light to a green light, the ships carrying the lights are crossing ships.

65. Is A to stand on; and if not, why not?

A has the other vessel B on her own starboard side. A knows she is crossing the course of B, because she sees the red light of B on her (A's) own starboard side. A also knows she must get out of the way of B, because Article 16 expressly requires that the steamer that has the other on her own starboard side shall keep out of the way of the other.

66. Is A to starboard or to port in such a case?

A must do what is right so as to get herself out of the way of B: it is generally preferable to pass under a ship's stern rather than attempt to cross her bows, but it depends entirely on the position and relative speed of the two ships, and therefore the regulations wisely leave the giving way ship to get out of the way in any manner that may be most desirable, so always that she does get out of the way.

67. If A gets into collision by porting, will it be because she is acting on any rule?

No; the rule does not require her either to port or to starboard. If she ports, and gets into collision by porting, it is not the fault of any rule.

68. If a steamer A sees the green light of another steamer B on her own (A's own) port bow, are the two steamers meeting, passing, or crossing; and how do you know?

Crossing, because the green light of one ship is shown to the red light of the other.

69. What is A to do, and why?

By the rule contained in Article 22 of the Regulations, A is required to keep her course, subject only to the qualification that due regard must be had to all dangers of navigation; and that due regard must also be had to any special circumstances which may exist in any particular case rendering a departure from that rule necessary in order to avoid immediate danger. The crossing ship B on A's port side must get out of the way of A, because A is on B's starboard side.

70. A, a steamer, sees the green light of another steamer, B, a point on her A's port bow. Is there any regulation requiring A to port in such a case; and if so, where is it to be found?

There is not any.

71. Are steam-ships to get out of the way of sailing ships?

If a steamer and a sailing ship are proceeding in such direction as to involve risk of collision, the steamer is to get out of the way of the sailing ship, unless the sailing ship is overtaking the steamer.

72. What is to be done by A, whether a steamer or a sailing ship, if overtaking B?

A is to keep out of the way of B.

73. When the by rules one of two ships is required to keep out of the way of the other, what is the other to do?

To keep her course. This is absolutely necessary to enable the commander of the ship required by the regulations to keep out of the way, to act with decision and promptitude, which he cannot possibly, unless he knows what the other vessel is going to do.

74. Is there any qualification or exception to this?

Yes. Due regard must be had to all dangers of navigation, and to any special circumstances which may exist in any particular case, and require a departure from the regulations to avoid immediate danger.

75. Is there any general direction in the steering and sailing rules; and if so, what is it?

Yes, it is this: that nothing in the rules shall exonerate any ship, or the owner, master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

76. Can you repeat article (———) of the regulations, I refer to the article containing the rule for (———)?

[The Examiner should repeat this question, naming a different article each time.]

77. What does the Act of Parliament provide as to the obligation of owners and masters in obeying the regulations respecting lights, fog signals, and steering and sailing?

Section 27 of "the Merchant Shipping Act Amendment Act, 1862," provides that owners and masters shall be bound to obey the regulations, and it also provides that in case of wilful default

by the master or owner he shall be deemed to be guilty of a misdemeanor for each infringement.

78. What do breaches of the regulations imply ?

If an accident happens through non-observance of the regulations, it implies wilful default on the part of the person in charge of the deck at the time, unless it is shown to the satisfaction of the court hearing the case that the special circumstances of the case rendered a departure from the rules necessary.

79. If collision ensues from a breach of there gulations, who is to be deemed in fault for the collision ?

The person by whom the regulations are infringed, unless the court hearing the case decides to the contrary.

80. Is there any special rule for steam-ships navigating narrow channels ?

In narrow channels every steam-ship shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which is on the starboard side of such ship.

81. Do the regulations apply to sea-going ships in harbours and in rivers ?

Yes: unless there is any rule to the contrary made by a competent authority.

82. Do they apply to British ships only ?

No, to foreign ships as well, with the exception of paragraphs (*a*), (*b*), (*c*), (*d*), (*e*), (*f*) and (*g*) of Article 10, which apply to only British fishing vessels.

83. Do you know where the present regulations are to be found ?

Yes, in the Orders in Council of the 11th August 1884, the 30th December 1884, and 24th June 1885. Copies are given away on application to the Board of Trade.

84. Is one ship bound to assist another in case of collision ?

Yes.

85. What is the penalty for default ?

If the master or person in charge of the ship fails to render assistance without reasonable excuse, the collision is, in absence of proof to the contrary, to be deemed to be caused by his wrongful act, neglect, or default.

86. Is there any other penalty attached to not rendering assistance ?

Yes. If it is afterwards proved that he did not render assistance, his certificate may be cancelled or suspended by the court investigating the case.

87. Is it not expected that you should understand the regulations before you take charge of the deck of a ship ?

It is.

88. Why ?

If I do not understand them and am guilty of default, the consequences will be very serious to me.

89. What would be a serious offence ?

To cause a collision by porting the helm or doing anything not required by the regulations and without due consideration.

Regulations for preventing collisions at sea. Order in Council of 11th August 1884.

Preliminary.

Art. 1, In the following rules every steam-ship which is under sail and not under steam is to be considered a sailing ship ; and every steam-ship which is under steam, whether under sail or not, is to be considered a ship under steam.

Rules concerning Lights.

Art. 2. The lights mentioned in the following Articles, numbered 3, 4, 5, 6, 7, 8, 9, 10 and 11, and no others, shall be carried in all weathers, from sunset to sunrise.

Art. 3. A sea-going steam-ship when under way shall carry—

(*a*) On or in front of the foremast, at a height above the hull of not less than 20 feet, and if the breadth of the ship exceeds 20 feet, then at a height above the hull not less than such breadth, a bright white light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 20 points of the compass ; so fixed as to throw the light 10 points on each side of the ship, viz. from right ahead to two points abaft the beam on either side ; and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.

(*b*) On the starboard side, a green light so constructed as to show an uniform and unbroken light over an arc of the

horizon of 10 points of the compass; so fixed as to throw the light from right ahead to 2 points abaft the beam on the starboard side; and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(*c*) On the port side, a red light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass; so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side; and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(*d*) The said green and red side-lights shall be fitted with inboard screens projecting at least three feet forward from the light, so as to prevent these lights from being seen across the bow.

Art. 4. A steam-ship, when towing another ship, shall in addition to her side-lights, carry two bright white lights in a vertical line one over the other, not less than three feet apart, so as to distinguish her from other steam-ships. Each of these lights shall be of the same construction and character, and shall be carried in the same position, as the white light which other steam-ships are required to carry.

Art. 5. (*a*.) A ship, whether a steam-ship or a sailing ship, which from any accident is not under command, shall at night carry, in the same position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three red lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line one over the other, not less than three feet apart, and of such a character as to be visible on a dark night with a clear atmosphere at a distance of at least two miles; and shall by day carry in a vertical line, one over the other, not less than three feet apart, in front of, but not lower than, her foremast-head, three black balls or shapes, each two feet in diameter.

(*b*.) A ship, whether a steam-ship or a sailing ship, employed in laying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line one over another, not less than six feet apart: the highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character that the red lights shall be visible at the same distance as the white light. By day she shall carry in a vertical line one over the other, not less than six feet apart, in front of, but not lower than, her foremast-head, three shapes not less than two feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*.) The ships referred to in this Article, when not making any way through the water, shall not carry the side-lights, but when making way, shall carry them.

(*d*.) The lights and shapes required to be shown by this Article are to be taken by other ships as signals that the ship showing them is not under command, and cannot therefore get out of the way. The signals to be made by ships in distress and requiring assistance are contained in Article 27.

Art. 6. A sailing ship under way, or being towed, shall carry the same lights as are provided by Article 3 for a steam-ship under way, with the exception of the white light, which she shall never carry.

Art. 7. Whenever, as in the case of small vessels during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept on deck, on their respective sides of the vessel, ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

Art. 8. A ship, whether a steam-ship or a sailing ship, when at anchor, shall carry, where it can best be seen, but at height not exceeding 20 feet above the hull, a white light, in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform and unbroken light visible all round the horizon at a distance of at least one mile.

Art. 9. A pilot vessel, when engaged on her station on pilotage duty, shall not carry the lights required for other vessels, but

shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

A pilot vessel, when not engaged on her station on pilotage duty, shall carry lights similar to those of other ships.

Art. 10. Open boats and fishing vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side-lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side and a red glass on the other side, and on approaching to, or being approached by another vessel, such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side, nor the red light on the starboard side.

The following portion of this article applies only to fishing vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre :—

(*a*) All fishing vessels and fishing boats of 20 tons net registered tonnage, or upwards, when under way and when not required by the following regulations in this article to carry and show the lights therein named, shall carry and show the same lights as other vessels under way.

(*b*) All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of the vessel shall be not less than five feet, and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction as to show all round the horizon, on a dark night with a clear atmosphere, for a distance of not less than three miles.

(*c*) A vessel employed in line fishing with her lines out shall carry the same lights as a vessel when engaged in fishing with drift nets.

(*d*) If a vessel when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall show the light and make the fog signal for a vessel at anchor.

(*e*) Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are by this Article required to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after part of the vessel, excepting that, if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

(*f*) Every fishing vessel and every open boat when at anchor between sunset and sunrise shall exhibit a white light visible all round the horizon at a distance of at least one mile.

(*g*) In fog, mist, or falling snow, a drift net vessel attached to her nets and a vessel when trawling, dredging, or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog-horn and ring her bell alternately.

Art. 11. A ship which is being overtaken by another shall show from her stern to such last-mentioned ship a white light or a flare-up light.

Sound Signals for Fog, &c.

Art. 12. A steam-ship shall be provided with a steam whistle or other efficient steam sound signal, so placed that the sound may not be intercepted by any obstructions, and with an efficient fog horn to be sounded by a bellows or other mechanical means, and also with an efficient bell.* . A sailing ship shall be provided with a similar fog-horn and bell.

In fog, mist, or falling snow, whether by day or night, the signals described in this Article shall be used as follows; that is to say—

(*a*) A steam-ship under way shall make with her steam whistle, or other steam sound signal, at intervals of not more than two minutes, a prolonged blast.

(*b*) A sailing ship under way shall make with her fog-horn, at intervals of not more than two minutes, when on the

* In all cases where the regulations require a bell to be used, a drum will be substituted on board Turkish vessels.

starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*c*) A steam-ship and a sailing ship, when not under way shall, at intervals of not more than two minutes, ring the bell.

Speed of Ships to be moderate in Fog, &c.

Art. 13. Every ship, whether a sailing ship or steam-ship, shall in a fog, mist, or falling snow, go at a moderate speed.

Steering and Sailing Rules.

Art. 14. When two sailing ships are approaching one another so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.—

(*a*) A ship which is running free shall keep out of the way of a ship which is close-hauled.

(*b*) A ship which is close-hauled on the port tack shall keep out of the way of a ship which is close-hauled on the starboard tack.

(*c*) When both are running free with the wind on different sides, the ship which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free with the wind on the same side, the ship which is to windward shall keep out of the way of the ship which is to leeward.

(*e*) A ship which has the wind aft shall keep out of the way of the other ship.

Art. 15. If two ships under steam are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where ships are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two ships which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are, when each of the two ships is end on, or nearly end on, to the other; in other words, in cases in which, by day, each ship sees the masts of the other in a line, or nearly in a line, with her own; and by night, to cases in which each ship is in such a position as to see both the side-lights of the other.

It does not apply, by day, to cases in which a ship sees another ahead crossing her own course; or by night, to cases where the red light of one ship is opposed to the red light of the other, or where the green light of one ship is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Art. 16. If two ships under steam are crossing, so as to involve risk of collision, the ship which has the other on her own starboard side shall keep out of the way of the other.

Art. 17. If two ships, one of which is a sailing ship, and the other a steam-ship, are proceeding in such directions as to involve risk of collision, the steam-ship shall keep out of the way of the sailing ship.

Art. 18. Every steam-ship, when approaching another ship, so as to involve risk of collision, shall slacken her speed or stop and reverse, if necessary.

Art. 19. In taking any course authorised or required by these Regulations, a steam-ship under way may indicate that course to any other ship which she has in sight by the following signals on her steam whistle, viz.—

One short blast to mean "I am directing my course to starboard:"

Two short blasts to mean "I am directing my course to port:"

Three short blasts to mean "I am going full speed astern."

The use of these signals is optional; but if they are used, the course of the ship must be in accordance with the signal made.

Art. 20. Notwithstanding anything contained in any preceding Article, every ship, whether a sailing ship or a steam-ship, overtaking any other shall keep out of the way of the overtaken ship.

Art. 21. In narrow channels every steam-ship shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such ship.

Art. 22. Where by the above rules one of two ships is to keep out of the way, the other shall keep her course.

Art. 23. In obeying and construing these rules due regard shall be had to all dangers of navigation; and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

No Ship, under any circumstances, to neglect proper Precautions.

Art. 24. Nothing in these rules shall exonerate any ship, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

Art. 25. Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland navigation.

Special Lights for Squadrons and Convoys.

Art. 26. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for ships sailing under convoy.

Art. 27. When a ship is in distress, and requires assistance from other ships or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, that is to say—

In the day-time—

1. A gun fired at intervals of about a minute.
2. The International Code signal of distress indicated by N C.
3. The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball.

At night—

1. A gun fired at intervals of about a minute.
2. Flames on the ship (as from a burning tar barrel, oil barrel, &c.).
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals.

ORDERS IN COUNCIL OF 30TH DECEMBER 1884 AND 24TH JUNE 1885.

ALTERNATIVE LIGHTS FOR TRAWLERS WHEN ENGAGED IN TRAWLING, HAVING THEIR TRAWLS IN THE WATER AND NOT BEING STATIONARY.

1884.—PART I.—STEAM-VESSELS OF 20 TONS GROSS REGISTER TONNAGE OR UPWARDS.

(1.) On or in front of the foremast head and in the same position as the white light which other steam-ships are required to carry, a lanthorn showing a white light ahead, a green light on the starboard side, and a red light on the port side, such lanthorn shall be so constructed, fitted, and arranged as to show an uniform and unbroken white light over an arc of the horizon of four points of the compass, an uniform and unbroken green light over an arc of the horizon of 10 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: (2) a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, the lanthorn containing such white light shall be carried lower than the lanthorn showing the green, white, and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet nor more than 12 feet.

1884.—PART II.—SAILING VESSELS OF 20 TONS NET REGISTER TONNAGE OR UPWARDS.

(1.) On or in front of the foremast head a lanthorn having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show an uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft

the beam on the port side: and (2) a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, the lanthorn containing such white light shall be carried lower than the lanthorn showing the green and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet.

1885.—Sailing Trawlers of any Tonnage.

As regards sailing vessels engaged in trawling, such vessels having their trawls in the water and not being stationary in consequence of their gear getting fast to a rock or other obstruction, if they do not carry and show the lights required by Article 6 of the Regulations aforesaid, or the other lights of the description set forth in Part 2 of the Schedule to the said recited Order in Council of the 30th of December, 1884, shall carry and show in lieu of the lights required by Article 6 of the Regulations aforesaid, or the other lights of the description set forth in paragraph 2 of the Schedule to the said recited Order, other lights as follows, that is to say:

A white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, and visible on a dark night with a clear atmosphere for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 30 seconds, and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by another ship or vessel in sufficient time to prevent collision.

Aids to Memory in four verses, by Thomas Gray.

1 *Two Steam-ships meeting.*

When both side-lights you see ahead—
Port your helm and show your RED.

2. *Two Steam-ships passing.*

GREEN TO GREEN——or, RED TO RED——
Perfect safety——Go ahead!

3 *Two Steam-ships crossing.*

Note.—This is the position of greatest danger: there is nothing for it but good look-out, caution, and judgment.

If to your starboard RED appear,
It is your duty to keep clear;
To act as judgment says is proper:—
To port—or Starboard—Back,—or, Stop her!

But when upon your Port is seen
A Steamer's Starboard Light of GREEN,
There's not so much for you to do,
For GREEN to Port keeps clear of you.

4. *All Ships must keep a good look-out, and Steam-ships must stop and go astern, if necessary.*

Both in safety and in doubt
Always keep a good look-out;
In danger, with no room to turn,
Ease her, stop her, go astern.

14th October 1867.

APPENDIX E.

Distress and Pilot Signals.

The following sections, together with the schedules referred to therein, of the "Merchant Shipping Acts Amendment Act, 1873," relate to Signals of Distress and signals for Pilots. (*See also* "*Regulations for preventing Collisions at sea.*" *Article* 27.)

M. S. Act, 1873.

18. The signals specified in the first schedule to this Act shall be deemed to be signals of distress.

Signals of distress.

Any master of a vessel who uses or displays, or causes or permits any person under his authority to use or display, any of the said signals, except in the case of a vessel being in distress, shall be liable to pay compensation for any labour undertaken, risk incurred, or loss sustained in consequence of such signal having been supposed to be a signal of distress, and such compensation may, without prejudice to any other remedy, be recovered in the same manner in which salvage is recoverable.

Signals for pilots.

19. If a vessel requires the services of a pilot, the signals to be used and displayed shall be those specified in the second schedule to this Act.

Any master of a vessel who uses or displays, or causes or permits any person under his authority to use or display, any of the said signals for any other purpose than that of summoning a pilot, or uses or causes or permits any person under his authority to use any other signal for a pilot, shall incur a penalty not exceeding twenty pounds.

Power to alter rules as to signals.

20. Her Majesty may from time to time by Order in Council repeal or alter the rules as to signals contained in the schedules to this Act, or make new rules in addition thereto, or in substitution therefor, and any alterations in or additions to such rules made in manner aforesaid shall be of the same force as the rules in the said schedules.

SCHEDULES.

SCHEDULE I.

Signals of Distress.

In the day-time.—The following signals, numbered 1, 2 and 3, when used or displayed together or separately, shall be deemed to be signals of distress in the day-time:—

1. A gun fired at intervals of about a minute;
2. The International Code signal of distress indicated by N C;
3. The distant signal, consisting of a square flag having either above or below it a ball, or anything resembling a ball.

At night.—The following signals, numbered 1, 2 and 3, when used or displayed together or separately, shall be deemed to be signals of distress at night:

1. A gun fired at intervals of about a minute;
2. Flames on the ship (as from a burning tar barrel, oil barrel, &c.);
3. Rockets or shells, of any colour or description, fired one at a time, at short intervals.

SCHEDULE II.

Signals to be made by Ships wanting a Pilot.

In the day-time.—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot in the day-time, viz.—

1. To be hoisted at the fore, the Jack or other national colour usually worn by merchant ships, having round it a white border, one-fifth of the breadth of the flag; or
2. The International Code pilotage signal indicated by P T.

At night.—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot at night, viz.—

1. The pyrotechnic light, commonly known as a blue light, every fifteen minutes; or
2. A bright white light, flashed or shown at short or frequent intervals, just above the bulwarks, for about a minute at a time.

APPENDIX F.

Examination in Chart.

For all Grades where the Chart is used.

[The candidate will be required to work out the following questions on either a "true" or "magnetic" chart* whichever may be handed to him by the Examiner; and also determine whether the chart is a "true" or "magnetic" one, and whether it is for the northern or southern, and eastern or western hemisphere.]

* The terms "true" and "magnetic" are used for the sake of brevity and convenience, for indicating charts that have compasses delineated upon them showing the "true" or "magnetic" point of the compass respectively.

1. Using deviation [card] [curve*] No. , find the course to steer by compass from to ; also the distance.

Answer.—Compass course °

Distance °

Variation °

Deviation °

2. With the ship's head on the above-named compass course a [point] [light-house] bore by compass and bore by the same compass, find the ship's position.

Answer.—Latitude °

Longitude °

3. With the ship's head as above, a [point] [light-house] bore by compass , and after continuing on the same course miles it bore , find the position of ship and her distance from at the time of taking the second bearing.

Answer.—Latitude °

Longitude °

Distance °

All the foregoing questions must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the port may require.

Signature °

Date °

Chart used °

Additional for Masters.

4. Find the course to steer by compass from to (*see* Question 1) to counteract the effect of a current which set at the rate of miles per hour, the ship making by log miles per hour; also the distance the ship would then make good in hours towards

Answer.—Compass course °

Distance °

5. On being off took a cast of the lead; required the correction to be applied to the depth obtained by the lead line before comparing it with the depth marked on the chart.

6. What do you understand the small numbers to indicate that you see placed about the chart, and at what time of tide?

7. What do the Roman numerals indicate that are occasionally seen near the coasts and in harbours?

8. How would you find, approximately, the time of high water at any place, the Admiralty tables not being at hand, nor any other special tables available?

All the foregoing questions, and those on Form Exn. 9C., must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the port may require.

Signature

Date

---

* A Candidate for a Master's Certificate is expected to use either a card of deviations or a curve of deviations on a Napier's diagram, whichever the Examiner may think proper to put before him.

APPENDIX G.

Deviation of the Compass.

N. B.—*The Examiner will not mark less than* 12 *of the following questions, which must be correctly answered by the candidate, and the Examiner's attention is specially called to the importance of Questions* 7, 8, 9, 10, *and* 19, *which should be marked in all cases.*

1. What do you mean by Deviation of the Compass?
2. How do you determine the deviation (*a*) when in port, and (*b*) when at sea?
3. Having determined the deviation with the ship's head on the various points of the Compass, how do you know when it is easterly and when westerly?
4. Why is it necessary, in order to ascertain the deviations, to bring the ship's head in more than one direction?
5. For accuracy, what is the least number of points to which the ship's head should be brought?
6. How would you find the deviation when sailing along a well-known coast?
7. In the following table give the correct magnetic bearing of the distant object, and thence the deviation:—

Ship's head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.	Ship's head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.
North N.-E. East S.-E.			South S.-W. West N.-W.		

8. With the deviation as above, give the courses you would steer by the Standard Compass to make the following courses, correct magnetic [ ].
9. Supposing you have steered the following courses by the Standard Compass, find the correct magnetic courses made from the above deviation table [ ].
10. You have taken the following bearings of two distant objects by your Standard Compass as above; with the ship's head at , find the bearings, correct magnetic [ ].
11. Name some suitable objects by which you could readily obtain the deviation of the Compass when sailing along the coasts of the English Channel.
12. Do you expect the deviation to change; if so, state under what circumstances?
13. How often is it advisable to test the accuracy of your table of deviations?
14. State briefly what you have chiefly to guard against in selecting a position for the Compass.
15. The Compasses of iron ships are more or less affected by what is termed the heeling error; on what courses does this error vanish, and on what courses is it the greatest?
16. State to which side of the ship, in the majority of cases, is the North point of the Compass drawn in the Northern Hemisphere; and what effect has it on the assumed position of the ship when she is steering on Northerly, and also on Southerly courses?
17. The effect being as you state, on what courses would you keep away, and on what courses would you keep closer to the wind, in order to make good a given Compass course?
18. Does the same rule hold good in both hemispheres with regard to the heeling error?
19. Your Steering Compass having a large error, how would you proceed to correct that Compass by compensating magnets and soft iron, in order to reduce the error within manageable limits?

APPENDIX H.

Syllabus of Examination in the Laws of the Deviation of the Compasses of an Iron Ship, and in the Means of compensating or correcting it.

Candidates for the voluntary examination in Compass Deviation, and also for Extra Masters' Certificates, will be examined in the whole of this syllabus, and will be required to answer all

the questions correctly, and to the entire satisfaction of the Examiner.

1. Describe an artificial magnet, and how a steel bar or needle is usually magnetized.

2. [*For the sake of simplicity it is desirable to adopt the nomenclature of the Astronomer Royal, and call that pole of the compass needle that points to the magnetic north the red, and the other the blue pole.*] What effect has the pole of one magnet of either name on the pole of the same name of another magnet, and what would be the consequence of the pole of one magnet of either name being brought near enough to affect the pole of contrary name, if in these cases both magnets were freely suspended ?

3. By applying this law to all magnets, natural as well as artificial, show what would be the result on a magnetic bar or needle, freely suspended, but by weight or by the nature of its mounting constrained to preserve a horizontal position ; and what result, if so mounted, but free to move in every direction, the earth being regarded as a natural magnet ?

4. Which is the red magnetic pole of the earth, and which the blue ?

5. What is the cause of the variation of the compass ?

6. What is meant by the deviation of the compass ?

7. Describe the sub-permanent magnetism of an iron ship, and state when and how it is acquired, and which is the sub-permanent red, and which is the blue pole, and why it is called sub-permanent magnetism.

8. What is meant by " the composition of forces" and " the parallelogram of forces," and show how the knowledge of these is valuable in ascertaining and compensating the sub-permanent magnetism of an iron ship ?

9. Describe the co-efficients B and C, plus (+), and minus (—), and why they are said to produce semi-circular deviations.

10. On what points by compass bearing of the ship's head does + B give westerly deviation, and on what does it give easterly ; and also on what point does — B give westerly, and on what points easterly ?

11. On what points does + C give westerly, and on what points easterly ; also on what points does — C give westerly, and on what points easterly deviation ?

12. How would you compensate the co-efficient C ?

13. How would you compensate the co-efficient B ?

14. If the value either of co-efficient B or C be given, also the magnetic direction of the ship's head while she was being built, how by the traverse tables would you determine the approximate value of the other co-efficient C or B ; and if the value of both these co-efficients be given, how would you determine approximately the direction, by compass, of the ship's head whilst being built ?

15. What is meant by transient induced magnetism ?

16. Under what circumstances does induced magnetism give semi-circular deviation ?

17. How would you compensate — B resulting from induced magnetism, and why for this purpose would you adopt a different mode of compensation to that employed in correcting — B produced by sub-permanent magnetism ?

18. Describe quadrantal deviation, and state what co-efficients represent it ; also on what points of the ship's head, by compass, each of these co-efficients gives the greatest amount of deviation.

19. On what points of the compass will each of these co-efficients, D and E + and —, give easterly, and on what points westerly deviation ?

20. Generally + D gives the greatest amount of *quadrantal* deviation : how should it be compensated ?

21. If D be compensated in the manner you have described, will it remain so in every latitude ? If so, state the reason why.

22. What conditions of the iron of a ship will produce + D and what — D ?

23. Describe the nature of the deviation resulting from + A and —A, and describe the error in the construction of the compass that frequently produces them.

24. Under what circumstances does the character of A and E so change as to render it desirable that these co-efficients should be disregarded or modified ?

25. The value of A, B, C, D, and E being given, or B, C, and D only, find the deviation on any required point of the compass, or construct a table of deviation, if required.

26. Describe how you would determine the deviation by means of a distant object, by reciprocal bearings, or by the figures on the dock walls.

27. If it be required to determine the deviation of two or more compasses, it is most convenient to bring the ship's head, *correct* magnetic, on as many points as may be necessary. To determine the co-efficients B, C, and D, the bearing of the ship's head by each compass is required. How would you for this purpose employ a Graphic Method?

28 State your rule for determining whether deviation is easterly or westerly.

29. Describe the use of the "dumb card," or an azimuth card without a needle, in compensating a compass.

30. If you determine the deviation by an azimuth or an amplitude of a heavenly body, it is then combined with variation,* which together is sometimes called the *correction* for the compass. State when the deviation is the difference between the variation and the *correction*, and when the sum; and when it is of the same name as that of the *correction*, and when of the contrary name.

31. In observing azimuths of heavenly bodies, the best method is by "time azimuths," since these can be observed without an altitude when the ship is in port, or the horizon cannot be defined from any cause. Given the sun's declination, the hour of the day, and the latitude to find the true bearing of the sun.†

32. By night, if it be desirable to observe the *correction* of the compass. Given the day of the year, and time at ship, also the latitude of the place to determine what† star will be in good position for this purpose.

33. If your correcting magnets are so mounted that their positions can be altered, describe the process by which, on open sea, you can place the ship's head correct magnetic N. (or S.), and correct magnetic E. (or W.), and can make the correction perfect.

34. Given the name of a star, the time, the place of ship, the variation of the compass, and the bearing of the star by compass. Determine the deviation, and name it east or west.

35. If an ordinary standard compass placed higher than the iron top sides be compensated whilst the ship is upright, what coefficient will be effected by heeling?

36. When generally will this co-efficient be plus, and when minus?

37. State the exceptions to this general rule.

38. Does the heeling error arise from the altered position of the sub-permanent poles of the ship, or from a change in the induced magnetism?

39. To what extent is the heeling error altered by a change in the magnetic latitude of the ship?

40. If a ship is beating to windward; when she tacks, under what circumstances will the heeling error retain the same name, and under what circumstances will it take the contrary name?

41. If a ship is placed on the opposite tack by the change of wind, the ship's course being the same by compass, will the heeling error change its name?

42. Under what circumstances will the heeling error, if disregarded, take the ship to windward, or when to leeward?

43. Can the heeling error be compensated? If so, state the means to be employed.

44. Can the compensation of the heeling error be depended on in every latitude? If not, state the reason.

45. Given the heel, the direction of the ship's head by compass, and the heeling error observed, to find the approximate heeling error, with a greater or less given heel, and with the ship's head on some other named point of the compass, the ship's magnetic latitude being in both cases the same.

46. Describe any instrument to show the ship's heel (generally called a clinometer), and state how and where it should be fixed.

47. Should the clinometer be observed when the ship is swung to determine the deviation when the ship is upright? If so, state the reason why.

APPENDIX I.

Particulars of Examination in Sumner's Method by Projection.

Candidates are required to compute their longitude by chronometer worked with two assumed latitudes.

---

* The magnetic variation is best determined by a chart of the curves of equal magnetic variation.

† The process of finding time azimuths by the ordinary formulæ of spherical trigonometry is tedious, and since on board an iron ship these observations should be often repeated, the candidate will be allowed to use any table or graphic or linear method that will solve the problem within a half of a degree, the altitude of the heavenly body not being given.

They are to mark off on the chart the two positions ascertained by the first altitude, and are then to connect them with a straight line, termed the *line of position*, or the line of equal altitude, which will show the bearing of any land it may intersect.

They will then be required to correct the first *line of position* for the ship's change of station, in the interval between the two observations, to project the *line of position* corresponding to the second observation on the chart, showing by its intersection with the first *line of position*, as corrected for change of station, the position of the ship at the time of the second observation.

The longitudes corresponding to the two latitudes by the second observation are no longer furnished by the Examiners. The candidates are consequently required to work out the whole of the problem for themselves (in place of the explanation recently required), and must be prepared to find the sun's true bearing by projection at the time of taking either the first or second observation; and when necessary to produce the *lines of positions* on the chart in order to make them cut one another should the position of the ship happen to be outside the parallels of the two assumed latitudes given in the question. Outline charts, extending from 46° to 49° and from 49° to 52° of latitude, respectively, are furnished by the Board of Trade to the different examiners for this purpose.

APPENDIX K.

The Candidate must answer in writing, on paper supplied to him by the Examiner, the following questions, numbering the answer to correspond with the questions.

Question—

Questions relating to cyclones or revolving storms common in tropical seas.

1. The direction of the wind in a cyclone being*_____ state the probable bearing of its centre from the ship in the*_____ Hemisphere.
2. And suppose that the wind during the passage of the same cyclone were found to change towards the*_____ _____, what would be the ship's position with reference to the line of progression of the centre of the cyclone, and what action would you take?
3. Under what conditions would the change in the direction of the wind in the cyclone be the reverse of the above?
4. What are the usual indications of a ship being on the line of progression of the centre of a cyclone?
5. What are the usual indications that a ship is (*a*) approaching the centre of a cyclone; (*b*) receding from it?
6. Describe the track usually taken by cyclones in the †_____, and state the seasons of the year in which they most frequently occur in that region.

APPENDIX L.

Instructions to Examiners.

Examination in Colours.

Herewith are—

(*a*) A lanthorn having in it a lamp in which kerosine is to be burnt.

(*b*) A slide having ground glass in it.

(*c*) Nine slides, each having a coloured glass in it. The colours are as follows:—

1. Red (Standard).
2. Pink or salmon.
3. Green (Standard or No. 1).
4. Green (Bottle or No. 2).
5. Green* (Pale or No. 3).
6. Yellow.
7. Neutral.*
8. Blue (Standard).
9. Blue* (Pale).

* These spaces to be filled in by the Examiners, and frequently varied.

† The Examiners to fill in whether North Atlantic, Bay of Bengal, China Seas, Indian Ocean, &c., &c.

(*d*) Cards, five of each as follow :—

1. White.
2. Black.
3. Red.
4. Pink.*
5. Green.
6. Drab.*
7. Blue.
8. Yellow.

Examination by Daylight. (*Cards.*)

In conducting the examination by daylight, the examiner should do it in three ways—

1. The cards should be mixed up. The examiner should then hold up each card separately, and ask the candidate to name the colour, and if the candidate does so without hesitation, he is to be regarded as having passed the daylight test.
2. If the candidate hesitates in any of his answers, so as to raise a doubt in the mind of the examiner as to his ablity to readily distinguish colours, the examiner should put all the cards on the table and require the candidate to select all cards of a colour or colours named by the examiner.
3. Having done that, they should all be mixed up again and the candidate should be required to sort the cards into eight heaps, putting all of one colour into each heap.
4. The result of the examination should be noted and recorded in each case.

Examination by artificial Light.

The room should be dark.

The lamp lighted and placed in the lanthorn.

The applicant should be seated or should stand so as to be opposite to the opening of the lanthorn, and at least 15 feet from the front of the lanthorn.

He should first of all see the light in the lanthorn without the interposition of any glass and be asked if it appears to him to have any colour; and if so, what colour?

The slide with the ground glass should then be put into the opening at the front of the lanthorn which is nearest to the light, and the applicant asked the same question.

The slide with the ground glass is to be left in, and the slides with the coloured glasses placed one by one and separately in front of it, and the candidate asked in each case to name the colour or tint.

The result of the examination should of course be noted and recorded in each case.

General.

The cards and glasses against which a star * is placed in the list are what may be called confusion tints. The candidate is not to be regarded as having "failed" if he miscalls these tints, provided that he names all the others correctly. But if having named all the others correctly he miscalls these so far as to name the drab card No. 6 as red, pink, salmon, &c.; or to name card No. 7 as red, green, or yellow; or glass No. 2 as green, blue, or yellow; or glass No. 5 as red, pink, salmon, &c.; or glass No. 7 as bright red or bright green; or the plain ground glass any colour, the case should be reported for record. In short, if the candidate's perception or impression of these tints does not agree with the perception of the examiner, the case should be reported on the Form Exn. 17B.

The only reasons for which a candidate is to be reported as having failed are inability to distinguish red from green, or either from black, by daylight; and red from green, or either from the ground glass, by artificial light.

If a candidate fails in the colour test when the ground glass is in the lanthorn (as it is always to be when the coloured glasses are shown), he may also be tried over again with the coloured glasses without the intervention of the ground glass, and the result noted and recorded.

APPENDIX M.

Instructions to Examiners.

Compass Adjustment.

It is of the utmost importance that masters of ships should thoroughly understand the tentative method of Compass Adjust-

ment as generally practised in merchant ships, and Examiners are therefore directed to fully satisfy themselves that all Candidates for Masters' Certificates have this particular knowledge. It should be tested in connexion with the Form of Examination, "Exn. 7," or it may be tested by Captain Beall's "Deviascope" at those ports which have been supplied with this instrument. Where the "Deviascope" is used it will not be necessary for the Candidates to give the written answers and sketches illustrative of the Question 19 of Form Examination 7.

A concise statement of the present method of tentative Compass Adjustment is forwarded for the use of Examiners. The Government wish them, however, distinctly to understand that the Government are not in any way advocating the correction of that part of co-efficient B which arises from vertical induction in soft iron by a permanent magnet instead of by a soft iron bar. The Government have no authority to interfere with the methods in use amongst Compass adjusters for the adjustment of Compasses in iron ships, but instruct the Examiners to satisfy themselves that masters are acquainted with the ordinary method as at present practised.

The examination by the "Deviascope" is at present only experimental, and no Candidate should be reported as having "failed" who does not pass the examination in it, provided he has answered satisfactorily the Question 19, "Exn. 7."

The "Deviascope" is sent only to three ports at present, and its extended use will depend upon experience at those ports.

The TENTATIVE METHOD of COMPASS ADJUSTMENT as generally practised by COMPASS ADJUSTERS in SHIPS of the MERCANTILE MARINE.

Before describing the practice it will be as well to briefly state the co-efficients used to express the different magnetic forces:—

Co-efficient	A	represents	a constant quantity.
„	B	„	semi-circular deviation due to fore and aft magnetic forces.
„	C	„	semi-circular deviation due to transverse magnetic forces.
„	D	„	quadrantal deviation due to horizontal induction in soft iron.
„	E	„	quadrantal deviation due to horizontal induction in soft iron unsymmetrically distributed.

SIGNS and EFFECTS of CO-EFFICIENTS A, B, C, D, and E.

Co-efficient A represents a constant deviation of the same nature and amount, on all points of the compass; + A signifying easterly, and — A, westerly deviation.

Co-efficient + B represents an attraction towards the ship's head, and causes easterly deviations with ship's head in the eastern semi-circle of the Compass, and westerly deviations in the western semi-circle, attaining a maximum value on the east and west points, decreasing to zero on north and south points, by Compass.

Co-efficient — B represents an attraction towards the ship's stern, and causes easterly deviations with ship's head in the western semi-circle, and westerly deviations with the ship's head in the eastern semi-circle, with a maximum value on the east and west points, decreasing to zero on the north and south points, by Compass.

Co-efficient + C represents an attraction towards the starboard side of the ship, and causes easterly deviations with ship's head in the northern semi-circle, and westerly deviations in the southern semi-circle, attaining a maximum value on the north and south points, decreasing to zero on the east and west points, by Compass.

Co-efficient — C represents an attraction towards the port side of the ship, and causes westerly deviations with ship's head in the northern semi-circle, and easterly in the southern semi-circle, attaining a maximum value on the north and south points, decreasing to zero on the east and west points, by Compass.

Co-efficient + D gives easterly deviations with ship's head between N. and E. and S. and W., and westerly deviations between S. and E. and N. and W.

Co-efficient — D gives results exactly the reverse to + D.

Note.—Both + D and — D have a maximum value on the four quadrantal points, and become zero on the cardinal points by Compass.

Co-efficient + E gives easterly deviations with ship's head between N.E. and N.W. and S.E. and S. W. and westerly deviations between N.E. and S.E. and N.W. and S.W.

Co-efficient — E gives results exactly the reverse to + E.

Note.—Both + E and — E have a maximum value on the cardinal points, and become zero on the four quadrantal points, but are usually very small in amount in Compasses placed in the middle line of the ship.

Heeling Error.—The heeling error arises partly from vertical induction in transverse iron, and iron vertical to the ship's deck, and partly from the vertical component of the sub-permanent magnetism of the ship. In the Northern Hemisphere in the majority of cases the N. point of the Compass needle is drawn to windard or the high side of the ship, with, as a rule, a maximum heeling error on N. and S. points, and zero on E. and W. points by Compass. If the Compass is not properly placed in the ship, there may be a sensible heeling deviation on E. and W. courses.

Tentative Corrections.

To correct co-efficient C.—With ship's head north or south, magnetic, place a bar magnet (or more than one if necessary) horizontally and exactly athwart ship, either on the deck or on any convenient platform, with its centre on the fore and aft line passing through the centre of the Compass card, placing its red or marked end to starboard if the N. point of the needle deviates to the starboard side, or to port if it deviates to the port side of the ship, moving the magnet to or from the Compass until it points correctly.

Note.—The deviation represented by co-efficient C varies inversely as the earth's horizontal force, providing the iron is symmetrically arranged on each side of the Compass.

To correct co-efficient B.—With ship's head east or west, magnetic, place a bar magnet (or more than one if necessary) horizontally and exactly parallel to the fore and aft midship line of the ship, either on the deck or on any convenient platform, with its centre on the athwart ship line passing through the centre of the Compass, the red or marked end of the magnet being directed aft if the end point of the Compass needle deviates towards the stern, or forward if it deviates towards the bow, moving the magnet to or from the Compass until it points correctly.

Note.—The co-efficient B consists of two parts: one is due to the permanent magnetism of the ship, which varies inversely as the earth's horizontal force; the other to vertical induction in soft iron, which varies as the tangent of the dip. As ships in the merchant service are rarely built with a view of providing a satisfactory position for the standard Compasses, it is very difficult in many ships to find a position for it where it will not be affected by vertical iron. It follows, therefore, that if this deviation be compensated, as is customary, by a fore and aft permanent magnet instead of by a vertical soft iron bar, the poles of the magnet may in some cases require to be reversed in high southern latitudes.

To correct co-efficient + D.—With ship's head on one of the quadrantal points, magnetic, the + D is generally corrected by boxes of small chain, cylinders of soft iron, or soft iron globes placed athwart ships on the same level, and at equal distances, on the port and starboard sides of the Compass, with the centre of their mass on a level with the Compass needle, move them to or from the Compass till the needle points correctly.

To correct co-efficient—D.—Co-efficient—D, which is of very rare occurrence, is corrected by placing the above correctors on the fore and aft sides of the compass.

Note.—When once the co-efficient D is properly corrected by soft iron it is correct for all magnetic latitudes, provided the distribution of the iron in the ship is not materially changed, and provided the magnetism of the soft iron has not been affected by the Compass needles. With short needles having small magnetic power, such for instance as Sir Wm. Thomson's, there will probably be no change; but when the needles are long and powerful, one-half the original D may be expected to return when approaching the magnetic equator. *See* Admiralty Manual, 1882, page 96, as follows:—"When "a compass with long and powerful needless is employed, "soft iron correctors placed very near it become mag- "netized by induction according to the power of the

" needles, and the resulting correction will not remain
" strictly perfect in all latitudes."

To correct Heeling Error.—The heeling error is corrected for any given magnetic latitude by placing a vertical magnet exactly under the centre of the Compass card, with its N. or red pole uppermost if the heeling error is to windward or to the high side of ship, or its S. or blue end uppermost if to leeward or to the low side of ship, moving the magnet to or from the Compass until the heeling error is corrected.

Note.—The heeling error, due to the permanent par of the magnetism, varies inversely as the earth's horizontal force, and consequently is greatest in high latitudes, diminishes as the ship approaches the magnetic equator, and increases again, still retaining the same name, as the ship recedes from the magnetic equator in the Southern Hemisphere. The heeling error, due to transverse and vertical soft iron, decreases as the ship approaches the magnetic equator, where it is zero, and is of a contrary name in the Southern Hemisphere. It is probable that the poles of the vertical magnet may require to be reversed in high southern latitudes.

A divided scale should be marked or fitted outside the tube or some other convenient place, so as to show the proper position for the correcting magnet as found in any given magnetic latitude, and the same recorded as a guide for approximately placing the magnet in position on any subsequent voyage in the same locality, and especially on the return of the ship to the United Kingdom.

Candidates should understand that the object of tentative adjustment is to bring the deviations within manageable limits, and also to equalise the directive force of the needle so far as is practicable on all courses; but no system of adjustment whatever is sufficiently reliable in character to absolve the navigator from the necessity of using every precaution, and especially of ascertaining the deviation on every available opportunity by observations of the sun by day and the other heavenly bodies by night.

APPENDIX N.

(From Memorandum on Examination of Engineers.)

EXAMINATION OF A MASTER OR MATE IN STEAM

The regulations under which these examinations are conducted are printed at pages 41 to 43 of the regulations for examinations of masters and mates. (Exn. 1.)

A candidate for this examination is required to have a thorough grasp of the construction of the steam engine and boiler, to enable him, in the first place, to understand the nature and importance of any defect which may be reported to him by the engineer, and so that he may work in harmony with the engineer in affording time and facilities for disconnexions, inspections, adjustments, and repairs.

To have a looking-on knowledge of what the principal repairs are about engines and boilers and pipes, and how these repairs are accomplished.

To be able to form an independent opinion as to a breakdown and the consequent propriety or impropriety of proceeding under steam with temporarily repaired or defective machinery.

To understand how to estimate approximately the reduction of fuel required for reduced speed, and consequently to sanction such reduction of speed as may seem to him to be warranted by the report of the engineer, and to satisfy himself before leaving port that there is sufficient coal for the voyage.

To have an intelligent grasp of the general run of pipes and connexions in the engine room, the marking of cocks, the opening and closing of cocks and valves, how mistakes of importance may be made in the confusion of an accident, and how best to guard against such mistakes.

To be capable of being left in charge of the feeding of a set of boilers, to understand the working of the water-gauge, and to be able to guard against being misled by false indications of the gauge glass.

To understand about blowing down and surfacing, the reasons for doing so, and the danger which may result from the neglect of these under certain circumstances. A master or mate presenting himself for examination in steam must be understood to have made up for his want of practical experience by reading up

about the steam engine. He ought, therefore, to show that he has given his mind to intelligently understanding the *rationale* of the action of the steam engine. Under this head, he should, therefore, be able to state approximately the quantity of heat required in the formation of steam, the remarkable relation of "latent" heat to "sensible" heat, using these popular names, how much steam can be raised by the combustion of one pound of coal, what horse-power measure is, what indicated horse-power is, the action of the slide-valve, the course of the steam through the engine, the advantage of working expansively, and how the expansive action is shown by the indicator diagram.

The candidate has to answer in writing 16 out of 20 questions selected from the book of Elementary Questions * Selections for this examination are given on the alphabetic sheet for "Steam." Generally, these answers are given by candidates as learned by rote from a book; the candidate should therefore be asked such *viva voce* questions as will necessitate his giving his answers in different words, so as to discover whether he has the root of the matter in him.

The principal part of the *viva voce* is the examination on board a steamer, preferably one with which he is unacquainted. He is told to look about and try to find out the run of the machinery without the assistance of any one; the Examiner to be in the engine-room to see that this independent examination is properly carried out. When the candidate reports that he thinks he knows the whole arrangement of the machinery, the Examiner will then question him on the uses of the parts, get him to point out the different cylinders, pumps, valves, condenser, &c. He must show that he understands the run of the pipes in the bilges, not necessarily that he has gone over every one of them, but he ought to be directed to trace, at least, one important range of pipes, and to thoroughly satisfy the Examiner that he could be safely trusted to manipulate the valves or cocks in connexion therewith. It will not often be practicable for the candidate to be asked to actually work engines under steam, but he must satisfy the Examiner that he knows how to do so, and that he is aware what precautions have to be taken in regard to water in the cylinder, &c. It is most important that a candidate should show that, in the event of an accident depriving him of the assistance of engineers, he knows what to do to safely take his vessel to an anchorage, or to stop the engines and proceed under sail alone.

The examination of a mate in steam is the same as that of a master. The knowledge is not with reference to the mate's position. A mate may be examined, but such examination implies that the mate will one day be a master, when the possession of the knowledge will be an advantage to him in the discharge of his duties as master.

APPENDIX O.

The following is a reprint of

INSTRUCTIONS

TO

EXAMINERS OF MASTERS AND MATES.

1. The Examiners already understand that they are to be very careful (in examining all applicants for Certificates of Competency) to satisfy themselves that the applicants understand the Rule of the Road at Sea, and should decline to pass every applicant who does not understand it.

2. As a serious misapprehension has, however, arisen in a recent case in which Sound Signals were being made by a steamer under way in thick weather, contrary to the express wording of Articles 12*a* and 19 of the Regulations, it is more than ever incumbent on Examiners not to pass any applicant unless the Examiner is satisfied that the applicant understands that the Signals named in Article 19 are purely optional, and are only allowed to be made in cases in which the weather is so clear that the ship making them has the other vessel in sight.

3. Any Master using these *optional* Sound Signals, even when the other vessel is in sight, does so in every case on his own

* Printed at end of Engineers' Regulations, Exn. 1*a*.

responsibility; but if he uses them when the other vessel is *not* in sight, he commits a very serious act of disobedience to the Regulations, and must abide the consequences of his illegal act.

4. Applicants must be made to understand that the compulsory Sound Signal which *must* be made by a steamer under way in a fog is a prolonged blast under Article 12*a*, and no other Sound Signal.

5. In examining an applicant on the application of Articles 12 and 13, the Examiner should, by answers to questions, ascertain that the applicant understands that it is his duty to go at a moderate speed in fog, while, as regards Article 24, the Examiner should impress on the applicant that an "ordinary precaution" to be observed in the navigation of a steam-ship in a fog is to get the way off his own vessel immediately he hears the Sound Signal of another steamer, and then he should go ahead very slowly, blowing the "prolonged blast" at intervals, and feeling his way until all danger of collision is passed.

APPENDIX P.

Forms used in connection with the Examination and Certificates of Masters and Mates.

Name of Form.	Initial Letters and Numbers.
Regulations relating to the Examinations of Masters and Mates.	Exn. 1

No. 26 Marine, dated Calcutta, the 31st January 1890

NOTIFICATION—By the Govt. of Bengal, P. W. Dept.

UNDER the powers conferred upon him by section 10 of Act I of 1859, and with the sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules for the examination of persons desirous of obtaining local certificates of competency as Masters and Mates in the Mercantile Marine. These rules supersede those contained in the Notification of the General (Marine) Department of this Government, dated the 28th August 1877, and published in the *Calcutta Gazette* of the 29th idem.

Certificates granted to persons who pass examinations.

1. *Certificates of Competency* will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose examiners have been appointed, and arrangements have been made for holding the examinations periodically at the Port of Calcutta. The examinations will be held twice a quarter or at such other times as the Government may appoint.

Examinations continued till all the Candidates are examined.

2. The examinations will commence early in the forenoon, and will be continued from day to day until all the candidates whose names appear upon the Port Officer's list on the day of examination are examined.

Notice of application for examination to be given to the Port Officer.

3. Candidates for examination must make their application upon the appropriate Form (Exn. 2), which must be filled up at the Port Office. The Exn. 2, properly filled in, together with the Candidate's testimonials and discharges, must be lodged with the Port Officer of Calcutta, not later than the day before the day of examination, and the Candidate must conform to any regulations in this respect which may be laid down by the Government; as, if this be not done, delay may be occasioned.

Testimonials of character, conduct and ability required.

4. Testimonials of character, and of sobriety, experience, ability, and good conduct on board ship for at least the twelve months of service immediately preceding the date of application to be examined, will be required of all applicants, and without producing them no person will be examined. As such testimonials and discharges have to be verified before the Candidate can be examined, it is desirable that they should be handed in together with the Form Exn. 2 as early as possible.

Testimonials of Foreigners

5. The testimonials of servitude of Foreigners and of British seamen serving in foreign vessels, which cannot be verified by the Port Officer, must be confirmed either by the Consul of the country to which the ship in which the Candidate served belonged, or by some other recognized official authority of that country, or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case will be decided on its own merits, and if the sufficiency of the proofs given appears to be at all doubtful, it must be referred to the Government.

Certificates as to Age

6. Should any doubt exist as to the age of a Candidate, he will be required to produce a certificate of birth or baptism.

Foreigners to know English.

7. Foreigners must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel. In the case of natives of India, who may not be able to speak English, their Certificates shall be endorsed to the effect that they are only valid for vessels manned and officered entirely by Asiatics.

Verification of Services by the Port Officer.

8. The time for which length of service as Seaman or Officer in the Mercantile Marine is to be reckoned in all cases referred to in the following paragraphs is to commence at the date when the articles of agreement were signed by the applicant, and to end at the date when he was discharged as shown in the articles of agreement. The certificates of discharge will generally be sufficient evidence of this, but great care must be exercised by the Port Officer and Examiners to detect any tampering in any way with the information contained in them, and to report to the Government at once any suspicious cases.

9. Services which cannot be verified by proper Entries in the Articles of the Ships in which the Candidates have served cannot be counted. For instance, a man will state his service to have been as Second or Only Mate, and to support his assertion will produce a Certificate of Discharge or of Employment by the Master to the effect that he served as Mate, when, on reference to the articles, it appears that he has actually been rated as Boatswain: the service in such a case will not be regarded as having been in the capacity of Mate.

Service as an Apprentice.

10. Time for which Indentures of Apprenticeship are in force will be accepted as sea service, provided that the Apprentice has remained by the ship for at least four-fifths of the time covered by the Indentures, and that the Indentures of the applicant are endorsed by the Owner or Master to whom he has been bound to the effect that he has performed his service faithfully for the whole time agreed upon.

Service as 2nd, 3rd or 4th Mate to qualify for Master.

12. Service as Second, Third, or Fourth Mate may be accepted as equivalent to service as First or Only Mate to qualify a Candidate for examination for a Master's Certificate of Competency, provided he can produce satisfactory evidence of his having served at sea 12 months as Second, Third, or Fourth Mate of a Foreign-going Ship while in possession of a First Mate's Certificate of Competency, valid in the United Kingdom. It will be noted that occasional service in charge of a watch in the daytime will not be accepted as Mate's service under the Regulations

Service on board a Training Ship.

13. Part of the time served on board a training ship will be allowed to count as service at sea, provided that the Candidate can produce amongst his testimonials a Certificate from the Committee that he has conducted himself creditably, and passed a good examination in seamanship so far as practised in the training ship as well as in other matters down to the time of his leaving the ship.

14. No period of service on board a training ship will be allowed to count for more than one year's sea service.

Service in capacities other than as Apprentices or Seaman.

15. Candidates whose services have been in capacities other than Apprentice, Ordinary Seaman, or Able Seaman, *e.g.*, Cook, Steward, Carpenter, &c., will be required to satisfy the Port Officer that they have a good knowledge of Seamanship. This may possibly be proved by the production of satisfactory Certificates from Masters with whom the applicants have served. Failing satisfactory evidence, the applicant may be required to perform additional service, which must be in the capacity of Ordinary Seaman or Able Seaman.

Service on rivers and in smooth water

16. Service performed on rivers, no matter of what size, or in smooth water or partially smooth water limits, cannot be accepted.

Partial loss of sight.

17. A person who has lost the sight of one eye cannot be permitted to be examined for a Certificate of Competency. If he already holds a Certificate, he cannot be examined for a Certificate of a higher grade.

Service in Light-ships and Engine-room.

18. Service in Light-ships or in an Engine-room will not be accepted as sea service for a Master's or Mate's Certificate of Competency.

Service as Hooghly Master Pilot.

19. Service as a First Class Pilot will be accepted as qualifying for examination for a Master's Certificate for Home Trade Ships, notwithstanding that he may not have served in the capacity of Mate, but only provided that his *Sea Services* are sufficient. For the purpose of this rule, a Hooghly Master Pilot will be held to be a First Class Pilot.

Service as Pilot's Apprentice.

20. Half the amount of service performed as an Apprentice in a Pilot Ship propelled by sails may count as actual Sea Service to qualify for examination for a Certificate of Competency.

Service in Tug Boats.

21. Service performed in Tug Boats employed in Sandheads Service or outside Port limits may be accepted as Sea Service for qualifying for a Mate's Certificate for Home Trade Ships. Service on Hooghly River survey vessels may be accepted on the same conditions. Service in the Hooghly Pilot vessels at the Sandheads is Sea Service.

Desertion and gross misconduct.

22. Candidates who have neglected to join their vessels after having signed Articles, or who have deserted their vessels after having joined, or who have been found guilty

of gross misconduct on board, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Government, after having investigated the matter, should see fit to reduce the time.

If after passing examination services are found to have been insufficient.

23. If after a Candidate has passed his Examination it is discovered on further investigation, *e g.*, by verification on the part of the Port Officer, that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, it will not be granted to him; but if the Government are satisfied that the error in the calculation of his services did not occur through any fault or wilful misrepresentation on his part, he will be allowed to go up for re-examination without payment of a further fee when he has performed the amount of service in which he was deficient.

Certificate of a lower grade may be granted on certain conditions.

24. If in such a case the applicant's services are sufficient to entitle him to receive a Certificate of a lower grade, provided as aforesaid he has not wilfully misrepresented the amount of his services, an Inferior Certificate may be granted to him, and the difference, if any, between the fee paid by him for the Superior Certificate and the fee payable for the Inferior Certificate, may be placed to his credit.

Must be re-examined for certificate of higher grade.

25. In such a case, when the applicant has by further service made up the amount in which he was found to be short, he must, before he can receive the higher Certificate, be re-examined in all the subjects.

Colour Tests.

26. The Local Government have made the following arrangements for the examination of persons as to their ability to distinguish colours :—*

27. Examinations in Colour are open to any person serving or about to serve in the Mercantile Marine.

28. Any person, including the holders of Certificates of Competency, or persons about to apply for Certificates of Competency, if desirous of being examined *in Colours only*, must make application to the Port Officer on Form Exn. 2ª, and pay a fee of one rupee.

29. He must on the appointed day attend for examination at the Examiner's Office; and if he passes he will receive a certificate to that effect.

30. If he fails it will be open to him to be examined again in Colours as often as he pleases on payment of the fee of one rupee at each fresh attempt.

31. The application of a *Candidate who is presenting himself for Examination for a Master's or Mate's Certificate* must be made on Form Exn. 2. Such examination will commence with the Colour test; and if the Candidate does not, at the time of making application, hold a Certificate of Competency of any grade, and should fail to distinguish correctly any of the colours used in the test, he will not be allowed to proceed with the examination in Navigation and Seamanship.

32. The fee he has paid for Examination for a Certificate of Competency will include the fee for the Colour test, and, with the exception of one rupee, will in such event be returned to him.

33. A Candidate for Examination for a Certificate of Competency who, at the time of making application, does not possess a Certificate, and who fails to pass the Colour test, may not be re-examined until after the lapse of three months from the date of his first failure. If he fails a second time, he will be allowed a third trial at the expiration of another three months from the date of his second failure. A fresh fee must be paid at each succeeding examination.

34. It is therefore obviously to the advantage of Candidates for Certificates of Competency to apply in the first instance to be examined in *Colours only* on Form Exn. 2ª.

35. A Candidate who holds a Certificate of Competency, and who, on presenting himself for Examination for a Certificate of a higher grade, is unable to pass the Colour test, will notwithstanding be permitted to proceed with the Examination in Navigation and Seamanship for the Certificate of the higher grade.

---

* *See* Appendix O.

36. Should he pass this examination, the following statement will be written on the face of the higher Certificate which may be granted to him, viz.—"This Officer has failed to pass the Examination in Colours."

37. Should he ultimately fail to pass the Examination in Navigation and Seamanship, a like statement, relating to his being Colour blind, will be made by the Port Officer on his existing Certificate before it is returned to him.

38. Holders of Certificates which bear the statement of their having failed to pass in Colours, and who may desire to have the statement removed from their Certificates, must obtain the special permission of the Government.

Qualifications for Certificates of Competency for a Home Trade Ship.

40. All Candidates for Certificates of Competency must first be examined in Colours.*

41. A MATE must be not less than 19 years of age, and have served four years at sea.

No candidate will be allowed to be examined unless he has served two years at sea within the last six years, and six months within the last three years immediately preceding the date of his application to be examined.

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the candidate is allowed to be examined.

42. In Navigation, &c.—He must write a legible hand, and understand the first five rules of arithmetic, both simple and compound. He must be able to take a bearing by compass, and be conversant with the use of Mercator's chart, and be able to find, on either a "true" or "magnetic" chart,† the course to steer, and the distance from one given position to another; to find the ship's position on the chart from cross bearings of two objects; from two bearings of the same object, the course and distance run between taking the bearings being given; and the distance of the ship from the object at the time of taking the second bearing.

43. He must also pass an examination in the International Code of Signals.‡

44. In Seamanship, &c.—He must possess a thorough knowledge of the rule of the road as regards both steamers and sailing vessels, their regulation lights, and fog and sound signals.§ He must be able to describe the signals of distress, and the signals to be made by ships wanting a pilot, and the liabilities and penalties incurred by the misuse of these signals;‖ also the use and management of the rocket apparatus in the event of his vessel being stranded. He must be able to mark and use the lead and log, to moor and unmoor a vessel, and to manage a ship's boat in heavy weather, &c., &c. He must also understand the construction, use, and action of the bulkhead sluices, the engine-room telegraph, &c., and to answer any other questions of a like nature appertaining to the duties of the Mate of a Home Trade Vessel which the Examiners may think proper to put to him.

45. A MASTER must be not less than 20 years of age, and have served five years at sea, of which one year must have been as First or Only Mate in the Home or Foreign Trade, during which service he must have been in possession of a Mate's Certificate for Home Trade Ships or of a First or Only Mate's Certificate for Foreign-going Ships. *Vide also para.* 19.

No candidate will be allowed to be examined unless he has served at sea two years within the last six years, and six months within the last three years immediately preceding the date of his application to be examined.

---

* *See* Appendix F.

† *See* Appendix D. The terms "true" and "magnetic" are used throughout the Regulations for the sake of brevity and convenience for indicating charts that have compasses engraved upon them, showing the "true" or "magnetic" point of the compass respectively.

‡ *See* Appendix A.

§ *See* Appendix B.

‖ *See* Appendix C.

Any cases not coming within the above conditions must be submitted for the special consideration of the Government before the candidate is allowed to be examined.

46. In Navigation, &c.—In addition to the qualifications required of a Mate of a Home Trade Ship, a Master will be required to find on a chart the course to steer by compass in order to counteract the effect of a given current, and to find the distance the ship will make good towards a given point in a certain time, and to *work out practically* the correction to apply to soundings taken at a given time and place, to compare with the depth marked on the chart,* &c. He will also be required to understand the use of the quadrant, to be able to observe with it, to read *off* and *on* the arc, and to find the index error by the horizon. He will also be required to find the latitude by a meridian altitude of the sun, and to give written answers (*vide supplementary vivâ voce test, page* 40) to certain practical questions on the subject of the deviation of the compass †

47. In Seamanship, &c.—In addition to the qualifications required of a Mate of a Home Trade Ship, a Master must understand how to rig a sea anchor, and what means to apply to keep a steamer with machinery disabled out of the trough of the sea, &c How to get a cast of the lead in heavy weather, &c. He will be examined as to his resources for the preservation of the crew and passengers in the event of wreck, and the steps to be taken if his vessel is disabled and drifting towards a lee shore, and will be required to answer any other questions appertaining to the management of Home Trade Vessels which the Examiner may think necessary to put to him.

Failure.

Re-examination in case of failure

48 In all cases of failure the Candidate must be examined *de novo*. If a Candidate fails in *Seamanship*, he will not be re-examined *until after a lapse* of six months. Whether the whole or part of this period must be served at sea must depend upon the subjects in Seamanship in which the Candidate failed, but what amount (if any) of sea service will be required will be left to the discretion of the Port Officer, subject, however, to revision by the Government should they see fit.

49 The Examiners in making out their Report on Form Exn. 14 should state what amount (if any) of further sea service the Candidate must perform, and they should also [illegible] this information under Division H in Form Exn. 2

[illegible] If he fails three times in *Navigation* he will not be re-[illegible]ed until after a lapse of three months from the date [illegible] *last failure.*

Certificate of a lower grade.

51 [illegible]ar a Candidate has failed in his Examination, but the subjects in which he has failed are not included in the subjects required for a certificate of a lower grade, he may, if he desires it, receive a certificate of such lower grade

52. No part, however, of the fee he has paid will be returned to him, and on presenting himself, when entitled, for re-examination for the higher grade of Certificate he will be required to pay a further full fee.

53. If a Candidate fails for bad spelling or writing, he will not be re-examined until after a lapse of at least three months.

Fees.

54. Candidates for examination, in making their application on Form Exn 2, will be required to pay the examination fee before any step is taken, whether by enquiring into their services or testing their qualifications, &c. Should it be found that their service is not sufficient to entitle them to be examined, or should their testimonials be unsatisfactory, or should they from any other cause, except failure to pass the colour tests, not be examined, no part of the fee will be returned to them, but when they have fulfilled the requisite service, or are able to produce satisfactory testimonials, as

* *See* Appendix D
† *See* Appendix E.

the case may be, they will be allowed to again present themselves for examination for a Certificate of the same grade without paying any further fee.

55. The fee for examination must be paid to the Port Officer. In any case in which a Candidate offers money to any other officer, and in any place but in the Port office, the Candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be again examined for twelve months. Fees to be paid by applicants for examination

56. If a Candidate fail in his examination, *no part of the fee he has paid will be returned to him* Fees to be paid by applicants for examinations. 133.

57. The fees are as follow :—

For "Home Trade Ships."

	Rs.
Mate	6
Master	12
For the renewal of any certificate .	5

General Instructions to Examiners and Candidates.

58. All instruments necessary for use in the examinations are supplied by the Government. Instruments used in examinations.

59. Before commencing the examination, the tables or desks must be cleared of all scraps of paper or books that are not used in the examination, and care should be taken that the candidates do not bring into the examination room any book, paper, document or memoranda of any description whatever. No person whatever should be allowed in the room during the time of examination, but those whose duties require them to be present. Prohibited books and papers.

60 No instructors will be allowed on the premises

61. Candidates will under no pretence whatever be allowed to leave the premises while the examination is proceeding. If a candidate has occasion to visit the retiring room, he will only be allowed to do so on the completion of the paper on which he may be engaged, when he will be required to enter in a book kept for the purpose the exact times of his leaving and returning to the examination room. When only a few candidates are under examination, two persons will not be allowed to leave the room at the same time. Candidates not to leave premises during examination.

62. Candidates should be so placed as to prevent one copying from the other, and no communication whatever between the Candidates should be allowed. Position of Candidates at examination.

63 If any blotting paper is allowed, it should be black ; and when the first examination paper is issued, each Candidate should be furnished with a piece, which must be returned to the Examiner upon the completion of the last paper. Blotting paper.

64 The examination papers should be issued to the Candidates in half sheets only, and one at a time. This will prevent a Candidate from spreading out the sheets on the table in an apparently careless manner, but so as to enable his nearest neighbour to look over and copy, or examine the problems It will also enable the Examiner to look over and report upon the work on one half sheet, while the Candidate is at work upon another, and so on. When the errors are not too numerous, or when they are not from ignorance of the subject, the incorrect problems may be returned to the Candidate for correction, but in no case should the errors be pointed out by the Examiner, neither should any marks be made on the correct work of the problem, which would at once indicate how far or to what extent the work is correct. Should the problems be returned to the Examiner the second time incorrect, this would be a failure ; and as the time allowed is considered ample for working out the papers carefully, this rule is expected to be strictly observed How examination papers should be issued

65. When from the large number of the candidates it may be found impossible to look over the work on the day of examination during the office hours, an hour in the morning of the following day may be allotted for the purpose of correcting the problems, but In certain cases problems may be corrected on morning following examination day

in no case should a Candidate have his problem returned to him for correction after he has made the second attempt.

Vivâ voce examination.

66. In the *vivâ voce* examination a reasonable time should be allowed for the Candidate to give his answers. No assistance should be given or leading question put.

Minor corrections.

67. All outstanding or minor corrections should appear in the margin of each problem paper; also on the chart papers Exn 9C and Exn. 9D; and unless all these corrections appear on the papers of the Candidate, they will not be considered complete.

Examination to commence with that for Second Mate.

68. In every case the examination, whether for Only Mate, First Mate, Master, is to commence with the problems for Second Mate.

Problems required as tests.

69. Examiners should bear in mind that the problems to be performed are required as tests, and for the purposes of an Examination, and not for sea-going or practical purposes alone.

70 The Candidates will be allowed to work out the various problems according to the method and the tables they have been accustomed to use.

Time allowed for Problems and Writings.

71. The rules as to the amount of time allowed are as follow :—

72. *Candidates for Home Trade Mate's Certificates* must complete the whole of their arithmetical and chart papers within *eight hours*, and Candidates for Home Trade Masters' Certificates within *ten hours*.

Additional time allowed in special cases.

73. Punctually at the expiration of the prescribed time all the papers should be called up, whether completed or not, and if not completed the Candidate will be declared to have failed, unless the Examiner see fit to lengthen the period in any special case. If, however, the period is lengthened in any case, the special circumstances of that case, and the reasons for lengthening the period, together with the time allowed, must be reported to the Government by the Examiner, in the column for "remarks" on the Form Exn. 14. It should be noted that the periods prescribed in the foregoing paragraphs are not intended to include the time occupied by the *vivâ voce* part of the examination.

74. It is anticipated that but few of the Candidates for Certificates of Competency will require the whole of the time herein allowed for completing their examination in navigation; and ample time has been prescribed, so that Candidates may perform their work in a careful, clear and legible manner, and to the entire satisfaction of the Examiners.

Supplementary vivâ voce Examination on written Papers.

75. An impression prevails in regard to the examination of Masters and Mates, that so long as a Candidate can commit to paper correct answers to the various questions requiring written answers (*e. g., Forms Exn. 4a, Exn.* 7, *Exn.* 9*a*, *Exn.* 9*c*, *Exn.* 3*d*, &c.), no matter how indicative the answers may be of their having been learnt off by rote *only*, the duty and responsibility of the local Examiners are at an end, and that they have no power or authority to reject a Candidate should his written answers be correct.

76. Lest, therefore, such an impression should prevail, the Government wish to point out that Candidates for Certificates of Competency are not only expected to give correct written answers, which may merely be learnt off by rote, but they are expected to possess an intelligent knowledge of the various subjects prescribed in the Regulations, particularly as regards the important subject of the Deviation of the Compass.

77. This result may be easily attained by the Examiner putting a few *viva voce* questions to the candidate as the papers are brought up for inspection, or at any subsequent time if more convenient. The oral questions (suggested by the printed questions and the answers given) should be such that the Examiner may satisfy himself that the candidate possesses a real knowledge of what he has written, and should be confined strictly to the subjects of the printed questions. Should the candidate then exhibit ignorance of the subjects, the Examiner (who is in a position to judge of the real knowledge the man before him possesses) should deal with him at his discretion, notwithstanding that the candidate may have written all the answers correctly by rote.

78. When an Examiner finds it necessary to fail a Candidate in this *supplementary viva voce* test, a memorandum containing the particulars of the points on which the candidate was ignorant, *i.e., the identical questions and the identical answers given*, must in each case be attached to his examination papers, when forwarded in the usual course to the Port Officer, or the particulars may be set forth by the Examiner in the margins of the candidate's papers in red ink.

79. If the Candidate passes he will receive the Form Exn. 16, upon which the Government will issue the certificate to the Candidate, whose testimonials, &c., will be returned at the same time. Form Exn. 16. Completion of examination.

Special Notice to Candidates.

80. The attention of Candidates is specially called to the following Regulations:—

81. Candidates are required to appear at the examination-room punctually at the time appointed.

82. Candidates are prohibited from bringing into the examination-room books, paper, or memoranda of any kind whatever. The slightest infringement of this regulation will subject the offender to all the penalties of a failure, and he will not be allowed to present himself for re-examination for a period of three months.

83. In the event of any Candidate being detected in defacing, blotting, writing in, or otherwise injuring any book or books belonging to the Government, the papers of such Candidate will be detained until the book or books so defaced be replaced by him. He will not, however, be at liberty to remove the damaged book, which will still remain the property of the Government.

84. In the event of any Candidate being discovered referring to any book or memoranda, copying from another, or affording any assistance or giving any information to another, or communicating in any way with another, during the time of examination, he will subject himself to all the penalties of a failure, and he will not be allowed to be examined for a period of six months.

85. No Candidate will be allowed to work out his problems on a slate or on waste paper.

86. No Candidate will be permitted to leave the room until he has given up the paper on which he is engaged.

87. Any Candidate who may be guilty of insolence to the Examiner or of other misconduct will render himself liable to the postponement of his examination, or, if he has passed, to the detention of his certificate for such period as the local Government may direct.

General.

88. Certificates of competency will be made and issued in the forms hereunto annexed.

89. Every Certificate of Competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the Certificate, and the other shall be kept and recorded by the Port Officer of Calcutta.

90. No application from the holder of a certificate granted by the Government of Bombay to be examined for a certificate of the same legal value shall be entertained.

APPENDIX A.

EXAMINATION OF MASTERS AND MATES IN THE INTERNATIONAL CODE OF SIGNALS.

Instructions to Examiners.

The Government desire to direct the attention of the Examiners to the principal points connected with the International Code of Signals (which is to be treated as a subject in Navigation) as to which Candidates for Examination should be questioned in order to qualify for Certificates of Competency

The Government would recommend to the Examiners a perusal of the *Report of the Signal Committee of* 1855 (which will be found at the commencement of the Signal Book), and also the *first few pages of the Book.* The information therein given will be found sufficient to make the Examiners theoretically acquainted with the characteristics of the Code, and the advantages it claims to possess over other Codes, and will enable them to appreciate and urge upon Candidates for Examination the facilities which this System of Signalling affords for easy and rapid communication.

The "comprehensiveness" and "distinctness" of the International Code are its chief recommendations.

The form of the Hoist generally indicates the nature of the Signal made, so that an observer can at sight understand the character of the Signal he sees flying.

The annexed plate gives examples which illustrate this.

The Examinations should tend to elicit a knowledge of the distinctive features of the Code above alluded to.

With this object the Examiners should make the 2, 3, and 4 Flag Signals on the Frame board which is furnished for the purpose (*always taking care first to show the Ensign and the Code Pennant at the Gaff*),* questioning the Candidates as to the distinguishing Forms of the respective Hoists, *(see Plate annexed)*, which will be indicated according as a Burgee, or a Pennant, or a Square Flag, is uppermost.

The Candidate ought to know how to find in the Signal Book the communication or the inquiry he desires to make, and how to make the Signal. The Signal to be made should *invariably* be sought for by the Candidate in the Vocabulary and Index, Part II, and never in Part I

The Candidate ought to know how to interpret a Signal.

The Examiner should place a Signal on the Frame board, and vary the Signal by showing a 2 or 3 Flag Signal, or a "Geographical" or a "Vocabulary" Signal, or the name of a Merchant Ship or a Ship of War.

The two latter signals would not of course be found in the Signal Book. The Candidate ought to point them out in the *Code List of Ships.*

A Candidate ought to be able to read off a Signal at sight, so far as to name the Flags composing the Hoist.

He ought to know the use of the Code Pennant, and of the Pennants C. and D., "Yes" and "No."

The Candidate should be practised in the use of the Spelling Table, by being made to spell his own name, or some word not to the Vocabulary of the Code.

A knowledge of the Distant Signals should be required of the Candidate, their object and the mode of signalling by the Distant Code, which will be found at the end of the Signal Book.

For this purpose two Black Balls, two Black Square Flags, and two Black Pennants will be furnished with the Frame board, and the Candidate should be required to make one or two Distant Signals, and to read off one or two made by the Examiners.

The Ball being the distinguishing symbol of the Distant Signal, any Pennants or Flags of the Code may be employed in conjunction with it, irrespective of colour. The Black Pennants and Flags are merely sent as showing best in the light background of the Frame board.

The Examiners should be careful to ascertain that the Candidate possesses a knowledge of the Distress Signals which came into operation November 1st, 1873.

Semaphores.

A plate at the end of the Signal Book explains the method by which the arms of the Semaphore are made to represent by their position (up, down, or horizontal) the three symbols used for Distant Signalling, viz., a Flag, a Ball, or a Pennant. Before making Signals with the Semaphore, the Black Disc with the white rim should be placed on the top of the Semaphore Mast, as it properly forms a part of the Mast itself.

The International Code is used on board Her Majesty's Ships, and it has been adopted by all the principal maritime powers for their Imperial as well as for their Mercantile Navies.

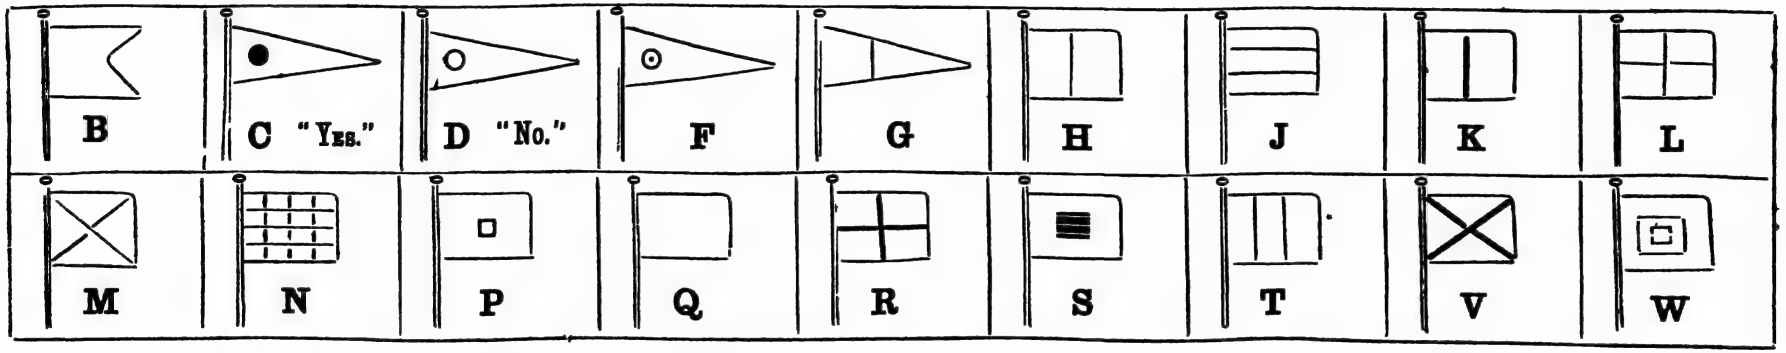
Note.—The International Code of Signals, with the Code List, is prepared by the Registrar-General of Shipping and Seamen, and may be had of the Publishers, Messrs. Spottiswoode & Co.,

* The object of this is, of course, to distinguish the Signals from those of another Code.

FLAGS OF THE INTERNATIONAL CODE OF SIGNALS.

"CODE SIGNAL" AND  "ANSWERING PENNANT."

N.B.—When used as the "Code Signal," this Pennant is to be hoisted under the "Ensign;" when used as the "Answering Pennant," where best seen.



The following examples will serve to illustrate how the *form of a Hoist* will usually denote the *nature of the Signal* made :—

ONE FLAG.	TWO FLAGS.			THREE FLAGS.		FOUR FLAGS.			
	BURGEE uppermost, "ATTENTION" Signals.	PENNANT uppermost, "COMPASS" Signals.	SQUARE FLAG uppermost, "URGENT" Signals.	General Signals.		BURGEE uppermost, GEOGRAPHICAL Signals.	PENNANTS C,D,F uppermost, NATIONAL VOCABULARY.	PENNANT G uppermost, Names of MEN-OF-WAR.	SQUARE FLAG uppermost, Names of MERCHANT SHIPS.

The Official Mercantile Navy List and Maritime Directory published for the use of Merchants, Shipowners, Shipbrokers, and others, may be obtained in like manner; price 12 *s.*

APPENDIX B.

REGULATIONS RESPECTING LIGHTS AND FOG SIGNALS AND STEERING AND SAILING RULES ISSUED BY THE BOARD OF TRADE.

NOTICE.

The Board of Trade have had their attention drawn to the necessity of a more strict examination of applicants for Certificates of Competency in their knowledge of the regulations for preventing collisions at sea.

In order that the rule of the road at sea may be better understood, and that a uniform system of examination may prevail, the Board of Trade have issued the following catechism.

This catechism has received the approval of the Trinity House and Admiralty in England, and of the Council of the Admiralty of France.

The Board of Trade attach very great importance to a thorough knowledge of the steering and sailing rules on the part of every applicant for a Certificate of Competency, and a thorough examination on the part of the Examiners.

All applicants for examination, whether for certificates as masters or mates, are to be examined as to their knowledge of the steering and sailing rules each time they present themselves for examination.

Questions suggested by the following heads of examination are to be asked in addition to, and are not to supersede, any other questions proper and necessary to be asked by the Examiner.

The following questions need not be adhered to literally by the Examiner, and are not all to be asked; but the substance of the leading questions should be asked, and all that are asked should be satisfactorily answered, before an applicant is reported to have passed his examination. The Examiner should make such a selection of the questions as each case appears to him to require.

THOMAS GRAY,

Board of Trade, *Assistant Secretary.*

Marine Department.

HEADS OF EXAMINATION IN REGULATIONS RESPECTING LIGHTS AND FOG SIGNALS AND IN THE STEERING AND SAILING RULES.

1. What light or lights are required by the regulations to be exhibited by sailing vessels at anchor?

One light only, viz., a white light.

2. What light or lights are required by the regulations to be exhibited by steam-ships at anchor?

The same as for sailing vessels

3. Where is the anchor light to be exhibited?

Where it can best be seen. It must of course be placed where there is the least possible chance of obstruction from spars, ropes, &c., &c.

4. To what height may the anchor light be hoisted?

It may be exhibited at any height where it can best be seen, not exceeding 20 feet above the deck.

5. What is the description of the lantern containing the anchor light required by the regulations?

A globular lantern of not less than eight inches in diameter.

6. In what direction or directions must the anchor light show?

It must show a clear, uniform, and unbroken light, visible all round the horizon.

7. At what distance must it be visible?

At least one mile.

8. What is the number of lights required by the regulations to be carried by sailing ships when under weigh at night?

Two side-lights, and to have in readiness a white light or a flare-up light to show from their stern to any vessel overtaking them

9. Of what colour are these lights, and how are they to be placed on board the ship?

A green light on the starboard side, and a red light on the port side.

10. What description of light must be shown from the sides of sailing vessels under weigh; and over how many points of the compass, and in what directions, and how far, are they required to show.

Each light must be so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass;

so fixed as to throw the light from right ahead to two points abaft the beam on the starboard and port sides respectively; and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

11. What lights are they to carry when being towed at night?

The same.

12. Are the side-lights required to be fitted with screens; and if so, of what length, and how?

Yes, on the inboard side; at least three feet in length, measuring forward from the light. They are to be so fitted as to prevent the coloured lights from being seen across the bows.

13. What is the number of lights required by the regulations to be carried by steam-ships when under steam at night?

Three lights, and to have in readiness a white light or flare-up light to show from their stern to any vessel overtaking them.

14. Of what colour are these lights, and how are they to be placed on board the ship?

A white light on or in front of the foremast at a height above the hull of not less than 20 feet; and if the breadth of the ship exceeds 20 feet, then at a height above the hull not less than such breadth. A green light on the starboard side, and a red one on the port side.

15. Over how many points of the compass, in what direction, and how far, is the foremast-head light of a steamer required to show?

Over 20 points, viz., from right ahead to two points abaft the beam on both sides. It must be of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.

16. Are the side-lights required to be fitted with screens; and if so, of what length?

The green and red lights are to be fitted with screens on the inboard side, extending at least three feet forward from the light, as in the case of sailing vessels.

17. Over how many points of the compass, in what directions, and how far, are the coloured side lights of steamers required to show?

The side-lights must be so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass, on each side of the ship, i.e., from right ahead to two points abaft the beam on the starboard and port sides respectively, and of such a character as to be visible on a dark night with a clear atmosphere at a distance of at least two miles.

18. What description of lights are steamers required by the regulations to carry when they are not under steam, but under sail only?

Side-lights only, the same as sailing vessels.

19. What exceptional lights are to be carried by small sailing vessels in certain cases?

Whenever, as in the case of small vessels during bad weather, the green and red side lights cannot be fixed, these lights shall be kept on deck, on their respective sides of the vessel, ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

20. What description of lights are pilot vessels required to carry when on their stations on pilotage duty?

A pilot vessel, when engaged on her station on pilotage duty, shall not carry the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

21. What description of lights are pilot vessels required to carry when not on their station on pilotage duty?

A pilot vessel, when not engaged on her station on pilotage duty, shall carry lights similar to those of other ships.

22. What lights are open boats and fishing vessels of less than 20 tons net registered required to carry when under way and not actually engaged in fishing.

Open boats and fishing vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side-lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side and a red glass on the other side, and on approaching to, or being approached by another vessel, such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side, nor the red light on the starboard side.

23. What lights are fishing vessels and fishing boats of 20 tons net register, or upwards, required to carry when under way and not actually engaged in fishing?

They must carry similar lights to those of other ships when under way.

24. What lights are steam trawlers of 20 tons gross register, or upwards, whilst actually engaged in trawling, and not being stationary, required to carry?

All steam-vessels engaged in trawling must carry either one of the two following arrangements of lights, whichever of the two may be the more convenient:—

(*a*) The usual green and red side-lights, and foremast head light, similar to those carried by other steamships; or

(*b*) They must carry on or in front of the foremast head, and in the same position as the white light which other steamships are required to carry, a lanthorn showing a white light ahead, a green light on the starboard side, and a red light on the port side; such lanthorn shall be so constructed, fitted, and arranged as to show an uniform and unbroken white light over an arc of the horizon of four points of the compass, an uniform and unbroken green light over an arc of the horizon of 10 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: and (2) a white light in a gobular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon; the lanthorn containing such white light shall be carried lower than the lanthorn showing the green, white, and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet, nor more than 12 feet.

25. What lights are sailing trawlers whilst actually engaged in trawling, and not being stationary, required to carry.

All sailing vessels, of whatever tonnage, whilst engaged in trawling, must carry either one of the three following arrangements of lights, whichever of the three, (*a*), (*b*), or (*c*), may be the most convenient:—

(*a*) They may carry the green and red side-lights similar to those of other sailing ships; or

(*b*) They may carry on or in front of the foremast head a lanthorn having a green glass on the starbord side and a red glads on the port side, so constructed, fitted, and arranges that the red and green do not converge, and so as to show an uniform and unbroken green light over an are of the horizon of 12 points of the compass, and an uniform and unbroken red light over an are of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft the beam on the port side; and (2) a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear, uniform and unbroken light all round the horizon; the lanthorn containing such white light shall be carried lower than the lanthorn showing the green and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet; or

(*c*) They may carry a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed at to show a clear, uniform and unbroken light all round the horizon, and visible on a dark night, with a clear atmosphere, for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 30 seconds, and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by, another ship or vessel in sufficient time to prevent collision.

26. What lights are vessels whilst actually engaged in drift net fishing required to carry?

All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of the vessel shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction as to show all round the horizon, on a dark night, with a clear atmosphere, for a distance of not less than 3 miles.

27. What lights are vessels whilst actually engaged in line fishing required to carry?

A vessel engaged in line fishing is required to carry the same lights as a vessel engaged in drift net fishing.

28 If a vessel, when fishing, becomes stationary in consequence of her gear getting fast to a rock or other obstruction, what signal must she make?

She must show the same light, and if a fog, mist, or falling snow prevail, she must make the same fog signal, as if she were at anchor.

29. What lights are fishing vessels and open boats required to exhibit when at anchor?

Between sunset and sunrise they must exhibit a white light, visible all round the horizon at a distance of at least one mile, the same as any other vessel.

30. What sound signals are fishing vessels required to make whilst engaged in fishing in thick weather?

In fog, mist, or falling snow, a drift net vessel attached to her nets, and a vessel when trawling, dredging, or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog-horn and ring her bell alternately.

31. May fishing vessels and open boats use flare-up lights, and if so, at what part, or parts, of the vessel should they be exhibited?

Yes. Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are by this article required to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after part of the vessel, excepting that, if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

32. Do these regulations referring specially to fishing vessels and boats apply to foreign vessels, and to all parts of the world?

No, with the exception of the *first paragraph* of Article 10 of the regulations, they apply only to British vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre.

33. What lights are steam-ships required to carry when towing other ships?

A steam-ship, when towing another ship, shall, in addition to her side lights, carry two bright white lights in a vertical line one over the other, not less than three feet apart, so as to distinguish her from other steam-ships. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light which other steam-ships are required to carry.

34. What light is a ship which is being overtaken by another required to show?

A ship which is being overtaken by another shall show from her stern to such last mentioned ship a white light or a flare-up light.

35. Describe the lights and the day signals that vessels employed in laying or picking up a telegraph cable are required to carry.

A ship, whether a steam-ship or a sailing-ship employed in laying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line over one another, not less than six feet apart; the highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character that the red lights shall be visible at the same distance as the white light. By day she shall carry in a vertical line one over the other, not less than six feet apart, in front of, but not lower than her foremast head, three shapes not less than two feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

36. Describe the lights and the day signals that vessels which from any cause are not under command are required to carry.

A ship, whether a steam-ship or a sailing ship, which from any accident is not under command, shall at night carry, in the same position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three red lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line one over than other, not less than three feet apart, and of such a charater as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles; and shall by day carry in a vertical line, one over the other, not less than three feet apart, in front of but not lower than her foremast head, three black balls or shapes, each two feet in diameter.

37. Are the above-mentioned ships to carry side-lights?

The above ships, when not making any way through the water, shall not carry the side-lights, but when making way shall carry them.

38. What are the previous mentioned shapes and lights intended to indicate to approaching ships?

These shapes and lights are to be taken by approaching ships as signals that the ship using them is not under command, and cannot therefore get out of the way.

39. Do these rules prevent squadrons and convoys from carrying special lights?

No. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war, or for ships sailing under convoy.

40. What sound signals are steam-ships and sailing ships required by the regulations to be provided with?

A steam-ship shall be provided with a steam whistle or other efficient steam sound signal, so placed that the sound may not be intercepted by any obstructions, and with an efficient fog-horn to be sounded by a bellows or other mechanical means, and also with

an efficient bell. A sailing ship shall be provided with a similar fog-horn and bell.

41. When are these signals to be used?

In fog, mist, or falling snow, whether by day or night.

42. What sound signal is to be made by steam-ships and sailing ships when not under way?

A steam-ship and a sailing ship when not under way shall, at intervals of not more than two minutes, ring the bell.

43. What sound signal is required to be made by a steam-ship when under way?

A steam-ship under way shall make with her steam whistle, or other steam sound signal, at intervals of not more than two minutes a prolonged blast.

44. What sound signals are required to be made by sailing ships when under way?

A sailing ship under way shall make with her fog-horn, at intervals of not more than two minutes, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

45. Do the regulations require ships to take any other precaution during thick weather?

Yes. Art. 13 says every ship, whether a sailing ship or steam-ship, shall, in a fog, mist, or falling snow, go at a moderate speed.

46. Is it optional for a steam-ship to make any other signals with her steam whistle?

Yes; but only to vessels in sight, *i.e.*, not to vessels which are so obscured by fog, mist, or falling snow that they cannot be seen, though their whistles may be heard.

Art. 19 provides that in taking any course authorised or required by the regulations, a steam-ship under way may indicate that course to any other ship which she has in sight by the following signals on her steam whistle, viz:—

One short blast to mean "I am directing my course to starboard."

Two short blasts to mean "I am directing my course to port:"

Three short blasts to mean "I am going full speed astern"

The use of these signals is optional; but if they are used, the course of the ship must be in accordance with the signal made.

47. What precaution is to be taken by steamers approaching another vessel?

If there is risk of collision, the steamer is to slacken speed, or, if necessary, stop and reverse.

48. If you see two white lights in a vertical line one over the other, what do they denote as regards the vessel carrying them?

They denote the presence of a steamer towing with her side lights not within sight on account of distance, fog, &c.; or a vessel end on to me engaged in drift net fishing, or in line fishing or it may be a steam trawler end on, or within two points of being end on, to me.

49. If you see a green, or a red, light with a white light below, what do they denote?

They denote the presence of either a sailing, or a steam, vessel engaged in trawling.

50. If you see both the green and red lights with a white light below them, what do they denote?

They denote the presence of a sailing trawler coming end on to me.

51. If you see a white light alone, what does it denote as regards the ship carrying it?

It denotes the presence of a vessel or boat at anchor; or a pilot vessel on her station; or the mast-head light of a vessel, under steam, with her side-lights not within sight on account of distance fog, &c.; or a fishing vessel stationary through her gear getting fast to some obstruction, or a sailing trawler engaged in trawling (1) under one arrangement of lights heading so that her side-lights are obscured, (2) under another arrangement from the red pyrotechnic light not having been exhibited, or it may be a light shown from the stern of a vessel which is being overtaken.

52. If you see a green or a red light without a white light, or both a green and a red light without a white light, is the vessel carrying the light or lights seen, a vessel under steam or a vessel under sail?

A vessel under sail?

53. How do you know?

Because there is no white mast-head light.

54. If you see a white light over a coloured light, is the vessel a vessel under sail or a vessel under steam?

A vessel under steam. The mast-head light denotes that the vessel is under steam.

[The Examiner will then take one model of a vessel, which he will place on the table, and call it A. He will then take the mast or stand with a white and red ball on it and place it at the other end of the table and call it B.

The Examiner should be careful that the model of one vessel only is used when the questions numbered 55 to 60 are asked.]

55. A is a steamer going north, seeing a white light and red light right ahead at B. Are A and the vessel B showing the two lights meeting end on or nearly end on, or is B passing A, or is B crossing the path of A, and in what direction, and how do you know?

Passing to port, because if I see a red light ahead, I know that the head of the vessel carrying that red light must be pointing away

in some direction to my own port or left hand. The ship showing the red light has her port or left side more or less open to A.

56. If A is going north, within what points of the compass must the vessel B showing the white and red lights be steering?

B must be going from a little W. of S. to W. N.-W.

57. How do you know this?

Because the screens being properly fitted, I could not see the red light of B at all with the vessel's head in any other direction.

58. A is a steamer going north, and seeing a white and green light ahead. Are A and B meeting, or is B passing A, or is B crossing the course of A, and in what direction; and how do you know?

B is passing to starboard of A, because if I see a green light ahead, I know that the head of the vessel carrying that green light must be pointing away in some direction to my starboard or right hand. The ship showing the green light has her right or starboard side more or less open to me.

59. As A is going north, within what points of the compass must the vessel showing the white and green lights be steering?

B must be going from a little E. of South to E.N.E.

60. How do you know?

Because the screens being properly fitted, I cannot see the green light at all with the vessel's head in any other direction.

61. If a steamer A sees the *three* lights of another steamer B ahead or nearly ahead, are the two steamers meeting, passing, or crossing?

Meeting end on, or nearly end on.

62. Do the regulations expressly require the course of a ship to be altered to starboard in any case, and if so, when?

Yes; in the case of two steamers meeting end on, or nearly end on.

63. Do they expressly require the course of a ship to be altered to starboard in any other case; and if so, in what other?

No. It is not in any other case expressly required by the regulations.

[The Examiner should see that the candidate puts the models in the positions indicated by the question 64, and following.]

64. If a steamer A sees another steamer's red light B on her own starboard side, are the steamers meeting, passing, or crossing; and how do you know?

Crossing, because the red light of one is opposed to the green light of the other; and whenever a green light is opposed to a red light or a red light to a green light, the ships carrying the lights are, crossing ships.

65. Is A to stand on; and if not, why not?

A has the other vessel B on her own starboard side. A knows she is crossing the course of B, because she sees the red light of B on her (A's) own starboard side. A also knows she must get out of the way of B, because Article 16 expressly requires that the steamer that has the other on her own starboard side shall keep out of the way of the other.

66. Is A to starboard or to port in such a case?

A must do what is right so as to get herself out of the way of B: it is generally preferable to pass under a ship's stern rather than attempt to cross her bows, but it depends entirely on the position and relative speed of the two ships, and therefore the regulations wisely leave the giving way ship to get out of the way in any manner that may be most desirable, so always that she does get out of the way.

67. If A gets into collision by porting, will it be because she is acting on any rule?

No; the rule does not require her either to port or to star board If she ports, and gets into collision by porting, it is not the fault of any rule.

68. If a steamer A sees the green light of another steamer B on her own (A's own) port bow, are the two steamers meeting, passing, or crossing; and how do you know?

Crossing, because the green light of one ship is shown to the red light of the other.

69. What is A to do, and why?

By the rule contained in Article 22 of the Regulations, A is required to keep her course, subject only to the qualification that due regard must be had to all dangers of navigation; and that due regard must also be had to any special circumstances which may exist in any particular case rendering a departure from that rule necessary in order to avoid immediate danger. The crossing ship B on A's port side must get out of the way of A, because A is on B's starboard side.

70 A, a steamer, sees the green light of another steamer, B, a point on her A's port bow. Is there any regulation requiring A to port in such a case; and if so, where is it to be found?

There is not any.

71. Are steam-ships to get out of the way of sailing ships?

If a steamer and a sailing ship are proceeding in such direction as to involve risk of collision, the steamer is to get out of the way of the sailing ship, unless the sailing ship is overtaking the steamer.

72. What is to be done by A, whether a steamer or a sailing ship, if overtaking B?

A is to keep out of the way of B.

73. When by the rules one of two ships is required to keep out of the way of the other, what is the other to do?

To keep her course. This is absolutely necessary to enable the commander of the ship required by the regulations to keep out of the way, to act with decision and promptitude, which he cannot possibly, unless he knows what the other vessel is going to do.

74. Is there any qualification or exception to this ?

Yes. Due regard must be had to all dangers of navigation, and to any special circumstances which may exist in any particular case, and require a departure from the regulations to avoid immediate danger.

75 Is there any general direction in the steering and sailing rules ; and if so, what is it ?

Yes, it is this : that nothing in the rules shall exonerate any ship, or the owner, master, or crew thereof, from the consequences of any neglect to carry lights, or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

76. Can you repeat article (———) of the regulations, I refer to the article containing the rule for (———) ?

[The Examiner should repeat this question, naming a different article each time.]

77. What does the Act of Parliament provide as to the obligation of owners and masters in obeying the regulations respecting lights, fog signals, and steering and sailing ?

Section 27 of "the Merchant Shipping Act Amendment Act, 1862," provides that owners and masters shall be bound to obey the regulations, and it also provides that in case of wilful default by the master or owner he shall be deemed to be guilty of a misdemeanor for each infringement.

78. What do breaches of the regulations imply ?

If an accident happens through non-observance of the regulations, it implies wilful default on the part of the person in charge of the deck at the time, unless it is shown to the satisfaction of the court hearing the case that the special circumstances of the case rendered a departure from the rules necessary.

79. If collision ensues from a breach of the regulations, who is to be deemed in fault for the collision ?

The person by whom the regulations are infringed, unless the court hearing the case decides to the contrary.

80. Is there any special rule for steam-ships navigating narrow channels ?

In narrow channels every steam-ship shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which is on the starboard side of such ship.

81. Do the regulations apply to sea-going ships in harbours and in rivers ?

Yes ; unless there is any rule to the contrary made by a competent authority.

82. Do they apply to British ships only ?

No, to foreign ships as well, with the exception of paragraphs (*a*), (*b*), (*c*), (*d*), (*e*), (*f*) and (*g*), of Article 10, which apply only to British fishing vessels.

83. Do you know where the present regulations are to be found ?

Yes, in the Orders in Council of the 11th August 1884, the 30th December 1884, and 24th June 1885. Copies are given away on application to the Board of Trade.

84. Is one ship bound to assist another in case of collision ?

Yes.

85. What is the penalty for default ?

If the master or person in charge of the ship fails to render assistance without reasonable excuse, the collision is, in absence of proof to the contrary, to be deemed to be caused by his wrongful act, neglect, or default.

86. Is there any other penalty attached to not rendering assistance ?

Yes. If it is afterwards proved that he did not render assistance, his certificate may be cancelled or suspended by the court investigating the case.

87. Is it not expected that you should understand the regulations before you take charge of the deck of a ship ?

It is.

88. Why ?

If I do not understand them and am guilty of default, the consequences will be very serious to me.

89. What would be a serious offence ?

To cause a collision by porting the helm or doing anything not required by the regulations and without due consideration.

REGULATIONS FOR PREVENTING COLLISIONS AT SEA. ORDER IN COUNCIL OF 11TH AUGUST 1884.

Preliminary.

Art. 1. In the following rules every steam-ship which is under sail and not under steam is to be considered a sailing ship; and every steam-ship which is under steam, whether under sail or not, is to be considered a ship under steam.

Rules Concerning Lights.

Art. 2. The lights mentioned in the following Articles, numbered 3, 4, 5, 6, 7, 8, 9, 10 and 11, and no others, shall be carried in all weathers, from sunset to sunrise.

Art. 3. A sea-going steam-ship when under way shall carry—

(*a*) On or in front of the foremast, at a height above the hull of not less than 20 feet, and if the breadth of the ship exceeds 20 feet, then at a height above the hull not less than such breadth, a bright white light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the ship, viz. from right ahead to two points abaft the beam on either side; and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.

(*b*) On the starboard side, a green light so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(*c*) On the part side, a red light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the port side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(*d*) The said green and red side-lights shall be fitted with inboard screens projecting at least three feet forward from the light, so as to prevent these lights from being seen across the bow.

Art. 4. A steam-ship, when towing another ship, shall in addition to her side-lights, carry two bright white lights in a vertical line one over the other, not less than three feet apart, so as to distinguish her from other steam-ships. Each of these lights shall be of the same construction and character, and shall be carried in the same position, as the white light which other steam-ships are required to carry.

Art. 5. (*a*) A ship, whether a steam-ship or a sailing ship, which from any accident is not under command, shall at night carry, in the same position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three red lights in globular lanterns, each not less than 10 inches in diameter, in a vertical line one over the other, not less than three feet apart, and of such a character as to be visible on a dark night with a clear atmosphere at a distance of at least two miles; and shall by day carry in a vertical line one over the other, not less than three feet apart, in front of, but not lower than, her foremast head, three black balls or shapes, each two feet in diameter.

(*b*) A ship, whether a steam-ship or a sailing ship, employed in laying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam-ships are required to carry, and, if a steam-ship, in place of that light, three lights in globular laterns, each not less than 10 inches in diameter, in a vertical line one over another, not less than six feet apart; the highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character that the red lights shall be visible at the same distance as the white light. By day she shall carry in a vertical line one over the other, not less than six feet apart, in front of, but not lower than, her foremast head, three shapes not less than two feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The ships referred to in this Article, when not making any way through the water, shall not carry the side-lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other ships as signals that the ship showing them is not under command, and cannot therefore get out of the way. The signals to be made by ships in distress and requiring assistance are contained in Article 27.

Art. 6. A sailing ship under way, or being towed, shall carry the same lights as are provided by Article 3 for a steam-ship under way, with the exception of the white light, which she shall never carry.

Art. 7. Whenever, as in the case of small vessels during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept on deck, on their respective sides of the vessels, ready for use: and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent a collision, in such a manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

Art. 8. A ship, whether a steam-ship or a sailing ship, when at anchor, shall carry, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light, in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform and unbroken light visible all round the horizon at a distance of at least one mile.

Art. 9. A pilot vessel, when engaged on her station on pilotage duty, shall not carry the lights required for other vessels, but shall

carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

A pilot vessel, when not engaged on her station on pilotage duty, shall carry lights similar to those of other ships.

Art 10. Open boats and fishing vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side-lights ; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side and a red glass on the other side, and on approaching to, or being approached by another vessel, such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side, nor the red light on the starboard side.

The following portion of this article applies only to fishing vessels and boats when in the sea off the cost of Europe lying north of Cape Finisterre :—

(*a*) All fishing vessels and fishing boats of 20 tons not registered tonnage, or upwards, when under way and when not required by the following regulations in this article to carry and show the lights therein named, shall carry and show the same lights as other vessels under way.

(*b*) All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of th vessel shall be not less than five feet, and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction as to show all round the horizon, on a dark night with a clear atmosphere, for a distance of not less than three miles.

(*c*) A vessel employed in line fishing with her lines out shall carry the same lights as a vessel when engaged in fishing with drift nets.

(*d*) If a vessel when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall show the light and make the fog signal for a vessel at anchor.

(*e*) Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are by this article required to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing, with any kind of drag net shall be shown at the after part of the vessel, excepting that, if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

(*f*) Every fishing vessel and every open boat when at anchor between sunset and sunrise shall exhibit a white light visible all round the horizon at a distance of at least one mile.

(*g*) In fog, mist, or falling snow, a drift net vessel attached to her nets and a vessel when trawling, dredging, or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog-horn and ring her bell alternately.

Art. 11. A ship which is being overtaken by another shall show from her stern to such last-mentioned ship a white light or a flare-up light.

Sound Signals for Fog, &c.

Art. 12. A steam-ship shall be provided with a steam whistle or other efficient steam sound signal, so placed that the sound may not be intercepted by any obstructions, and with an efficient fog-horn to be sounded by a bellows or other mechanical means, and also with an efficient bell.* A sailing ship shall be provided with a similar fog-horn and bell.

In fog, mist, or falling snow, whether by day or night, the signals described in this Article shall be used as follows ; that is to say—

(*a*) A steam-ship under way shall make with her steam whistle or other steam sound signal, at intervals of not more than two minutes, a prolonged blast.

(*b*) A sailing ship under way shall make with her fog-horn, at intervals of not more than two minutes, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*c*) A steam-ship and a sailing ship, when not under way, shall, at intervals of not more than two minutes, ring the bell.

Speed of Ships to be moderate in Fog, &c.

Art. 13. Every ship, whether a sailing ship or steam-ship, shall in a fog, mist, or falling snow, go at a moderate speed.

---

* In all cases where the regulations require a bell to be used, a drum will be substituted on board Turkish vessels.

Steering and Sailing Rules.

Art. 14. When two sailing ships are approaching one another so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.—

(*a*) A ship which is running free shall keep out of the way of a ship which is close-hauled.

(*b*) A ship which is close-hauled on the port tack shall keep out of the way of a ship which is close-hauled on the starboard tack.

(*c*) When both are running free with the wind on different sides, the ship which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free with the wind on the same side, the ship which is to windward shall keep out of the way of the ship which is to leeward.

(*e*) A ship which has the wind aft shall keep out of the way of the other ship.

Art. 15. If two ships under steam are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This article only applies to cases where ships are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two ships which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are, when each of the two ships is end on, or nearly end on, to the other; in other words, in cases in which, by day, each ship sees the masts of the other in a line, or nearly in a line, with her own; and by night, to cases in which each ship is in such a position as to see both the side-lights of the other.

It does not apply, by day, to cases in which a ship sees another ahead crossing her own course; or by night, to cases where the red light of one ship is opposed to the red light of the other, or where the green light of one ship is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Art. 16. If two ships under steam are crossing, so as to involve risk of collision, the ship which has the other on her own starboard side shall keep out of the way of the other.

Art. 17. If two ships, one of which is a sailing ship, and the other a steam-ship, are proceeding in such directions as to involve risk of collision, the steam-ship shall keep out of the way of the sailing ship.

Art. 18. Every steam-ship, when approaching another ship, so as to involve risk of collision, shall slacken her speed or stop and reverse, if necessary.

Art. 19. In taking any course authorised or required by these Regulations, a steam-ship under way may indicate that course to any other ship which she has in sight by the following signals on her steam whistle, viz.—

One short blast to mean "I am directing my course to starboard:"

Two short blasts to mean "I am directing my course to port:"

Three short blasts to mean "I am going full speed astern."

The use of these signals is optional; but if they are used, the course of the ship must be in accordance with the signal made.

Art. 20. Notwithstanding anything contained in any preceding Article, every ship, whether a sailing ship or a steam-ship, overtaking any other shall keep out of the way of the overtaken ship.

Art. 21. In narrow channels every steam-ship shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such ship.

Art. 22. Where by the above rules one of two ships is to keep out of the way, the other shall keep her course.

Art. 23. In obeying and construing these rules due regard shall be had to all dangers of navigation; and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

No Ship, under any circumstances, to neglect proper Precautions.

Art. 24. Nothing in these rules shall exonerate any ship, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

Art. 25. Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland navigation.

Special Lights for Squadrons and Convoys.

Art. 26. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with

respect to additional station and signal lights for two or more ships of war or for ships sailing under convoy.

Art. 27. When a ship is in distress, and requires assistance from other ships or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, that is to say—

In the day-time—

1. A gun fired at intervals of about a minute;
2. The International Code signals of distress indicated by N. C.
3. The distant signal, consisting of square flag, having either above or below it a ball or anything resembling a ball.

At night—

1. A gun fired at intervals of about a minute;
2. Flames on the ship (as from a burning tar barrel, oil barrel, &c.);
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals.

ORDERS IN COUNCIL OF 30TH DECEMBER 1884 AND 24TH JUNE 1885.

ALTERNATIVE LIGHTS FOR TRAWLERS WHEN ENGAGED IN TRAWLING, HAVING THEIR TRAWLS IN THE WATER AND NOT BEING STATIONARY.

1884.—PART I.—STEAM-VESSELS OF 20 TONS GROSS REGISTER TONNAGE OR UPWARDS.

(1) On or in front of the foremast head and in the same position as the white light which other steam-ships are required to carry, a lanthorn showing a white light ahead, a green light on the starboard side, and a red light on the port side, such lanthorn shall be so constructed, fitted, and arranged as to show an uniform and unbroken white light over an arc of the horizon of four points of the compass, an uniform and unbroken green light over an arc of the horizon of 10 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: (2) a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, the lanthorn containing such white light shall be carried lower than the lanthorn showing the green, white, and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet nor more than 12 feet.

1884.—PART II.—SAILING-VESSELS OF 20 TONS NET REGISTER TONNAGE OR UPWARDS.

(1) On or in front of the foremast head a lanthorn having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show an uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft the beam on the port side: and (2) a white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, the lanthorn containing such white light shall be carried lower than lanthorn the green and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet.

1885.—SAILING TRAWLERS OF ANY TONNAGE.

As regards sailing vessels engaged in trawling, such vessels having their trawls in the water and not being stationary in consequence of their gear getting fast to a rock or other obstruction, if they do not carry and show the lights required by Article 6 of the Regulations aforesaid, or the other lights of the description set forth in Part 2 of the Schedule to the said recited Order in Council of the 30th of December 1884, shall carry and show in lieu of the lights required by Article 6 of the Regulations aforesaid, or the other lights of the description set forth in paragraph 2 of the Schedule to the said recited Order, other lights as follows, that is to say:

A white light in a globular lanthorn of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, and visible on a dark night

with a clear atmosphere for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 3) seconds, and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by another ship or vessel in sufficient time to prevent collision.

AIDS TO MEMORY IN FOUR VERSES, BY THOMAS GRAY.

1. *Two Steam-ships meeting.*

When both side lights you see ahead—
Port your helm and show your RED.

2. *Two Steam-ships passing.*

GREEN to GREEN—or, RED to RED—
Perfect safety—Go ahead!

3. *Two Steam-ships crossing*

Note.—This is the position of greatest danger: there is nothing for it but good look-out, caution, and judgment.

If to your starboard RED appear,
It is your duty to keep clear;
To act as judgment says is proper:—
To Port—or Starboard—Back,—or, Stop her!

But when upon your Port is seen
A Steamer's Starboard Light of GREEN,
There's not so much for you to do,
For GREEN to Port keeps clear of you.

4. *All Ships must keep a good look-out, and Steam-ships must stop and go astern, if necessary.*

Both in safety and in doubt
Always keep a good look-out;
In danger, with no room to turn,
Ease her, stop her, go astern.

14*th October* 1867.

APPENDIX C.

DISTRESS AND PILOT SIGNALS.

M. S. Act 1873. The following sections, together with the schedules referred to therein, of the "Merchant Shipping Acts, Amendment Act, 1873," relate to Signals of Distress and Signals for Pilots. (*See also* "*Regulations for preventing Collisions at Sea. Article* 27.)

Signals of distress. 18. The signals specified in the first schedule to this Act shall be deemed to be signals of distress.

Any master of a vessel who uses or displays, or causes or permits any person under his authority to use or display, any of the said signals, except in the case of a vessel being in distress, shall be liable to pay compensation for any labour undertaken, risk incurred, or loss sustained in consequence of such signal having been supposed to be a signal of distress, and such compensation may, without prejudice to any other remedy, be recovered in the same manner in which salvage is recoverable.

Signals for pilots. 19. If a vessel requires the services of a pilot, the signals to be used and displayed shall be those specified in the second schedule to this A

Any master of a vessel who uses or displays, or causes or permits any person under his authority to use or display, any of the said signals for any other purpose than that of summoning a pilot, or uses or causes or permits any person under his authority to use any other signal for a pilot, shall incur a penalty not exceeding twenty pounds.

Power to alter rules as to signals. 20. Her Majesty may from time to time by Order in Council repeal or alter the rules as to signals contained in the schedules to this Act or make new rules in addition thereto, or in substitution therefor, and any alterations in or additions to such rules made in manner aforesaid shall be of the same force as the rules in the said schedules.

SCHEDULES.

SCHEDULE I.—SIGNALS OF DISTRESS.

In the day time.—The following signals, numbered 1, 2 and 3, when used or displayed together or separately, shall be deemed to be signals of distress in the daytime:—

1. A gun fired at intervals of about a minute;
2. The International Code signal of distress indicated by N C;
3. The distant signal, consisting of a square flag having either above or below it a ball, or anything resembling a ball.

At night.—The following signals, numbered 1, 2 and 3, when used or displayed together or separately, shall be deemed to be signals of distress at night:

1. A gun fired at intervals of about a minute;
2. Flames on the ship (as from a burning tar barrel, oil barrel, &c.);
3. Rockets or shells, of any colour or description, fired one at a time, at short intervals.

SCHEDULE II.—SIGNALS TO BE MADE BY SHIPS WANTING A PILOT.

In the day time.—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot in the day time, viz:—

1. To be hoisted at the fore, the Jack or other national colour usually worn by merchant ships, having round it a white border, one-fifth of the breadth of the flag; or
2. The International Code pilotage signal indicated by P T.

At night.—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot at night, viz.—

1. The pyrotechnic light, commonly known as a blue light, every fifteen minutes; or
2. A bright white light, flashed or shown at short or frequent intervals, just above the bulwarks, for about a minute at a time.

APPENDIX D.

EXAMINATION IN CHART.

FOR ALL GRADES WHERE THE CHART IS USED (INCLUDING "HOME TRADE" CANDIDATES).

[The candidate will be required to work out the following questions on either a "true" or "magnetic" chart, * whichever may be handed to him by the Examiner; and also determine whether the chart is a "true" or "magnetic" one, and whether it is for the northern or southern, and eastern or western hemispheres.

---

1. Using deviation [card] [curve] † No. find the course to steer by compass from to ; also the distance.

Answer.—Compass course .
Distance .
Variation .
Deviation .

2. With the ship's head on the above-named compass course a [point] [light-house] bore by compass and bore by the same compass, find the ship's position.

Answer.—Latitude .
Longitude .

3. With the ship's head as above, a [point] [light-house] bore by compass , and after continuing on the same course miles, it bore , find the position of ship and her distance from at the time of taking the second bearing.

Answer.—Latitude .
Longitude .
Distance .

All the foregoing questions must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the port may require.

Signature .
Date .
Chart used .

ADDITIONAL FOR MASTERS (INCLUDING "HOME TRADE" CANDIDATES).

4. Find the course to steer by compass from to (*see* Question 1) to counteract the effect of a

---

* The terms "true" and "magnetic" are used for the sake of brevity, and convenience, for indicating charts that have compasses delineated upon them showing the "true" or "magnetic" points of the compass respectively.

† A candidate for a Master's Certificate is expected to use either a card of deviations, or a curve of deviations on a Napier's diagram, whichever the Examiner may think proper to put before him.

current which set at the rate of miles per hour, the ship making by log miles per hour; also the distance the ship would then make good in hours towards

Answer.—Compass course

Distance

5. On being off took a cast of the lead; required the correction to be applied to the depth obtained by the lead line before comparing it with the depth marked on the chart.

6. What do you understand the small numbers to indicate that you see placed about the chart, and at what time of tide?

7. What do the Roman numerals indicate that are occasionally seen near the coasts and in harbours?

8. How would you find, approximately, the time of high water at any place, the Admiralty tables not being at hand nor any other special tables available?

All the foregoing questions, and those on Form Exn. 9 C., must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the port may require.

Date

APPENDIX E.

DEVIATION OF THE COMPASS.

(For Masters of Home Trade Ships.)

[The Applicant must answer in writing, on paper given him by the Examiner, all the following questions, numbering his answers to correspond with the numbers of the questions.]

1. When taking a Meridian Altitude, how do you know when the sun is on the Meridian; or, in other words, when it is noon?
2. How does the sun bear when on the meredian of an observer in these latitudes (Home Trade Limits)?
3. What do you mean by deviation of the compass, and how is it caused?
4. Having determined the deviation, how do you know when it is easterly, and when westerly?
5. Supposing the sun when on the meridian bore by your compass——————what would be the deviation of that Compass for the direction of the ship's head at the time, the variation given on the Chart being——————?
6. How could you find the deviation of your Compass when in port, or when sailing along a cost?
7. Name some suitable objects by which you could readily obtain the deviation of your Compass, when sailing along the coasts of the Channel you have been accustomed to use?
8. The bearing of two objects when in a line with each other was found on the Chart to be——————magnetic; but when brought in a line on board they bore——————by your Compass; required the deviation of your Compass for the direction of the ship's head at the time?
9. What means are there for checking the deviation of your Compass by night?
10. Supposing the North Star (*Polaris*) bore——————by your Compass, what would be the deviation (approximately) of that Compass for the direction the ship's head at the time, supposing the variation given on the Chart to be——————?
11. Do you expect the deviation to change? if so, state under what circumstances?
12. What is meant by variation of the Compass, and what is the cause of it?

APPENDIX F.

INSTRUCTIONS TO EXAMINERS.

Examination in Colours.

Herewith are—

(*a*) A lanthorn having in it a lamp in which kerosine is to be burnt.

(*b*) A slide having ground glass in it.

(*c*) Nine slides, each having a coloured glass in it. The colours are as follow :—

1. Red (Standard).
2. Pink or salmon.
3. Green (Standard or No. 1.
4. Green (Bottle or No. 2).
5. Green* (Pale or No. 3).
6. Yellow.
7. Neutral.*
8. Blue (Standard).
9. Blue* (Pale).

(*d*) Cards, five of each as follow :—

1. White
2. Black.
3. Red.
4. Pink.*
5. Green.
6. Drab.*
7. Blue.
8. Yellow.

Examination by Daylight. (Cards.)

In conducting the examination by daylight the examiner should do it in three ways—

1. The cards should be mixed up. The examiner should then hold up each card separately, and ask the candidate to name the colour, and if the candidate does so without hesitation, he is to be regarded as having passed the day-light test.
2. If the candidate hesitates in any of his answers so as to raise a doubt in the mind of the examiner as to his ability to readily distinguish colours, the examiner should put all the cards on the table and require the candidate to select all cards of a colour or colours named by the examiner.
3. Having done that they should all be mixed up again and the candidate should be required to sort the cards into eight heaps, putting all of one colour into each heap
4. The result of the examination should be noted and recorded in each case.

Examination by Artificial light.

The room should be dark.

The lamp lighted and placed in the lanthorn.

The applicant should be seated or should stand so as to be opposite to the opening of the lanthorn; and, at least, 15 feet from the front of the lanthorn.

He should first of all see the light in the lanthorn without the interposition of any glass and be asked if it appears to him to have any colour, and if so, what colour ?

The slide with the ground glass should then be put into the opening at the front of the lanthorn which is nearest to the light, and the applicant asked the same question.

The slide with the ground glass is to be left in, and the slides with the coloured glasses placed one by one and separately in front of it, and the candidate asked in each case to name the colour or tint.

The result of the examination should of course be noted and recorded in each case.

General.

The cards and glasses against which a star* is placed in the list are what may be called confusion tints. The candidate is not to be regarded as having "failed" if he miscalls these tints, provided that he names all the others correctly. But if having named all the others correctly he miscalls these so far as to name the drab card No. 6 as red, pink, salmon, &c. ; or to name card No. 7 as red, green, or yellow ; or glass No. 2 as green blue, or yellow ; or glass No. 5 as red, pink, salmon, &c. ; or glass No. 7 as bright red or bright green ; or the plain ground glass any colour, the case should be reported for record. In short, if the candidate's perception or impression of these tints does not agree with the perception of the examiner, the case should be reported on the Form Exn. 17B.

The only reasons for which a candidate is to be reported as having failed are inability to distinguish red from green, or either from black, by daylight ; and red from green, or either from the ground glass, by artificial light.

If a candidate fails in the colour test when the ground glass is in the lanthorn (as it is always to be when the coloured glasses are shown), he may also be tried over again with the coloured glasses without the intervention of the ground glass, and the result noted and recorded.

NOTICE.

Candidates applying to be examined for Certificates of Competency are hereby informed that no remuneration or gratuity whatever, either directly or indirectly, can be received by any Officer, Messenger, or Servant of the Government, except the lawful fees stated in the Regulations, which are to be paid to the Port Officer when the Candidate makes his application.

Any Officer, Messenger, or Servant of the Government accepting any present or gratuity is liable to summary dismissal, and any Candidate so offering money will be subject to the penalty mentioned in para. 16 of the Regulations relating to the examination of Masters, or para. 35 of those relating to the examination of Engineers and Engine-drivers as the case may be.

Every case in which an applicant has paid, or pays hereafter, any fee or gratuity to any Officer, Messenger, or Servant, on any pretence whatever, other than the prescribed fees for examination, should be reported to the Local Government.

REGULATIONS

RELATING TO THE

EXAMINATION OF MASTERS OF INLAND STEAM-VESSELS.

Preliminary.

UNDER the provisions of the Inland Steam-Vessels Act, 1884, no inland steam-vessel having engines of eighty nominal horse-power or upwards is allowed to proceed on any voyage unless her master possesses a first class master's certificate granted under the Act, or a master's certificate granted under Act I of 1859 (*for the amendment of the law relating to merchant seamen*), or the Merchant Shipping Acts, 1854 to 1883, or a certificate to which the provisions of any such Act have been made applicable under the Merchant Shipping (Colonial) Act, 1869; and no such ship having engines of under eighty nominal horse-power is allowed to proceed on any voyage unless her master possesses a second class master's certificate granted under the Act, or a certificate of the higher grade of the nature referred to above:

Provided that a steam-vessel having engines of under eighty nominal horse-power shall be deemed to have complied with the law if she has as her master and engineer a person possessing both a second class master's certificate and an engine-driver's certificate granted under the Act

Any person who having been engaged to serve as master of an inland steam-vessel proceeds on any voyage in that steam-vessel as master without being at the time entitled to and possessed of the certificate required under the Act, and any person who employs any person as such master without ascertaining that he is at the time entitled to, and possessed of, the certificate required under the Act, is liable to be punished with fine which may extend to *five hundred rupees.*

No. 27 Marine, dated Calcutta, the 31st January 1890.

NOTIFICATION—By the Govt of Bengal, P. W. Dept.

UNDER the powers conferred upon him by section 29 of the Inland Steam-Vessels Act, 1884, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the granting of certificates of competency to masters of inland steam-vessels.

Certificates granted to persons who pass examinations

1. *Certificates of Competency* will be granted to those persons who pass the requisite examinations, and otherwise comply with the requisite conditions. For this purpose arrangements have been made for holding examinations periodically at the port of Calcutta.

Examinations continued till all the candidates are examined

2. The examinations will be held by the Port Officer and one or more other examiners to be appointed by the Government from time to time They will commence early in the forenoon, and will be continued from day to day until all the Candidates whose names appear upon the Port Officer's list on the day of examination are examined.

3. Candidates for examination must make their application upon the appropriate form (Exn. 2*b*), which must be filled up at the Port Office. The Exn 2*b* properly filled in, together with the candidates' testimonials and discharges, must be lodged with the Port Officer not later than the day before the day of examination.

Testimonials of character, conduct, and ability required

4 Testimonials of character, and of sobriety, experience, ability, and good conduct on board ship for at least the twelve months of service immediately preceding the date of application to be examined, will be required of all applicants, and without producing them no person will be examined. As such testimonials and discharges may have to be verified before the candidate can be examined, it is desirable that they should be handed in, together with the Forms Exn 2*b*, as early as possible.

Testimonials of Foreigners

5. The testimonials of servitude of Foreigners and of British Seamen serving in foreign vessels which cannot be verified by the Port Officer must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country; or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Government.

Certificates as to Age

6. Should any doubt exist as to the age of a candidate, he will be required to produce a certificate of birth or baptism.

Foreigners to know English.

7. Foreigners must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel. In the case of natives of India, who may not be able to speak English, their certificate shall be endorsed to the effect that they are valid only for vessels manned and officered entirely by Asiatics.

Colour Tests.

8. The Government have made the following arrangements for the examination of persons as to their ability to distinguish colours :—*

9. Examinations in Colour are open to any person serving or about to serve in the Mercantile Marine.

10. Any person, including the holders of Certificates of Competency, or persons about to apply for Certificates of Competency, if desirous of being examined *in Colours only*, must make application to the Port Officer on Form Exn. 2*a*, and pay a fee of one rupee.

11. He must on the appointed day attend for examination at the Examiner's Office; and if he passes he will receive a certificate to that effect.

12. If he fails it will be open to him to be examined again in Colours as often as he pleases on payment of the fee of one rupee at each fresh attempt.

---

* *See* Apendix A.

13. The application of a *Candidate who is presenting himself for Examination for a Master's Certificate* must be made on Form Exn. 2*b*. Such examination will commence with the Colour test; and if the Candidate does not, at the time of making application, hold a Certificate of Competency of any grade, and should fail to distinguish correctly any one of the colours used in the test, he will not be allowed to proceed with the examination

14. The fee he has paid for Examination for a Certificate of Competency will include the fee for the Colour test, and, with the exception of one rupee, will in such event be returned to him.

15. A candidate for Examination for a Certificate of Competency who, at the time of making application, does not possess a Certificate, and who fails to pass the colour test, may not be re-examined until after the lapse of three months from the date of his first failure. If the fails a second time, he will be allowed a third trial at the expiration of another three months from the date of his second failure. A fresh fee must be paid at each succeeding examination.

16. It is therefore obviously to the advantage of Candidates for Certificates of Competency to apply in the first instance to be examined in *Colours only* on Form Exn. 2*a*.

17. A Candidate who holds a Certificate of Competency, and who, on presenting himself for Examination for a Certificate of a higher grade, is unable to pass the Colour test, will notwithstanding be permitted to proceed with the Examination for the Certificate of the higher grade.

18. Should he pass this examination, the following statement will be written on the face of the higher Certificate which may be granted to him, viz.—"This Officer has failed to pass the Examination in Colours."

19. Should be ultimately fail to pass the Examination, a like statement, relating to his being Colour blind, will be made by the Port Officer on his existing Certificate before it is returned to him.

20. Holders of Certificates which bear the statement of their having failed to pass in Colours, and who may desire to have the statement removed from their Certificates, must obtain the special permission of the Government.

Qualifications for Certificates of Competency as First Class Masters.

21. *Examination in Colours.*—All candidates for certificates of competency must first be examined in colours.*

22. A candidate for a certificate as first class master of inland steam-vessels must be not less than twenty-four years of age, and must have served as a second class master in charge of a steam-vessel for not less than three years, or he must be not less than twenty-two years of age, hold a certificate of competency as second mate granted under Act I of 1859 (for the amendment of the law relating to Merchant Seamen) or the Merchant Shipping Acts 1854 to 1883, or a certificate to which the provisions of any such Act have been made applicable under the Merchant Shipping (Colonial) Act, 1869, and have served as Mate of an inland steam vessel or master of a river flat for not less than one year.

23. Each candidate will be examined apart, and *viva voce*, in each and all of the following subjects:—

(1)—The rules of the road.
(2)—The management of river steamers under all contingencies.
(3)—The tide table.
(4)—Storm signals.
(5)—The provisions of Act VI of 1884, and the rules framed under sections 21, 29, 50 and 51 of the Act.

Qualifications for Certificates of Competency as Second Class Masters.

Examination in Colours.—All candidates for certificates of Competency must first be examined in colours.*

24. A candidate for a certificate as second class Master of an inland steam-vessel must not be less than twenty-one years of age and must produce satisfactory certificates of

* *See* Appendix A.

sobriety and intelligence, and that he has served three years as Mate of a small steam-vessel or as chief helmsman of a steam-vessel of over 80 horse power, and shall be examined *viva voce* as to his knowledge in the following subjects:—

(1)—The rules of the road.
(2)—The management of small river steamers.
(3)—Storm signals.

Failure.

Re-examination in case of failure.

25. If a candidate fails, he will not be re-examined *until after a lapse* of three months from the date of such failure.

Certificate of lower grade.

26. If a candidate has failed in his examination, but the subjects in which he has failed are not included in the subjects required for a certificate of a lower grade, he may, if he desires it, receive a certificate of such lower grade.

27. No part, however, of the fee he has paid will be returned to him, and on presenting himself, when entitled so to do, for re-examination for the higher grade of certificate he will be required to pay again the full fee.

Fees.

28. Candidates for examination, in making their application on Form Exn. 2*b*, will be required to pay the examination fee before any step is taken, whether by enquiring into their services or testing their qualifications, &c. Should it be found that their service is not sufficient to entitle them to be examined, or should their testimonials be unsatisfactory, or should they from any other cause not be examined, no part of the fee will be returned to them, but when they have fulfilled the requisite service, or are able to produce satisfactory testimonials as the case may be, they will be allowed to again present themselves for examination for a certificate of the same grade without paying any further fee.

Fees to be paid by applicants for examination.

29. The fee for examination must be paid to the Port Officer. In any case in which a candidate offers money to any other officer, and in any place but in the Port Office, the candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected and not allowed to be again examined for twelve months.

30. If a candidate fails in his examination, *no part of the fee will be returned to him.*

31. If the candidate satisfy the examiners as to his knowledge of the prescribed subjects, and generally as to his competency to command an inland river steamer, they shall certify the same to the Government, which will then grant a certificate to the candidate.

Form Exn. 16. Completion of examination.

32. The fees are as follows:—

	Rs.
First Class Master	16
Second Class Master	6
Renewal of a certificate	5

General.

33. Certificates of competency of first and second class masters shall be made and issued in the forms hereunto annexed.

34. Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate, and the other shall be kept and recorded by the Port Officer of Calcutta.

APPENDIX A.

INSTRUCTIONS TO EXAMINERS.

Examination in Colours.

Herewith are—

(*a*.) A lanthorn having in it a lamp in which kerosine is to be burnt.
(*b*.) A side having ground glass in it.

(*c.*) Nine slides, each having a coloured glass in it. The colours are as follows:—

1. Red (Standard).
2. Pink or salmon.
3. Green (Standard or No. 1).
4. Green (Bottle or No. 2).
5. Green* (Pale or No. 3).
6. Yellow.
7. Neutral.*
8. Blue (Standard).
9. Blue* (Pale).

(*d.*) Cards, five of each as follow:—

1. White.
2. Black.
3. Red.
4. Pink.*
5. Green
6. Drab.*
7. Blue.
8. Yellow.

Examination by Daylight. (Cards.)

In conducting the examination by daylight the examiner should do it in three ways:—

1. The cards should be mixed up. The examiner should then hold up each card separately and ask the candidate to name the colour, and if the candidate does so without hesitation he is to be regarded as having passed the daylight test.
2. If the candidate hesitates in any of his answers so as to raise a doubt in the mind of the examiner as to his ability to readily distinguish colours, the examiner should put all the cards on the table and require the candidate to select all cards of a colour or colours named by the examiner.
3. Having done that they should all be mixed up again and the candidate should be required to sort the cards into eight heaps, putting all of one colour into each heap.
4. The result of the examination should be noted and recorded in each case.

The room should be dark.

The lamp lighted and placed in the lanthorn.

The applicant should be seated or should stand so as to be opposite to the opening of the lanthorn; and, at least, 15 feet from the front of the lanthorn.

He should first of all see the light in the lanthorn without the interposition of any glass and be asked if it appears to him to have any colour, and if so what colour?

The slide with the ground glass should then be put into the opening at the front of the lanthorn which is nearest to the light, and the applicant asked the same question.

The slide with the ground glass is to be left in, and the slides with the coloured glasses placed one by one and separately in front of it, and the candidate asked in each case to name the colour or tint

The result of the examination should of course be noted and recorded in each case.

General

The cards and glasses against which a star* is placed in the list are what may be called confusion tints. The candidate is not to be regarded as having "failed" if he miscalls these tints, provided that he names all the others correctly. But if having named all the others correctly he miscalls these so far as to name the drab card No. 6 as red, pink, salmon, &c.; or to name card No. 7 as red, green, or yellow; or glass No. 2 as green, blue, or yellow; or glass No. 5 as red, pink, salmon, &c.; or glass No. 7 as bright red or bright green; or the plain ground glass any colour, the case should be reported for record. In short, if the candidate's perception or impression of these tints does not agree with the perception of the examiner, the case should be reported on the Form Exn 17B

The only reasons for which a candidate is to be reported as having failed are inability to distinguish red from green, or either from black by daylight; and red from green, or either from the ground glass, by artificial light.

If a candidate fails in the colour test when the ground glass is in the lanthorn (as it is always to be when the coloured glasses are shown) the may also be tried over again with the coloured glasses without the intervention of the ground glass, and the result noted and recorded.

Government of Bengal.

By the Honourable the Lieutenant-Governor of Bengal.

Certificate of Competency

AS

FIRST CLASS MASTER OF AN INLAND STEAM-VESSEL UNDER ACT VI OF 1884.

To

Mr. _____

Whereas *it has been reported to the Lieutenant-Governor that you have been found, after examination, duly qualified to fulfil the duties of First-class Master of an Inland Steam-Vessel under Act VI of* 1884, *I do hereby grant you this CERTIFICATE OF COMPETENCY as such First-class Master.*

By order of the Government of Bengal,

Given *under my* Hand and Seal,

Under-Secy. to the Govt. of Bengal.

REGULATIONS

RELATING TO THE

EXAMINATION OF ENGINEERS AND ENGINE-DRIVERS OF INLAND STEAM-VESSELS.

Preliminary.

UNDER the provisions of the Inland Steam-Vessels Act, an inland steam-vessel having engines of eighty nominal horse-power or upwards cannot proceed on any voyage unless her engineer possesses an engineer's certificate granted under the Act or the Indian Steam Ships Act, 1884, or the Merchant Shipping Acts, 1854 to 1883, or to which the provisions of any such Act have been made applicable under the Merchant Shipping (Colonial) Act, 1869; and no such ship having engines of under eighty nominal horse-power can proceed on any voyage unless she has as her engineer a person possessing an engine-driver's certificate granted under the Act or the Indian Steam-Ships Act, 1884, or a certificate of the higher grade of the nature referred to above: Provided that a steam-vessel having engines of under eighty nominal horse-power shall be deemed to have complied with the law if she has as her master and engineer a person possessing both a second class master's certificate and an engine-driver's certificate granted under the Act.

Any person who has been engaged to serve as Engineer or engine-driver of an inland steam-vessel proceeds on any voyage in that steam-vessel as engineer or engine-driver, as the case may be, without being at the time entitled to, and possessed of, the certificate required under the Act, and any person who employs any person as engineer or engine-driver without ascertaining that he is at the time entitled to, and possessed of, the certificate required under the Act, is liable to be punished with fine which may extend to *five hundred rupees*.

No. 28 Marine, dated Calcutta, the 31st of January 1890.

NOTIFICATION—By the Govt. of Bengal, P. W. Dept.

UNDER the powers conferred upon him by section 29 of the Inland Steam-Vessels Act, 1884, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the granting of certificates of competency to engineers and engine-drivers of inland steam-vessels

Certificates of competency granted to persons who pass requisite examinations.

1. Certificates of competency will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose examiners have been appointed and arrangements have been made for holding the examinations periodically at the port of Calcutta.

Examinations continued till all the candidates are examined.

2. The examinations will commence early in the forenoon and will be continued from day to day until all the candidates whose names appear upon the Port Officer's list on the day of examination are examined.

Application how to be made.

3. Candidates for examination must make their application upon Form Exn. 3, which must be filled up at the Port Office. The Exn. 3 properly filled in, together with the candidate's testimonials, must be lodged with the Port Officer not later than the day before the day of examination.

Testimonials required.

4. Testimonials of character, and of sobriety, experience, ability, and good conduct for at least the 12 months immediately preceding the date of application to be examined, will be required of all applicants, and without producing them no person will be examined. If the service has been on shore, the testimonial must be signed by an employer; if at sea, by either the master, managing owner, chief or superintending engineer.

5. As such testimonials and discharges may have to be verified before the candidates can be examined, it is

desirable that they should be handed in, together with the Form Exn. 3, as early as possible.

Testimonials of Foreigners

6. The testimonials of servitude of Foreigners and of British Seamen serving in foreign vessels which cannot be verified by the Port Officer must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country; or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Government.

Certificate as to age.

7. Should any doubt exist as to the age of a candidate, he will be required to produce a certificate of birth or baptism.

Foreigners to know English.

8. Foreigners must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel.

Verification of services, &c., by Articles.

9. Services which cannot be verified by proper entries in the articles of the ships in which the candidates have served cannot be counted.

Qualifications for Certificates of Competency as Engineers.

Qualification of candidate for Inland Engineer's Certificate.

10. A candidate must be not less than twenty-two years of age:—

(*a*) He must have served an apprenticeship to an engineer, of three years in England or five years in India, and must prove that during the period of his apprenticeship he has been employed on the making and repairing of engines. Or, if he has not served an apprenticeship, he must prove that for not less than three years in England or five years in India he has been employed as a journeyman or master-hand in some factory or workshop on the making or repairing of engines. In either case he must also have served two years thereafter in the engine room of a steamer of over 80 horse power, or as a certificated engine-driver in a steamer of less than 80 horse power.

Or failing the above service he must have served as a certificated engine-driver in charge of a steamer for not less than four years.

(*b*) He must be able to give a description of boilers, and the methods of staying them, together with the use and management of the different valves, cocks, pipes, and connections.

(*c*) He must understand how to correct defects from accident, decay, or other causes and the means of repairing such defects.

(*d*) He must understand the use of the barometer, thermometer, and salinometer, and the principles on which they are constructed.

(*e*) He must state the causes, effects, and usual remedies for incrustation and corrosion.

(*f*) He must be able to state how a temporary or permanent repair could be effected in case of derangement of a part of the machinery, or total breakdown.

(*g*) He must write a legible hand, and understand the first five rules of arithmetic, and decimals, and their application to questions about consumption of stores, and full capacities of tanks and bunkers, the duty of pumps, and the direct strains in engines and boilers.

(*h*) He must be able to pass a creditable examination as to the various constructions of paddle and screw engines in general use; as to the details of the different working parts, external and internal, and the use of each part.

Qualifications for Certificates of Competency as Engine-drivers.

11. Candidates for examination must make their application upon the appropriate Form (Exn. 3*b*), which must be filled up at the Port Office.

12. A candidate for a certificate of competency as engine-driver must have attained the age of twenty-two years.

He must have served an apprenticeship of at least four years if in India or three years in the United Kingdom, and have served as assistant engineer for one year on a steamer of not less than 80 horse power.

Or he must have been three years principal serang or tindal in the engine-room of a steamer, or have been for three years in charge of the engine of a factory or mill under a European manager or engineer, as well as one year principal serang or tindal or assistant engineer in the engine-room of a steamer under a certificated engineer.

13. He must have the testimonial shown in Appendix B filled up by the engineer with whom he has last served, or his other testimonials must contain all the particulars therein required.

14. He must pass a *viva voce* examination before the Board of Examiners as to the working of an engine and the use of its different parts.

15. He must be able, if required, to show his practical qualifications by one week's trial in a steamer after fulfilling the other tests to which he will be subjected.

General Rules as to Examinations.

Candidates not to take books, &c., into examination room.

16. All books necessary for the use of candidates under examination will be provided by the Government, and applicants will not be permitted to take into the examination room any book, paper, document, or memoranda of any description whatever; and, subject to the provisions referred to hereafter, they will also not be allowed to work out their problems on a slate or on waste paper

17. Candidates will be allowed in the time allotted to cancel any part of their work, and when required additional papers will be supplied by the Examiners. These additional sheets must be attached to, and form part of, the examination papers.

Punishment for breaking rules.

18. In the event of any candidate being discovered copying from another, or affording any assistance or giving any information to another, or communicating in any way with another during the time of examination, he will be regarded as having failed in his examination, and will be turned back for three months, in the same manner as if he had failed in the practical part of the examination; and no part of the fees he may have paid for examination will be returned to him.

Leaving examination room.

19. If a candidate leaves the room before answering any question which has been given to him, he cannot afterwards be permitted to answer it, but the examiners may substitute other data or another question.

Questions from Form Exn. 15*a*.

20. All applicants presenting themselves for examination for certificates of competency as engineers will be required to give written answers to eight out of a list of ten questions selected from Form Exn. 15*a*,* "Elementary Questions for the first examinations of Engineers for certificates of competency." These questions are intended to furnish a record to some extent of the candidate's knowledge at the time of his examination, and also to induce the candidates to pay more attention to their handwriting and spelling.

21. The Form Exn. 15*b*., on which these answers will be written, contains also some questions as to the experience of the applicant, to be answered by him in writing.

22. Examiners may add to their *viva voce* questions on the practical management of steam engines and boilers any of those contained in Exn. 15*a*.

---

* *See* Appendix A.

23. If at the expiration of the time allowed the candidate has worked out correctly the whole of the questions set to him, and given satisfactory answers in the *viva voce* examination, he will be declared to have passed.

24. If at the expiration of the time allowed he has not worked out the whole of the questions set to him, but if the result of the *viva voce* examination taken in connection with the answers to such of the questions as he has worked out is sufficient to satisfy the Examiner that the applicant is competent to take charge of engines, he will be declared to have passed.

25. In other cases he will be declared to have failed.

(Exn 15) 26. A report of the examination, and the examination papers, will be forwarded to the Government on the Form (Exn. 15).

Notification of having passed will be given to successful candidates (Exn 16) 27. If the candidate passes, he will receive the Form Exn. 16, upon which the Government will issue the certificate to the candidate, whose testimonials, &c, will be returned at the same time. It is therefore important that the port of destination of the certificate should be the same on both the Form Exn. 16 and the Form Exn. 2. If circumstances should make any alteration necessary, the examiners should see that it is made in both forms, otherwise delay in the issue of the certificate may be caused.

Fees.

Fees to be paid by applicants for examination. 28. Candidates for examination, in making their application on Form Exn. 3 or Exn. 3*b*, will be required to pay the examination fees before any step is taken, whether by inquiring into their services or testing their qualifications, &c. No part of the fee will under any circumstances be returned to them, but should it be found that their service is not sufficient to entitle them to be examined, or that their testimonials are unsatisfactory, they will be allowed to present themselves for examination without paying any further fee, when they have fulfilled the requisite service, or are able to produce satisfactory testimonials, as the case may be.

29. The fee for examination must be paid to the Port Officer. In any case in which a candidate offers money to any other officer, and in any place but in the Port Office, the candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be examined for twelve months.

30. If a candidate fails in his examinations, *no part of the fee he has paid will be returned to him.*

31. The fees are as follow :—

	Rs.
Engineers	12
Engine drivers	10
Renewal of a certificate	5

Failure.

32. If the applicant fails in the *viva voce* or practical part of the examination, he may not present himself for re-examination until he can produce proofs of THREE MONTHS' further service afloat. If he fails in arithmetic or drawing only, he may come up again at any time. Engine-drivers may be examined *de novo* after six months, if the past examination showed that they might reasonably be expected to qualify.

General.

33. Certificates of competency of engineers and engine-driver shall be made out and issued in the forms hereunto annexed.

34. Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate, and the other shall be kept and recorded by the Port Officer of Calcutta.

APPENDIX A.

Form Exn. 15a.

ELEMENTARY QUESTIONS FOR THE FIRST EXAMINATIONS OF ENGINEERS FOR CERTIFICATES OF COMPETENCY.

To Engineer Examiners.

Examiners will require all candidates to fill up a form, Exn. 15*b*., of which a copy is enclosed, and they will forward the same to the Government along with the report of the examination.

The arithmetical questions for Engineers and the *vivâ voce* examinations for all candidates will be continued as heretofore, and failure in the elementary questions will be treated as failure in arithmetic.

The numbers of the questions for each examination will be selected by the examiners, and they are not to be communicated to the candidate until his examination commences.

Exn. 15b.

Port	Class for which examined
Date	Candidate's name

A. Where and how long did you serve in works at the making or at the repairing of Engines, and in what capacities?

B. How long have you served as fireman or trimmer?

C. How long have you served in the Engine-room at sea, and in what capacities?

D. With what descriptions of Engines have you served at sea—Paddle or Screw or both, Jet Condensing, Surface Condensing, or Non-condensing Engines, Compounds, Trunks, Inverted Cylinders, or Horizontal Engines? What size were the Engines?

E. With what descriptions of Boilers have you served at sea—Rectangular or Cylindrical, Wet-bottomed or Dry-bottomed, Multitubular, Sectional or Flue Boilers?

F. What Engine defects have come under your notice at sea, what caused these defects, and how were they remedied? Give the names of the Steamers for verification.

G. What Boiler defects have come under your notice at sea, what caused these defects, and how were they remedied? Give the names of the Steamers for verification.

For the questions to be answered on the following pages, *See* the book of Elementary Questions. The questions need not be written: only the answers to them.

ELEMENTARY QUESTIONS.

1.

What parts of an engine are generally made of wrought-iron?

2.

What parts of an engine are generally made of cast-iron?

3.

For what parts of an engine is steel sometimes used?

4.

What parts of an engine are generally made of brass or gun-metal?

5.

Where is "white metal" sometimes used? On account of what property possessed by it is it adopted? What objection is there to its more general use?

6.

For what parts is Muntz metal sometimes used? Is it malleable? For what properties is it valued?

7.

What difference is there in the composition of cast-iron, of wrought-iron, and of steel?

8.

How can cast-iron, wrought-iron, and steel be distinguished from each other?

9.

What are the different properties of cast-iron, of wrought-iron, and of steel.

10.

What is meant by the terms "breaking stress," "proof stress," "safe-working stress"?

11.

What is the cohesive strength or breaking stress of good ordinary wrought-iron?

12.

Tempering steel: how is it done, and in what order do the colours come?

13.

What is case-hardening?

14.

Which of the common metals or alloys can be forged, and which of them are brittle or "short"?

15.

What is meant by "welding"? Which of the common metals can be welded?

16.

The expansion of metals by heat: give examples of this in the engine and in the boiler.

17.

In the construction of cylindrical marine boilers, for what parts have the plates to be worked hot? When the material is steel, what precautionary treatment of these plates is afterwards necessary?

18.

What is double riveting? In what parts of cylindrical marine boilers is double riveting employed? In which of the shell seams is it most necessary?

19.

What is "caulking," and how are seams prepared for caulking?

20.

Describe the different ways of fastening the ends of the main stays of a boiler. What are the merits of, or objections to, the different plans ?

21.

What strain per square inch is allowed on boiler stays ?

22.

Describe a riveted stay, and state where such stays are commonly used.

23.

Where are thin plates to be looked for in a boiler as it wears, and how is the thinness to be detected ?

24.

How are boiler tubes fixed ? What are "stay tubes," and how are they secured ?

25.

Where is it generally that boiler tubes leak ? How is this defect repaired ? What are the causes of this leaking ?

26.

What are the causes of cracked tube plates ? Where are the cracks situated ? How are they repaired ?

27.

What is the difference between a "dry uptake" and a "wet uptake" ? Which requires most repair ? Why ? Where have you seen a wet uptake ?

28.

What is a superheater ? What is its construction ? What valves are on it ? There is sometimes a gauge glass on it ; what is that for ?

29.

What parts of a marine tubular boiler are first injured by shortness of water ?

30.

Where are angle irons sometimes used in the construction of a boiler, and where are flanged plates used ?

31.

Priming : to what causes is it attributed ? What means are applied to prevent it ? What evils may be produced by it ?

32.

Funnel draught : what makes it ? What checks it ?

33.

Flame is sometimes seen at the top of the funnel : what causes this appearance ? Is it beneficial or is it detrimental ? Why so ?

34.

A blast pipe : what is its construction ? Where is it placed ? For what is it used ?

35.

How many bottom blow-off cocks are generally fitted to each boiler, and why are they so fitted ?

36.

Blow-off cocks are sometimes fitted with a spanner guard : for what purpose is this ? Describe how the guard is formed ?

37.

Test cocks or water-gauge cocks : where are they placed ? At what heights ? Must the cocks themselves be at those heights ? What provision is made for cleaning these cocks ? Should they ever become choked ? When there are no test cocks, how is the height of the water ascertained ?

38.

What is a dead-weight safety valve? Of what are the rubbing surfaces formed? How is a lock-up valve arranged to admit of lifting it or of turning it round, and to prevent adding to the weight?

39.

About what area of safety valve is now required by the Board of Trade? What area was formerly required, and on what ground has that been altered? What is the effect of suddenly opening a safety valve when steam is up? To about what extent do safety valves rise when blowing off without being eased by hand?

40.

Spring-loaded safety valves: what advantages have they that are not possessed by dead-weight valves? What are the disadvantages as compared with dead-weight valves?

41.

Of what pieces does a glass water gauge mounting consist? How does it act? Where is it placed? At what height? Is it liable to derangement? How is its working tested?

42.

Glass water gauges have sometimes pipe connections top and bottom: what is the object of this arrangement? Should there be cocks at the extremities of these pipes?

43.

Describe a Bourdon's steam gauge. Some gauges have an inverted syphon pipe below them: what is its use?

44.

Why is a small cock sometimes put on the pipe leading to a steam gauge? Where should it be placed, and what error might be made by omitting to use it?

45.

Do steam gauges indicate the total pressure of the steam, or only a portion of that pressure? What is the pressure measured from?

46.

What is meant by the salting of the boiler? How is this prevented? What is the density of ordinary sea water? How is the density ascertained? What is the difference between the formation of scale and the salting of the boiler? What is the maximum density at which boilers should be worked at sea?

47.

Scum cocks and pipes: how are they arranged? Where are they placed? At what height in the boiler? When are they used? When must they be shut? Neglect of these cocks lead to what dangers?

48.

Scale: of what does it consist? Where is it most objectionable? How is it removed? How is its formation prevented? What evil effects are produced by it?

49.

What is a salinometer? Of what does it consist? How does it act? How is it graduated? Can it be used at any temperature indiscriminately?

50.

What harm may be done through the check valve of one of a set of boilers being defective while under way? How would you work to avoid this harm?

51.

How is the leak from a split tube stopped in a boiler at sea? Describe the operation.

52.

What is the use of dampers? Where are they fitted? When should they be used?

53.

When there are no dampers fitted, what is used instead? What evil to the boiler is sometimes attributed to this? When the heating surfaces are clean does this occur?

54.

Describe the piston of a steam cylinder, with its different rings and their uses. There are generally round pieces let in flush on one side of a piston: what are they? How are these pieces fixed?

55.

Cylinder drain cocks: what is their use? There is sometimes a valve upon each cock: what purpose does it serve?

56.

Cylinder escape valves: of what do they consist? How protected? How regulated? When are they most needed? To what danger do they expose the Engineer? What precaution is sometimes used to obviate this danger?

57.

What is a compound engine? What different kinds are there for screw steamers, in respect to the number and arrangement of their cranks and cylinders? What is a triple expansion engine?

58.

What is link motion? What are some of its advantages? In modern engines for the screw propeller when there is no link motion, what takes its place?

59.

What is a separate expansion valve? Why is it not fitted to all engines? What effect has an expansion valve upon the starting and upon the reversing of the engine?

60.

What arrangement is applied to reduce the friction of a slide valve? To what is the friction due?

61.

Describe a loose eccentric; how does it act? In what engines is the loose eccentric still employed?

62.

What is the travel of the eccentric rod? How is it measured on the eccentric? What is the travel of the slide valve when the link motion is in mid gear and the engine still moving?

63.

What are "double beat valves"? Why are they not generally used for safety valves? Are they ever used instead of the slide valve? What objections are there to their use?

64.

What is a circulating pump? Is it always worked by the main engine? Give an example from your last steamer of the three water temperatures generally noted by careful engineers.

65.

An air valve is sometimes fitted to a circulating reciprocating pump: what purpose does it serve?

66.

What is the difference between a bucket air-pump, a piston air-pump, and a plunger air-pump?

67.

Whether are double-acting air-pumps made with plungers, with pistons, or with buckets?

68.

What is an air-pump trunk? When is it necessary? How is it attached to the bucket?

69.

What class of air-pump requires both foot and delivery valves, and in what other class can either of these valves be in some cases dispensed with?

70.

When under way, when the air-pump bucket is at the top of its stroke, at what height is the water in the condenser?

71.

With a surface condenser and a single acting air-pump, what is the effect of a leaky foot valve, and what is the effect of a leaky bucket when there is also a foot valve?

72.

Air-pump pet cock or valve: where is it placed? How does it act? What is its object? Does it in every case reduce the effective capacity of the pump? Is it equally applicable to double acting pumps?

73.

At what temperature is the hot well worked? What is the effect of higher temperatures? What is the effect of lower temperatures? What limits the lowness of temperature? Has a very low temperature any disadvantages?

74.

Bilge injection with common condensers: what are the fittings required? When is it used? What precautions are necessary in using it?

75.

When surface condensers are used, what takes the place of the bilge injection? To what is the connection made? How is its valve formed? Why is this necessary?

76.

What are the practical guides to the proper amount of opening of the inlet valve for the circulating pump?

77.

Feed-pump pet cock or valve: where is it placed? What is its use? How does it act? Is it always a necessary fitting?

78.

What are some of the ways of fastening the ends of surface-condenser tubes? About what size and about what thickness are condenser tubes? What parts of a surface condenser are made of brass?

79.

What is a blow-through valve or cock? To what is it attached? There is sometimes a valve that when opened admits steam from the slide valve casing to the exhaust port: what is its use? To which cylinder is it fitted?

80.

What is a snifting valve? What is its use? Where is it placed? Can it be placed too high? Can it be placed too low? At what height should it be placed? Was there one in your last steamer; if so, where was it? Why are snifting valves generally omitted now?

81.

What connections are generally fitted to the donkey-pump, and to what services can it be applied?

82.

When the engines are stopped with steam up, what are to be shut and what are to be opened?

83.

How is an engine heated up before starting? What precautionary examinations are made before starting?

84.

What is an interceptor or catch-water? Where is it fixed; what is its construction; how does it act; and what attention does it require?

85.

Describe an air-pump bucket, with its valve or valves and its packing. Of what are the valves generally made?

86.

Of what materials are air-pump rods made? Why so?

87.

What is the racing of the engine? When does it occur? What danger attaches to it? What is done to prevent it?

88.

What are marine governors? What is their general construction? How do they act?

89.

What is meant by the "pitch" of a screw propeller? How is it measured?

90.

Explain the difference between a "right hand" and a "left hand" propeller, and state how each of them revolves.

91.

What is the slip of a screw propeller? How is its amount expressed in figures?

92.

Which of the valves about engines and boilers have to be worked by hand, which of them work self-actingly, and which are worked by the motion of the engine?

93.

Why is soda sometimes put into a boiler, and how is it put in which under way? What is the kind of soda used?

94.

Tallow cups for cylinders were sometimes made with two small cocks, or with only one small cock, or with one large hollow plug cock, or with one small cock and a valve; which of these is suitable for a high-pressure cylinder, and which for the cylinder of a condensing engine? Describe how the cup with only one small cock is used. What is now generally used instead of these? How has this change come about?

95.

Does a cylinder escape valve, self-acting, allow all the water to escape; if not, how much is left in the cylinder?

96.

What is a "Steam Lubricator" (sometimes called an Impermeator)? Explain its action; to what part of the engine is it connected; whether will throwing cold water over it make it work faster or slower? Describe the one used in your last steamer?

97.

A common paddle wheel: of what is the centre made? Of what are the arms formed? What is the form of the bolts which attach the floats to the arms? How are the arms attached to the centres?

98.

Why have some paddle wheels one or more cast-iron floats in each wheel? With what engines are these most required? At what part of the circumference are they placed?

99.

Why are paddle wheel floats sometimes made of different breadths in the same wheel? With what description of engine is this most needed? Where are the broad floats placed, and where are the narrow floats placed in the circumference of the wheel?

100.

What difference is there between a radial paddle wheel and one with feathering floats? What is the object of feathering floats? Are all the eccentric rods attached in the same way, and are they all of the same form?

101.

Whereabout is the centre of the eccentric of a paddle wheel with feathering floats placed? In that case are the feathering levers on the striking face or on the back of the float? When the paddle shaft has an outer bearing, how is the eccentric made?

102.

Of what materials are the working surfaces of a paddle wheel with feathering floats? Are they all lubricated? With what?

103.

What is a "Disconnecting Paddle Engine"? At what place is the disconnecting effected? How is it accomplished? In which of the cranks of a disconnecting engine are the crank pins fixed?

104.

Whether is link motion valve gear or the loose eccentric generally used for disconnecting paddle engines? For what steamers are disconnecting paddle engines frequently employed?

105.

What are expansion joints? Where are they necessary? What attention do they require? Of what should the working surfaces be made?

106.

What omission in the construction of expansion joints may lead to a serious accident when steam is first applied? How is this prevented in the construction of a steam trunion pipe for an oscillating engine?

107.

Describe an oil cup with a syphon worsted. How is the worsted arranged? How is it cleaned? How far down the tube does it extend?

108.

Describe a thrust bearing; which of the surfaces wears? Why are there sometimes a number of oil tubes for one thrust bearing?

109.

What parts of a screw shaft are generally covered with brass? Why is this necessary? About what thickness is the brass?

110.

What is the stern tube or screw shaft pipe? Why is a pipe of such a length required? Of what is it made? How is it fixed at each end?

111.

What is a lignum vitæ bearing? How is the wood fitted? Where is such a bearing generally used?

112.

How is a screw propeller fixed on the shaft? What means are used to prevent its getting loose at sea?

113.

Where are sluice valves placed? What large sluice valve is there in almost all screw steamers? From what position should this valve be worked? Why so? What attention should it receive?

114.

With a condensing engine; what valves or cocks are on the skin of the ship in the engine-room and in the stokehole?

115.

What are the necessary fittings of a marine boiler?

116.

With a surface condensing engine what cocks or valves are open some time before the engine is started so as to be ready for starting whenever the order is given?

117.

What is a steam jacket? What cocks are on it? In what engines are jackets most generally used? Do they require to be felted?

118.

What parts of an engine or its fittings should be felted or otherwise protected from radiation?

119.

What are the small cylinders sometimes fitted on the slide valve casing cover of vertical engines? Explain their action. To what are they connected by a pipe? Why so?

120.

Name the principal pipes in connection with the engines and boilers of a steamer, and state to what the ends of these pipes are connected.

121,

Through what cocks or valves, pipes and chambers does the water pass on its way from the sea inlet rose plate to the water space of the boiler, with a jet condenser?

122.

Through what cocks or valves, pipes and chambers does the circulating water of a surface condenser pass?

123.

Through what cocks or valves, pipes and chambers does the steam pass from the boiler until it is in the form of water in the hot well?

124.

Name the pieces of the engine through which the pressure of the steam is transmitted from the piston to the screw propeller. Name them in the order in which they act.

125.

What is an air vessel? How does it act? At what parts of an engine or of its fittings are air vessels generally applied?

126.

What is the construction of a mud box? Where should mud boxes be placed? Why are they necessary? How should the space be divided by the rose plate, and why?

127.

What is a trunk engine? When used in a horizontal engine for a right-hand screw propeller at which side of the vessel should the cylinders be placed? Why so?

128.

What is an oscillating engine? For what steamers are oscillating engines generally adopted? Why? How is the steam conveyed to and from the slide valve casing?

129.

Of what parts does the valve motion gear of an oscillating engine consist?

130.

For what have geared engines sometimes been used? Of what were the cogs of the large wheel made?

131.

At what part of a screw steamer is the pressure that propels it applied to the hull?

132.

At what part of a paddle steamer is the pressure that propels it applied to the hull?

133.

About how much fuel per indicated horse power per hour is required by modern steam engines, common, compound and triple expansion?

134.

What is the explanation of the economy of the surface condenser?

135.

What is the construction of a surface condenser? Of what are its tubes made? How are they fixed? How are they kept tight? What is done with a split tube?

136.

Where do surface condensers foul? How are they cleaned?

137.

What non-conducting substances are employed to prevent radiation, and how are they applied?

138.

In the construction of smoke-box doors and of dry uptakes, what provision is made to lessen the amount of radiation?

139.

How can the formation of black smoke be prevented? Describe smoke preventing apparatus.

140.

What is meant by "circulation" in a boiler, and what are the results of defective circulation?

141.

What means are sometimes adopted to improve the circulation in a boiler?

142.

By what arrangement is the circulation promoted in a "hay-stack" boiler?

143.

Describe a ship's side air-pump discharge valve, in what respects does it sometimes differ from a common stop valve, and what attention does it require?

144.

What is the construction of a feed escape valve, to what is its discharge connected, and how is its loading regulated?

145.

When there is no feed escape valve, what is the arrangement of the feed valves or cocks?

146.

What is the measure of a horse-power? How is indicated horse power ascertained?

147.

Has "nominal horse power" a fixed meaning? What is the use of this expression? What is generally taken as the measure of one horse power nominal?

148.

What is "back pressure" in a cylinder? About how much is it in each of the cylinders in your last steamer? Is excessive cushioning ever a trouble under certain conditions in modern engines? Say when and why and in which cylinder this occurs.

149.

What is meant by "speed of piston"? About how much is the speed of piston in modern marine engines?

150.

What is "atmospheric pressure"? What is its average amount? What instrument tells this amount?

151.

What is "gross pressure" or "absolute pressure"? What pressure is it that is shown by the steam gauge?

152.

What is meant by "cutting off" steam? How is it done? What part of the valve regulates the cut off?

153.

What is a piston slide valve? Describe its construction. Why are such frequently employed in place of the common slide valve? What is a great drawback to the use of these valves?

154.

What fixes the time of closing the exhaust? After the exhaust is closed and before the port opens for steam, what becomes of the steam that is in the cylinder?

155.

What is the "lead" of the valve? What is its object? About what amount is it?

156.

What is the "cover" or "lap" of the valve? What is its object? About what proportion of the stroke of the valve is it made?

157.

What is the "exhaust cover" of a slide valve? What is its effect upon cushioning and upon exhaust?

158.

What is "minus cover" or "minus lap" on the exhaust? What is its effect upon the exhaust and upon cushioning?

159.

What is "cushioning" or "compression" in a steam cylinder? How is it affected by the amount of cover or of minus cover there may be upon the exhaust? How is it affected by the exhaust pressure?

160.

What is "mean effective pressure"? How is its amount ascertained?

161.

What is a dial vacuum gauge? What is its construction? For what is it used? About what amount should it show when the engine is working all right? What effect has the variations it indicates on the performance of the engine?

162.

Does the vacuum gauge enable you to tell what pressure there is in the condenser, or must you have recourse also to the barometer to arrive at that? How would you ascertain the actual amount of back pressure there is in the condenser?

163

What is a barometer? What is its construction? Is a barometer sometimes used instead of a vacuum gauge? In what respect does the weather barometer differ from the vacuum gauge barometer?

164.

The common vacuum gauge and the common steam gauge, in which of them are the graduations marked from atmospheric pressure? Does either of them tell what is the true actual pressure in the boiler or in the condenser?

165.

Do steam and vacuum gauges vary with the variations of the weather barometer? When the weather barometer varies from 29 to 31, how much will the vacuum gauge vary, and how will that affect the working of the engine? Why so?

166.

Vacuum is generally stated as so many inches. What is meant by, say, 20 inches vacuum? What does that tell us about the absolute pressure of the vapour then in the condenser?

167.

From what depth will a pump draw water? Is there any limit? Why?

168.

What is vacuum? Can vacuum move a piston? When the temperature of the water in the condenser is 212°, what is the greatest degree of vacuum there can then be in the condenser?

169.

What is a thermometer, its construction? What is the property of matter that is the principle of its construction? What temperatures are regularly noted by careful engineers?

170.

What is the temperature of (1) melting ice, (2) of boiling water, (3) of steam about 60 lbs. pressure by the steam gauge, (4) of steam about 100 lbs, and (5) of strain about 150 lbs, also (6) of smoke in the funnel, and (7) of water in the hot well?

171.

What is meant by the "conduction" of heat? Give examples of it in the boiler and in the engine.

172.

What is meant by the "convection" of heat? Give examples of it in the boiler and in the engine.

173.

What is meant by "radiation" of heat? Give examples of it in the boiler and in the engine.

174.

Which is convection, which is radiation, and which is conduction in the following cases: (1) Heat from the glowing fuel to the furnace crown. (2) Heat passing from one side of the furnace crown plate to the other. (3) Heat passing from the steam pipes in the engine-room. (4) The heat of evaporation?

175.

What are the effective heating surfaces of a marine boiler? What is an objection to vertical heating surfaces?

176.

What parts of a marine engine are exposed to danger when the temperature is below freezing point?

177.

What precautions are necessary in cold climates when the temperature is below freezing point?

178.

State as many ways as you can by which a boiler might not get its full feed; that is, a boiler, or one of a set of boilers, get short of water, although the feed valve is open its proper amount; to what causes might this be due?

179.

Of what are furnace bars generally made? About what thickness are they at top? About what space is between them? Whether are the bars put further apart for Newcastle coal or for Welsh coal?

180.

Which burns faster, Newcastle coal or Welsh coal? Which is the flaming coal? Which makes most smoke?

181.

About how many tons of steam coal will be burnt per day in our furnaces, each 3′ 0″ wide, and of about the usual length? On what grounds do you say so?

182.

About how many tons of steam coal will be burnt per day with good compound engines to drive an ordinary steamer of 40 ft. beam 10 knots an hour by steam alone? On what grounds do you say so? What percentage more coal would be required to propel the same steamer one knot faster?

183.

About how many tons of steam coal will be burnt per day with a good compound engine, surface condensers, the low pressure cylinder 70 inches diameter, doing average work? On what grounds do you say so?

184.

A pair of inverted cylinder direct acting engines, there is a liner half an inch thick between the ahead eccentric rod and the eccentric strap, in overhauling the engine this piece is lost and forgotten; what difference will its omission make in the working of the engine, on the admission, on the cut off, and on the exhaust of the steam? Which will take place earlier, and which later, distinguishing between the up stroke and the down stroke?

185.

A pair of inverted cylinder direct acting engines driving a right-hand screw; on which of the crosshead guide bars is the pressure greatest in the up stroke, and on which in the down stroke?

186.

A screw propeller is getting loose, it has a little play on the shaft, sideways on the key or feather; how will this show in the engine-room?

187.

How would you prove whether the centre line of the trunions of an oscillating cylinder be fair with the centre line of the main shaft?

188.

How can the fairness of a line of screw shafting be tested without lifting the shafts?

APPENDIX B.

TESTIMONIAL.

I hereby certify that has served with me in the engine-room of as principal serang or tindal for a period of , during which time he has discharged his duties to my entire satisfaction

I consider that he fully understands the working of an engine, and has sufficient tact, presence of mind, and energy to look after and manage the working of the engines of a river steamer having engines not exceeding 80 *nominal horse-power.*

Date (*Signed.*)

No. and description of Certificate.

ANY Engineer giving a testimonial in this form should be very careful in doing so, as the document may materially influence the applican 's elligibility as a candidate.

Government of Bengal.

By the Honourable the Lieutenant-Governor of Bengal.

Certificate of Competency

AS

ENGINEER OF AN INLAND STEAM-VESSEL UNDER ACT VI OF 1884.

To_____

Whereas *it has been reported to the Lieutenant-Governor of Bengal that you have been found duly qualified to fulfil the duties of Engineer of an Inland Steam-Vessel, I do hereby, in pursuance of Act VI of* 1884, *grant you this CERTIFICATE OF COMPETENCY.*

Given *under my* Hand and Seal,

By order of the Government of Bengal,*

This_____ 18____

Under-Secy. to the Govt. of Bengal.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 1st February, 1890.

Present:

The HON'BLE SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding.*

The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General.*

The HON'BLE F. B. PEACOCK.

The HON'BLE P. NOLAN.

The HON'BLE T. T. ALLEN.

The HON'BLE SIR HENRY HARRISON, KT.

The HON'BLE SIR ALFRED CROFT, K.C.I.E.

The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.

The HON'BLE C. H. MOORE.

The HON'BLE H. PRATT.

The HON'BLE SHAHZADA MAHOMMED FURROKH SHAH.

The HON'BLE DR. RASH BEHARY GHOSE.

The HON'BLE RAJA RAMESHWAR SING BAHADUR.

BENGAL VACCINATION BILL

THE Hon'ble SIR HENRY HARRISON moved that the Report of the Select Committee on the Bill to amend the Bengal Vaccination Act, 1880, and Act II, 1887, be taken into consideration in order to the settlement of the clauses of the Bill.

The Motion was put and agreed to.

The Hon'ble SIR HENRY HARRISON also moved that the clauses of the Bill be considered for settlement in the form recommended by the Select Committee.

He said:—"I have explained the object of the Bill at a previous meeting, and it is therefore not necessary for me to say anything further on this occasion."

The Motion was put and agreed to.

The Hon'ble SIR HENRY HARRISON also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

CALCUTTA PORT BILL.

His Honour the PRESIDENT said:—"Before adjourning the Council, I think I owe a few words to it in explanation of the omission from the list of business of the Ports Bill which had been originally entered in the list of business for discussion to-day.

"You will recollect that a fortnight ago we adjourned without considering it, in order that the Chamber of Commerce might have an opportunity of submitting a memorial, which we understood was in the course of preparation for our consideration.

"On Wednesday last, my friend, the Hon'ble Mr Moore, told me he was afraid he would have to ask for another postponement in consequence of the absence of the Chamber's legal adviser. I asked him to see if the postponement could not be avoided, but I heard from him yesterday that he had been unable to get the memorial considered in time for us to take it up to-day, and he again asked for an adjournment. Upon that I took it on myself to exclude the motion from the list of business for to-day.

"Since then (yesterday) I received an application, which I think is in your hands, from the Secretary of the British Indian Association, which requests us that we will postpone for a fortnight the consideration of the Select Committee's report in view of the Committee laying before the Council some further representation regarding section 85.

"I may add that the Secretary says 'that the question of title in riverbanks having been treated by the Select Committee as one of general application, my Committee venture to hope that His Honour the Lieutenant-Governor will be pleased to recognize its importance by granting their prayer.'

"On this occasion I am very glad that we are able to meet their wishes without adding to the inconvenience of the Council, but I think I must protest against a body of the importance of the British Indian Association addressing us two days before the Bill is down for final consideration, asking us to postpone that consideration with reference to a point which has been discussed in all the newspapers since the issue of the report of the Select Committee which has been before them for five whole weeks, and regarding a section which has been the law of the land, with a slight alteration, for the last twenty years. I think it would be more respectful to the Council, and more conducive to public business, if they would take matters of that kind into their consideration a little earlier before the date of actual discussion in Council.

"On this occasion, as I said, I am very glad to be able to meet their wishes, but I do hope that, on Saturday fortnight, to which I propose to adjourn the Council, this Port Bill may be brought up for discussion and settlement."

The Council adjourned to Saturday, the 15th February, 1890.

CALCUTTA;
The 3rd February, 1890.

C. H. REILY,
Assistant Secretary to the Govt. of Bengal,
Legislative Department.

EXTENSION OF THE BENGAL TENANCY ACT TO ORISSA.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 24th January, 1890.

RESOLUTION.

READ—

A letter from the Commissioner of Orissa, No. 1850, dated 4th November, 1886, on the subject of the extension of the Bengal Tenancy Act to that Division.

A letter from the Board of Revenue, No. 975A, dated 17th December, 1889, with enclosures, regarding the arrangements to be made for the survey and settlement of Orissa.

THE Collector of Balasore recommended in 1885 that the Lieutenant-Governor should, in the exercise of the power vested in him by section 1, immediately extend the Bengal Tenancy Act of that year to Orissa. The proposal received no local support at the time, and was considered premature by this Government; but it has since been renewed in connexion with the survey and settlement of the Division which is now being taken in hand. The Director of the Department of Agriculture and Land Records has represented that the settlement laws now in force in Orissa, that is to say, Regulation VII of 1822 and Bengal Act VIII of 1879, read with Act X of 1859, do not supply an adequate machinery for adjusting rents, inasmuch as they do not require the ryots to question the Settlement Officer's proceedings till the record is completed, and that the procedure which they established has proved practically unworkable where it has been contested. He observes—

"In proceedings under Chapter X of the Tenancy Act, the case is otherwise. The Settlement Officer's decision has the force of a decree; it must be appealed against within 30 days of the date of the order, and the appeal lies to the superior court of a Special Judge. Settlement proceedings under Chapter X of the Tenancy Act have therefore a sanction and finality which do not attach to proceedings under Act VIII of 1879. Moreover, experience has shown that proceedings under Chapter X of the Tenancy Act, besides being final, can be worked harmoniously and satisfactorily. It appears to me, therefore, that Chapter X of the Tenancy Act should be extended to those portions of Orissa which are from time to time brought under survey.

"The extension of Chapter X to any particular area involves also the extension of the sections of the Act relating to the determination of the status of tenants and to the enhancement and reduction of rent, *i.e.* sections 19 to 38. As a record of rights will have to be made and fair rents settled under Chapter X, it is evident that the rules for determination of the status of tenants and determination of fair rents prescribed in the Act must also be followed."

There is also some reason to believe that if the most important portion of the Act is extended to Orissa, it will be convenient to introduce the law in its entirety. It is a question, however, whether the provisions as to preparing price-lists (section 39) and as to the payment of landlords' fees on transfers of tenures (sections 12 and 13) should not be excluded. The provisions as to judicial procedure and sales on decree (Chapters XIII and XIV) may, moreover, be found unsuitable to a province in which rent suits are still tried by Revenue officers.

2. The opinion of the Board and of the Revenue officers employed in Orissa is awaited on the subject; and, as the matter is of considerable public importance, the Lieutenant-Governor will be glad to receive any expression of opinion which may be offered by those interested. Such opinions should be transmitted to this Government before the 15th of April next.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* for the information of the public.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Govt of Bengal.

THE CANAL REVENUE REPORTS FOR 1888-89.

No. 198 *I.A.*

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

Irrigation.

Dated Calcutta, the 3rd February 1890.

RESOLUTION.

READ—

The Canal Revenue Reports for 1888-89, and Chief Engineer's Note on same.

The outlay, direct and indirect, on canals in Bengal, for which capital accounts are kept, amounted at the close of the year 1888-89 to Rs. 7,15,56,843. Of this sum Rs. 6,05,42,061 is the amount spent on Major Irrigation Works and charged to Loan Funds; while the expenditure on Minor Works was Rs. 1,10,14,782, of which Rs. 93,75,327 was provided from Provincial revenues, Rs. 8,66,000 was the grant contributed by the Imperial Government from Famine Relief and Insurance Funds in aid of the construction of the Orissa Coast Canal, and Rs. 7,73,455, representing expenditure on surveys and investigations for irrigation works which have not been carried out, was provided from Imperial revenues, but is not now chargeable with interest.

On Major Works the capital outlay during the year was Rs. 7,92,776, of which Rs. 6,38,718 represents the progress made with the revised project for the Orissa Canals, and Rs. 1,51,340, the expenditure on the Sone system; that on Minor Works was Rs. 1,49,475, of which Rs. 1,01,306 was spent on the Orissa Coast Canal, now nearly completed and open to traffic throughout its length, and Rs. 47,862 on the Circular and Eastern Canals.

2. The length of the canals in Bengal now in operation is altogether 864 miles, of which 621 miles are navigable. The area which, in their present state of completion, they are capable of irrigating is 1,422,319 acres, and the area actually irrigated in 1888-89 was 574,216 acres, the crops raised on which are valued at Rs. 1,81,10,045.

The traffic is represented by 195,140 boats which plied on the canals with passengers or cargo, and measured 3,747,300 tons. These figures do not include the traffic on the Nuddea rivers, which were brought under the management of the Public Works Department at the commencement of the year. On these rivers the boats which paid toll were 48,224 in number, and were measured at 839,502 tons.

3. Receipts and expenditure are shown in the following statement, where the results of three years can be compared:—

	1888-89.		1887-88.		1886-87.	
	Receipts.	Expenditure.	Receipts.	Expenditure.	Receipts.	Expenditure.
Major Irrigation Works.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals	2,43,294	4,05,019	2,22,679	5,02,450	1,79,519	5,20,543
Midnapore Canal	2,51,510	2,09,804	2,33,025	2,50,390	2,33,974	2,35,038
Hidgellee Tidal Canal	55,097	78,040	41,858	66,976	53,494	22,735
Sone Canals	8,31,278	7,94,432	5,88,618	7,52,348	9,02,692	5,97,821
Total ...	13,81,179	14,87,295	10,87,080	15,72,170	13,69,679	13,76,137
MINOR WORKS AND NAVIGATION.						
Irrigation and Navigation Works.						
Sarun Canals	20,814	36,332	20,665	29,397	12,427	28,659
Calcutta and Eastern Canals ...	5,75,125	2,93,801	5,79,934	2,24,656	4,83,654	1,92,264
Orissa Coast Canal	66,174	77,018	53,837	83,507	29,488	61,426
Total ...	6,62,113	4,07,151	6,54,436	3,37,560	5 25,569	2,82,349
GRAND TOTAL ...	20,43,292	18,94,446	17,41,516	19,09,730	18,95,248	16,58,486

The net deficit on Major Works is Rs. 1,06,116 contrasting with deficits in 1887-88 of Rs. 4,85,090 and in 1886-87 of Rs. 6,458, while Minor Works shew incomes in 1888-89 of Rs. 2,54,962, in 1887-88 of Rs. 3,16,876, and in 1886-67 of Rs. 2,43,220. All irrigation works taken together shew a net income in 1888-89 of Rs. 1,48,846; but as interest charges payable to the Imperial Government on the capital spent on Major Works amounted to Rs. 23,39,849, the actual deficit to be met from Provincial revenues was Rs. 21,91,003.

4. The better results of 1888-89 as compared with 1887-88 have been mainly due to increased receipts, but the statement shews that considerable reductions of expenditure were also effected. In Orissa one great outlet of expenditure, the reconstruction of the two weirs which were partially overthrown by the floods of 1886, a work which for two years has been a heavy charge on the revenues of the Orissa Canals, is now happily closed. On the other hand, the ordinary maintenance charges of these canals are found to be higher than usual, a point to which the attention of the Superintending Engineer has been drawn in the Chief Engineer's Note. It seems probable, however, that, so long as the reconstruction of the weirs was in progress, expenditure on ordinary repairs was restricted to the more imperative requirements of the works, and more therefore had to be spent in 1888-89 in carrying out repairs which could be and had been postponed for a while. The cost of establishment chargeable against Revenue, which in 1886-87 was Rs. 5,16,714 for the works given in the table above, rose in 1887-88 to Rs. 7,21,376, an increase due not to greater extravagance in the establishment employed, but to the introduction of a new and fairer method of distributing establishment charges between Irrigation and Roads and Buildings. For 1888-89 the corresponding figure is Rs. 7,01,050, and the saving would have been greater but for an increase of Rs. 27,996 in the cost of establishments employed under Civil officers for the collection of revenue on the Orissa, Midnapore and Sone Canals, an increase which was due chiefly to the greater amount of work involved in realising the heavier collections. On the whole, therefore, there has been a substantial saving in the charges incurred for establishment on the maintenance and management of the canals. The occurrence of this saving can be traced chiefly to the increased amount of work carried out by the Irrigation staff on Roads and Buildings, and the consequent transfer of a larger share of establishment charges from the Irrigation to the Roads and Buildings Branch. Similarly the larger Capital expenditure in 1888 89, on works not chargeable to Revenue, has tended to relieve the canal Revenue account of a portion of its establishment charges.

5. The revenue collected in the last three years on the works mentioned in the above statement is shown below:—

Head.	Revenue.		
	1888-89.	1887-88.	1886-87.
	Rs.	Rs.	Rs
Water-rates	10,22,352	7,69,362	10,43,342
Navigation	9,74.105	9,21,4[illegible]2	7,88,685
Miscellaneous	60,298	66,838	80,171
Total ...	20,56,755	17,57,682	19,12,198
Less refunds of revenue	13,463	16,166	16,950
Net total receipts ...	20,43,292	17,41,516	18,95,248

6. The recovery of the revenue derived from water-rates from the depression of 1887-88 was assisted by the character of the irrigation season of 1888-89, which was such as to lead to a full appreciation of the value of canal water. On the Sone Canals, where collections had been to some extent suspended in consequence of the agitation of the previous year, the receipts rose from Rs. 5,19,586 to Rs. 7,59,556, and it is clear that the efforts of the managing staff to restore public confidence in the canals have been attended with success. Irrigation in Orissa also has received a fresh impetus, and the collections of 1888-89 are higher than those of any year since 1882-83, while on the Midnapore Canal, where no great development of irrigation can be expected owing to the limited and fluctuating character of the source of supply, there is a slight improvement on the results of 1887-88.

7. The activity of irrigation in 1888-89 is evident from the figures in the following table, where actual areas irrigated during the last three years are shown :—

		1888-89.	1887-88.	1886-87.
		Acres.	Acres.	Acres.
Orissa	Kharif	156,319	108,867	75,115
	Rabi	2,779	502	2,440
	Perennial	194	137	154
	Total ...	159,292	109,506	77,709
Midnapore	Kharif, including boro rice crop	69,777	65,864	69,762
Sone	Kharif	69,628	57,595	30,082
	Rabi	69,817	27,501	16,662
	Perennial	4,600	6,265	11,626
	Hot-weather	11,762	13,855	15,278
	Five-year lease ...	200,102	210,164	194,556
	Total ...	355,909	315,380	268,204
	Total Major Works ...	584,978	490,750	415,675
Sarun	Kharif	3,897	1,699	566
	Rabi, including hot-weather...	3,316	2,519	1,580
	Total Minor Works ...	7,213	4,218	2,146
GRAND TOTAL, MAJOR AND MINOR WORKS ...		592,191	494,968	417,821

8. The "earnings" of the year's work, of which the above table shows the extent, are as follows :—

	Water rates earned. 1888-89.
	Rs.
Orissa Canals	2,42,808
Midnapore Canal	1,31,433
Sone Canals	8,05,790
Sarun Canals	21,850
Total ...	12,01,881

These sums represent the whole of the liabilities incurred by cultivators on crops raised by canal water during the year. In previous years the definition of the word "earnings" has been restricted to the assessments, which were not only fully completed, but also legally recoverable within the year. Exact returns of "earnings" (in the wider sense of the word now adopted) are not available for previous years ; but owing to the extended use of canal water already noticed, the earnings of 1888-89 considerably exceed those of 1887-88 and 1886-87. This is in favour of good collections in 1889-90.

9. The arrears of water-rates outstanding at the close of each of the last three years are shown in the following statement :—

NAME OF CANAL.	ARREARS.		
	1st April 1889.	1st April 1888.	1st April 1887.
	Rs.	Rs.	Rs.
Orissa Canals	1,14,597	92,109	87,458
Midnapore Canal	84,773	56,493	50,749
Sone Canals	3,80,613	4,11,281	2,31,582
Sarun Canals	34,927	33,492	32,712
Total ...	6,14,910	5,93,375	4,02,501

NOTE.—The figures are those of the Examiner, Public Works Accounts ; but it is believed that they will require correction, since they do not agree with those given by the Superintending Engineer, which again differ from those of the Collector.

The reduction effected in the outstanding balances of the Sone Canals is less than the increments in the balances of the Orissa and Midnapore Canals taken together. The progress made with collections on each system can be compared as follows :—

	Percentage of current demand adjusted.	Percentage of arrear demand adjusted.
Sone Canals	60	80
Midnapore Canal	34	89
Orissa Canals	46	72

Those results (except in the case of the Sone Canals) cannot be considered good, and it is again necessary to call the attention of district officers in Orissa and Midnapore to the steady growth of the arrear balances as a subject which demands early and energetic treatment.

10. In Navigation Receipts improved results are shown on all the lines except the Calcutta and Eastern Canals. There is reason to suppose that the income from this route, on which the traffic receipts are greater than on all the other canals of the province combined, is being unfavourably effected by the competition of the Central Bengal Railway. Under arrangements which existed before the construction of the railway, when the canals had a monopoly of the traffic, and which have not yet been altered, tolls are only collected at the Calcutta terminus of the boat-route; and the railway is thus enabled to tap the canal traffic before the latter has paid toll, and therefore at present competes with the canal at an advantage. The actual tollage collections for each system are given below for three years—

Year.	Orissa Canals.	Midnapore Canal.	Hidgellee Tidal Canal.	Orissa Coast Canal.	Sone Canals.	Calcutta and Eastern Canals.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1886-87	58,604	1,09,693	51 904	28,587	49,665	4,73,183	7,71,706
1887-88	60,628	1,26,574	46,406	52,428	50,984	5,71,872	9,09 292
1888 89	69,830	1,46,760	53,910	65,010	52,163	5,65,491	9,53,163

On the Nuddea rivers the collections fell from Rs. 1,98,318 to Rs. 1,91,749.

11. The number of complaints which came up for disposal during the year was altogether 14,710, of which 12,506 were complaints made during the year and 2,204 were old complaints left over for disposal from the files of the previous year—

	Orissa.		Midnapore.		Sone.		Total.	
	Number.	Percentage on cases disposed of.	Number.	Percentage on cases disposed of	Number.	Percentage on cases disposed of.	Number.	Percentage on cases disposed of.
Pending from last year	1,503	.....	84	.....	625	.....	2,212	.....
Filed during the year	3,789	.....	1,647	.....	7,062	.....	12,498	.....
Total ...	5,292	.....	1,731	.....	7,087	.....	14,710	.....
Disposed of { Admitted	.....	.....	216	11·5	2,253	39·0	.....	.....
Disposed of { Dismissed	.....	.....	1,276	88·5	3,519	61·0	.....	.....
Total ...	4,110	100 0	1,492	100·0	5,772	100·0	11,374	100·0
Pending on 31st March 1889 ...	1,182	.....	239	.....	1,915	.....	3,336	.....
Area irrigated in 1888-89 ... Acres	159,294		69,777		355,909		584,978	
Proportion of acres irrigated to one complaint (current year only).	42·04		42 5		50 4		46·7	
Ditto for 1887-88 (including cases pending from previous years).	37·9		78·3		46·7		47·5	

The above table, which is an abstract of the information given in the various Revenue reports on the filing and disposal of complaints, is defective in the case of the Orissa Canals, where the Deputy Revenue Superintendent has failed to distinguish the claims admitted and those rejected. Also, since in the reports of 1887-88 current and pending complaints were taken together, it is impossible to exactly compare the work done in each year. As, however, the number of complaints, current and pending, in 1887-88 was 10,332, being in the ratio of 1 : 47·5 to the number of acres irrigated, while in 1888-89 the number of current complaints is 12,498 and the ratio 1 : 46·8, it is clear that not only was the number of complaints greater in the latter year, but the proportion of complaints with regard to the area irrigated has also risen. In the case of the Midnapore Canal that proportion has almost doubled—an unsatisfactory state of affairs which should have received attention in the reports of the officers responsible.

12. The number of certificates issued for the recovery of arrears has fallen from 28,805 to 19,536, and the number pending at the close of the year from 19,536 to 15,880—

	Pending at close of 1887-88.	Instituted during 1888-89.	Total.	Disposed of.	Pending at close of 1888-89.
Midnapore	5,310	11,201	16,511	9,326	7,185
Orissa	9,047	5,259	14,306	8,553	5,753
S ne	5,179	4,216	9,395	6,453	2,942
Total ...	19,536	20,676	40,212	24,332	15,880

The reduction in the cases pending has been effected entirely on the Sone and Orissa Canals, as in Midnapore there is a considerable and highly unsatisfactory increase, notwithstanding that the number of cases disposed of is actually higher than in either of the other systems. The percentage, however, of cases disposed of, as compared with the number pending and instituted, is not so good, the respective percentages being for Midnapore 56·5, Orissa 59·8, and Sone 68·7. Judging by the very large proportion of cases struck off compared with the total number disposed of in Midnapore, namely, 5,478, or nearly 59 per cent., it appears probable that sufficient care is not exercised in issuing these certificates, and that much unnecessary work is in consequence thrown on the officer who is trusted with their disposal.

13 The Lieutenant-Governor notes with satisfaction the names of the various officers to whom Colonel Harrison awards special praise, and he takes this opportunity, on Colonel Harrison's connection with the province being severed, of recording his acknowledgment of the excellent service rendered by him during his tenure of the office of Chief Engineer and Joint-Secretary, and of the admirable tact and judgment which Colonel Harrison has always displayed in administering the department confided to him.

ORDER.—Ordered that a copy of this Resolution, and of the Note and its accompaniments, be submitted to the Government of India, in the Public Works Department, for information; also that copies be forwarded to the Appointment, Revenue, and Financial Departments of this Government; the Board of Revenue, Lower Provinces; the Commissioners of the Presidency, Burdwan, Patna, and Orissa Divisions; the Collectors of the 24-Pergunnahs, Nuddea, Hooghly, Midnapore, Burdwan, Patna, Shahabad, Gya, Sarun, Cuttack, and Balasore; the Superintending Engineers of the Orissa, South-Western and Sone Circles; and Examiner, Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. I. HARRISON, *Lieut.-Col.*, R.E.,
Offg. Joint-Secy. to the Govt. of Bengal,
P. W. Dept.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

IRRIGATION BRANCH.

REVENUE REPORT.

Note by LIEUTENANT-COLONEL C. W. I. HARRISON, R.E., *Chief Engineer, on the Canal Revenue Reports for the year* 1888-89.

THE Capital expenditure on Irrigation Works, for which Capital accounts are kept, amounted during the year 1888-89 to Rs. 9,19,020 for direct and Rs. 23,231 for indirect charges—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Capital expenditure not charged against Revenue	7,74,547	18,229	7,92,776
Minor Works and Navigation, Provincial	1,44,473	5,002	1,49,475
Total ...	9,19,020	23,231	9,42,251

2. The total Capital outlay at the end of the year 1888-89, including indirect charges, was as follows:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Major Irrigation Works.			
Productive Public Works ...	5,88,83,503	16,58,558	6,05,42,061
Minor Works and Navigation.			
Protective grants—Imperial ...	8,66,000	...	8,66,000
Ordinary revenue { Imperial and Provincial } ...	98,67,297	2,81,485	1,01,48,782
Total ...	6,96,16,800	19,40,043	7,15,56,843

3. The above outlay is divided under the different projects in the following statement:—

Works.	During 1888-89.			To end of 1888-89.		
	Direct charges.	Indirect charges.	Total.	Direct charges.	Indirect charges.	Total.
Major Irrigation Works.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	6,23,439	15,279	6,38,718	2,35,37,322	5,31,481	2,40,68,803

Orissa Coast Canal ...	97,811	3,495	1,01,306	41,54,073*	1,02,356	42,56,429
Sarun Canals ...	...	...	...	6,69,230	27,183	6,96,413
Total ...	1,44,473	5,002	1,49,475	1,07,33,297	2,81,485	1,10,14,782
GRAND TOTAL ...	9,19,020	23,231	9,42,251	6,96,16,800	19,40,043	7,15,56,843

* Includes expenditure of Rs. 8,66,000 from famine protective grants.

REVENUE.

4. The total revenue receipts, working expenses and charges for interest in respect of the works which are classed as Major Irrigation Works during 1888-89, and four previous years, are shown in the following statement:—

PARTICULARS.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts from all sources ...	13,81,179	10,87,080	13,69,679	15,74,272	12,99,876
Working expenses (direct and indirect charges)	14,87,295	15,72,170	13,76,137	11,98,291	12,27,414
Net revenue	(—)1,06,116	(—)4,85,090	(—)6,458	3,75,981	72,462
Charges for interest	23,39,849	23,13,446	22,91,006	22,66,710	22,29,979
Deficit	24,45,965	27,98,536	22,97,464	18,90,729	21,57,517
Rate per cent. on Capital outlay ...	4·04	4·68	3·88	3·23	3·72

INTEREST.

5. The total amount of interest payable to the Imperial Treasury on account of Major Irrigation Works for the year 1888-89 is Rs. 23,39,849.

FINANCIAL RESULTS.

6. The following statement shows the financial results of both Major Irrigation Works and Minor Works and Navigation, of which Capital and Revenue Accounts are kept, to the close of the year 1888-89:—

	Major Irrigation Works.	Minor Works and Navigation.
	Rs.	Rs.
Direct revenue	1,51,85,443	2,05,73,482
Working expenses (direct charges)	1,58,26,535	79,97,925
Results on direct charges only ... Loss ...	6,41,092	Profit ... 1,25,75,557
Indirect charges debitable to revenue ...	8,27,907	... 2,05,967
Results on both direct and indirect charges ... ... Loss ...	14,68,999	Profit ... 1,23,69,590
Charges for interest on Capital	3,40,63,927	Not calculated.
Net results, including interest to end of 1888-89 ... ... Loss ...	3,55,32,926	.....

Thus on Major Irrigation Works the net loss including interest is Rs. 3,55,32,926, or 58·69 per cent., of the gross Capital outlay, including all charges.

7. The financial results of Minor Works and Navigation, of which only revenue accounts are kept, are shown below:—

	Rs.
Direct revenue	78,22,208
Working expenses (direct charges)	42,44,206
Results on direct charges only ... ... Profit ...	35,78,002
Indirect charges debitable to revenue	2,21,813
Results on both direct and indirect charges ... Profit ...	33,56,189

EXPENDITURE.

8. The expenditure on, and receipts from, Irrigation, Navigation, and Agricultural Works during the year 1888-89, as compared with those of the year 1887-88, are shown below:—

EXPENDITURE.	1888-89. Rs.	1887-88. Rs.
42—Major Irrigation Works, Working Expenses—		
Provincial	11,87,295	15,72,170
43—Minor Works and Navigation—		
Irrigation and Navigation Works—		
Provincial	7,19,087	8,26,214
Agricultural Works—		
Provincial	7,83,156	7,17,359

Note.—Commencing with the year 1888-89, "Refunds of revenue" are treated as reduction of receipts and not as charge against Working Expenses, and "Indirect charges" are shown in addition to direct charges under Working Expenses, in accordance with the suggestion contained in Government of India's letter No. 154*I*, dated 15th August 1889.

9. The areas irrigated during the year 1888-89 and the four preceding years, by the Major Irrigation Works, are shown in the following statement:— Area irrigated.

Year.	Orissa Canals.				Midnapore Canal.				Sone Canals.				Total.

The year's working and its financial results will now be dealt with separately for each of the canal systems of the province.

ORISSA CANALS.

10. The Capital, Interest, and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT. Capital account.

Heads of account.	Outlay during 1888-89.	Outlay to end of 1888-89.
Direct charges.	Rs.	Rs.
I.—Works	4,88,452	1,69,03,279
II.—Establishment	1,06,375	43,03,670
III—Tools and plant	15,043	20,01,555
IV.—Suspense accounts	21,307	1,46,525
Loss by exchange	...	2,68,070
Total ...	6,31,177	2,36,23,099
V.—*Less*—Receipts on Capital account ...	7,738	85,777
Net total direct charges ...	6,23,439	2,35,37,322
Indirect charges.		
Capitalization of abatement of land revenue ...	386	32,842
Leave and pension allowances	14,893	4,98,639
Total indirect charges ...	15,279	5,31,481

The capital outlay of 1888-89 shown in this statement represents the progress made with the works provided in the revised estimates of the Orissa Project. Owing to a slight scarcity of food-supply in the district, a more plentiful supply of labour was available than has been the case for some years, and the amount of earthwork carried out on canal and distributary banks, drainage works and protective embankments was more satisfactory. The additional lengths completed and the fresh areas brought under command, or provided with distributaries, will be shown in a later paragraph. The list of masonry works and buildings either put in hand or brought to completion also indicates a fair rate of progress during the year.

* These are now shown under the suggestion of the Government of India.

11. The income calculated on "earnings" of the year and expenditure are shown below:— EARNINGS

Expenditure.	Amount.	Earnings.	Amount.
DIRECT CHARGES.			
I.—Maintenance and repairs.	Rs.		Rs.
Repairs	2,36,694	Water-rates	2,42,808
Establishment, including direction and accounts	70,201	Navigation	77,908
Tools and plant	21,156	Miscellaneous	14,242
Total ...	3,28,051	Total ...	3,34,958
II.—Revenue management.			
Irrigation establishment ...	43,161		
Navigation ditto ...	15,734		
Total ...	58,895	*Less*—Refunds of revenue ...	221
Total direct charges ...	3,86,946	Net earnings	3,34,737
Indirect charges	18,073	Deficit	70,282
Total working expenses ...	4,05,019	Total ...	4,05,019

By the orders of the Government of India, a change is now introduced in the method of calculating the amount of water-rates shown as "earned" in the above statement. Under the rules in force on the Orissa canals, a portion of the water-rates assessed in any year do not become legally due until the 1st May, and a further portion till the 1st June, of the following year. Hitherto, therefore, as explained in previous Revenue Reports, the earnings of each year have been calculated by excluding those instalments of the assessments which would not become due till the year following; but, on the other hand, including those instalments of the assessments of the previous year, which, though undoubtedly earned in that year, have only become due in the year under report. The amount thus arrived at has hitherto been shown in the statistical table IVC attached to each report as the amount of revenue assessed. In this and future reports, however, the 'earnings' of a year will be taken to mean the amount of the liabilities incurred by cultivators for water supplied during that year, without regard to the date on which those liabilities may become legally recoverable. The statement also now for the first time includes, on the expenditure side, indirect as well as direct charges. EARNINGS.

12. The lengths of the canals and distributaries in operation at the close of the year 1888-89, compared with 1887-88, are given in the statement following:— LENGTH OF CANALS.

Name of Canal.	1888-89.								1887-88.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command. There has been an increase of 6½ miles in the length of canals intended for the purposes both of irrigation and navigation, and of 13 miles in the length of those to be used for irrigation only. The former increase is due to the completion of the Jajepore Canal in the Brahmini-Byturni Series, which was opened for traffic in the month of August 1888, and the latter to the completion of the Machgong Extension Canal in the Mahanuddee Series, as far as the 32nd mile, up to which point it has been filled with water.

There has been no increase in the length of village channels, and none are in progress upon any of the canals, but the length of distributaries has increased during the year to the extent of 42½ miles, of which 6¾ miles are on the Kendrapara and Pattamoondi Canals, and 35¾ miles on the High Level Canal, Range III, where the whole length of distributaries proposed to be constructed has been completed with the exception of about two miles of main distributary, and a few minor branches required for affording irrigation to the high ground near the Main Canal and the Orissa Trunk Road. The area protected from flood remains the same as it was in the previous year, as the Daib embankment has not yet been fully completed, but there is an increase of 98,851 acres in the area under command in consequence of the completion of that portion of the Machgong Extension Canal which lies above the 32nd mile, and of the Jajepore Canal, the former of which has added 28,851 acres, and the latter 70,000 acres to the area commanded. The area provided with distributaries has also increased to the extent of 24,132 acres, of which 3,402 acres, are on the Kendrapara, Pattamoondi and High Level, Range I, canals of the Mahanadi Series, and 20,730 acres, on the High Level Canal, Range III, of the Brahmini-Byturni Series.

RAINFALL.

13. The rainfall of the year 1888-89 and of the previous year in the Cuttack and Balasore districts is given in the Statistical Table No. IVE. In both districts the total fall registered is very nearly the same as that registered in 1887-88.

The average rainfall at the thirteen stations situated within the area commanded by the Orissa canals for nineteen years is 55·18 inches, whilst the fall of the year at the same stations was 47·94, or 7·24 inches below the average.

From the statement of rainfall at the eleven stations in the upper districts drained by the Mahanadi, which has been supplied by the Superintending Engineer, it appears that the average fall during the year under review was 43·08 inches against 52·18 inches of the year 1887-88, showing a decrease of 9·10 inches. The average for the last seven years up to and including 1887-88 was 46·22 inches, so that the fall of the year under review is somewhat below the average.

From the table below, which gives the average rainfall observed during the kharif and rabi months during the last seven years at thirteen stations within the tract irrigated by the Orissa canals, it is evident that the kharif rains, though on the whole more plentiful than usual, were unequally distributed, a very short fall being registered in July and October, while that of August was unusually large. The deficiency in October was, however, partly made up by an increase in November, when the quantity registered was 2·01 inches in excess of the fall of the previous year :—

1887-88 ...	108,867	502	137	109,506	47·84†
1888-89 ...	156,319	2,779	194	159,292	47·94†

* Mean of observations in Cuttack and Marsaghai.

† Ditto ditto at 13 stations throughout canal-irrigated area.

The spread of kharif irrigation has again been very marked, as the area which has taken water during 1888-89 is greater by 47,452 acres than the irrigated area of 1887-88, and greater by 27,789 acres than the irrigated area of any year since the construction of the canals. The partial failure of the July rains and the drought in October were the main causes which brought about this result.

To compare with 1887-88, of the increase of 47,452 acres in kharif irrigation, 18,019 acres are contributed by the High Level Canal, Range III, where the rate of increase is as much as 241 per cent., and 16,257 acres by the Kendraparah Canal. All the canals, however, show improved results, the lowest rate of increase being on the High Level Canal, Range II, where it was 18 per cent. Of the 2,227 more acres of rabi irrigated, 2,114 acres represent the increase on the Kendraparah Canal.

The whole area of all crops irrigated, being 159,292 acres, bears a ratio of 63 per cent. to the area under command of distributaries, already given as 250,919 acres. The ratio by canals is as follows:—

	1887-88.	1888-89.	Increase.
Kendraparah system	54·2	70·8	16·6
Taldundah ditto	54·9	71·0	16·1
High Level, Range I	32·0	37·0	5·0
High Level, „ II	No distributaries.		
High Level, „ III	35 0	60·3	25·3

15. The whole of the irrigated area was assessed. The figures below show the method of assessment alongside of the figures of the two preceding years for purposes of comparison:—

		1888-89.	1887-88.	1886-87.
		Acres.	Acres.	Acres.
Kharif ...	Five-year leases ...	152,282	102,863	73,699
	Annual leases ...	57	37	68
	Unauthorized irrigation ...	3,981	5,975	1,354
Rabi ...	...	2 779	501	2,439
Perennial ...	Sugarcane	193	130	149
Total, including unauthorized irrigation ...		159,292	109,506	77,709
Total, excluding unauthorized irrigation ...		155,311	103,531	76,355

It is observed, however, that though the figures used in the statements in this and the preceding paragraphs, which give a total of 159,292 acres as the area irrigated, are those adopted by the Superintending Engineer throughout his report of the year's operations, yet it is stated that the area actually under lease at the close of the year was 146,046 acres only. The difference thus observable between the area irrigated and that leased is described by the Superintending Engineer "as due to the areas provisionally entered in the leases of some of the canals, the lands commanded by which have not as yet been cadastrally surveyed, having been smaller than they were afterwards found to be when the measurements of the area actually watered came to be made." And the Deputy Revenue Superintendent summarises the results of the year as follows:—

	Rs.
Area leased and assessed during the year	1,30,258
Unauthorized irrigation	8,981
Assessed area of which measurements were completed after the close of the year	25,053
Total ...	1,59,292

1888-89, AN ANXIOUS PERIOD FOR THE PROSPERITY OF THE CANALS.

16. With the close of the year 1882-83 ended the first period of five-year leases which had been introduced in these canals in 1878-79; and since during that period it was deemed desirable to cause all the leases to end at the same time, with a view to permitting of an alteration of the rate simultaneously over the whole of the Orissa system. Should such alteration be considered advisable, all the leases given subsequently to 1878-79 were given nominally for five years, that is to say, at the five-year lease rate, but they really expired simultaneously on the 31st March 1883. With 1883-84 therefore commenced a new period of five years, and the year happening to be one somewhat favourable to canal irrigation, a considerable area was leased, all the leases for which lapsed on the 31st March 1888, causing the year under review to be opened with a leased area of 45,716 acres only. Up to the end of June very few fresh leases had been entered into, and matters began to wear a serious look so far as the interests of the canals were concerned; and it was not until the demand for canal water arose in July that any good start was made. During that month and August, notwithstanding the heavy rain at the close of the latter month, leases were obtained for some 43,000 acres of either new irrigation or renewals of old leases. A small increase in September and the drought in October added some 40,000 acres more, bringing the total by the end of November to about 131,000 acres. Subsequent measurement and the correction of estimated areas in the leases eventually raised the area to that given above.

RANGE I, HIGH LEVEL CANAL, A SPECIAL CAUSE FOR ANXIETY

Range I of the High Level Canal was the subject of special anxiety, since leases for no less than 13,000 acres out of the 14,605 acres shown as leased in 1887-88 lapsed at the close of that year. It was feared that many of the leases would not be renewed, but the scantiness of the rainfall in October had a most marked effect, and the area now leased is larger than it has been in any previous year.

17. At first sight the area now reached seems to lead to the conclusion that all the land under lease at the end of 1882-83 had now been re-leased. Such, however, is not the case, and dates given in the Superintending Engineer's Report show that though the area leased up to the end of 1888-89, viz. 146,046 (it is fairer to take this figure than 159,292 acres, since the latter is the result of careful measurement which was wanting in 1882-83), is 13,018 acres more than the area leased up to the close of 1882-83, yet that, if the areas by canals be compared, it appears that even if none of the leases on the older canals be for entirely fresh irrigation, *i. e.*, for land which had not been irrigated up to 1882-83, a considerable area of lapsed irrigation has still to be recovered, the increase of 13,018 acres being practically wholly due to increase in the High Level Canal, and especially Range III thereof. The remaining canals have not yet recovered the depression which followed the expiry of the first set of five-year leases as will be seen from the following table:— LAPSED IRRIGATION STILL TO BE RECOVERED.

Name of Canal.	Area leased.		More.	Less.
	1888-89.	1882-83		
	Acres	Acres.	Acres.	Acres.
Kendrapara, including Gobri	53,867	60,374	...	6,507
Gobri Extension	1,499	..	1,499	...
Patramoondi	10,549	12,091	...	1,545
Taldundah	10,285	10,719	...	434
Machgong	27,241	34,012	...	6,771
High Level Ranges I and II	19 162	14,244	4,918	...
Ditto Range III	23,443	1,585	21,858	...
Total ...	146,046	133,028	28,275	15,257

18. It is clear from what has been said above that the Orissa Canals are very dependent on the nature of the season at a critical period for their prosperity; and there is no doubt but that, from the point of view of canal interests only, the drought of October 1888 was the most opportune occurrence that could have taken place, inasmuch as it happened just as the former leases had expired and there was no interval during which the cultivators might have come to think that they could do without canal water and to doubt whether it was to their interest to insure their lands against drought by a small yearly payment. The drought made them thoroughly appreciate the benefits of canal irrigation; and, as a matter of fact, it was in the real interests of the cultivators themselves that no such interval should occur; for nothing but continuous irrigation will enable them to be prepared with the means and method of irrigating with success and with universal benefit when drought really comes. THE DROUGHT OF 1888-89 VERY BENEFICIAL IN EVERY WAY.

19. The information regarding five-year leases is not sufficiently exact to permit of a correct conclusion being formed as to how the area under five-year leases is progressing, especially whether lapsed leases are being renewed. It would be as well if this point were properly taken up by the Superintending Engineer and Deputy Revenue Superintendent in their reports for the year now in progress, since the renewal of leases will be a better proof than anything else that the Ooriya is at last taking kindly to canal irrigation. RENEWALS OF LEASES.

20. At the commencement of the year under review the accounts showed an unrealized balance of Rs. 96,567, of which Rs. 92,110 was for water-rates, and Rs. 4,457 for miscellaneous revenue. The additional assessments which fell due within the year on account of previous years, as well as the year under review, came to Rs. 2,04,535, of which Rs. 1,96,765 was for water-rates. Thus, including arrears, the gross amount, which was liable to be collected during 1888-89, was Rs. 3,01,102, of which Rs. 1,60,328 was realized and Rs. 24,003 either remitted or written off as irrecoverable. Accordingly, the year closed with an unrealized balance of Rs. 1,16,771, of which Rs. 1,14,597 was for water-rates. ASSESSMENT AND COLLECTIONS.

This balance is larger than that at the end of the previous year. The increase is due, in a great measure, to the large increase on the assessments during the year. The outstanding balances, however, include considerable demands on account of irrigable but unirrigated beali rice lands—a class of lands which, in cases where beali rice is the only crop grown on them, it has now been decided to strike out of the assessments of the blocks in which they are situated. The outstandings, therefore, will undergo some reduction when these

orders are carried into effect, as well as from the remission recommended by the Deputy Revenue Superintendent. of submerged and damaged leased areas, till now assessed at full rates. The actual realizations during the year, though larger than those of the previous five years, would have been much better, but for the damage to crops caused by drought and abnormal cyclonic weather. The attention of the Deputy Superintendent has, however, been drawn to the steady increase in the outstanding balances, and he has been requested to submit a special report on the measures he would propose for the reduction of these arrears, and on what hopes may be entertained of effecting the reduction at an early date. A detailed account of the balances is given below:—

Year in which amount fell due.	Water-rates.	Miscellaneous.
	Rs.	Rs.
1881-82	327	76
1882-83	108	246
1883-84	435	456
1884-85	1,123	476
1885-86	2,642	458
1886-87	8,040	463
1887-88	32,907	...
1888-89	69,015	...
Total arrears ...	1,14,597	2,175

21. The results of the year as regards water-rate collections are shown below:—

	Outstandings of all years up to and including 1887-88.			Demands due in 1888-89 for the irrigation of that year.		
	Rupees.	Percentage of demands outstanding on 31st March 1888.	Rupees.	Rupees.	Percentage of demands for the year.	Rupees.
Outstandings to end of 1887-88, with assessments made in 1888-89 ...	...	100·0	1,61,837	...	100·0	1,27,038
Adjustments made in 1888-89 ... { Collections ...	93,402	57·7		57,963	45·6	
Adjustments made in 1888-89 ... { Remissions ...	22,851	14·1		62	0·04	
Total adjustments ...	...	71·8	1,16,253		45·7	58,025
Outstanding on 1st April 1889 ...	...	28·1	45,584		54·3	69,013

The percentage of adjustment for old outstandings is 71·8 against 73 6 of the last year, but that for the current demand is 45 7 against 45·1. The proportion of remissions is greater, being 14·1 against 5·7; it was mentioned in last year's report that considerable remissions would have to be made. So far as current demands are concerned, the percentage is the same in both years, being 0·04. The percentage of balances of old arrears still remaining to be collected at the close of the year has risen from 26·4 to 28 1, but the collection of the current year compares favourably with that of the year previous, as the unrealized percentage has fallen from 54·9 to 54·3.

COMPLAINTS.

22. The number of complaints received and the progress made in settling them is shown below:—

	Number pending from last year.	Number filed during year.	Total.	Disposed of during year.	Balance left pending.
Complaints against assessments	1,503	3,789	5,292	4,110	1,182
Miscellaneous	129	887	1,016	957	59
Total ...	1,632	4,676	6,308	5,067	1,241

The diminution in the arrears is satisfactory, and it is stated that all complaints arising out of the assessment of unauthorized irrigation have been disposed of as far as the Canal Revenue office is concerned. The number of new complaints was swollen by applications based on the recent orders of the Bengal Government regarding the remission of beali lands in five-year blocks, and by hose relating to fully assessed lands which had been damaged by inundation.

23. The Superintending Engineer thus compares the kharif duties obtained from the several canals with those obtained in the previous year:— DUTY OF WATER

NAME OF CANAL.	Rainfall during the kharrif season.		Duty of quantity entering canal per cubic foot.		Duty of quantity utilised per cubic foot.	
	1888-89.	1887-88.	1888-89.	1887-88.	1888-89.	1887-88.
	Inches.	Inches.	Acres.	Acres.	Acres.	Acres.
Kendraparah Canal System ...	37·07	28 93	92·48	67·39	100 25	71·42
Ditto Canal	36·65	25·59	86·22	89·38	97·92	93 77
Pattamoonda do.	41·19	33 10	84·04	30 20	119·16	37·73
Gobri do.	37 91	35 63	92 33	41 36	99·81	81·62
Taldanda Canal System ...	44 39	28 59	82·60	79·60	217·40	98 70
High Level Canal, Range I ...	38 78	26 48	70·73	57·02	112·03	77·72
Ditto ditto, II ...	42·72	27·98	30 99	40·05	30 99	74·24
Ditto ditto, III ...	44 56	30·15	200·07	64·67	200·07	64 67

So that, except in the case of the High Level Canal, Range II, a higher average duty for the whole season was obtained; a natural consequence of the greater rainfall. In the case of the exception noted, a very high discharge was passed into this canal during October, partly in order to raise the level of the pool above the Byturni weir, for the purpose of benefiting the irrigation on Range III, but principally in order to facilitate irrigation from Range II by raising the level of the water. In the return of the Executive Engineer the whole of this discharge was represented as having been utilised, which, as the Superintending Engineer points out, can hardly have been the case. In future, care will be taken to show the quantity utilised by deducting the discharge at the outfall of the canal into the Byturni river.

During October, when the demand for irrigation was at its highest, and great pressure was brought on the canals, the average duty obtained was 53·48 acres per cubic foot entering the canals, and 60 32 acres per cubic foot utilised.

24. During the year 256 experiments on the outturn of crops were made, half on irrigated and half on unirrigated lands. On lands irrigated during 1888-89, the average weight of paddy per acre is 16·23 maunds and of straw 20 12 maunds, against 16·83 and 25·62, which are the respective averages of the five previous years. On unirrigated lands the figures for the year are 11·02 maunds of paddy against 12·46 maunds obtained in previous years, and 14·02 maunds of straw against an average of 19·05. The average yield per acre during the year therefore from irrigated as well as from unirrigated lands, though greater than it was in 1887-88, must both for grain and straw be considered but moderate. CROP EXPERIMENTS.

The difference in favour of irrigation, as shown by these experiments, is 5·21 maunds per acre in grain and 6·10 maunds in straw, the figures obtained from the averages of previous years being 4·37 and 7·57 respectively.

25. The cost of revenue establishment of the year was Rs. 43,161. The following statement shows the details of the year under review with those of the three previous years:— REVENUE ESTABLISHMENT.

	1888-89.	1887-88.	1886-87	1885 86
Establishment under Collector.	Rs.	Rs.	Rs.	Rs.
Superior officers and permanent and temporary establishment, including travelling allowance	31,389	28,749	26,007	24,028
Contingencies	2,889	2,218	2,625	1,948
Headmen's fees	1,680	2,208	1,209	1,229
Establishment under Executive Engineer.				
Permanent and temporary establishment ...	3,052	2,964	2,942	2,854
Contingencies	...	...	...	...
Water-regulation establishment ...	4,151	4,161	4,222	4,245
Total ...	43,161	40,300	37,005	34,304
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department	1,60,328	1,46,039	1,05,775	1,16,940
Percentage ...	26·9	27·6	34·98	29·3

26. The management of the navigation of the canals and the collection of the revenue from this source is in the hands of the engineering staff. The NAVIGATION.

receipts, which are tabulated in statistical table ID, include tolls collected on boats and rafts using the canals, and the earnings of the transport service maintained by Government between Bhuddruck on the High Level Canal and Cuttack, a distance of 74 miles. The collections from tolls and transport service for the last ten years are shown below:—

	Tolls.	Transport service.	Total.
	Rs.	Rs.	Rs.
1879-80	62,389	35,686	98,075
1880-81	41,297	30,105	71,402
1881-82	53,219	29,987	83,206
1882-83	66,736	41,737	1,08,473
1883-84	61,602	48,550	1,10,152
1884-85	52,784	27,018	79,802
1885-86	64,093	19,919	84,012
1886-87	58,664	8,384	67,048
1887-88	66,628	4,376	71,004
1888-89	69,830	8,078	77,908

The cost of the establishment employed in collecting tolls during the year was Rs. 9,474, or Rs. 319 in excess of the previous year, due partly to the opening of the Jajepore Canal for traffic in August 1888, on which Rs. 156 was incurred, and partly to the Toll Collector at the Jumboo lock of the Kendrapara Canal having been employed there for a complete year instead of only for a portion of a year, as was the case in 1887-88.

TRAFFIC

27. The following statement compares the traffic (excluding the transport service) of all the canals in Orissa during the year under review with that of the previous year:—

CANALS.	Miles open.	Tollage on boats and rafts		Number of boats plying cargo and passengers		Tonnage of cargo and passenger boats.		Value of cargo and rafts.		Tollage per mile of canal.	
		1888-89	1887-88.	1888 89.	1887 88	1888-89	1887-88.	1888 89.	1887-88	1888-89.	1887-88.
	No.	Rs.	Rs.	No.	No.	Tons.	Tons.	Rs.	Rs.	Rs.	Rs.
Taldundah and Machgong Canals	31	4,310	6,267	926	1,430	25,280	44,568	1,02 110	94,665	139 0	202·1
Kendraparah and Gobri Canals (including extension)	75	51,786	46,65	5,160	5,011	81,677	81,718	34,18,930	36,11 975	717·1	622·1
High Level Canal, Range I	83	6,642	8,306	2,958	2,975	22,080	24,118	6,28,530	8, 6, 00	201·3	251·7
Ditto, ditto II	12½	3,392	4,085	1,542	1,995	10 732½	17,3 8	2,95,8 2	3,7 4 2	271·4	326·8
Ditto, ditto III	19	1,601	1,311	788	673	7,39 ½	6,716	1,30,472	1,2 ,311	84 3	69 0
Jajepore Canal*	6½	99		101	.	534	...	34,003	...	15 2	...
Total	177	69,830	66,628	11,475	12,084	151,074	175,906	45,90,957	50,32 93	394 5	399·7

* This canal was opened to traffic on the 11th August 1888.

This return only takes count of laden boats, of which there is a decrease both in number and tonnage. Of empty boats, on which reduced tollage rates are charged, the number which made voyages is 1,473 more than last year. The gross receipts from tollage are accordingly greater by Rs. 3,202, the total number of boats by 864, and the total tonnage by 30,267 tons. There is a decrease in rafts. Moreover, as the receipts from Government traffic have declined by Rs. 3,183, or 36 per cent., in consequence of the completion of the public works for which materials were boated in the previous year, the general traffic by private boats on the whole shows improvement, for though the actual weight of cargo, as exhibited in statistical table 11D, appears to have slightly declined, the data on which that table is based cannot be depended on for accuracy. The classes of goods which show increases are grain, piece-goods, and building materials, while metals and salt have declined.

The number of passengers carried has increased by 10,015, being 17·21 per cent. in excess of the number who travelled in the year previous.

The fluctuations on the various canals are considerable The increase on the Kendraparah Canal is larger by 7,319 than the decrease which occurred in 1887-88, so that the passenger traffic on this canal appears to have completely recovered from the temporary depression ascribed to the loss of the two ocean passenger steamers running between Calcutta and Chandbali; but the passenger traffic of the High Level Canal although increasing has not yet recovered itself. On the Taldandah Canal there is a still greater decrease than there was last year due to the same cause apparently, viz., that the passengers are not carried the short distance from the head of the canal at Jobra to the canal bridge situated on the crossing of the Pilgrim road.

28. The transport service maintained by Government between Bhuddruck and Cuttack was worked at a loss of Rs. 4,585 as against a loss of Rs. 5,712 in 1887-88. The number of passengers and the weight of goods carried were about double what were carried in 1887-88, but the line was worked at an increased cost of Rs. 3,383, steamers instead of accommodation boats being employed. TRANSPORT SERVICE

29. The miscellaneous receipts during the year under review are compared by sub-heads with those of the previous year in the following statement:— MISCELLANEOUS RECEIPTS

SOURCE OF REVENUE.	YEAR IN WHICH RECEIVED.		DIFFERENCE.	
	1888-89.	1887-88.	Increase.	Decrease
	Rs.	Rs.	Rs.	Rs.

[*] Indirect charges are now, by the suggestion of the Government of India, included in this statement of financial results.

It will be noticed that the deficit which was so great in the years 1886-87 and 1887-88 has now been reduced to one comparable with the years 1884-85 and 1885-86, owing chiefly to the absence of expenditure on account of the breaches in the Mahanadi weir, but also to an improvement in the receipts. If the earnings of the two years 1887-88 and 1888-89, be compared, the deficit of Rs 2,45,842 is found to be reduced to Rs. 70,282; but it must be remembered that, in addition to the causes given above, in the former year the assessments did not include amounts not legally due until after the close of the year, whilst such are included in the year under review.

MAINTENANCE.

31. The outlay on maintenance, exclusive of that on the transport service which amounted to Rs. 6,403, during the year under review and the two preceding years is distributed under the sub-heads as follows:—

	1888-89.	1887-88.	1886-87.
	Rs.	Rs.	Rs.
Head works	71,168	1,94,272	2,34,500
Main canals	1,11,712	76,219	83,735
Distributaries	31,451	25,594	21,458
Drainage and protective works	15,960	10,778	6,690
Total ...	2,30,291	3,06,863	3,46,383

HEAD WORKS.

Out of a total expenditure of Rs. 71,168 on head works, Rs. 62,796 represents the cost of maintaining the weirs, divided as follows:—

NAME OF WEIR.	Length.	EXPENDITURE.		RATE PER RUNNING FOOT.	
		1888-89.	1887-88.	1888-89.	1887-88.
	Feet.	Rs.	Rs.	Rs.	Rs.
Naraje	3,833	10,140	26,106	2·64	6·81
Mahanadi	6,349	26,539	1,32,941	4 18	20·93
Beropa	1,980	5,573	5,015	2·81	2·53
Brahmini	4,000	7,471	7,692	1·86	1·92
Pattia	783	5,698	6 526	7 27	8 34
Byturni	1,026	1,440	977	1 40	0 95
Burrah	526	5,935	7,165	11·28	13 62
Total of all weirs ...	18,497	62,796	1,86,432	3·39	10·08

As the rebuilding of the portions of the Naraje and Mahanadi weirs which had been carried away in 1886 was completed in 1887-88, the repairs necessary in 1888-89 were again of a normal character. A portion, however, of the apron of the Mahanadi weir was again injured by floods, involving a special outlay of Rs. 7,658 on its reconstruction.

The maintenance of the remaining head works, including river protective works, embankments and buildings, amounted to Rs. 8,372. Of these the buildings, on which quadrennial repairs were carried out, show an increase of Rs. 1,665.

MAIN AND BRANCH CANALS.

32. The following statement gives the cost of maintenance of each main and branch canal separately for four years:—

CANALS.	Miles.	1888-89.		1887-88.		1886-87.		1885-86.	
		Cost.	Per mile.	Cost.	Per mile.	Cost.	Per mile.	Cost.	Per mile.
	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Kendrapara ...	39	39,370	1,009	17,339	445	21,004	538	30,789	789
Ditto extension ...	15	2,611	174	2,385	159	2,741	183	2,998	200
Gobri ...	15	6,434	429	4,500	300	3,975	265	7,806	520
Do. extension	6	4,725	787	4,047	674	3,599	6 0	9,101	1,517
Pattamoondee	47	8,769	186	11,347	241	14,162	3 0	18,629	396
Taldundah ...	27	17 027	630	8,998	333	9,971	369	14,213	526
Machgong	19	8,360	440	4,163	219	4,041	212	2,901	152
High Level, Range I ...	33	13,771	417	12,230	370	12 862	389	15,892	481
Ditto, do. II ...	12½	4,315	345	4,420	353	5,295	421	6,653	532
Ditto, do. III ...	19	6,330	333	6,905	358	6 215	327	10,621	559
Tota ...	23·½	1,11,712	480	76,219	328	83,795	360	1,19,661	514

The average mileage rate of maintenance, therefore, shows an increase of more than 46 per cent., in which nearly all the canals have shared. On the Kendraparah canal, where the increase is greatest, gate renewals were carried out on three locks, and both on this and other canals navigated by steamers, a great deal of earthwork was carried out in order to repair the erosion of the banks which were in many places protected by bamboo revetments. On the canals generally there has been a great increase in the amount of earthwork carried out, as well as in silt clearance and the removal of weeds. The quantity of silt cleared by hand was 9,904,436 cubic feet, and the cost Rs. 26,217, giving an average rate of Rs. 2·65 per thousand, while in the previous year only 3,586,859 cubic feet were cleared at an average rate of Rs. 2·77. The amount of silt dredged was 304,077 cubic feet, and the cost Rs. 2,751, an average rate of Rs. 9 per thousand cubic feet. The cost of repairs to the canals, taking them all together, is far higher than in the two previous years, but is still below the cost in the somewhat abnormal year 1885-86; and an examination of the above figures and of those given in greater detail in the Superintending Engineer's report appears to show that a very large proportion of the increased cost as compared with the previous year is due to the effects of steamer navigation on the canal banks, or to outlay on navigation works, or in meeting the requirements of navigation. This remark applies with more or less force to all the navigable channels of the Kanchraparah system. It may be that the lower expenditure in the two previous years was due to a comparative neglect of the necessary repairs, but there appears to be grave reason for doubting whether these narrow channels are suitable to a heavy steamer traffic. The repairs during the year under review have certainly been effected with care; and should the experiment of planting the screw-pines along the water's edge have the anticipated result, the money will have been well spent, and a great saving in earthwork generally may be anticipated. But the experiment has not been tested sufficiently as yet, and should it not prove a success, either an entirely new method must be adopted for protecting the banks or little or no diminution in cost can be looked for.

The damage caused by steamer traffic cannot, however, be given as an explanation of the high rate on the navigable channel of the Taldandah canal nor on the Machgoing canal which has not yet been made navigable; and yet on both these the expenditure, as will be seen from the statement above, is double that of the previous year. In both cases the increased expendiure is ascribed to the larger amount of dressing and turfing required on the slopes and to increased charges for silt and weed clearing. The conclusion apparently to be drawn is that either these necessary repairs have been neglected in past years, or that a somewhat excessive zeal has been exhibited in "polishing." No special explanation is given for an abnormal collection of silt or an abnormal wear and tear to the slopes.

Of course some of the increased charges are beyond control, such, for instance, as the damage done to buildings by the cyclone of September 1888.

33. The cost per mile for repairs of distributaries for the last four years is shown below:— DISTRIBUTARIES.

	Miles.	1886-89.		1887-88.		1888-87.		1889-90.	
		Cost.	Per mile.	Cost.	Per mile.	Cost.	Per mile	Cost.	Per mile.
DISTRIBUTARIES.	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Kendrapara Canal System	333½	14,530	40·53	13,510	40·48	11,073	33·17	13,156	39
Taldanda Canal	71½	2,960	41·26	2,242	31·35	2,232	31 21	2,297	32
Machgong Canal	122½	5,725	46·83	5,182	42 38	4,071	33·30	3,743	30
High Level Canal, Range I ...	117½	9,240	78·35	4,630	39·74	4,081	34·80	5,325	45
Total	644½	31,451	48·77	25,594	39·69	21,457	33·27	24,521	38

On the High Level Canal, Range I, the quantity of earthwork and turfing required for the repairs of the distributary banks was much larger than usual—

an increase in which all the other canals share, though in a less degree. It is possible that this was due to the abnormal heavy rainfall of August, but this is not stated.

DRAINAGE AND PROTECTIVE WORKS

34. There was also an increase during the year in the cost of drainage and protective works, amounting in all to Rs. 5,182; and occurring on the Kendrapara, Machgong and Gobri Extension Canals, and upon Ranges II and III of the High Level Canal. Besides greater outlay on clearing the drainage channels of silt, expenditure of a special character took place on the repairs of a large stone groyne above the Brahmini weir, and on the slopes and crests of the protective embankments.

NECESSITY FOR CAREFUL CONTROL OF THE EXPENDITURE.

35. As mentioned above, the increased expenditure both on canals and distributaries may have been due to a certain extent to natural causes, heavy rainfall, cyclone, &c., but a careful examination of the figures appears to show a distinct tendency to increased expenditure of a nature which may be guarded against and controlled. There is a happy mean between allowing works to fall into disrepair and a lavish expenditure in aiming at excessive trimness of banks and slopes, and there appears to be reason for doubting whether this happy mean has yet been found on the Orissa Canals, and the Superintending Engineer's earnest attention must be directed to this matter, as the only hope of ever making these canals pay even their working expenses appears to be in reducing expenditure as well as increasing receipts.

FLOODS.

36 The floods in the Mahanadi and Byturni rivers were moderate ones, but the flood in the Brahmini was slightly higher than the flood of 1879, although it was lower than the high flood of 1881 below the weir at Janapore. The highest flood in the Mahanadi river rose to 85 80 on the gauge at Naraje, as compared with 87·70, which was the highest reading obtained during the floods of the previous year, and with 92·10, which was the level reached at the same place by the great flood of 1872. The highest flood of the year in the Byturni river stood at a height of 5·40 feet above the reading of the flood of 1887 below the weir at Acquapadda.

MIDNAPORE CANAL.

CAPITAL ACCOUNT

37. The Capital, Interest and Revenue Accounts of this Canal are given below:—

I.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1888-89	Outlay to end of 1888-89.

Total ...	2,51,510	34,14,021			

* These are now shown under the suggestion of the Government of India.

The capital outlay during the year was Rs. 2,665, and to the end of the year Rs. 82,66,010 against Rs. 83,16,768, the amount of the estimate sanctioned by the Secretary of State.

The period allowed for the completion of the estimates sanctioned by the Secretary of State for the Midnapore canal expired on the 31st March 1888. At that date, however, certain works, which were regarded as falling within the scope of the original project, and therefore as properly chargeable to capital, still remained to be carried out. In these circumstances, the Government of India decided that no further extension of time for the completion of the project, as such, should be allowed, but, following the procedure laid down in Public Works Code, volume II, Chapter XV, paragraph 156, directed that a schedule of the works chargeable against capital, which it might be found necessary to carry out, should be annually submitted for sanction, and application for funds made in accordance with the provisions of the paragraph quoted.

EARNINGS.

38. The revenue account calculated on "earnings" of the year and expenditure is given below :—

EXPENDITURE.	Amount.	Earnings	Amount.
DIRECT CHARGES.	Rs.		Rs.
I.—Maintenance and repairs.			
Works (extensions and improvements) ...	...	Water-rates	1,31,433
Repairs	1,06,139	Navigation	1,46,760
Compensation	...	Miscellaneous ...	14,019
Establishment, including direction and accounts	36,111		
Tools and plant	24,335		
Total ...	1,66,585	Total ...	2,92,212
II.—Revenue management.			
Irrigation establishment	25,927		
Navigation ditto	7,550		
Total ...	33,477	*Less*—Refunds of revenue	285
Total direct charges ...	2,00,062	Net total receipts ...	2,91,927
INDIRECT CHARGES	9,742		
Total working expenses ...	2,09,804		
Profit	82,123		
Total ...	2,91,927		

Under the rules of the Midnapore canal, water is only supplied, as a general rule, from June to November, and the ordinary water-rates fall due on the 1st February, or within the limits of the year in which the water is supplied. Under ordinary circumstances, therefore, the amount of the 'earnings' of any year should coincide with the assessments of the year. In practice, however, a small portion of the assessments do not fall due till after the close of the year to which they belong; for instance, in cases of boro rice irrigation, where the whole of the assessment cannot well be completed before the close of the official year, or of lands illicitly irrigated, where the justice of the demand is disputed by the cultivator, and the assessment is consequently delayed. It may be stated that, of the sum of Rs. 1,31,433 shown above as the amount of water-rates earned during 1888-89, Rs. 1,18,243 are assessments completed within the year, Rs. 11,900 are assessments completed after the close of the year, while Rs. 1,290 is the estimated amount of the assessments which for various reasons it has not yet been possible to complete.

RAINFALL.

39. The following table shows the rainfall for the year 1888-89 and the four previous years at five registering stations in the Midnapore district:—

STATIONS.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	Average of 19 years previous to 1888-89.
	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
Midnapore	68·00	55·38	49·39	76·20	57·19	55·97
Panchkoorah	59·47	56·21	50·56	86·03	48·84	56·27
Luchmapore	60·93	47·00	56 35	81·84	Not available.	
Mowah	60·14	49·76	55 93	81·07	Ditto.	
Contai	59·24	54·41	48·24	76·45	77·30	68·20

Of these stations, the first four only are within or contiguous to the area commanded by the Midnapore canal. The rainfall of the year, though up to

the average, was very unequally distributed, as an examination of the quantity recorded in each month from June to November will show:—

		Inches.
June	1888	3·67
July	„	18·57
August	„	21·16
September	„	6·58
October	„	1·08
November	„	0·29

The rainfall here shown for each month is the average of the quantities recorded at the four stations which lie within the irrigated tract.

LEASES AND IRRIGATION.

40. The area of all crops leased and irrigated is returned by the Deputy Revenue Superintendent in charge of the assessments at 69,777 acres. Of this area 62,374 acres were kharif lands leased for five years; while of 4,034 acres of kharif leased for one year, 122 acres were voluntarily leased, and 3,912 acres assessed on the ground of having been surreptitiously irrigated. Lastly, though the right of Government to use the water of the Cossye during the rabi months is restricted, arrangements, such as have been common of recent years, were made for the irrigation of a limited area of boro rice, and 3,369 acres were so irrigated under annual leases.

The Superintending Engineer returns the area leased and irrigated at 65,865 acres, thus differing from the return of the Deputy Revenue Superintendent by 3,912 acres. The explanation appears to be that the latter area was illicitly irrigated, and the assessment was not completed until after the close of the year. For this reason it was not included in the final month's irrigation returns of 1888-89; and the Superintending Engineer appears to have made a mistake in saying in his report that it was included.

The five-year leases in force during 1887-88 amounted to 66,628 acres, of which 32,875 acres expired on the 31st March 1888. During 1888-89 the renewals were 28,620 acres. The area of the leases which lapsed on the 31st March 1889 was 11,377 acres, an error having been made in the figures given in last year's note.

Of 69,777 acres assessed, 60,263 acres were irrigated from the Midnapore weir, 8,914 from the Panchkoorah weir, and 600 from the tidal reaches. Similar information for three years is supplied in the following table, where the percentage which the area irrigated in each year bears to that commanded and provided with distributaries is shown:—

Particulars.		Totals provided for in the revised estimate.	Midnapore Weir, Ranges IV & V.			Panchkoorah Weir, Range III and Tidal reaches, Ranges I and II.			Total.		
			1888-89.	1887-88.	1886-87.	1888-89.	1887-88.	1886-87.	1888-89.	1887-88.	1886-87.
Length of distributaries and branch canals ...	Miles.	220 12	229·04	229·04	229·04	53·25	53·25	53·25	283·19	283·19	283 19
Area provided with distributaries ...	Acres.	125,000	100,000	100,000	100,000	25,000	25,000	25,000	125,000	125,000	125,000
Area irrigated ...	„	...	60,263	59,362	62,225	9,514	6,502	7,537	69,777	65,864	69,762
Percentage of area irrigated to that commanded		...	60 26	59·36	62·23	37·9	26·01	30 15	55·82	52·64	55·81

In his summary of the irrigation season, the Superintending Engineer quotes as follows from the Executive Engineer's report:—

"The improvement on the previous year's irrigation, though slight, is still satisfactory, when the adverse circumstances under which we were placed last year is taken into consideration. The rains as stated before began to fall from September and ceased altogether in October. The demand for irrigation became general; but with the failure of the rains the discharge of the river Cossye began to diminish until in October only 800 or 900 cubic feet were available to irrigate over 65,000 acres. In November, when the crops were greatly in need of irrigation, the river discharges went down to 300 cubic feet. With careful regulation, this was made to irrigate the area leased, and it is a matter for congratulation that no general failure in the irrigated rice crops occurred on any distributary."

The conditions here described, a demand becoming more intense in proportion as the supply failed, are such as to severely test the administration of any canal; and the dual system of administration in force at Midnapore, where the negotiations with those who require the water on the one hand and the actual control of the supply on the other, rest with distinct and independent officers,

would appear to be inherently weak when subjected to such a strain. As the Collector remarks with much force:—"There was a great rush for water in September and October, and a large number of leases were executed on the mere chance of getting it." And, to quote the words of the Deputy Revenue Superintendent, "this" (the Revenue) "Department was found fault with for taking more leases than the Engineer officers could supply water with." The expediency of a change of system, under which leases should be controlled by the Engineers who already control the supply, has been strongly urged by the Revenue officers, supported by the Engineers. Such a system has, however, been already in force on the Sone canals, where its efficiency has been severely questioned, and has been the subject of prolonged and exhaustive enquiries, the report on which is now about to be submitted to the Government of India. Until a final decision has been pronounced on that report, it would be obviously premature to amend the Midnapore system after the Sone pattern.

In connection with the remarks in last year's note (paragraph 35) on this same subject, the following remarks by the Superintending Engineer are worthy of consideration when any new system is proposed to be introduced:—

"The matter of making the leases of all land irrigable from the same outlet or same distributary terminable on the same date was under consideration, and it is probable that if this system is adopted, and the rate successively year by year increased for subsequent leases entered into on the same distributary, that irrigation would become more general.

"At present the disinclination to renew until forced by absolute failure of rainfall leads largely to surreptitious irrigation, which must be very largely in excess of that reported, at the expense in a dry season of those who have leased honestly. Penalty rates are not enforced, and the dishonest irrigator finds himself admitted to a lease for the remaining years of a five-years' lease or a five-years' lease as the case may be on the same yearly rate as a lessee for the whole term, or at any rate on no worse terms than the applicant for a lease.

"This is the system on which irrigation has been worked for years in Midnapore, and a greater premium on declining to enter into leases till the last moment could not be afforded. The fact is very well appreciated by those who have entered into leases, and it is no matter for surprise if they fall into similar ways as soon as their leases expire. By insuring their crops for five years, they get no corresponding advantage.

"Were the proposed system adopted, it might be possible to apportion water more fairly in years of scanty rainfall by first attending to the wants of the lessees on the oldest leased distributary."

COMPLAINTS.

41. The number of irrigation complaints was 1,731, of which 1,647 were filed during the year and 84 pending from the previous year. 1,218 of the complaints were objections to certificates issued under the Public Demands Recovery Act, most of them in cases of surreptitious irrigation, while in other cases the applicants alleged either that no water was supplied or that the water-rates were excessive. The remaining complaints appear to have been of an ordinary character. Of 1,492 claims disposed of, 216 were decided entirely in favour of the petitioners, while the remainder appear to have been either rejected or in some cases compromised by the applicants entering into leases. The number left pending at the close of the year was 239.

DUTY OF WATER.

42. The kharif duty calculated on the discharge utilized was 164 acres per cubic foot for the area under Midnapore weir and 184 acres for that under Panchkoorah weir. The former figure, which gives a much higher duty than what was obtained last year, must be received with caution, as the calculations of the discharges on which it is based are not trustworthy.

ASSESSMENTS AND COLLECTIONS.

43. The following comparative statement shows the balances, assessments, and recoveries of water-rates on the Midnapore canal since the year 1884-85:—

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year
	Rs	Rs.	Rs.	Rs.	Rs.	Rs.
1884-85	1,44,691	1,22,321	2,67,012	1,16,807	38,993	1,11,212
1885-86	1,11,212	1,10,868	2,22,080	1,08,709	43,399	69,972
1886-87	69,972	1,06,750	1,76,722	1,08,834	17,139	50,749
1887-88	50,749	1,02,532	1,53,281	90,837	5,951	56,493
1888-89	56,493	1,23,337	1,79,830	91,016	4,041	84,773

Thus, while the whole amount recoverable, including arrears, was Rs. 26,549 more than in 1887-88, the collections were only Rs. 179 more; the percentage of collections being 50·6 as against 59·3.

Out of the sum of Rs. 1,23,337 shown in the above table as falling due within the year, Rs. 1,18,243 were water-rates of the year itself. On this the collections were Rs. 39,863 and the remission Rs. 9, the total adjustments 33·7 per cent.

The amount recoverable on account of previous years was Rs. 61,586, of which Rs. 56,493 were arrears, properly so called, while Rs 5,093 were water-rates earned in previous years, but not recoverable till 1888-89. The amount adjusted was Rs. 55,185, or 89·02 per cent.

This large reduction of arrears and the smallness of the sum (Rs. 4,041) which it was found necessary to treat as irrecoverable are satisfactory features in the returns of the Deputy Revenue Superintendent. A different view must be taken of the collection of the current demand, from which a balance of Rs. 78,372, or 66·3 per cent., is left unsettled. In partial explanation, it is stated that Rs 39,302 had of necessity to stand over; of these, Rs. 5,053 were water-rates on boro rice, which is only reaped at the end of the year, Rs. 19,338 were demands contested by the ryots which could not be collected till the objections were heard and settled, and Rs 14,911 were demands which it will probably be necessary to strike out, as good reasons for remission, in some cases insufficiency of supply, in others loss of crop from breaches in the Cossye embankment, are known to exist.

MISCELLANEOUS RECEIPTS.

44. In miscellaneous revenue, the demand was Rs. 18,870, of which Rs. 5,503 were for arrears. The collections were Rs. 12,287 and the balance Rs. 6,035. The miscellaneous receipts collected by the Executive Engineer amounted to Rs. 1,731.

CERTIFICATES.

45. The number of certificates undisposed of at the end of the previous year was 5,310. In addition, 11,201 new certificates were filed, 5,017 being for surreptitious irrigation and 6,184 for satisfaction of demands under kabulyats: 9,326 were disposed of—in 3,847 cases by the realization of the demand, while the other 5,478 cases were struck off; 7,185 cases, of which only 661 were more than six months' old, were left unsettled at the end of the year, and with these good progress has since been made. It is stated that no certificates were issued for the realisation of the current demand.

REVENUE ESTABLISHMENT.

46. The cost of revenue establishment was Rs. 24,728 against Rs. 21,600 of the year preceding. The percentage of cost on the total collections is 23·93 against 20·34. The increased expenditure is chiefly accounted for by the payment of Rs. 2,135 as headmen's fees, on which nothing was spent in the previous year. The Commissioner remarks that in the report of the Deputy Superintendent nothing is said of the effect produced by the payment of commission to headmen. The Collector says the same, and notes further that, on the other hand, an attempt has been made to reduce expenditure by eliminating one collection with and making over its work to the others; but as this was done on the assumption that the leased area would not extend beyond its then existing limit, the success of the experiment has yet to be assured. Judging by the results the experiments have not so far answered since the collections have fallen off, and the percentage of cost of collection on the demand has increased.

NAVIGATION AND TRANSPORT SERVICE.

47. The receipts under navigation increased from Rs. 1,26,574 in 1887-88 to Rs. 1,46,760 in 1888-89. The usual particulars regarding the traffic carried during the last ten years in vessels other than those of the Calcutta Steam Navigation Company are given below:—

DESCRIPTION.		1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.

(a) Exclusive of Rs. 21,428 tolls paid by the Calcutta Steam Navigation Company.
(b) By private boats, 81,940, and by the Calcutta Steam Navigation Company's steamer, 85,319.

The tollage receipts both from boats and steamers continue to advance, and are now higher than in any previous year, the increase being distributed over the whole year except for the month of August, when navigation was stopped owing to the excessive accumulation of silt at the Panchkura works. The Superintending Engineer shows that the export traffic in rice and paddy is steadily on the increase in the districts of Midnapore and Hooghly, and appears to be stimulated by a bad harvest, such as that of 1888-89, when the superiority of irrigated over unirrigated crops is more marked. Other goods of which greater quantities were carried are raw cotton, salt, piece-goods, building materials, fuel, timber and miscellaneous.

The Calcutta Steam Navigation Company continue to maintain a double daily service of steamers on the Midnapore canal. The discomfort of these vessels is made the subject of a complaint by the Executive Engineer. The tolls paid by the Company rose from Rs. 18,114 to Rs. 21,428.

FINANCIAL RESULTS.

48. The following statement shows the receipts on revenue account and working expenses of the Midnapore canal since the year 1879-80:—

PARTICULARS.	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.

* These are now shown under the suggestion of the Government of India.
If allowance be made for the increase in the establishment charges under the new method, the year under review would compare favourably with any year since 1880-81 at any rate.

EXPENDITURE ON REPAIRS.

49. The actual cost of repairs during the year 1888-89 was less than that in the previous year, and is distributed by sub-heads as shown below:—

	1888-89.	1887-88.
	Rs.	Rs.
Head works, including buildings	13,903	11,667
Main canal and branches	65,216	89,238
Distributaries	22,464	20,687
Drainage and protective works	2,113	1,990
Steamers	2,443	7,599
Total ...	1,06,139	1,31,181

HEAD WORKS.

The expenditure on the Midnapore head works was Rs. 10,551 and on the Panchkoorah head works Rs. 3,352. The expenditure on weirs was Rs. 2·70 per foot run of the Midnapore weir and Rs. 3·34 of the Panchkoorah weir against Re. 1·48 and Rs. 5·30 respectively last year. The cost of clearing silt from the locks and lock entrances situated above the two weirs was considerable. A large sum also was expended in replacing the apron of the Midnapore weir and on the shutters on the Panchkoorah weir sluices.

There is a decrease of Rs. 26,819 on the repairs of main canal and head works taken together, and an increase of Rs. 1,777 on those of distributaries. Mileage rates are worked out below:— MAIN CANAL

YEAR.	MAIN CANAL AND HEAD WORKS, &c.			DISTRIBUTARIES.		
	Length of canal, exclusive of river crossings.	Total cost of work.	Rate per mile.	Length of distributary channels.	Total cost of work.	Rate per mile.
	Miles.	Rs.	Rs.	Miles.	Rs.	Rs.
1881-82	48	1,03,910	2,164	277	11,854	42
1882-83	48	1,01,821	2,121	277	20 407	73
1883-84	48	1,06,425	2,216	277	21,195	76
1884-85	48	1,15,171	2,399	277	18,865	68
18-5-86	48	1,10,360	2,299	277	14,424	52
1886-87	48	1,20.135	2,503	283	17.617	63
1887-88	48	1,10.494	2,301	283	20,687	74
1888-89	48	83,675	1,743	283	22,464	79

The mileage rate of the main canal is much lower than in previous years, economies having been chiefly effected in earthwork charges, which fell from Rs. 59,161 to Rs. 49,758, and in repairs of navigation works, which fell from Rs. 19,162 to Rs. 4,008. In earthwork 4,176,765 cubic feet of silt were cleared by dredgers and removed at a cost of Rs. 26,387, or at an average rate of 6·31 per thousand, which compares favourably with the rate of 7·63 obtained in the previous year, and 1,931,281 cubic feet were cleared by hand and excavators at an average rate of Rs. 5·32 per thousand, which is slightly higher than in 1887-88. In addition 1,755,000 cubic feet were cleared at an average rate of Rs 8-12-6 per thousand from the first three reaches, which were closed for that purpose during April.

The cost of repairs to distributaries was Rs. 22,464 against Rs. 20,687 in the preceding year. The mileage rate for the year was Rs. 79 per mile, which is higher than that of former years; but it is explained that an expenditure of Rs. 8,039 for 4,493,278 cubic feet of earthwork had to be incurred in raising banks and clearing silt and in closing the breaches caused by the excessive floods of July and August. A certain amount of silt clearance and repairs to banks must always have to be done, whilst even if we exclude the whole sum, the balance falls at a rate of Rs. 51 per mile, which was about the rate in 1885-86, when it was Rs. 52 per mile. Since then the yearly rates have been Rs. 63, Rs 74 and now Rs. 79, and there appears to be sufficient ground for a searching enquiry as to whether the expenditure under this head cannot be reduced, since even Rs. 51 per mile appears to be higher than the rate ought to be. DISTRIBUTARIES.

The expenditure on tools and plant amounted to Rs. 24,335 against Rs. 31,409 of the previous year, and was incurred principally on repairs to the dredging plant. REPAIRS TO DREDGERS

50. The highest flood in the Cossye river, the result of heavy rainfall following in cyclonic storm in the Bay, occurred on the 25th August, when the gauge reading above Midnapore weir was 88·80 and below it 87·50, against 92·30 and 91·55 respectively, the highest recorded in 1868. Several minor floods came down the river, which caused serious silt deposits both at Mohunpore and Panchkoorah. Though very considerable damage by floods was caused to embankments both north and south of the canal by which irrigated crops are reported to have been destroyed, no damage occurred to the canal or works. FLOODS.

HIDGELLEE TIDAL CANAL.

51. On this canal, which is a major work, no capital expenditure was incurred during the year under report. The expediency, however, of incurring further expenditure on works designed for the most part to overcome the accumulations of silt, which at present interfere with the financial success of the canal, was indicated in the Chief Engineer's note of last year, and it was stated that estimates for remodelling the canal were then under the consideration of the Government of India. These estimates, amounting to Rs. 7,91,963, have now been sanctioned by the Secretary of State, and funds will be assigned as required for the completion of the improvements, with the condition, which has been

accepted by the Lieutenant-Governor, that the province shall accept financial responsibility for the work by agreeing to pay interest at the rate of 4 per cent. on all allotments made from Imperial revenues under this arrangement. The remodelling of the canal, therefore, as opposed to the original project, will be classified as a minor work.

CAPITAL ACCOUNTS.

52. The capital, interest, and revenue accounts of the Hidgellee Tidal Canal are given below :—

The receipts from tolls during the year under review amounted to Rs. 53,910 against Rs. 40,406 for the previous year, thus showing an increase of Rs 13,504. The previous year was a year of partial closure of canal for silt clearance.

54. The only receipts other than tolls are miscellaneous. These amounted to Rs. 1,260 against Rs 1,452 of the previous year. MISCELLANEOUS.

55. The following statement shows the receipts on revenue account and working expenses of the canal for the last ten years:— FINANCIAL RESULTS.

The deficit in the year's working, notwithstanding a substantial increase of Rs. 13,239 in the receipts, was anticipated in the Chief Engineer's note of last year, where it was stated that of the charges incurred for the thorough clearing of the channels in 1887-88, a large sum would not be paid till the following year. The actual amount of these payments was Rs. 39,580. The influx of silt was largely due to the deterioration which has taken place in the condition of the Russulpore river, from which the canal was formerly supplied. Since the completion of the last silt clearance the feed has been exclusively taken in at the Huldee river, and it is hoped that another closure may not be found necessary for three seasons.

56. After the heavy rains at the end of August, the southern portion of the district of Midnapore was visited by floods of great severity, and the incapacity of the natural drainage channels to relieve the inundated tracts was investigated by a committee of enquiry. The brunt of the inundation fell on the tract of country adjoining range III of the Orissa coast canal. Regarding the Hidgellee canal, it appeared that though the drainage of parts of the affected area had been to some extent obstructed by it, yet this obstruction was not one of the main causes of the floods, and any injury so caused was more than counterbalanced by the enormous benefits conferred on landlords and ryots by the protective works constructed by Government. The defects in the arrangements for passing drainage water across the canals are now being remedied, and it is hoped that by the lowering of the bed, which is a feature in the recently-sanctioned scheme for remodelling the canal, complete facilities for drainage will be afforded. The damage done to the canal was not such as to require special expenditure beyond that provided in the regular maintenance estimates. FLOODS

SONE CANALS.

CAPITAL ACCOUNT.

57. The Capital, Interest and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1 88-89.	Outlay t oend of 1888 89.

* These are now shown under the suggestion of the Government of India.

The expenditure on capital account during the year was Rs. 1,48,443. The principal works carried out were docks at Bedadi, Nasriganj, and Daodnugger; a warehouse at Bedadi, a syphon aqueduct at mile 10¾, Domraon Branch canal, and numerous permanent outlets in all divisions. The following works were all but completed at the close of the year:—Docks at Baroon Urwal, and Deegah; the Tejpoora distributary taking off from the Patna canal and the Bachori drainage cut; Telegraph offices at Baroon, Nasriganj and Ugeon; the Rewah escape, and several minor works.

EARNINGS.

58. The income calculated on "Earnings" of the year and expenditure are shown below:—

EXPENDITURE.	Amount.	Earnings.	Amount.
DIRECT CHARGES.	Rs.		Rs.
I.—Works, Maintenance and Repairs.		Water-rates	8,05,790

Total ...	8,77,512		

The water rates now shown as "earned" are the assessments on the irrigation of the year, and include for the first time those assessments which were not completed until after the close of the year.

LENGTHS OF CANALS AND DISTRIBUTARIES.

59. The following table shows the lengths of canals and distributaries open and the areas commanded and irrigable:—

DIVISION.	Navigable canals.	Branch canals.	Distributaries.	Gross area under command.	Maximum discharge of canal.	AREA WHICH CAN BE IRRIGATED.		
						Kharif.	Rabi.	Total.
	Miles.	Miles.	Miles.	Acres.	Cubic feet per second.	Acres.	Acres.	Acres.
Eastern Sone	80½	...	388	406,155	1,613	129,040	180,000	309,040
Arrah	74½	71½	467½	618,364	4,342	347,300	360,000	707,360
Buxar	56	77½	343	704,000				
Total ...	201½	148½	1,168½	1,728,509	5,955	476,400	540,000	1,016,400

An addition of 1¾ miles has been made to the length of distributaries during the year. There are, besides the distributaries included in the

above return, 14 miles of village channel maintained at the cost of Government in the Buxar Division. There is no change in the areas commanded and irrigable; the provision of parallel channels along part of the Buxar canal has, however, enabled land in their neighbourhood to be more easily and satisfactorily supplied with water, and will eventually result in some increase in the area under irrigation.

VILLAGE CHANNELS AND OUTLETS.

60. The following table shows the progress made with village channels and outlets:—

Division.	Total length of village channels completed.	Total number of temporary and permanent outlets.	Number of permanent outlets.
	Miles.	No.	No.
Eastern Sone	204½	2,033	320
Arrah	768½	2,330	737
Buxar	511½	984	274
Total, 1888-89 ...	1,484½	5,397	1,331
Total, 1887-88 ...	1,525	5,999	828

Of the village channels now in use, 185½ miles have been constructed by Government agency and 1,299 by villagers. The figures as regards channels constructed by villagers are only approximate, and the decrease in the total length is partially due to this cause; it is, however, mainly owing to the reduction in the number of outlets from 5,999 to 5,397, which has been accompanied by an increase in the area under irrigation. The construction of permanent outlets was pushed on during the year, 503 having been built in carefully chosen situations with a discharging capacity proportioned as nearly as possible to the area under lease or likely to be irrigated.

RAINFALL.

61. The following statements furnish the rainfall statistics of the Sone canal system and the distribution by canal divisions for the last five years:—

		Average of 22 stations.

The Superintending Engineer reports:—"The rainfall for the year (45·43 inches), average for all stations, over the area commanded by the Sone Canals was, it will be noted, considerably in excess of that which fell in the year preceding (40·18 inches), and it was also in excess of the average for 20 years (41·25

inches). The chief characteristics of the season, as regards rainfall, were—*First*, the late date at which the rains commenced. No rain fell at Arrah until the 2nd July, and the rains throughout the area irrigable may be said to have commenced on this date. *Secondly*, the favourable rainfall during July, August, and the first ten days of September. *Thirdly*, the almost entire cessation of the rains from the 11th of September to the 29th of November, the average fall over all canal stations for that period being 1·47 inches only. *Fourthly*, the wide variation in the falls at different stations ranging for the year from 39·03 inches at Sikroul to 52·07 inches at Nasrigunge. This variation had only a comparatively small effect on the area irrigated, as up to the 10th of September the rainfall may be said to have been generally favourable."

62. The following statement shows the area leased and irrigated during the last four years :— AREA LEASED AND IRRIGATED.

DESCRIPTION.	1888-89.		1887-88.		1886-87.		1885-86.

GRAND TOTAL ...	345,682	355,909	283,515	315,380	246,812	268,204	279,003	332,579
Percentage of leased to irrigated area	97·12		89 89		92·03		83·89	

The area irrigated was in excess of any year to date, except 1884-85, when the area irrigated was 370,661 acres. The area under annual leases during the kharif season exceeds the area irrigated. This is partly due to areas leased late in October, to which water could not be supplied in time to be of service, but mainly to the strenuous efforts which were made to confine the water within the leased areas. Unauthorized irrigation in the kharif season has practically disappeared.

It will be noticed that compared with the previous year there has been a decrease of 10,260 acres under five-years' lease. It is not to be inferred that there has been any reduction on the area actually irrigated. Applications for five-year leases for 15,050 acres were either declined by the Canal Officers or withdrawn, chiefly the former for reasons given in the extract from the Sub-Engineer's report quoted in the next succeeding paragraph.

The Sub-Engineer was given authority to cancel five-year leases with the result that no single application was declined, and leases for 1,456 acres only cancelled. This may be taken, with leases for 529 acres subsequently cancelled, as the full area on which the lessees were dissatisfied with their bargain.

Out of the 200,102 acres irrigated under five-years' lease, it is estimated that 154,825 acres, or 77·3 per cent., were cultivated under kharif; 27,408 acres, or 13·6 per cent., under rabi; and 17,869 acres, or 8·9 per cent., under sugarcane crops.

The statement below shows the area irrigated during the year and the two preceding, as well as 1884-85, the largest on record, classified by crops—

	1888-89.	1887-88.	Difference.	1886-87.	1884-85.
	Acres.	Acres.	Acres.	Acres.	Acres.
Kharif	224,453	220,428	+ 4,025	177,510	246,740
Rabi	97,225	56,090	+ 41,135	45,361	99,280
Sugarcane	22,469	25,007	— 2,538	30 055	23,682
Total ..	344,147	301,525	+ 42,622	252,926	369,702
Add—Hot-weather irrigation ...	11,762	13,855	— 2,093	15,278	959
Grand Total ...	355,909	315,380	+ 40,529	268,204	370,661

In 1887-88 there was a sharp demand for canal water during the kharif season checked by a copious fall of rain on the 13th October which had an important effect in limiting the area under rabi irrigation during that year. The year under review is perhaps more fitly comparable with 1884-85, in which 14,752 acres more were irrigated. The rainfall in 1888-89 was 45·43 inches for the year and 24·61 inches during the kharif season, the corresponding figures for 1884-85 being 30·26 inches and 18·00 inches; the period of great demand being during October in 1889 and during August and September in 1884.

63. The system pursued was not altogether the same. In 1884-85 but little attempt was made to restrict the supply of water to the area under lease, and irrigation previous to the issue of a permit was not rigorously suppressed, nor were the rules regarding the existence of proper village channels enforced. In 1888-89 the most strenuous efforts were made to prevent unauthorized irrigation, and generally to enforce the provisions of the law and rules. The procedure adopted is detailed in the extract from the Superintending Engineer's report quoted below:—

"Up to the middle of September the season, though the rains were late in commencing, was not unfavourable, but from the commencement of the *Hathia*, the 26th of September, rain was eagerly looked for, and none falling by the beginning of the *Chitra*, the 9th of October, the demand for canal water became urgent and pressing Applications for permits poured in from all sides, and the greatest eagerness to irrigate leased areas was manifested.

"It had been determined at the beginning of the season to abstain from in any way pressing cultivators to enter into leases. Whilst every possible assistance was given, if desired, they were left to decide the matter entirely in accordance with their own view of their own interests. When applications were tendered, the size of outlet allowed was fixed as nearly as possible in accordance with the discharge required to irrigate the area proposed to be leased, so that unauthorized irrigation on any considerable scale would not be possible. It was explained that a *tatil* would be enforced These measures were in some localities not popular, and several applications were in consequence not completed. Many applications for leases, five-year and annual, were refused until proper channels were provided, and altogether declined where there was doubt as to the supply of water available, or where the block proposed was such that unauthorized irrigation was certain to occur. These causes and the hope that holding off from applying for leases might induce Government to reduce the water-rates had considerable effect in lessening the area under lease when the urgent demand for water commenced about the 3rd of October. In many cases it was then too late; channels could not be provided in time, nor could water be given within the few days during which the crop could live without irrigation."

The area irrigated in October was in fact practically limited only by the quantity of water available, and the facilities which existed or could be improvised for leading it to the fields From the 16th to the 25th of October, an average of 2,415 cubic feet of water per second were passed down the Arrah canal, which was designed to carry 1,660 cubic feet per second only. In 1884-85 the sharp demand occurred in August and September, so that the time during which irrigation could be usefully effected was more protracted, and under the same circumstances, the area irrigated in 1888-89 would probably have been in excess of the results of that year. Of the late irrigation about 5,000 acres reported as leased or irrigated chiefly in the Arrah Division could not be assessed on various grounds, and if the financial interests of the canals were the only consideration, there is little doubt that it would be best to refuse permits after the 20th of September. It is a matter for consideration whether under such circumstances previous payment in part at least should not be insisted on. The area noted above, having been decided not to have been irrigated in a legal sense, has been excluded from all the returns.

There was a general failure of the rains in Behar, so that it was considered desirable that an account of the kharif irrigation of the year for the Sone canals should be published at an early date for general information. A note on the subject was accordingly published in the *Calcutta Gazette* for the 9th January 1889.

The large increase in the rabi irrigation was chiefly due to there being no rain in October and November, though the reduction in rate of from Rs. 2-8 to Rs. 2 per acre for flow irrigation for the year only had some influence in inducing applications, the major part of which must in any case have been filed, as the ground was so dry that the seeds would not germinate without artificial irrigation.

64. Whatever difference of opinion may exist as to the procedure to be adopted as regards irrigation or the rates to be charged, the advantage reaped by the country generally from the Sone canals during 1888-89 is unquestionable, and the Superintending Engineer appears to have full justification for the observations made in the extract from his report which follows:—

"There can be no doubt as to the benefits the Sone canals conferred on the districts which they traverse during the year 1888-89. The failure of the rice crop outside the area commanded by the Sone canals was nearly complete; the aharas in which there was any water in the first week of October being few and far between. The situation was complicated by the necessity of blocking early in October four vents in the Dehree river sluices of the Sone weir. As narrated in an extract from a report on the kharif irrigation of the year, quoted in paragraph 4, this operation was carried out in 15 hours, during which time only was the supply of the canals partially shut off. There was at the time considerable sickness amongst the sectional officers, and substitutes, even inefficient, could not be procured. The brunt of the work fell on the Subdivisional officers, amongst whom were one European and three native upper subordinates, and sick or well, they threw themselves into the work with a vigour which in my opinion deserves the commendation of Government. The Divisional officers were no less energetic and self-sacrificing in directing operations. The result of the efforts made is generally admitted to have been successful. A pamphlet by a native gentleman, a pleader and landowner, in which a view, certainly not favourable to canal irrigation, is taken, thus speaks of the operations of the year:—'It is almost admitted that in the year under review the canal authorities have worked better in all the departments than in previous years. The supply of water was satisfactory, the prayers of the cultivators were attended to, and, generally speaking, the arrangements were good.' It is fair to say that he adds:—'In fact, the successful management of this year carries with itself condemnation of the system.' The main difference between the system adopted during the year and that previously in force was the determined effort made to prevent water being taken until permits had been granted. The supply of water was rigorously limited to the area leased, and criminal prosecutions instituted, wherever possible, when water was misappropriated. The system was somewhat relaxed after the 10th of October with decidedly unfavourable financial results to Government, but some benefit to the cultivators. It was remarked in last year's report that efforts were made to remove all well-founded grounds of complaint brought to light during the sittings of the Sone Canal Committee, and this policy was continued during the year. It is fully recognized that lasting contentment will only result by securing irrigating cultivators full crops, and that anything short of this standard will, whatever may be the measure of the benefits derived compared with the water-rates paid, lead to complaints which, though ill-founded, are to be avoided."

65. The areas actually irrigated in each of the executive divisions during the last five years are shown below:—

YEAR.	EASTERN SONE DIVISION.				ARRAH DIVISION.				BUXAR DIVISION.				TOTAL FOR ALL DIVISIONS.			
	Annual leases.				Annual leases.				Annual leases.				Annual leases.			
	Kharif and rabi.	Sugarcane and hot-weather.	Five-year leases.	Total.	Kharif and rabi.	Sugarcane and hot-weather.	Five-year leases.	Total.	Kharif and rabi.	Sugarcane and hot-weather.	Five-year leases.	Total.	Kharif and rabi.	Sugarcane and hot-weather.	Five-year leases.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
5 ...	46,831	1,328	28,136	72,993	97,490	4,556	82,573	184,619	64,909	4,137	48,801	117,047	208,930	10,721	161,510	370,661
6 ..	26,294	1,041	27,945	49,180	58,984	6,921	95,233	157,021	36,140	13,523	50,907	120,569	121,418	21,385	179,784	322,579
7 ...	11,569	1,216	34,194	47,379	21,710	20,300	98,737	140,747	13,165	5,288	61,625	80,078	46,744	26,804	194,556	268,204
8 ...	20,899	679	40,123	61,201	25,982	11,079	102,423	141,484	38,715	6,362	67,618	112,695	85,096	20,120	210,164	315,380
9 ..	29,470	408	37,117	66,995	52,269	11,591	101,489	165,349	37,706	4,363	61,406	123,585	139,445	16,362	200,102	355,909

The reduction in the area under five-year lease is due as has been mentioned in paragraph 62 above to leases being refused where the channels were not in good order or the blocks unsuitable. In some cases applications were withdrawn, as the cultivators were unwilling to accept the outlets proposed which are now recorded in the permit.

The proportion of *flow* to *lift* irrigation for the last five years is shown below:— FLOW AND LIFT.

	1888-89.		1887-88.		1886-87.		1885-86.		1884-85.	
	Flow	Lift.	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.
Proportion	93·4	6·6	95·2	4·8	96·5	3·5	95	5	93	7

DUTY OF WATER

66. The following statement shows the duty obtaining in the year under review and in the years 1887-88 and 1884-85 :—

				Eastern Main Canal Series.	Arrah Canal System.	Buxar Canal System.	Western Main Canal Series.	Sone Canals.
1888-89	Kharif	Acres		55,559	120,758	70,605	191,383	240,922
		Duty on gross supply		49·4	68·7	80·1	71·8	65·2
	Rabi	Acres		15,547	47,165	56,982	104,147	119,694
		Duty on supply utilized		56·5	73·01	94·9	83·5	76·7
1887-88	Kharif	Acres		54,733	112,505	78,197	190,702	245,435
		Duty on gross supply		54·4	85·5	81·2	82·4	73·9
	Rabi	Acres		11,111	31,590	38,396	69,986	81,097
		Duty on supply utilized		43·9	65·9	84·9	75·09	68·5
1885-86	Kharif	Acres		39,532	1,24,441	80,661	205,102	244,634
		Duty on gross supply		45·4	88·7	97·0	93·6	79·9
	Rabi	Acres		12,324	44,946	47,371	92,317	104,641
		Duty on supply utilized		42·8	128·0	116·1	121·7	99·0
1884-85	Kharif	Acres		61,849	133,307	75,266	208,573	270,422
		Duty on gross supply		47·1	79·1	74·3	74·2	65·6
	Rabi	Acres		13,103	64,125	45,734	109,859	122,962
		Duty on supply utilized		37·2	142·5	157·7	148·4	113·6

N B.—Sugarcane is included in both kharif and rabi.

As the year 1884-85 was that in which the largest area was irrigated, it has been selected for comparison in place of 1886-87, which was a year of such plentiful rainfall that as stated last year its results are not of much value as standards of comparison.

The main result for 1888-89 the duty in the kharif season for the Sone canals, 65·2 acres, per cubic foot per second of gross supply approaches very nearly to 65·6, the figures for 1884-85, although in the latter year the rainfall was much more favourable.

For a short base, ten days (11th to 20th October 1889) against fourteen days (29th September to 12th October 1887), the duty *on the rice crop alone* for the Sone canals falls to 42·3 acres in 1888-89, against 45 acres in 1887-88.

In the Arrah Division the quantity of canal water utilized in irrigation during the four months July to October is calculated by Mr. Inglis, Executive Engineer, Arrah Division, to be equivalent to 2·93 feet over the area watered in 1888-89, and 2·6 feet in 1887-88. Taking the drainage area, it is equivalent to 7·2 inches of rainfall of effective rainfall, against 5·7 inches in the previous year.

The Superintending Engineer gives the particulars tabulated below regarding some experiments carried out in the Arrah Division on the quantity of water used in irrigating definite areas from specified outlets:—

Dutributary.	Size of outlet.	Number of days discharging.	Average discharge.	Area irrigated.	Area irrigated per cubic foot per second.	Date from which open.
Bichiaon	9″×12″	11	2·8	54 15	2·76	2nd October 1888.
Kaithi	9″ diam	11	2·37	45·6	1·74	6th August „
Kaithi	Same outlet	11	2·72	42 28	1·41	23rd Sept. „
Kaithi	6″ diam.	12	1·09	21·0	1·6	Ditto „
Behcea R. P. C. ...	15″×18″	9	3·46	116·4	3·46	3rd October „

The results are discordant, and the omission of information as to the nature of the soil, the distance of the outlet from the block irrigated, the number of days elapsed since the last irrigation and since the last rainfall, and the extent of the latter in inches, &c, prevents any useful deductions being made. At the same time the experiments point to a direction in which much useful work can be done, as with a demand in the kharif season, which even now the canals are unable to meet it, is imperative that whilst a sufficient supply of water shall be allowed the utmost economy, which can only be effected at the outlet, should be practised.

The duty in the rabi season was slightly higher than in the previous year. The matter is not of practical importance, as the area of rabi crops irrigated did not nearly approach that for which water was available.

CROP EXPERIMENTS.

67. The results of experiments carried out by canal officers on the outturn of crops irrigated by canals and otherwise have been noticed in former reports The evidence given before the Sone Canals Committee showed that the value of these experiments was questioned, and accordingly in 1888-89 the matter received more than ordinary care. The extract from the Superintending Engineer's report quoted below deals with the difficulties experienced in obtaining comparative results, and narrates the course pursued during the year under review:—

"Former reports have compared the yield of crops irrigated by the canals and those matured without their aid. It has always been recognized that crop experiments, whilst valuable as showing the quantities of grain and straw produced in each case, could not be relied on as an absolute test of the producing power of the land under canal and non-canal irrigation. It was not possible to select plots cultivated under precisely similar conditions, differing only in the means of irrigation employed, and in many parts of the country it was difficult to find rice crops not under canal irrigation. Again, it had been asserted before the Sone Canals Committee that not only was the crop produced by the aid of canal water inferior, but that the longer the land was irrigated, the less the produce became. Complaints were also made that the experiments were not conducted under conditions where the public could have the opportunity of being present and watching the process. Independently of the circumstances of the year, it had been determined to confine the experiment for the most part to canal-irrigated crops, and, as a matter of fact, no other course would have been possible, as rice crop over the area commanded failed where canal irrigation was not available

"The services of a Covenanted Civilian were placed at the disposal of the Public Works Department, so that the result of a series of experiments carried out by an officer not belonging to the Canal Department might be recorded. The co-operation of Messrs. Burrows, Thomson and Mylne, who have always been ready to assist, in every way, the officers of the Irrigation Department, was solicited, and the Collectors of the districts concerned asked to instruct Subdivisional Magistrates to themselves make a few experiments if possible. In the case of experiments carried out by canal officers, the nearest Magistrates, as well as zemindars and ryots, were asked to be present. The publicity thus given to the experiments did not, in all cases, meet with the approval of the cultivators, who would have preferred the matter to have remained a subject of controversy. The instructions issued were to the effect that the crops experimented on should be good crops, and that the weighment should take place on the field."

The results of the experiments are given in the table which follows, which is abstracted from the figures contained in Mr Luson's report:—

Crop.	Name of officer conducting experiments.	Number of experiments.	Average yield, dhan.	Number of experiments.	Average yield, straw.
			Mds. s		Mds. s.
Transplanted ...	Mr. H. Luson, c s. ...	25	33 $39\frac{1}{25}$	25	47 $17\frac{11}{25}$
Aghani dhan ...	Messrs Burrows, Thomson, and Mylne	26	31 $5\frac{1}{5}$	26	52 $22\frac{9}{13}$
	Canal Subdivisional Officers	83	35 $6\frac{17}{24}$	31	68 $14\frac{1}{15}$
	Canal subordinates ...	138	31 $30\frac{17}{138}$	134	55 $38\frac{11}{18}$
Kartika dhan...	Mr. H. Luson, c.s. ...	3	35 $1\frac{1}{3}$	3	46 $36\frac{4}{75}$
	Messrs. Burrows, Thomson, and Mylne	25	26 $37\frac{7}{24}$	25	46 $5\frac{107}{225}$
	Mr. G. C. Maconochy, c.s. ...	2	31 $4\frac{1}{6}$	2	56 $29\frac{1}{8}$
	Subordinate, Agiaon ...	1	14 $19\frac{1}{3}$	1	33 6
Broadcast dhan	Mr. H. Luson, c.s. ..	2	22 22	2	31 $22\frac{6}{25}$
	Messrs Burrows, Thomson, and Mylne ...	1	23 14	1	36 32
	Canal Subdivisional Officers	3	37 $11\frac{1}{3}$	1	54 0
	Canal subordinates ...	2	33 $7\frac{1}{3}$	2	39 $13\frac{1}{3}$
	Average ...	261	31 $32\frac{9}{16}$	253	54 $32\frac{1}{4}$

The figures given above are not the actual weighments, but the weighments reduced by one-twelfth in the case of dhan and one-third in the case of straw in those cases where the crop was weighed wet on the field, this representing the loss which Mr. Luson found by actual experiment to occur in drying.

It must not be forgotten that the experiments were not on the yield of average crops, which were those selected in former years, but of the yield of the best crops. Mr. Luson, however, states that after a personal inspection of

nearly half the whole irrigated area in Shahabad, Patna, and Gya, he estimates the average outturn of irrigated dhan for the year to be $18\frac{7}{10}$ maunds of paddy per acre, or $12\frac{7}{15}$ maunds of rice.

The average of 1,227 experiments made by canal officers and subordinates from 1880-81 to 1887-88 on the yield of *average* crops is $16\frac{5}{20}$ maunds per acre of paddy, against $18\frac{7}{10}$ maunds, the yield of *average* crops in 1888-89, as estimated by Mr. Luson, based on experiments on good crops. Of the 25 experiments carried out by Mr. Luson himself, 23 were on land which had been continuously irrigated for nine years and upwards, and 16, by either Mr. Luson or Messrs. Burrows, Thomson, and Mylne, were on crops produced on *kerail* soil which has been stated to be unsuited for canal irrigation; the average yield of good crops being, nevertheless, 34 maunds $15\frac{7}{16}$ seers.

The fact that almost any soil will under favourable circumstances if regularly irrigated produce 34 maunds of dhan per acre can scarcely for the future be questioned.

In wheat, 57 experiments were made, and the balance both in grain and straw is in favour of canal water; but this result is reversed in three experiments made on barley.

DEMANDS AND COLLECTIONS.

68. The following statement shows the demands, collections, and balance of water-rates for the last five years:—

YEAR.	DEMAND.			Remissions.	Net demand.	Collections.	Balance.	Percentage of collections to current demand.
	Arrears	Current.	Total.					
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1884-85	4,23,793	11,15,399	15,39,192	73,625	14,65,567	7,70,359	6,95,208	69·0
1885-86	6,95,208	8,07,702	15,02,910	1,26,266	13,76,644	9,78,323	3,98,321	121·1
1886-87	3,98,321	6,95,086	10,93,407	35,364	10,58,043	8,26,461	2,31,582	118·9
1887-88	2,31,582	7,25,810	9,57,392	26,525	9,30,867	5,19,586	4,11,281	71·5
1888-89	4,11,281	7,53,217	11,64,498	24,329	11,40,169	7,59,556	3,80,613	100·8

As usual, the figures given above are taken from those compiled by the Examiner of Accounts. The balance at the commencement of the year agrees exactly, and that at the close of the year very nearly, with the figures given by the Commissioner and Collector; there are differences in the remaining columns which approximately balance each other, the discrepancy at the close of the year being Rs. 4 only. The current demand includes Rs. 1,45,277 which, though due, are not legally recoverable until after the 1st of April.

ARREARS.

69. The extent to which not only the current demand, but also the arrears of 1887-88 and earlier years have been worked off, is shown in the statement following. The figures are obtained from statements attached to the Commissioner's report:—

	Demand of 1888-89 how composed.	Collected or remitted.	Percentage of demand adjusted.	Balance outstanding at close o year.
	Rs.	Rs.		Rs.
Arrears of 1885-86 and previous years... ...	33,330	16,648	49·9	16,682
„ 1886-87	25,848	17,066	66·0	8,782
„ 1887-88	3,52,103*	2,95,630	83·9	56,473
Total of arrear demand outstanding on 1st April 1888	4,11,281	3,29,344	80·0	81,937
Current demand of 1888-89...	7,50,340	4,51,660	60 2	2,98,680†
Gross demand, including arrears	11,61,621	7,81,004	67·2	.....
Total outstanding at close of year	.....	.....	.....	3,80,617†

* Includes Rs. 1,30,550 not legally recoverable within the year 1887-88.

† Includes Rs. 1,45,277 not legally recoverable within the year 1888-89.

There has been a small diminution in the arrear balance on the 1st of April 1889, as compared with that on the 1st of April 1888. The balance due on account of the year immediately preceding that current has increased from Rs. 25,846 to Rs 56,423, whilst the balance an account of previous years has been reduced from Rs. 33,329 to Rs. 25,464.

The effect of the agitation which led to the appointment of the Committee had an unfavourable effect on the collections of the year, the Collector of Shahabad giving it as his opinion that "the work was thrown back by nearly two years." He adds "that instances have come to the notice of our officers where the rate-payers of certain villages expressed their regret that they ever joined the agitation and withheld payment, inasmuch as the pressure of accumulated arrears was too much for them." As regards the current year's demand, the Superintending Engineer notices that the demand statements reached the Collector at a later date than usual, a result ascribed to two causes—1st, the detention of demand statements including items to which objections had been preferred until a decision had been arrived at, and 2nd, the increased area under irrigation. Complaint is made in the Collector's reports of the delay which, as noted above, occurred in the receipt of the demand statements, the reasons given by the Sub-Engineer for their late despatch must be accepted as fairly satisfactory.

70. The following statement compares by districts the operations of the year under review with those of the preceding year:—

District.	Arrears due for irrigation effected in previous years.				Demands for irrigation effected in 1888-89.			
	Percentage of total demand.				Percentage of total demand.			
	Demand.	Collections.	Remissions.	Outstanding at end of year.	Demand.	Collections.	Remissions.	Outstanding at end of year.
Shahabad—								
1888-89	100·0	78·7	4·8	16·3	100·0	66·2	0·3	33·4
1887-88	100·0	66·0	13·8	20·2	100·0	54·8	0·7	44·5
Patna—								
1888-89	100·0	53 2	8·7	38 0	100·0	18 6	0·02	81·3
1887-88	100·0	45·5	5·6	48·9	100 0	22·0	0·2	77·8
Gya—								
1888-89	100 0	88·4	0·3	11·2	100·0	48·6	1·0	50·3
1887-88	100·0	89·0	1·7	9·3	100 0	43·2	0·2	57·6
Average—								
1888-89 ... ... .f. ...	100·0	74·9	5·1	19·9	100·0	59·8	0·3	39·8
1887-88	100·0	64·8	9·7	25·5	100·0	50·7	0·5	48·8

The Commissioner of Patna makes the following observations on the percentage of the total demand, arrears and current, collected during the year:—

"From the above figures it will be seen that in Shahabad 72 per cent. of the total demand was adjusted during the year under report—a result which may be considered fair; while the adjustment in Patna was only 41, which is not satisfactory. The Collector of Patna states that the present circle officer has effected some improvement in the collections, but there is yet much room for further improvement."

The Executive Engineer of the Eastern Sone Division states that the delay in recovering arrears must cause loss of revenue to Government, and has generally a demoralizing effect on the cultivators.

If the demands received in March, which are practically not recoverable during the year, are excluded, the percentage of collections to the total demand, including arrear balances, is for Gya 65 per cent., Patna 38 per cent., and Shahabad 77 per cent.

The result of the year's collecting operations has been good in Shahabad, fair in Gya, but very bad in Patna.

REMISSIONS.

71. The remissions granted during the year are Rs. 2,196 less than those of the preceding year, as shown below:—

	1888-89.	1887-88.
	Rs.	Rs.
By canal officers	10,776	6,911
By civil officers	13,553	19,614
Total ...	24,329	26,525

The statement above is based on the figures contained in the Examiner's accounts.

For the purpose of comparing the accuracy of the demand statements of the year with those of that previous it is necessary to take into account refunds and cancelled demand statements not replaced by others of equal amount. Taking into account these items, which are equally remissions and excluding remissions by civil officers the figures for the last two years are shown below:—

	Rs.
1888-89	16,234
1887-88	18,813

Remissions by civil officers are those arrears which it was found necessary to write off as irrecoverable owing to the persons assessed having absconded or become bankrupt.

The remissions by canal officers may be divided thus:—

	Percentage of remissions and refunds to gross demand.	
	1888-89.	1887-88.
Eastern Sone Division	1·09	0·74
Arrah Division	0·72	1·95
Buxar Division	1·20	1·24

showing, except in the case of the Eastern Sone Division, a further advance on last year's results, which were considered to be satisfactory.

From the Examiner's accounts it would appear that the totals of refunds, remissions and irrecoverable item amounted to Rs. 36,940 in 1888-89 and Rs. 41,856 in 1887-88. These are *actuals* and include items of former years finally dealt with in 1888-89. On this question of remissions and refunds further information is necessary, so as to show what percentage of the assessments of any year are finally remitted, refunded or written off as irrecoverable. The percentage in Bengal on account of the peculiar circumstances under which irrigation there is effected, must always be considerable as compared with other Provinces, but undoubted progress is being made, and it is desirable to show this. The matter should not be lost sight of.

REVENUE ESTABLISHMENT.

72. The expenditure on the Revenue establishments employed during the last two years is shown below:—

	1888-89.		1887-88.	
	Amount.	Percentage on collections.	Amount.	Percentage on collections.
	Rs.		Rs.	
Permanent and temporary establishments, such as zilladars, ameens, &c. ...	(a)54,325	7·15	(b)53,254	10·25
Establishment employed under Collectors ..	33,316	4·38	30,466	5·85
Headmen's and patwaries' fees ...	70,608	9·30	51,523	9·92
Total ...	1,58,249	20 83	1,35,243	26·02

(a) Inclusive of Rs. 2,270 for water regulation establishment.
(b) Ditto 2,334 ditto ditto.

The above figures have been taken from the Examiner of Accounts' memorandum.

There is a small increase in the expenditure on the establishment employed under both the Engineers and Collectors, due to the larger area irrigated and the increased collections. The increased sum disbursed on account of headmen's fees includes Rs. 10,949 wholly in the Arrah Division of arrears previous to 1887-88 disbursed in 1888-89, and to that extent the expenditure is unduly high; the remaining increase is a consequence of the increase in the area irrigated and in the collections.

COST OF MEASUREMENTS, &C., PER ACRE.

73. The following statement shows the approximate cost of measuring lands brought under assessment during the year under review and of preparing demand statements:—

Divisions.	Areas measured during the year and assessed.	Cost of measuring crops.		Cost of preparing demand statements.	
		Total.	Per acre.	Total.	Per acre.
	Acres.	Rs	Pies.	Rs.	Pies.
Eastern Sone	34,356	713	3·98	1,017	5 68
Arrah	70,483	2,838	7·73	2,518	6·85
Buxar	72,469	2,483	6 57	1,630	4·32
Total, 1888-89 ...	177,308	6,034	6·53	5,165	5 59
Total, 1887-88 ...	151,069	5,533	7 00	4,594	5·83

It will be seen from the above table that the increase in the area assessed has been followed by a reduction in the cost per acre of making the assessment.

COMPLAINTS.

74. The Superintending Engineer has attached to his report very complete lists of complaints and applications received during the year divided under three main heads:—(I) Objections to demand statements or ordinary applications for remission; (II) Complaints against orders actually passed other than those imposing an assessment; (III) Applications in connection with irrigation not involving complaints against orders passed by or the action of canal officers. Both complaints and applications are classified under numerous heads and sub-heads in appendices XIV and XV to the Superintending Engineer's report. In former years a less elaborate classification was adopted, but the numbers of complaints for the last two years can to a certain extent be classified under the main heads mentioned above, and figures showing the results are given in the subjoined table:—

Division.	(I.)—Ordinary remission.				(II to IV.)—Other complaints.			Total complaints received during year, excluding those pending from previous year.	Pending.
	Received during the year and pending from previous year.	Disposed of.		Pending.	Received during the year and pending from last year.	Disposed of.	Pending.		
		Remission allowed.	Remission refused.						
	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone ...	1,512	483	559	470	56	47	9	1,518	479
Arrah	3,591	1,094	1,562	935	441	357	84	3,688	1,019
Buxar	1,867	624	339	404	220	207	13	1,864	417
Total, 1888-89 ...	6 970	2,201	2,960	1,809	717	611	106	7,070	1,915
Total, 1887-88 ...	6,743	2,385	3,838	625	Not recorded.				

Of the 5,161 complaints regarding assessment disposed of, remission was allowed in 42·6 per cent. of the cases, against 37·3 per cent. in the previous year. The Superintending Engineer remarks that the small increase in the number of complaints is apparent rather than real owing to the fact that not unfrequently the same complaint is made to the Subdivisional Officer, the Executive Engineer, the Collector, and the Superintending Engineer, each of which now appears as a separate number in the register. The demand for water in October for new irrigation also led to many complaints, as the cultivator is never satisfied to pay water-rates unless the crop is satisfactory, and this was necessarily not the case where water was applied for and received at the last moment. The explanation may be accepted as sufficient as regards the apparent increase in the numbers of complaints, there being no doubt that it is due to a more rigid enumeration of the number of complaints, and the character of the season being such as to induce objections to the assessments. The same cannot, however,

be said as to the number of complaints pending at the close of the year, especially in the Arrah Division, for which no sufficient reason has been given.

APPEALS. 75. During the year 23 appeals against the orders of canal officers were prefered to the Collector; of these 3 were allowed, 15 dismissed, and 5 pending at its close.

CERTIFICATE PROCEDURE. 76. The number of certificate cases filed and disposed of during the year under review, as compared with the year preceding, in the districts of Shahabad, Patna, and Gya, is shown below:—

	Shahabad.				Patna.				Gya.			
	1888-89		1887-88.		1888-89.		1887-88.		1888-89.		1887-88.

Cases disposed of—												
1. By being struck off owing to the demand having been remitted.	516	5,512	2,846	16,054	1,425	4,226	465	1,943	90	4,461	80	205
2. By being wholly satisfied .	2,879	42,838	4,466	35,403	1,427	3,496	1,713	4,773	116	577	95	451
Total .	3,395	48,350	7,312	51,547	2,853	7,722	2,178	6,715	206	5,040	125	656
Balance outstanding at the close of the year.	520	6,567	967	17,943	2,323	19,535	4,045	21,154	100	6,995	167	2,991

From the above it will be seen that inclusive of 5,179 cases pending at the commencement of the year, there were 9,395 for disposal, covering a sum of Rs. 94,207. In 2,031 cases for Rs. 14,200 the demand was remitted, whilst in 4,422 for Rs 46,910 the demand was fully satisfied The number of cases pending at the close of the year was 2,942, the sum outstanding being Rs. 33,097. The Collector of Shahabad observes that remissions were mostly due to the cases covering bad and irrecoverable debts, and draws attention to the satisfactory decrease, compared with the preceding year, in the number of cases pending at its close. The excessive percentage of cases struck off in the Patna district is probably not unconnected with the delay in making collections, commented on in paragraph 65 of this note.

NAVIGATION RECEIPTS. 77. The tables below show the navigation revenue and tollage receipts for the last five years:—

NAVIGATION RECEIPTS.

Year.	Eastern Main Series.			Western Main Series.			Total.	Total tollage only.
	Number of miles open.	Tollage receipts.	Transport service receipts.	Number of miles open.	Tollage receipts.	Transport service receipts.		
	No.	Rs	Rs.	No.	Rs.	Rs.	Rs.	Rs.
1884-85	86½	23,053	1,304	132½	14,280	13,122	51,761	37,333
1885-86	86½	19,579	...	132½	22,133	4,531	46,243	41,712
1886-87	86½	22,506	54*	132½	27,159	4,535*	54,254	49,665
1887-88	86½	27,6*2	95*	132½	23,362	4,825*	55,904	50,984
1888-89	86½	24,876	80*	132½	27,286	5,607*	57,829	52,162

* There is no longer any Government transport service. These receipts are on account of hire of steamers, boats, and sundries.

TOLLAGE (ASSESSED).

Year.	Patna Canal System - Eastern Main Canal Series.	Arrah Canal System.	Buxar Canal System.	Total.
	Rs.	Rs.	Rs.	Rs.
1884-85	23,142	10,316	3,937	37,395
1885-86	19,523	14,808	7,388	41,719
1886-87	22,646	18,289	9,001	49,936
1887-88	28,206	15,306	8,030	51,542
1888-89	25,165	18,421	8,826	52,412

78. COMPARISON OF TRAFFIC. TRAFFIC

		1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
Number of miles open	No.	218½	218½	218½	218½	218½
Toll collections	Rs.	52,412	51,542	49,436	41,719	37,395
Rate of toll per mile	„	240	236	249	191	171
Boats, including empties ...	No.	8,096	8,116	8,573	7,210	6,434
Tonnage of boats	Tons	104,788	95,082	104,835	77,006	61,744
Estimated value of cargo, including rafts	Rs.	58,04,029	56,80,508	64,65,651	36,41,863	41,10,598

The decrease in the tollage levied on the Patna canal system, which is wholly under the head Tollage on rafts, is more than covered by increased tollage assessed during the year in the other canal systems. The decreased tollage on rafts is stated to be due to the stock of bamboos at Patna being in excess of the demand. The remaining variations do not appear to call for remark.

79. The expenditure on navigation establishment was Rs 13,071, against Rs 13,212 in the previous year NAVIGATION ESTABLISHMENT

80. There is no Government Steam Transport Service on the Sone canals, but three steamers, the property of Government, are hired to a contractor, who maintains a weekly service on the Patna canal, and a bi-weekly service on the Arrah and Buxar canals. The services are regularly maintained, and are understood to be popular, though the speed, owing to various considerations, is slow, barely averaging, including stoppages, four miles an hour. TRANSPORT SERVICE.

81. The miscellaneous receipts for the last five years are given in the following statement:— MISCELLANEOUS RECEIPTS

		1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
		Rs.	Rs.	Rs.	Rs.	Rs.
Sale of water		387	370	702	1,742	582
Plantations		383	394	319	307	178
Other canal produce		1,816	2,145	2,904	2,424	1,339
Water power		835	708	668	469	488
Rent of buildings		8,247	7,197	7,198	7,213	6,409
Fines		224	317	169	653	734
Miscellaneous ...	Rent of lands	7,995	10,997	15,231	14,369	13,770
	Fisheries	734	502	565	421	732
	Cost of process	3,739	2,474	6,302	6,414	7,066
	Sale of old materials ..	102	60	443	355	405
	Other items	2,042	3,295	3,213	3,713	8,651
	Total ...	26,504	28,459	37,714	38,080	40,354

The only considerable decrease has been under the head rent of lands. It was last year explained that it had been found necessary to retain possession of land likely to be required for repair purposes owing to difficulties experienced in reclaiming it when required.

82. The state of the plantations in each division at the close of the years 1887-88 and 1888-89 is shown in the following statement:— PLANTATIONS

Division.	1888-89.				1887-88.				Increase.	Decrease.
	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.		
	No.	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone	71,473	30,366	53,530	155,376	64,280	28,334	59,440	152,054	3,322	...
Arrah	35,871	23,379	61,019	120,268	31,503	15,274	54,844	101,621	19,247	...
Buxar	13,438	6,973	23,306	43,716	9,693	14,765	18,327	42,785	931	...
Total ...	120,787	60,719	137,854	319,360	105,476	58,373	132,011	295,860	23,500	...

The expenditure on plantations was Rs. 8,929, and the receipts Rs. 383, against Rs. 8,300 and Rs. 394, the respective amounts in the previous year. The plantations have not yet arrived at a stage in which any substantial sums

can be expected to be received as earnings, but there is a satisfactory progressive increase in the number of trees which require little or no outlay in keeping up.

FINANCIAL RESULTS.

83. The receipts on revenue account and working expenses of the Sone Canals for the year 1888-89 and the nine preceding years are shown in the statement below:—

	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.	1881-82.	1880-81.	1879-80.

Total working expenses .	7,94,432	7,52,348	5,97,821	5,73,345	6,28,075	5,36,730	5,48,537	4,88,864	5,02,371	3,82,678
Net revenue .	36,846	(—)1,63,730	3,04,871	4,78,644	2,26,944	61,648	1,34,903	2,46,099	(—)25,364	1,47,065

* These are now shown under the suggestion of the Government of India.

Compared with 1887-88, the net revenue is Rs. 36,846 against a deficit of Rs. 1,63,730, which is mainly due to the increase in the total receipts from Rs. 5,88,618 to Rs. 8,31,278.

The working expenses during the year have exceeded those incurred in any year up to date, and, considering the small revenue derived from the canals, it is essential that any increase under this head shall be jealously watched.

In respect to the area irrigated, the year has been compared with 1884-85, and on referring to the table above it will be seen that the working expenses were Rs. 6,28,075 in that year, against Rs. 7,94,432 in 1888-89, showing an increase of Rs. 1,66,357, out of which Rs. 118,377 is in one item—"Establishment employed on maintenance, including direction and accounts." This increase in cost is apparent only. In 1884-85 a charge of 23 per cent. on the expenditure incurred on maintenance and repairs was made the balance being debited to the provincial establishment Roads and Buildings Branch, whilst at present the actual cost of the establishment employed, which is less than that actually engaged on the same work in the former year, is debited to this head The new method of charging establishment has in fact added upwards of Rs. 1,10,000 to the permanent yearly working expenses of the Sone canals.

In 1888-89, Rs. 10,426 was expended on Extensions and Improvements, whilst in 1884 85 there was no expenditure under that head.

Under the head Maintenance, the expenditure in 1884-85 was Rs. 16,656 in excess of that incurred during the current year.

The expenditure on Tools and Plant was in excess in 1888-89 by the sum of Rs. 7,745, chiefly owing to the increased number of dredgers and mud punts now in use.

Under the head Revenue Management irrigation establishment there is an excess of Rs. 28,941 in 1888-89 wholly on the item headmen's fees. The actual expenditure on irrigation establishment was Rs. 1,07,411 in 1884-85 and Rs. 85,371 in 1888-89.

There was a reduction of Rs. 2,720, compared with 1884-85, under the head Navigation establishment.

Setting aside former years, there was special expenditure in 1888-89 on the following items:—

I.—Substituting masonry arches in place of wooden platforms in the case of 14 bridges over the Chowsa and Gurra Chowbey Canals.

II.—Rebuilding the piers of the river sluices on the Dehree side of the Sone weir. On this work Rs. 50,024 were expended during the year.

III.—The payment of one year's arrears of headmen's fees, amounting to Rs. 10,949, for 1886-87 in the Arrah Division.

In future years, now that the whole of the piers of the river sluices of the Sone weir have been reconstructed, the expenditure on works (extensions and improvements and maintenance) should be kept within Rs. 3,00,000, and there ought also, compared with 1888-89, to be a reduction of Rs. 10,000 in the item headmen's fees.

84. The cost of repairs to head-works during the last five years is shown below:— REPAIRS TO HEAD WORKS.

	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
	Rs.	Rs	Rs.	Rs.	Rs.
Sone weir	63,245	47,150	68,570	34,908	29,922
Other works	10,097	12,997	10,419	7,697	9,462
Total ...	73,342	60,147	78,989	42,605	39,384

The extra cost of maintaining the head-works was wholly due to special expenditure, amounting to Rs. 50,024, on the remodelling of the Dehree river sluices of the Sone weir. Work on rebuilding the piers was commenced in December, and the whole of the masonry work completed by the 31st March; the gates and fittings were finished before the present rains; the total expenditure on the new piers was Rs. 56,826. The whole of the piers of the river sluices of the Sone weir have now been rebuilt. Excluding special repairs to the river sluices, the expenditure on the head-works was Rs. 23,318 in 1888-89, against Rs. 25,139 in 1887-88.

85. The outlay on main canals and distributaries in each division during the last two years is shown below:— MAINTENANCE OF MAIN CANALS AND DISTRIBUTARIES.

	Arrah Division.		Buxar Division.		Eastern Sone Division.	
	1888-89.	1887-88.	1888-89.	1887-88.	1888-89.	1887-88.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Western Main canal	44,298	42,388	20,109	10,456	...	...
Eastern ditto	...	...	...	...	22,722	30,672
Canals	34,443	25,717	10,766	11,686	23,015	26,395
Branch canals	14,559	16,874	14,206	12,710	...	...
Distributaries	29,453	27,136	15,172	12,604	17,216	19,806
Drainage and protective works ...	2,358	3,044	163	388	2,753	2,944
Total ...	1,25,111	1,15,159	60,406	47,844	65,706	79,817

These figures are taken from the Superintending Engineer's report. The cost of maintenance, excluding head-works and telegraph lines, is Rs. 2,51,223, against Rs. 2,42,820 shown last year.

Both in the Arrah and Buxar Divisions the expenditure during the year was more than that of the year 1887-88. The increase is mainly due to special silt clearing in the 9th to the 13th miles of the Main Western canal and in miles 28 to 58 of the Arrah canal which had not been carried out for many years. The renewal of the Pakri bungalow roof with iron beams has also contributed

somewhat towards the excess expenditure. The outlay in the Eastern Sone Division was Rs. 14,111 less than in the year preceding.

SILT CLEARING AND DREDGING.

86. The quantity of silt dredged from the Eastern and Western Main canals, and the rate at which the work was done during the last two years, are given below :—

CANALS.	1888-89.			1887-88.		
	Cubic feet dredged.	Cost, including removal over spoil bank or discharge into river.	Rate per 1,000 cubic feet.	Cubic feet dredged.	Cost, including removal over spoil bank or discharge into river.	Rate per 1,000 cubic feet.
		Rs.	Rs. A. P.		Rs.	Rs. A. P.
Eastern Main and Patna	23,27,518	12,944	5 9 0	30,56,923	17,521	5 11 6
Western Main ...	75,44,478	49,724	6 9 5	77,69,055	46,049	5 14 10

The Superintending Engineer makes the following observations in the increase in rate per 1,000 cubic feet in the case of the Western Main canal, and on the charge for interest and depreciation adverted to in last year's report :—

The rates compare unfavourably with those of the previous year, when for the most important item, Main Western canal, the rate was Rs. 5-14-10 per 1,000 cubic feet of silt dredged. This is in part due to liabilities for 1887-88, amounting to Rs. 2,209,* having been paid in 1888-89. Deducting this amount from the whole expenditure for 1888-89 and adding it on to that of 1887-88, the rates for the Main Western canal become Rs 6-5-4 per 1,000 cubic feet for 1888-89 and Rs. 6-2-11 for 1887-88. The rate for 1886-87 was Rs. 7-6-6 per 1,000 cubic feet. It may be added that during 1888 89 the work was spread over 13 miles instead of being confined to the first 9 miles of the canal as usual

* On 86,55,367 cubic feet dredged.

Turning to the cost of dredging only, leather belting and rope cost Rs. 3,693 in 1888-89 and Rs. 1,313 in 1887-88. The extra cost during the year was partly owing to silt having been to a greater extent than usual thrown into the river requiring an extra length of rope, and partly to the month in which the ropes and belting were renewed falling in 1888-89. The extra rate owing to this cause in the Main Western canal is annas 4-4 per 1,000 cubic feet Amongst other causes for the extra cost was Rs. 400 charged during the year for making a road through the spoil bank to the river.

The expenditure on repairs to dredgers was as follows :—

		Rs.
Fouracres' dredgers	(12)	7,704
Bruce's ,,	(2)	754
English ,,	(2)	4 300
Mud punts	(64)	2,870

If the total cost of dredging is required, the following sums, details regarding which are given in the Revenue Report for 1886-87, should be added to the rates mentioned above :—

	C. ft.	Rs. A. P.
For Fouracres' dredgers	per 1,000	2 12 8
,, Bruce's ,,	,, 1,000	4 14 4
,, English ,,	,, 1,000	8 13 3
,, Mud punts ,,	,, 1,000	2 14 1

The dredgers are laid up during part of the year, but this will have no effect on the charge for interest and depreciation, as the number of dredgers and punts cannot be diminished, every dredger and mud punt at times during the rains barely sufficing to keep the canal open, and it is a question whether the dredgers do not suffer nearly as much when laid up as when at work : it is the difference between rubbing and rusting. In any case the interest would be the same, as the dredgers cannot be employed on other work. The dredging accounts are perhaps not in such detail as might be desired, but further minute accuracy would involve increased clerical establishment. Instructions will be given that in future liabilities and not payments only during the year are to be taken into account.

In future reports the actual cost based on liabilities should certainly be shown, and it would be well to show the number of days during which the dredgers have been employed and been laid up.

The quantity and cost of silt clearances by hand in the Eastern Main and Patna canals during the last two years is shown in the following table:—

	1888-89.			1887-88.		
	Cubic feet cleared by hand.	Cost.	Rate.	Cubic feet cleared by hand.	Cost.	Rate.
		Rs.	Rs. A. P.		Rs.	Rs. A. P.
Eastern Main and Patna canals ...	27,75,668	10,542	3 12 9	1,961,162	9,691	4 13 6

In the case of the Western Main canal, in addition to the charge for dredging, Rs. 3,460 was spent in the Arrah Division and Rs. 258 in the Buxar Division on silt clearing by hand.

In the Arrah canal silt clearing on a more extensive scale than usual was carried out during the year, the quantity removed by hand being 28¼ lakhs cubic feet at a cost of Rs. 8,282, and Rs. 1,444 was also expended on dredging silt accumulated in front of locks.

The expenditure incurred during the year on dredging and clearing silt in the branch canals and distributaries is shown below:—

	Rs.
Eastern Sone Division.	
Distributaries, Patna Canal System	1,359
Arrah Division.	
Doomraon branch canal	938
Behea branch canal	88
Distributaries	4,934
Drainage and protective works	813
Buxar Division.	
Buxar canal	453
Chowsa branch canal	56
Distributaries	479

87. The cost of weed-clearing for the last five years is shown in the following table:— WEED CLEARING.

	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
	Rs.	Rs.	Rs.	Rs.	Rs.
Eastern Sone Division	217	568	314	2,115	1,589
Arrah Division	1,725	3,342	2,218	2,491	3,976
Buxar ,, ...	869	1,015	2,065	77	...
Total ...	2,811	4,915	4,597	4,683	5,565

It will be seen from above table that the cost of weed clearing during the year was about half of that incurred during preceding year.

This decrease in expenditure is attributed partly to the heavy discharge of the canals in October, which had apparently some effect in retarding the growth of the weeds, and partly to the silt clearance in the lower part of the Arrah canal previous to the rains which, for the time being, destroyed nearly all the weeds there. In the previous year the weeds in these miles had been very troublesome.

88. The mileage rates of cost of repairs are worked out below both for canals and distributaries, and compared with the rates of the two previous years in the statement below:— MILEAGE RATES OF REPAIRS.

Canal.	Division.	1888-89.		1887-88.		1886-87.	
		Number of miles.	Cost per mile.	Number of miles.	Cost per mile.	Number of miles.	Cost per mile.
		No.	Rs.	No.	Rs.	No.	Rs.
Eastern Main Canal	Eastern Sone	7½	3,134	7½	4,230	7½	2,245
Western ditto	Arrah	5	6,859	5	8,427	5	7,385
	Buxar	16½	1,218	16½	633	16½	546
Buxar Canal	Do.	43½	238	43½	258	43½	406
Patna do.	Eastern Sone	79	291	79	334	79	305
Arrah do	Arrah	65½	527	65½	392	65½	455
Doomraon Branch	Do.	40½	187	40½	242	40½	152
Behea ditto	Do.	31	220	31	229	31	183
Chowsa ditto	Buxar	39½	346	39½	195	39½	209
Garra Chowbey Branch	Do.	33	119	33	131	33	131
Distributaries	Arrah	467½	63	467½	58	467½	54
	Buxar	343	44	341½	37	333½	53
	Eastern Sone	353	43	358	55	357	43

The increase in the mileage rates, where such occur, is wholly due to the larger quantity of silt removed, which is itself a consequence of the larger area irrigated during the last two years.

CLOSURES OF CANALS.

89. The Western Main series of canals were closed from the 1st to the 12th June 1888, the Eastern Main series from the 17th April to the 25th May 1888, and the Arrah canal from the 28th mile downwards from the 2nd May to the 12th June 1888.

FLOODS.

90. There were high floods during the year both in the river Sone and in the river Ganges. Little or no damage, however, was caused to the canal works. The highest readings on the gauges are noted below :—

RIVER SONE.

LOCALITY.	1888-89—17TH AUGUST 1888.		1887-88—18TH JULY 1887.		HIGHEST KNOWN, 1876-77—7TH JULY 1876.	
	Above weir.	Below weir.	Above weir.	Below weir.	Above weir.	Below weir.
Dehree	340·50	339·50	338·40	337·40	342·10	341·00
Baroon	342·60	340·40	340·13	338·10	343·50	342·70

RIVER GANGES.

LOCALITY.	Date.	Reading.	HIGHEST KNOWN SINCE 1874.	
			Date.	Reading.
Buxar	20th September 1888 ..	119 21	6th September 1875...	200·71
Deegah	19th „ „ ...	168·53	14th August 1879...	169·20
Hajipore, confluence of rivers Ganges and Gunduck.	19th „ „ ...	165·60	August „ ...	166·20

The Dehree canal head sluices were closed for 58½ hours and the Baroon canal head sluices for 136 hours during floods to avoid the influx of water heavily charged with silt.

CALCUTTA AND EASTERN CANALS.

CAPITAL ACCOUNT.

91. The Capital and Revenue Accounts of these canals are given below :—

1.—CAPITAL ACCOUNT.

1884-85	9,013	52,60,547	(a) 5,69,736	2,91,214	2,78,512	5·3
1885-86	(−)42,566	52,17,981	(b) 4,79,484	1,96,209	2,83,275	5·4
1886-87	5,293	52,23,274	4,83,634	1,92,264	2,91,390	5·5
1887-88	15 842	52,39,116	5,79,934	2,24,656	3,55,278	6 7
1888-89	49,369	52,88,485	5,75,125	2,03,801	2,81,324	5 3

(a) Is Rs. 35,185 larger than it should be by reason of error of amount.
(b) Is Rs. 35,185 smaller than ditto ditto ditto.

The expenditure on Capital account was larger than it has been of recent years, and amounted to Rs. 49,369. Of this sum, Rs. 27,745 was spent on two wrought-iron caissons, to be used for closing the large locks at Dhappa and Chitpore, when these are under repair, and Rs. 12,258 on buildings, of which the chief are the new Dhappa toll-house, an inspection bungalow at Busseerhaut on the Eastern canals boat route, and a godown at Bhangore for the storage of goods recoverod from wrecks.

The gross revenue, though less than that of 1887-88, is greater than that of any other preceding year since 1879-80, while the net revenue, though better than that of the first six years of the decade, is worse than that of either of the

Although there has been a small reduction in the number of boats entering the canals, yet the result of a further reduction in the cost of establishments is again a small decrease in the cost per boat measured from 3·68 to 3·58 annas.

WRECKS. 99. The total number of boats wrecked owing to various causes during the year was 106, against 128 of the previous year.

MAINTENANCE CHARGES. 100. From the statement already given in paragraph 86, it will be seen that the working expenses, including all charges, direct and indirect, have increased from Rs. 2,24,656 to Rs. 2,93,801, and that this increase has taken place mainly in the cost of maintenance and repairs, which has risen from Rs. 1,04,527 to Rs. 1,63,656. Under "Channels and Banks," on which the increase in the cost of maintenance is Rs. 39,158, is included the greater portion of the outlay on the Bhyrub and Assassooni khalls, two links in the chain of rivers and tidal creeks forming the Eastern boat route, both of which were laid dry and the work carried out at the end of 1887-88, the silt being cleared by hand. The clearance of the Tetooa khall and some extensive piling work near Hastings on Tolly's Nullah were also charged under this sub-head. Under "Towpaths," on which the increase is Rs. 5,616, much of the repairs carried out in 1887-88 was paid for in 1888-89, while on "Rustic Bridges," on which only ordinary charges had been incurred for some years, the renewals now found necessary caused an increase of Rs. 8,671.

DREDGING. 101. On "Dredging" the expenditure has increased from Rs. 4,254 to Rs. 10,979. 979,700 cubic feet of silt were dredged by two dredgers for Rs. 8,698; an average rate of Rs. 8-14 per thousand cubic feet. The quantity dredged in the previous year was 350,700 cubic feet, and the rate Rs. 9-8-4 per thousand.

ORISSA COAST CANAL.

CAPITAL ACCOUNT. 102. The Capital and Revenue accounts of this canal are given below:—

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1888-89.	Outlay to end of 1888-89
	Rs.	Rs.
DIRECT CHARGES.		
I.—Works	70,302	32,19,103
II.—Establishment	24,963	7,26,121
III.—Tools and plant	3,464	1,74,816
IV.—Suspense accounts	(—) 911	37,311
Total ...	97,818	41,57,351
V.—*Less* receipts on Capital account	7	3,278
Net total direct charges ...	97,811	41,54,073
INDIRECT CHARGES.		
Capitalized abatement of land revenue ...	.....	784
Leave and pension allowances	3,495	1,01,572
Total indirect charges	3,495	1,02,356

A revised estimate for this canal was sanctioned by the Secretary of State in August 1889, and amounted to Rs. 43,46,873 (direct charges), or Rs. 1,92,800 over the total expenditure to end of the year 1888-89. The canal has been open throughout its entire length of 97½ miles during the year. The works in progress under "Original works" comprised the finishing up of the canal banks, locks, and ferry ghâts, and the completion of the Panchpara supply pipe.

The canal is practically complete, though certain details, such as the provision of accommodation for the tolls establishment, ferry ghâts, &c., remain to be carried out. Some 2,900,000 cubic feet too of earth has still to be taken out of the bed, but as it offers no serious obstacle to navigation, and to dredge it would be expensive, its removal has been deferred.

The expenditure has been entirely from Provincial Funds with the exception of Rs. 8,66,000 contributed from Imperial Protective Funds. There is no interest account.

2—REVENUE ACCOUNT (ACTUALS). REVENUE ACCOUNT.

Net revenue	(—)10,844	(—)29,670	(—)31,938	(—)16,994

RECEIPTS. The increase in the navigation receipts is satisfactory. The Superintending Engineer, however, notices that out of Rs. 66,428, which were the toll-takings of the whole canal, no less than Rs. 45,275 were derived from Range III. The traffic still seems to be almost entirely local, and the only vessels which perform the through journey from Calcutta to Chandbally are the steamers of the Calcutta Steam Navigation Company. The question of encouraging through boat-traffic may now be considered, and it may be that a reduction of through tolls would result in an increase of revenue.

MAINTENANCE. There is a decrease of Rs. 6,252 in the working expenses, including direct and indirect charges. The cost of repairs declined from Rs. 53,277 to Rs. 42,606, and the average cost per mile from Rs. 546 to Rs. 437. Some of the expenditure on repairing cyclone damages of previous years was incurred during the year under review. The expenditure on tools and plant was greater by Rs. 5,719. Heavy repairs to barges and steam launches, and renewals of ferry boats were carried out.

TRANSPORT SERVICE. 104. The bi-weekly service of steamers maintained by two Calcutta companies between Calcutta and Cuttack attracted 27,747 passengers, chiefly pilgrims. The Executive Engineer states:—"No sufficient attention is paid by the companies to the service of such a town as Balasore on this route. The accommodation provided for pilgrims at stopping places is scanty and insufficient and detrimental to their health, and complaints of overcrowding were by no means few."

FLOODS. 105. The disastrous inundation of the country traversed by Range III of the Orissa Coast Canal, which followed the heavy rainfall of August 1888, has already been mentioned, in the remarks on the Hidgellee Canal. It is generally admitted that the silting of the main drainage outlets which causes these floods, is chiefly due to the excessive land reclamation which has taken place about the mouths of these channels, and to the construction of bunds across the channels after the flood season, according to custom from an early period. Certain modifications have been suggested, and some are being carried out, in the works of the Coast Canal, so that the canal shall assist in relieving the country as far as possible. The Superintending Engineer states that the works were not appreciably injured by the floods.

SARUN CANALS.

CAPITAL ACCOUNT. 106. The Capital and Revenue accounts of these canals are given below :—

Net revenue ...	(—)15,518	(—)8,732	(—)16,232	17,812	(—)16,252	(—)1,025	(—)16,921	(—)41,482	10,090

The increased cost of repairs is due to extensive repairs to the protective works at Siswa, the head of the Main canal, and to the construction of a bund at Chuttahi just above the Gundaki feeder above the Rupan Chap *sota*, which is *de facto* the main canal, and which broke into the river Gunduck during the rains of 1888. This cut has, notwithstanding the efforts made to prevent it, further developed during the current year, and is certain to be a cause of much trouble and expense.

The cost of silt clearing was moderate, 1,092,134 cubic feet of silt having been removed at a cost of Rs. 3,684. against 1,489,000 cubic feet costing Rs. 5,452 in 1887-88.

IRRIGATION.

108. These canals were, as last year stated, primarily intended for the supply of water for the manufacture of indigo. The water available is to a certain extent used for irrigation, but the areas returned as irrigated are not reliable, there being no special establishment employed to assess water-rates, which are collected by the gentlemen who have guaranteed a revenue of Rs. 21,850. There are no distributaries and but few village channels, and the guarantors are understood to have considerable difficulty in assessing lands watered direct from the canals, which are in fact the old nullahs of the country.

There was a complete failure of the *Hutia* rain, and in consequence a demand for water for rice irrigation, and also to a limited extent for rabi irrigation, as seeds could not be sown in many places for want of moisture without artificial irrigation.

The areas irrigated for all years since 1881-82 are shown below:—

	Acres.
1881-82	666
1882-83	1,741
1883-84	21,122
1884-85	7,223
1885-86	4,565
1886-87	2,146
1887-88	4,218
1888-89	7,213

COLLECTIONS.

109. The amount of the guarantee is recovered by the Collector of Sarun. The assessments, remissions, and recoveries for the canals are shown below:—

	Rs.
Balance unrecovered on the 1st April 1888	24,321
Assessment of the year's guarantee	21,850
Miscellaneous revenue collected by Executive Engineer ...	399
Total ...	46,570
Remitted	Nil
Net demand ...	46,570
Recovered on account of guarantee by Collector	...
Guarantee paid by canal managers	19,384
Fisheries	4
Miscellaneous	20
Realized by guarantors for water-rates	83
Realized by Collector for water-rate under Certificate Act ...	924
	20,415
Recovered by Executive Engineer	399
Total collections ...	20,814
Balance on 1st April 1889	25,756

The outstanding balance has increased slightly during the year.

PLANTATIONS.

110. The plantations are of but trifling extent. The number of trees in existence is shown in the table below:—

	1888-89.	1887-88.
	Rs.	Rs.
Trees over 12 feet in height	3,988	1,710
Saplings between 4 and 12 feet	1,751	694
Seedlings under 4 feet	3,693	1,915
Total ...	9,432	4,319

The expenditure on plantations up to the end of the year has amounted to Rs. 1,485.

FLOODS.

111. There were no floods during the year of any importance. The river Gunduck did not even reach the embankment; the highest flood was on 20th July 1888 when the gauge registered 240·50, which was 2·10 feet below the highest flood on record, viz., 242·60 in August 1883.

GENERAL.

112. The guarantee expires on the 1st of April 1890. Preparations have been made to build a regulator at Hatpokur, but it will be necessary to determine what measures will be necessary to prevent the Rupan Chap *sota* forcing a passage into the river Gunduck at Chattahi before expending a considerable sum of money on a regulator below that place.

NUDDEA RIVERS.

113. The channels comprising the Nuddea rivers system are situated in the districts of Moorshedabad and Nuddea. Their approximate lengths are as follows:—

Bhagiruthee	...	167 miles to Nuddea.
Bhyrub-Jellinghee ...	...	41 ditto.
Matabhanga	...	138 miles to outfall on the Hooghly.
Hooghly	...	31 miles from Nuddea to Chogda.
		477 miles.

The management of the revenue has passed from the hands of the Board of Revenue to the Public Works Department. A revenue account also has been opened for these rivers. Both changes were effected at the commencement of the year under report.

REVENUE ACCOUNT.

The Revenue Account is given below:—

	Expenditure			Receipts	
	During 1888-89.	To end of 1888-89.		During 1888-89.	To end of 1888-89.

* These are now shown under the suggestion of the Government of India.

MADHUBAN CANAL.

120. This a small canal of which no capital or revenue accounts are kept. The special repairs to the weir mentioned in last year's report were completed early in the year, and the canal was opened for irrigation on the 15th August 1888. Water was continually running until the 31st January 1889, when 2½ inches of rain fell and stopped the demand for water. The area irrigated was 8,560 acres, including 3,830 acres of opium. The expenditure incurred on maintenance was Rs. 4,194 against Rs. 9,821 spent in the year previous, which, however, included Rs. 4,729 for special repairs against Rs. 582 required for this purpose in 1888-89.

GENERAL REMARKS.

NET REVENUE

121. The working of the canals classed as Major irrigation works in Bengal resulted in a net deficit of Rs. 23,721, as below:—

	Rs.
Gross direct receipts	13,94,369
Ditto charges	14,18,090
Deficit ...	23,721

The budget estimate of net revenue was (—) Rs. 42,000, and the revised estimate, which provided for an additional Rs. 26,000 in working expenses, was (—) Rs. 68,000.

In 1887-88 the revenue on the Sone canals had been seriously affected by the local agitation against the canal administration, and consequently the net result of the year on Major works had been a loss of Rs. 4,00,356. The budget estimate for 1888-89 was framed with the expectation that this adverse influence would gradually be brought to rest; and though many indications in the course of the year made it clear that this expectation was being fulfilled, and that the benefits of irrigation were being freely admitted by the users of water, still the state of the collections at the time the revised estimate was issued was not such as to justify any substantial advance on the figures of the original estimate. Ultimately the receipts exceeded the estimate by Rs. 36,369, while the working expenses were less by Rs. 7,910.

	Budget estimate.	Revised estimate.	Actuals.
	Rs.	Rs.	Rs.
Direct receipts	13,58,000	13,58,000	13,94,369
Do. charges	14,00,000	14,26,000	14,18,090
Net revenue ...	—42,000	—68,000	—23,721

EARNINGS.

122. The net income from Major works calculated on the earnings of the year is shown below—

	1888-89. Rs.
Orissa canals	(—)70,282
Midnapore canal	82,123
Hidgellee Tidal canal	(—)22,943
Sone canals	83,080
	71,978

The result shown in this statement is calculated on the actual navigation and miscellaneous receipts, as well as the whole amount of the water-rates assessable on crops raised by canal water supplied during the year. In the Revenue Reports of previous years, earnings have been calculated on the demand on which it was possible to make recoveries. In the present report the whole of the liability incurred, whether recoverable within the year or not, is taken as revenue earned, less actual refunds. This is in accordance with the instructions

of the Government of India, and is the same as the method followed in the Upper Provinces. On the expenditure side actual charges, direct and indirect, have been taken.

123. The approximate value of crops irrigated by Major irrigation works during the last two years is shown below:— VALUE OF CROPS.

CANALS.	1887-88.		1888-89.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
	Acres.	Rs.	Acres.	Rs.
Orissa canals	109,506	19,06,362	159,292	51,64,168
Midnapore canal	65,864	13,17,280	69,777	17,44,425
Sone canals	315,380	76,89,808*	355,909	1,10,07,607
Total ...	490,750	1,09,13,450	584,978	1,79,16,200

* This is the correct figure.

This statement is compiled from returns submitted for the Orissa and Midnapore canals by the Deputy Revenue Superintendents, and for the Sone canals by the Superintending Engineer. The percentage of increase shown in the area irrigated is 18, while that of the value of crops raised by canal water is 64; a result brought about by a general rise in prices, as well as a general improvement in the outturn from irrigated lands. Several glaring inaccuracies in the returns of valuation for 1887-88, some of which were noticed in the Chief Engineer's note of that year, have been corrected in the comparative statement given above. For instance, Rs. 12 per acre, given by the Deputy Revenue Superintendent as the value of the Orissa rice crop of 1887-88, is now admitted to have been much too low an estimate, and is raised to Rs. 18 per acre, which compares to Rs. 32 per acre, the valuation of the same crop in 1888-89. Similar errors noticed in the returns received from the Sone canals have also been corrected. The following abstract, compiled from the corrected figures, shows that on these canals there has been an increase in the value per acre of food-grains and sugarcane and a decrease in the value of opium:—

CROPS.	RATES PER ACRE.					
	1887-88.			1888-89.		
	Eastern Sone.	Arrah.	Buxar.	Eastern Sone.	Arrah.	Buxar.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Sugarcane	96·6	50	100	105·4	100	100
Wheat	28	17·5	28	28	24	28
Barley	22·5	12·5	22	22	15	22
Rice	24	19	22	30	29·8	28
Miscellaneous cereals	12·5	12	14	24	18·4	13·7
Opium	75	40	48	49	39·	48

124. The state of the canal plantations on Major works is shown in the following statement:— PLANTATIONS.

CANALS.	1887-88.			1888-89.		
	Trees 12 feet high and above.	Saplings between 4 and 12 feet.	Seedlings.	Trees 12 feet high and above.	Saplings between 4 and 12 feet.	Seedlings.

GRAND TOTAL ...	11,07,610	11,44,912	.....	.....	.....	.....

The revival of trade on the Midnapore canal, which had set in in the previous year, has continued to gain strength. The two river systems alone show decreased incomes, and it is probable that the introduction of lower rates on the railways which compete with these routes was beginning to make itself felt in 1888-89, since it is found to have caused a very sensible decrease on the boat traffic in 1889-90.

126. It has not been the custom, at least of late years, to bring to notice in the Revenue Report the names of members of the establishment who may have specially distinguished themselves by their conduct of their duties; and, finding such the case, I have hitherto refrained from altering the custom, although I have by no means failed to appreciate the good work of those who have been serving under me. Where officers, as a body, are so earnest, conscientious, self sacrificing, and hard-working, as those with whom I have been connected during my stay in the province, and where the men who do not give satisfaction are so few and far between, it must always be felt a somewhat invidious duty to select officers for special mention, and the custom of omitting all individual notice has, I confess, afforded me a sense of relief. Now, however, that I am about to sever my connection with the province, I feel that I ought not to lose this opportunity, when submitting the last Revenue Report of the province which will issue under my signature, of showing my appreciation of the more special services which some members of the establishment have rendered, and of thanking all, with but few exceptions, for their excellent work, and all without exception for their good-will, kindliness and thorough loyalty towards one, who, however anxious he might be not to appear in that character, could scarcely fail to be considered as somewhat of an interloper.

The officers in charge of Circles during my tenure of office have been:—

Orissa Circle—Major McArthur, Mr. Rhind.

South-Western Circle—Messrs. Wickes and Vertannes (now retired) and Major McArthur.

Sone Circle—Mr. Odling and Major McArthur, the latter for a short time only.

One and all have conducted their duties to my entire satisfaction; but if any one is to be specially noticed, I would mention Mr. Odling for the exceptionally able manner in which he has managed his Circle at a most trying period in the existence of the Sone Canals.

Amongst officers who have been in charge of divisions during the same period, whilst nearly all have conducted their duties in an excellent manner, I would specially mention Messrs. Faulkner, Horn, Inglis, Livesay, Scotland, Shawe, Stephen, Frost, Carter; and amongst sub-divisional officers, Messrs. A. S. Thomson, Lees, Coy, Frost, Carter, C. A. White, Arnott, Silk, Barlow, Clowes, Stawell, and Searight.

During the year under review and its predecessor, the strain on the canal officers, divisional and sub-divisional, has been specially severe, and excellent service has been rendered by all in a very trying season More especially has this been the case on the Sone Canals, where, owing to the system in force, the work thrown on the engineering staff is heavier than it is elsewhere, and the Superintending Engineer brings prominently to notice the excellent service rendered by the divisional and sub-divisional canal officers in an exceptionally trying season.

I travelled over the greater part of the main canals in 1888, just when the severe demand was commencing to subside, so that I have personal konwledge of the difficulties experienced. The Divisional Engineers, Mr. Horn, Buxar; Mr. Inglis, Arrah; and Mr. Frost, Eastern Sone, are distinctly entitled to praise for the successful exertions they made to extend the benefits of irrigation as widely as possible, and Mr. Stephen, the Executive Engineer at Dehree, is equally deserving of credit for the promptitude with which he conducted the difficult operation of closing the vents in the under-sluices at Dehree. The Superintending Engineer's commendation of the sub-divisional officers was well earned.

Lastly, I thank heartily for their good work the officers who have performed the duties of Under-Secretary—Major McArthur and Messrs. Buckley and Shawe. I have invariably found them most helpful and loyal, and of the greatest assistance in every portion of the duties of my office.

127. The date for the submission of Revenue Reports to the office of the Chief Engineer is the 15th September. The dates when the different reports were received are shown below:—

		In 1888.	In 1889.
Orissa Circle ...	Commissioner's report ...	26th October...	3rd October.
	Superintending Engineer's report	3rd ditto ...	9th ditto.
South-Western Circle	Commissioner's report ...	24th September	16th September.
	Superintending Engineer's report	24th ditto ..	28th ditto.
Sone Circle ...	Commissioner's report ...	6th October .	28th September.
	Superintending Engineer's report	17th September	14th ditto.

The reports were punctual, with the exception of those of the Commissioner of the Orissa Division and the Superintending Engineer, Orissa Circle. The Finance and Administrative Accounts of the year 1888-89 due on the 1st were received from the Examiner on the 22nd August.

C. W. I. HARRISON, Lt.-Col., R.E.,

The 6th January 1890. *Offg. Chief Engineer.*

Under-Secretary, ditto ...	Major A. D. McArthur, R.E.	From 1st April to 3rd June 1888.
Officiating ditto, ditto ...	Mr. G. A. G. Shawe ...	„ 4th August 1888 to 31st March 1889.

Circle or Division.	Name of Officer.	Period of charge.
SUPERINTENDING ENGINEERS IN CHARGE OF CIRCLES.		
Orissa Circle	Mr. R. H. Rhind ...	From 1st April 1888 to 31st March 1889.
Ditto, Personal Assistant	„ J. T. Boase	„ 26th June 1888 to 31st March 1889.
South-Western Circle ...	„ T. H. Wickes ...	„ 1st April to 3rd June 1888.
	Major A. D. McArthur, R.E.	„ 4th June 1888 to 31st March 1889.
Ditto, Personal Assistant	Mr. J. T. Boase ..	„ 7th to 25th June 1888.
	Rai Sahib Krith Chunder Chowdry.	„ 17th December 1888 to 22nd January 1889.
Sone Circle	Mr C. W. Odling ...	„ 1st April 1888 to 31st March 1889.
Ditto, Personal Assistant	„ K. H. Stephen ...	„ 14th January to 28th February 1889.
EXECUTIVE ENGINEERS IN CHARGE OF DIVISIONS.		
Orissa Circle.		
Mahanuddy Division ...	Mr. G. W. Faulkner ...	From 1st April 1888 to 31st March 1889.
Acquapada-Jajepore Division	„ A. Monies	„ 1st April to 15th July 1888.
	J. P. Cleghorn	„ 16th July 1888 to 31st March 1889.
Pooree Division	Rai Sahib Raj Kissen Banerjee.	„ 1st to 8th April 1888.
	Mr. J. R. Swinden ...	„ 9th April 1888 to 31st March 1889.
Brahmini-Byturni Division ...	„ C. Taylor	„ 1st April to 24th July 1888.
	„ A. Monies	„ 26th July 1888 to 31st March 1889.
South-Western Circle.		
Cossye Division	Mr. J. P. Scotland	From 1st April 1888 to 31st March 1889.
Northern Drainage and Embankment Division.	„ R. E. Carter	„ 1st to 30th April 1888.
	„ T. M. L. Thompson ...	„ 1st May 1888 to 31st March 1889.
Nuddea Rivers Division ...	„ C. E. Livesay	„ 1st April 1888 to 31st March 1889.
Circular and Eastern Canals Division.	„ G. A. G. Shawe	„ 1st April to 3rd August 1888.
	„ C. Taylor	„ 4th August 1888 to 31st March 1889.
Balasore Division	„ A. Hayes	„ 1st April 1888 to 31st March 1889.
Sone Circle.		
Arrah	Mr. W. A. Inglis	From 1st April 1888 to 31st March 1889. (On privilege leave from 10th October 1888 to 10th January 1889.)
	„ K. H. Stephen	From 10th October 1888 to 13th January 1889.
Buxar	„ D. B. Horn	From 1st April 1888 to 31st March 1889.
Eastern Sone	„ M. J. Monckton... ...	„ 1st April to 30th June 1888.
	„ H. F. B. Frost	„ 1st July 1888 to 31st March 1889.
Gunduck	„ M. J. J. P. Norman ...	„ 1st April 1888 to 31st March 1889.
Canal Revenue Officers.		
Deputy Collector, Shahabad...	Baboo Sarada Prasad Chatterjee.	From 1st April 1888 to 31st March 1889.
Sub-Deputy Collector, Shahabad.	Baboo Siva Sunker Sing ...	Ditto ditto. (On privilege leave from 13th to 29th September 1888.)
	„ Jagdam Sahai ...	From 1st April 1888 to 31st March 1889.
Circle Officer, Patna district...	Syud Mahomed Kabeer ...	Ditto ditto.
Ditto, Gya do. ...	Baboo Moti Lall	Ditto ditto.
Deputy Revenue Superintendent, Orissa.	Mr. S. C. Roberts	Ditto ditto.
Ditto, Midnapore ...	Baboo K. C. Ghose	Ditto ditto. (On privilege leave from the 24th January to 31st March 1889.)
	„ Rajendra Nath Roy ...	From 24th January to 31st March 1889.
Collector of Tolls, Calcutta ...	Mr. W. R. Cooksey	„ 1st April 1888 to 31st March 1889.

10	Moorshedabad „ 1, '90	Nil	Weather—bright and cold. Wind N.-W. All the *rubbi* crops on the ground are doing well. *Haimanti dhan* nearly all harvested.
Rajshahye Dtvn. 11	Dinagepur „ 1, '90	Nil	Weather—getting cooler. Outturn of *amun* is estimated at 16 annas. Prospect of mustard not favourable. Pressing of sugarcane continues.
	Thakurgaon ...	0·34	
12	Rajshahye „ 1, '90	Nil	Weather—cold with fresh breeze. Condition of spring crops good. Harvesting of *amun* nearly over with good outturn. Sugarcane being reaped all over the district. Ganja and tobacco at Nowgong in good condition. Common rice sells at 16 seers 9 chittacks per rupee.
13	Rungpur „ 1, '90	Nil	Weather—seasonable. *Amun* rice is estimated to have yielded a 15-anna crop. Tobacco is flourishing. Sugarcane is being cut and crushed, and mustard gathered with a fair outturn.
	Kurigram ...	0·65	
	Nilphamari ...	0·80	
14	Bogra „ 1, '90	Nil	Weather—very cold ; days somewhat cloudy. Reaping of *amun* almost finished ; probably not more than one anna remaining to be cut. Other crops also being gathered. Common rice is being sold at head-quarters at 21 seers per rupee.
	Sherpur ...	0·01	
	Nowkhilla ...	0·34	
15	Pubna „ 1, '90	Nil	Weather—fine and cool. *Amun* outturn estimated at 13 annas. Mustard and tobacco expected to yield 12 annas. Sugarcane will not be above 8 annas. Prices slightly lower.
16	Darjeeling „ 1, '90	Nil	Weather—very cold and bright. Crops doing well and prospects generally good.
17	Jalpigoree „ 1, '90	Nil	Weather—cold. Cutting of *haimanti* paddy completed ; 14 annas outturn obtained. Winter crops doing well. Some damage to tobacco reported from Falacutta owing to recent hailstorm. Prices stationary.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts.		
Dacca Divn.	18	Dacca Feb. 1, '90	2·54	Weather—very cold. Heavy rain in the Sudder subdivision. Sowing of *boro* paddy nearly completed. Mustard and pulses being gathered. Rain has done good to the standing crops. Fodder is available. No special change in the prices of food-grains. Common rice sold at from 13 to 16 seers per rupee.
	19	Furreedpur „ 1, '90	Nil	Weather—colder and clearer. Produce of date trees below average owing to floods of rainy season. *Boro* rice being sown on churs. Sugarcane being cut. Prospects of cold-weather crops on the ground fair. Tillage for early rice and jute progressing.
	20	Backergunge „ 1, '90	Nil	Weater—cool with foggy mornings. Prospects of crops good. Harvesting of *amun* nearly completed; outturn estimated at 16 annas. Common new rice selling at 16 seers per rupee.
	21	Mymensingh „ 1, '90	0·22	Weather—very cold. Prospects of crops good. Common rice sells at 14 seers per rupee. Transplantation of *boro dhan* continues.
Chittagong Divn.	22	Chittagong „ 1, '90	Nil	Weather seasonable. State of miscellaneous crops good.
	23	Noakholly „ 1, '90	0·02	Weather—seasonable. State of *rubbi* crops good. Rain has done good to them. Price of rice stationary.
	24	Tipperah „ 1, '90	0·35	Weather—seasonable. Winter crops doing well. Transplantation of *boro dhan* still going on.
	25	Chittagong Hill Tracts. Jan. 31, '90	Nil	Weather—very cold and foggy up to 10 A.M. in the morning. Wind steady from N. Gathering of mustard commenced. Tobacco and chillies progressing.
		Hill Tipperah Feb. 1, '90	Nil	Weather—cold. Chillies and tobacco doing well. *Jum*-cutting commenced in the hills.
BEHAR.				
Patna Divn.	26	Patna „ 1, '90	Nil	Weather—cold. Prospects of *rubbi* continue good. A shower of rain would, however, much benefit the crops Peas and mustard are in pods. Wheat in ear in some places. Poppy is flowering and looks well. Prices of food-grains almost stationary.
	27	Gya „ 1, '90	Nil	Weather—cold. Harvesting of paddy nearly finished. Prospects of *rubbi* and poppy favourable. Food-stocks sufficient.
	28	Shahabad „ 1, '90	Nil	Weather—very cold and bright all the week, but milder and rather cloudy to-day (1st). Cutting of peas commenced. Other *rubbi* crops and poppy doing well. Sugarcane being pressed. Prices stationary.
	29	Durbhunga „ 1, '90	Nil	Weather—very cold with west wind. The late rain has greatly benefited the *rubbi* crops. Mustard is being harvested in places Prospects of poppy continue good. Common rice selling at 19 seers per rupee.
	30	Muzafferpur „ 1, '90	0·06	Weather—seasonable. All standing crops doing very well. Mustard being cut. Prospects of poppy good, except the late sowings in Hajipur.
		Hajipur ...	0·05	
		Sitamarhi ...	0·39	
	31	Sarun „ 1, '90	Nil	Weather—clear and cold; very seasonable with west winds. *Rubbi* prospects excellent. Poppy rather backward, but fair. Sugarcane pressing going on.
	32	Chumparun „ 1, '90	Nil	Weather—cold, with passing clouds. Rainfall of the past week has been decidedly beneficial to all crops, and has caused no damage to wheat according to latest reports. Early poppy plants coming into flower. Prices stationary.
	33	Monghyr „ 1, '90	Nil	Weather—cool and cloudy at times. *Rabbi* crops doing well, but want rain, especially in the Begusarai subdivision, where the standing crops on high lands do not look very promising, and mustard has been damaged by *lahi* insects. Poppy flowering.
Bhagulpore Divn.	34	Bhagulpur „ 1, '90	Nil	Weather—cool with west winds. Prospects of crops promising, but rain wanted for wheat. Mustard harvested; yield about 12 annas. Linseed flowering and weather favourable.
	35	Purneah „ 1, '90	Nil	Weather—cold. Mustard still being harvested with good outturn. Tobacco and other *rubbi* crops have benefited, especially in Kissengunge, from recent rain. Tobacco a good crop. Ploughing going on.
		Kissengunge (on 24th Jan.)	1·30	
		Arrareah (ditto)	0·14	
	36	Maldah Feb. 1, '90	Nil	Weather—somewhat cooler. Gathering of *kalai* and mustard continues; in thana Kharba it is just over. Other *rubbi* crops (wheat, barley, gram, &c.) doing well, but require rain. Transplantation of *boro* paddy going on. Common rice selling at an average of 17 seers per rupee
	37	Sonthal Perghs. „ 1, '90	Nil	Weather—very cold and dry; warm in the day time. *Rubbi* crops doing well. Mustard is a short crop in Pakour, estimated at 8 annas. Mangoes are in blossom.

	No.	District and date of return.	Rainfall at Sudder Station in inches	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Feb. 1, '90	Nil	Weather—seasonable. Estimated outturn of *guru sarad* is as follows :— Jajpore . ... . 17 annas Kendrapara ... ... 12 „ Sudder ... ... 13 „ On the whole a 14-anna crop has been reaped over the whole district.
	39	Pooree ...	...	Report not received.
	40	Balasore „ 1, '90	Nil	Weather—unusually cold. Outturn of *guru* rice estimated at 14 annas in the Bhuddruck subdivision and 11 annas in the Sudder subdivision Outturn of *rabi* crops averages generally about 12 annas.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Feb. 1, '90	Nil	Weather—seasonable. Crops in good condition everywhere
	42	Lohardugga „ 1, '90	Nil	Weather—seasonable; mornings very chilly. Prospects of *rabi* crops good at head-quarters. In Palamow they are somewhat affected by want of rain.
	43	Singbhoom „ 1, '90	Nil	Weather—seasonable. Prospects of winter crops favourable. Prices stationary.
	44	Manbhoom „ 1, '90	0·06	Weather—cold. Mustard fully harvested, with 16 annas outturn. Sugarcane being pressed; outturn about 10 to 12 annas. *Rabi* crops doing well; probable outturn 14 annas. Price of rice falling.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

* Means of six days. † Means of five days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 31st of January 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15 h May 1889. Mean for district.	Since 15 h May 1889. Normal mean.	Since 15 h May 1889. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.

decoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means 17 years. The means of the district are the numerical average of the rainfall returns received in the district, i.e., from total rainfall at the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 31st of January 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 25th January.	Sunday, 26th January.	Monday, 27th January.	Tuesday, 28th January.	Wednesday, 29th January.	Thursday, 30th January.	Friday, 31st January.	Total number of rainy days.	Total rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th May 1889.	Average rainfall from 16th May to date.

Explanation.—Indicates that no rain has fallen If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 4th February* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 31st JANUARY 1890.

It was noticed in the report for the previous week that on Friday, the 24th January, a disturbance which had originated in Northern India had commenced to pass over the province, moving in a south easterly direction. The disturbance consisted of an area of low pressure, or perhaps of two distinct areas accompanied by a feeble form of cyclonic circulation of winds. On the Friday there thus appeared to be a tendency to two distinct whirls, one of which had a centre in South Behar, while there was a second in Chutia Nagpur. On the first day of the present week, or on Saturday morning, the 25th instant, the disturbance had again moved in a south-easterly direction, and there was a distinct barometric depression lying over South-East Bengal which was accompanied by a well-marked circulation of winds the centre of which was a little to the south of Dacca. A second feeble depression also appeared to exist off the Ganjam coast, and there also was a tendency to cyclonic circulation along the coast. With the passage of these disturbed conditions through the province, numerous rain showers, in many instances accompanying local storms and in some instances with hail, occurred over the province, and on the 25th rain was generally reported in East Bengal, while very numerous stations in South-West Bengal, North Bengal, and Orissa and a few stations in North Behar also, received rain. On the 26th the disturbance had advanced over Burmah, and rather heavy rain was reported at such stations as Bassein Rangoon, etc., but in Bengal with the disappearance of the depression, weather conditions rapidly improved, and a rather strong northerly wind current set in, bringing with it a great reduction of temperature, the rapid fall of temperature being due to the fact that a moderately heavy fall of snow had been brought to the line of hills to the north and north-west of the province, which caused a cold wave of northerly winds to establish itself completely over the province. So rapid was the fall that the mean temperature of the 24 hours ending at 8 a m of the 26th was at many stations 5°, and at some stations as much as 9° and nearly 10° below the temperature of the previous 24 hours. At this time, therefore, the cold weather conditions set in over the province in a very pronounced form, and they have continued to exist till quite the end of the week. From the 26th, therefore, temperature has been decidedly low, while humidity was also only moderate in amount; pressure became steadily higher, and was by the middle of the week very high, though it fell somewhat towards its close. Skies were almost cloudless, and after the disappearance of the disturbed conditions absolutely no rain fell

Pressure.—Notwithstanding the very high pressure which occurred in the middle of the week after the disappearance of the depression, the mean pressure for the period has been somewhat below the normal at almost all stations. The usual defect has not been larger than about two or three-hundredths of an inch, but at some of the stations in North Bengal it equals four-hundredths, and at Chittagong it even equals six-hundredths of an inch. These larger defects are probably connected with the depression above referred to

Temperature—As stated previously, fell very rapidly on the 26th, and for the remainder of the week it has been decidedly low The mean temperature of the whole province for the week has been 2·4° below the normal, and in such districts as Chutia Nagpur and Orissa the defects have almost equalled four degrees.

The actual temperatures during the week, the range from day to night, and their variation from the normal values are best seen in the following table, where the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province are given, together with the normal values From the figures given it will be seen that the night temperatures have generally been in larger defect than those of the day, and that the mean minimum temperatures of the week have been decidedly low.

The lowest temperature recorded during the week was 37·9° at Ranchi :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 31st January 1890.

	Normal mean maximum temperature for the week ending 31st January.	Actual mean maximum temperature for the week ending 31st January 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 31st January.	Actual mean minimum temperature for the week ending 31st January 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 31st January.	Actual mean daily temperature for the week ending 31st January, 1890.	Variation of actual mean from the normal.
Cuttack	80 2	82·2	—4·0	60·3	55·5	—4·8	73·3	68·8	—4·5
Calcutta	78·1	74·7	—3·4	57·0	53 5	—3·5	67 6	64·0	—3·6
Dacca	79·0	76·0	—3 0	55·6	53·1	—2 4	67·3	64·6	—2 7
Burdwan	79·7	81·3	+1·6	55·4	51·8	—3 6	67·6	66·6	—1 0

Hazaribagh	73·4	70·9	—2·5	51·4	46·4	—5 0	62·5	58 6	—3 9
Darjeeling	42·8	53·3	+10·5	33·5	32 7	+0·8	38·4	43·0	+4 6

The rainfall of the week has been rather important, and the falls in South-West and East Bengal have averaged about half an inch. In other districts the falls are much smaller, and Orissa and North Bengal only average about a tenth of an inch, while in North Behar it is only about half this. Chutia Nagpur and South Behar report no rain at all.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 31st of January 1890 :—

Meteorological Divisions.	Temperature						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day. C. Little,
For Meteorological Reporter to the Govt. of India.

Meteorological Office, India; *The 3rd February* 1890.

MEMORANDUM

THE returns from the principal Municipalities in Bengal presented, during the week ending 18th January 1890, the following results :—

1. Births were registered in them at the rates of 23·1 per 1,000 of population, as opposed to very nearly the same proportion, viz., 22·8 per 1,000 in the preceding week ending 11th January, and deaths at 21·8 against 25 9 per 1,000, indicating a falling off in the registration of these events.

2. The following Municipalities returned the highest proportions of births and deaths :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Arrah	49·1	Poori	65·0
Naraingani	41·4	Naraingani	58·0
Monghyr	38·0	Jessore	49 0
Utterpara	37·7	Ranaghat	47 9
Serampore	37·3	Utterpara	47 2
Bali	31 6	Serampore	41·2
Comillah	30·8	Chittagong	37 6
Chittagong	30 5	Darjiling	37 0
		Burdwan	36·6
		Comillah	34·7
		Hughli and Chinsurah ...	32·8
		Rampore Beauleah	31 5

3. The only noticeable point, in connection with the incidence of the specific death-causes in comparison with the outcome of the preceding week, is a diminution of mortality from fever and the maladies classed under the head of "Other causes"—*vide* subjoined table :—

	Ratio per *mille* during the weeks ending—	
	18th January 1890.	11th January 1890.
Cholera	2 3	2·4
Small-pox	·6	·4
Fever	8 9	11·5
Bowel-complaints	3 1	3 1
Injury	·3	·4
Other causes	6·6	8 1

4. Of the death-causes above indicated, while small-pox continued to prevail with added severity in the Poori Municipality (mortality 18·9 per 1,000 of population, against 14 7 per 1,000 during the preceding week ending 11th January), cholera, fever and "other causes" proved conspicuously fatal in the following Municipalities :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Jessore	30 6	Ranaghat	29·9	Poori	25 2
Naraingani	20 7	Darjiling	29 6	Naraingani	20 7
Hughli and Chinsurah ...	9·8			Comillah . .	19 3
Chittagong	9·4			Serampore	17·7
Dacca	5·2			Burdwan	16 8
Howrah	4·6			Chittagong	11·7

5. The death-rates in relation to *Sex*, *Class* and *Age* stood as noted below :—

According to Sex.	Ratio per *mille.*	*According to Class*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	23·3	Christians	14·9	Under 1 year ...	159 8
Females	20·3	Hindus	21 5	1 and under 5 years ...	23·5
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	115	Mahomedans ...	22·8	5 „ 10 „ ...	8 9
		Buddhists	51·4	10 „ 15 „ ...	8·6
				15 „ 20 „ ...	9 6
				20 „ 30 „ ...	14 8
				30 „ 40 „ ...	13 9
				40 „ 50 „ ...	20 3
				50 „ 60 „ ...	22 8
				60 years and upwards ..	68 0

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

PART I.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 163A.

GENERAL.—*The 4th February* 1890.—Mr. J. B. Worgan, District and Sessions Judge, Cuttack, is appointed to act as District and Sessions Judge of Dinagepore, during the absence, on deputation, of Mr. J. G. Charles, or until further orders.

Mr. F. J. G. Campbell is appointed to act as District and Sessions Judge of Cuttack, during the absence, on deputation, of Mr. J. B. Worgan, or until further orders, with effect from the date on which he joined the appointment.

Mr. A. H. Collins is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the Sudder station of the district of Dinagepore, on being relieved of his present appointment as Officiating District and Sessions Judge of that district.

The 5th February 1890.—The Lieutenant-Governor is pleased, under paragraph 16, Special India Army Circular, dated the 16th March 1889, to promote Captain Joseph Binning, Presidency Volunteer Reserve Battalion, to the rank of Major.

Baboo Komul Narain Chuckerbutty, Sub-Deputy Collector, Tipperah, is transferred to the Sudder station of the Chittagong Hill Tracts district.

Mr. H. Lee, Officiating Magistrate and Collector, Midnapore, is allowed leave for nine days, under article 291 of the Civil Service Regulations in extension of the leave granted to him under the orders of the 7th January 1890.

The 6th February 1890.—Mr. W. F. Meres, C.S., has been granted by Her Majesty's Secretary of State for India an extension of furlough for twelve months.

The 7th February 1890.—The services of Captain C. J. Keene of the Eastern Bengal State Railway Volunteer Rifle Corps are placed at the disposal of the Government of the Punjab.

Mr. J. B. Worgan, District and Sessions Judge, is allowed leave for twelve days, under article 108 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 31st January 1890.

The 11th February 1890.—Baboo Okhoy Coomar Bose, Deputy Magistrate and Deputy Collector, on leave, is posted to the Sudder station of the district of Noakholly.

The Lieutenant-Governor is pleased to accept the resignation tendered by Lieutenant H. Stuart of his appointment as Quartermaster, Behar Light Horse.

Lieutenant H. C. Spry is appointed to be Honorary Quartermaster of the Behar Light Horse, with effect from the 2nd January 1890, *vice* Lieutenant H. Stuart, resigned.

Commander E. W. Petley, Calcutta Naval Volunteers, is, with the sanction of His Excellency the Governor-General in Council, appointed Honorary Aide-de-Camp on the staff of His Honour the Lieutenant-Governor of Bengal.

Mr. C. P. Caspersz, Officiating Magistrate and Collector, Chittagong, is allowed furlough for ten months, under article 340 of the Civil Service Regulations, with effect from the 21st March 1890, or such date as he may be relieved.

POLICE.—*The 10th February* 1890.—Mr. R. F. G. Faussett, Officiating Assistant Superintendent of Police, is allowed leave for one year, under article 369 of the Civil Service Regulations, with effect from the 12th December 1889.

Mr. C. E. Briscoe, Officiating Assistant Superintendent of Police, Midnapore, is allowed leave for ten days, under article 273 (*a*) of the Civil Service Regulations, with effect from the date on which he availed himself of it.

ECCLESIASTICAL.—*The 10th February* 1890.—The Revd. W. S. Mitchell, Baptist Missionary, Gya, is hereby licensed, under section 6 of Act XV of 1872, to solemnize marriages between persons one or both of whom is a Christian or are Christians.

The Revd. W. S. Mitchell is also appointed to be a Registrar of Births and Deaths under Act VI of 1886.

The 11th February 1890.—The Revd. F. W. Brown, Minister of the American Baptist Mission, Balasore, is hereby licensed, under sections 6 and 9 of Act XV of 1872, to solemnize marriages between persons one or both of whom is a Christian or are Christians, and to grant certificates of marriages between persons who are Native Christians.

The Revd. F. W. Brown is also appointed to be a Registrar of Births and Deaths under Act VI of 1886.

EDUCATION.—*The 8th February* 1890.—Mr. E. F. Mondy, Officiating Principal, Dacca College, is appointed to act, until further orders, in class III of the Bengal Educational Service, with effect from the 29th December 1889, *vice* Mr. A. C. Edwards, on privilege leave.

The 11th February 1890.—Baboo Syama Churn Ganguli, Principal, Utterpara College, is appointed to act in class II of the Subordinate Educational Service, with effect from the 18th November 1889, *vice* Baboo Mathura Nath Chatterjee, on leave.

Mrs. Stansbury, Head Mistress, Eden Female School, Dacca, is appointed to act in class III of the Subordinate Educational Service, with effect from the 18th November 1889, *vice* Baboo Syama Churn Ganguli, on deputation.

Baboo Upendra Nath Maitra, Lecturer, Dacca College, is appointed to act in class IV of the Subordinate Educational Service, with effect from the 18th November 1889, *vice* Mrs. Stansbury, on deputation.

Dr. A. F. R. Hoernle, Principal, Madrassa College, Calcutta, is allowed furlough for eight months, under article 340 of the Civil Service Regulations, with effect from the 1st July 1890, or such subsequent date as he may avail himself of it.

MEDICAL.—*The 11th February* 1890.—Surgeon-Major A. Tomes, Officiating Civil Surgeon, Howrah, is allowed leave for two months, under article 291 of the Civil Service Regulations, with effect from the date on which he may be relieved.

The following notification is republished from the *Assam Gazette* :—

No. 652G.—*The 31st January* 1890.—Consequent on the recall to duty from privilege leave, for the period from the 1st to the 5th of September 1889, of Mr. J. Kennedy, C.S., the officiating promotions of Messrs. J. D. Anderson, C.S., A. Porteous, C.S., and H. Le Mesurier, C.S., announced in notification No. 351 of the 25th of October 1889, published in the *Assam Gazette* of the 2nd of November 1889, will have effect from the 20th, instead of the 15th of September 1889.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

E. Slane, Assistant Conservator of Forests, and Mr. R. Quinnell, Assistant Conservator of Forests" *read* "Mr. E. E. Slane, Sub-Assistant Conservator of Forests, and Mr. R. Quinnell, Sub-Assistant Conservator of Forests."

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—FORESTS.

NOTIFICATION.

The 5th February, 1890.—In exercise of the powers conferred upon him by section 19 of the Indian Forest Act VII of 1878, the Lieutenant-Governor hereby declares the tracts of land described below, which (on the 26th November, 1880, as regards the Girga Forest, and on the 20th February, 1882, as regards the other four forests) were notified as proposed Reserves, to be Reserved forests with effect from the 1st March, 1890.

Girga Forest.

District.	Pergunnah or other sub-division.	Name of forest	Description of boundaries.
Singbhoom ...	Porahat ...	Porahat (Girga)	*North.*—A demarcated line from the Lohardugga-Singbhoom boundary skirting the village lands of Jojobir, Komdih, Omda, and Sidma to a point north-west of the village of Kamargaon. *East.*—A demarcated line from that point skirting the village lands of Kamargaon, Salking, Usnugir, and Daimar to the Karo river; then that river for about one mile; then a demarcated line skirting the village lands of Sadiuli and Jilingutu to a point near that village. *South.*—A demarcated line skirting the village lands of part of Jilingutu, Tomden, Jojoda (or Bangurda), Kamai, Sinko (or Chindung), Baru Lumin and Bera Lumin. *West.*—The Lohardugga district boundary.

NOTE.—From this area are omitted the lands belonging to the following groups of villages which have been marked off by demarcation :—

Group.	Villages.
I.—Bando	1. Bandu. 2. Baritola. 3. Khanta. 4. Irgi. 5. Lhosod. 6. Kita.
II.—Pandoa	1. Ponda. 2. Aida. 3. Aidatola.

Birda Forest.

District.	Pergunnah or other sub-division.	Name of forest.	Description of boundaries.
Singbhoom ...	Porahat ...	Birda ...	*North.*—The demarcated boundary of the Kundrugutu-Bundgaon Pirs starting from the trijunction point of these two pirs with the Baring Pir near Jiklatang and running to the hill west of Kairka. *East.*—A demarcated line passing southward for a mile and a half over the hills west of and skirting the village lands of Jalmai and Bandi; then running generally southward past the villages of Loajagda Mamla, Kocha Songra, and Songra to the road near Tuihasa. *South.*—A demarcated line from this point past the villages Tuihasa, Erekora, Karla and Birda. *West.*—A demarcated line from Birda past the villages Birda, Dighi, Kontari, Dargada, again Kontari and Dighi and Kaman to the north boundary at Jiklatang.

NOTE.—From this area are omitted the lands belonging to the following villages which have been marked off by demarcation :—

Group.	Villages.
Chirkubora	1. Chirkubora. 2. Porotoli. 3. Anidih. 4. Akir. 5. Dumreo.

Songra Forest.

DISTRICT.	Pergunnah or other sub-division.	Name of forest.	Description of boundaries.
Singbhoom ...	Porahat ...	Songra ...	*North.*—A demarcated line from a point on the boundary between Songra and Lagra east of the Harni stream near the village of Dumari and skirting the range of hills past the villages Dumari, Angria, Lagra, Chatma, Saunia, Sinko, Marla and Sarda to the Chaibassa-Bandgaon road at Tupna; thence passing over the Bicha Hill to Tutio. *East.*—The Tamar pergunnah of Lohardugga for about 4 (four) miles; then the Seraikela estate to a hill west of Jonua and south-east of Kurjuli. *South.*—A demarcated line from this hill passing over the Lokudburn Hill and crossing the Tolsadom stream about one mile north of Mundri; then passing between the hills half a mile north of Kutipiri to the Chaibassa-Gudri road; then that road for about a mile. *West.*—A demarcated line skirting the village lands of Roauli, Jamjni, Hoilohr, Sidma, Bandu, Kumar and Buriuli to the Kundrugutu road; then that road to a point at the foot of the Jhanda hill about a mile south of Kundrugutu; then a demarcated line skirting the village lands of Kundrugutu, Bingbu, Kandeon Khandajni, Lota, Chaki, Daraia, Jirai, Kopa, Hesatola and Gupdi to the north boundary near Dumari.

NOTE.—From this area are omitted the lands belonging to the following villages which have been marked off by demarcation:—

Group.	Villages.
I.—Pingu	1. Pingu. 2. Loahatu.
II.—Kocha	1. Kocha. 2. Dudukundih. 3. Goai.
III.—Tarabara	Tarabara.
IV.—Tebo	1. Tebo. 2. Sainkata
V.—Kotagarah	1. Kotagarah. 2. Senkra.
VI.—Halmad	1. Halmad. 2. Rogod.
VII.—Raigora	Raigora.
VIII.—Jonko	Jonko.
IX.—Kurjuli	1. Kurjuli. 2. Kanmail. 3. Burudih.

Kundrugutu Forest.

DISTRICT.	Pergunnah or other sub-division.	Name of forest.	Description of boundaries.
Singbhoom ...	Porahat ...	Kundrugutu ...	*North.*—A demarcated line starting from a point on the Girga-Baring Pir boundary near the village of Gere, and skirting the lands of the villages Gere, Mamail, Chakomtola, Ichagutu, Siyankel, Longabera, again Siyankel and Ichagutu, Darung, again Chakomtola, Tomrom, Jatanghasa and Champaba to the Raru river near Tondanghatu; then that river for about one and a half miles to a point between Sanhai (deserted village) and Jarakel; then a demarcated line skirting the village lands of Lota, Manmaru, Jarakel and Kundrugutu, joining the western boundary of the Songra forest at a point on the old road about a mile south of Kundrugutu. *East.*—The old road running in a general southerly direction from a point about a mile south of Kundrugutu to Buriuli, and which forms the western boundary of the Songra Reserved forest.

District.	Pergunnah or other sub-division.	Name of forest.	Description of boundaries.
			South.—A demarcated line from a point on the Kundrugutu road north of Buriuli, and skirting the village lands of Buriuli, Sidma, Hoilohr, Lamda, Dindapani, Dena and Jate; then the Chaibassa-Gudri road from a point near Jate to a stream near Kotagara; then a demarcated line skirting the village lands of Kotagara and Jarakel to the Gompai nadi; then the Gompai nadi for 850 feet near Birkel; then a demarcated line passing over the ridge of the hill north of the village Kiru (or Giru) to the Karo river. *West.*—The Karo river past Roro to a point about a quarter of a mile below the junction of the Karo and Raru rivers; then a demarcated line skirting the village lands of Buru Ururing, Ururing, Biti, Tutukel (deserted), Jomtai, Olmokund and Gere to the north boundary.

NOTE.—From this area are omitted the lands belonging to the following villages which have been marked off by demarcation :—

Group.	Villages.
I.—Tolongjiri	... Tolongjiri.
II.—Kaiom	... 1. Buru Kaiom. 2. Bera Kaiom.
III.—Dharion	... 1. Dharion. 2. Kamrora.
IV.—Kudabera	... 1. Kudabera (or Kodobera). 2. Kukruburu. 3. Diai.
V.—Jonkopai	... Jonkopai.

Bera Forest.

District.	Pergunnah or other sub-division.	Name of forest.	Description of boundaries.
Singbhoom ...	Porahat ...	Bera ...	*North.*—A demarcated line running from a point near the village of Kichinda south-west of Gudri, skirting the village lands of Kichinda, Tirkera, and Gudri to the Gompai nadi; then up that stream for about 1,400 feet; then again a demarcated line skirting the village lands of Birkel and Jarakel to the Gompai nadi near Jarakel village; then the Gompai nadi for about 1½ miles and on to the Gudri-Chaibassa road. *East.*—The Gudri-Chaibassa road from a point near Kotagara to a point near Jate (along the boundary of the Kundrugutu forests); then a demarcated line skirting the village lands of Jate to the Danki Manda stream; then that stream for about 1,000 feet; then a demarcated line skirting the village lands of part of Jate, Joro (or Byjora), Banjira and Dura to the Sanjai river; down that stream for about ¾ of a mile to its junction with the Danluhr nadi; then up that nadi for about 2,200 feet; then a demarcated line skirting the village lands of Kutipiri, Banskata, Ponsoa and Jarakel to the Muttrabera nadi, which it follows for about 400 feet on to its junction with the Mantuda nadi, which it follows for about 2,000 feet past Beikora and Berabinda; then a demarcated line skirting the village lands of Jhaliamara, Khorimati, and Brindabon. *South.*—A demarcated line from a point north of Dhunamara skirting the village lands of Jamjni, Ghoraduba, Soinka, Kuntupai and Dorbo to the Chaibassa-Gurjun road; then that road along the Bera Leda forest boundary until it meets the Anandpur estate.

DISTRICT.	Pergunnah or other sub-division.	Name of forest.	Description of boundaries.
			West.—A demarcated line following the boundary between the Anandpur estate and the Porahat and Dorka Pirs of the Porahat estate to the junction of the Koel and Karo rivers; then the Karo river to a point about half a mile north of the village Saudiuli; then a demarcated line skirting the village lands of Konskel and Kichinda.

NOTE.—From this area are omitted the lands belonging to the following villages which have been marked off by demarcation—

Group.	Villages.
I.—Saruda	Saruda.
II.—Gulikora	1. Gulikora. 2. Tongsarjom.
III.—Serengda	Serengda.
IV.—Kantinkel	1. Kantinkel. 2. Eugan. 3. Komurkel. 4. Konsai.
V.—Hindiong	1. Hindiong. 2. Sausal. 3. Rairda.
VI.—Sarugara	1. Sarugara. 2. Chitir.
VII—Oranga	1. Oranga. 2. Kebra. 3. Horo. 4. Bara. 5. Tomsai.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTICE TO MARINERS (No. 19).

CHINA SEA.

SINGAPORE, WESTERN APPROACH—SALAT SINKI.

Bell buoy withdrawn; and a light-vessel moored on Ajax shoal.

THE British Admiralty has given notice (No. 23 of 1890) that on 1st February 1890 a light-vessel will be moored on Ajax shoal, west side of Salat Sinki, western approach to New harbour, Singapore:—

The light will be a *flashing* white light, showing a *flash every thirty seconds*; it will be elevated 38 feet above the sea, and should be visible in clear weather from a distance of 10 miles.

The light-vessel will be painted yellow, with the word *Ajax* in white letters on a black ground on her sides. She will carry a caged ball, painted red, at the masthead, as a day mark.

Position, lat. 1° 13′ 55″ N., long 103° 40′ 20″ E.

Also, that on the same date, the Bell buoy now marking Ajax shoal will be withdrawn.

By direction of the Government of Bengal,

OLIVER LASH,
for Port Officer of Calcutta.

The Revd A. McKenna.
Baboo Chandragati Mustafi.
„ Bunwari Lal Sen.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890 —It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Soory Local Board, in the district of Beerbhoom, under section 25 of Act III (B.C.) of 1885, of Baboo Madan Gopal Singh to be their Chairman.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Kedar Krishna Banerjea to be the Chairman of the Jhaldah Municipality, in the district of Manbhoom, *vice* Baboo Kedarnath Mittra, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 8th February 1890.—It is hereby notified that, under section 24 of the Bengal Local Self-Government Act III (B. C.) of 1885, the Lieutenant-Governor is pleased to re-appoint the Magistrate of Midnapore to be the Chairman of the Midnapore District Board, with effect from the 27th January 1890.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 11th February 1890.—It is hereby notified for general information that, under section 138 of the Bengal Local Self-Government Act III (B.C.) of 1885, the Lieutenant-Governor is pleased to alter Rule 81, Part IV of the rules made under clauses (*b*), (*c*), (*d*), (*e*), (*f*), (*h*), (*j*), (*q*), (*s*) and (*t*) of the said section. The rule, as now amended, is as follows :—

"81. The latest day for the submission of the statement of the requirements and probable expenditure of the District Board for the ensuing financial year shall be the 15th of November."

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 6th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., widening the bye-lane from premises Nos. 98 to 104, Upper Chitpore Road, it is hereby declared that for the above purpose pieces of land, Nos. 99 and 104, Upper Chitpore Road in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 3 chittacks and 24 square feet only, are required.

The boundaries of the lands are as follow :—

Portion marked A on plan.—On the North and West a public bye-lane; on the South portion of premises No. 99, Upper Chitpore Road; and on the East premises No. 100, Upper Chitpore Road.

Portion marked B on plan.—On the North and East portion of premises No. 104, Upper Chitpore Road; on the South a public bye-lane; and on the West Upper Chitpore Road.

Plans and specifications of the land are filed in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 6th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz, for widening the filled up drain connecting Williams' Lane with Old Bytakhana Bazar Road, it is hereby declared that for the above purpose pieces of land, Nos. 19 and 20 Scott's Lane, and No. 1, Williams' Lane in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 2 cottahs 12 chittacks and 22 square feet only, are required.

The boundaries of the lands are as follow :—

Portion marked A on plan.—On the North portion of No. 20, Scott's Lane; on the South a public filled up drain; on the East Old Bytakhana Bazar Road; and on the West a passage.

Portion marked B on plan.—On the North portions of No. 1, Williams' Lane and No. 19, Scott's Lane; on the South a public filled up drain; on the East portion of No. 19, Scott's Lane; and on the West Williams' Lane.

A plan and specifications of the lands are filed in the office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 7th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Dacca Municipality for a public purpose, viz., for the improvement of the trench for the suction pipe for the use of the water works in the town of Dacca, station Lalbag, zillah Dacca, it is hereby declared that for the above purpose pieces of lands measuring, more or less, 12 cottahs and 8 dhoors of standard measurement, are required. The pieces of lands are bounded as follows :—

Plot No. I.—On the North by the main road; on the South by the foreshore of the river Boorigunga; on the East by the trench of the suction pipe; and on the West by the land of Baboo Manick Chand Saha and of Rahimuddi Meah.

Plot No. II.—On the North by the main road and the land of Basanta Lall and Hemanta Lall Dobe; on the South by the foreshore of the river; on the East by the land of Basanta Lall and Hemanta Lall Dobe; and on the West by the trench of the suction pipe.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 7th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a new road from Banerjee's Lane to Amherst Street, it is hereby declared that for the above purpose pieces of land Nos. 172, Bowbazar Street, 14-1, 5, 48-2, 58 and 54, Choonapooker Lane, 4, Nitaie Baboo's Lane, and 150, Amherst Street, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 9 cottahs 1 chittack and 36 square feet only, are required.

The boundaries of the lands are as follows—

Portion marked A on plan.—On the North partly premises No. 53, Choonapooker Lane and partly Choonapooker Lane; on the South partly Choonapooker Lane and partly premises No. 55, Choonapooker Lane, portion of premises No. 54, Choonapooker Lane and portion of premises No. 172, Bowbazar Street; on the East Choonapooker Lane; and on the West partly portion of premises No. 54, Choonapooker Lane and partly Banerjee's Lane.

Portion marked B on plan.—On the North portion of premises No. 48-2, Choonapooker Lane; and on the South, East, and West Choonapooker Lane.

Portion marked C on plan.—On the North and East portion of premises No. 15, Choonapooker Lane; and on the South and West Choonapooker Lane.

Portion marked D on plan.—On the North and East public filled up drains; on the South No. 14-1, Choonapooker Lane; and on the West Choonapooker Lane.

Portion marked E on plan.—On the North portions of premises Nos. 5 and 4, Nitaie Baboo's Lane; on the East Nitaie Baboo's Lane; and on the West a public filled up drain.

Portion marked F on plan—On the North and South premises No. 150, Amherst Street; on the East Amherst Street; and on the West Nitaie Baboo's Lane.

A plan and estimates of the land to be required are in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 7th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for the construction of a dhobikhana, it is hereby declared that for the above purpose a piece of land No. 3, Woolfutbagan Road, Dihi Punchannogram, district 24-Pergunnahs, measuring, more or less, 5 bigahs and 14 cottahs only, are required.

The boundaries of the land are as follows :—

On the North a passage; on the South portion of No. 3, Woolfutbagan Road; on the East partly a public latrine and partly No. 283, Lower Circular Road; and on the West Woolfutbagan Road.

A plan and estimates of the land to be acquired are in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 8th February 1890.—Mr. L. P. Shirres, Joint-Magistrate, is appointed to be Vice-Chairman of the District Road Committee of Lohardugga, *vice* Mr. G. W. Place, transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

WEDNESDAY, FEBRUARY 12, 1890.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of the Nizamut lakhiraj State lands situated in the district of Nuddea will be put up to sale at the Collectorate of Nuddea on the 13th March 1890, corresponding with 1st Chyte 1296 B.S.

The purchasers of the plots will be subject to the following conditions :—

I.—The plots will be sold revenue free to the highest bidders above the upset price.

II.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up for sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

V.—The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Dacca Collectorate, the 8th February 1890.

L. HARE, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below to the undermentioned estate, situate in the district of Maldah, will be put up to sale at the Maldah Collectorate on 26th March 1890, corresponding with 14th Chaitra 1296 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid at once.

4*th*—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Government revenue assessed.

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt. of Bengal.*

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observation taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e*, from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal, Daily Report, and to the Accountant and Treasurer Bengal Secretariat, for the other reports.

ALEX. PEDLER,
Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 17th March 1886.

NOTICE.

IT is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,
Under-Secy. to the Govt. of Bengal.
The 24th November 1886.

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series

The Calcutta Series is distributed by the Benga Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage. Rs. A. P.	With postage. Rs. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ..	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.

	For town. Rs. A. P.	For mufasil. Rs. A. P.
For the Calcutta Series per copy ...	0 8 9	0 10 3
„ each of the Madras, Bombay and Allahabad Series per copy	0 5 3	0 5 9
„ the Calcutta Series. For the year ...	7 2 6	8 6 3
„ each of the Madras, Bombay and Allahabad Series. For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Reports should apply to—

Superintendent, Government Press, Madras
The Government Central Book Depôt, Bombay.
„ Curator of Government Books, North-Western Provinces and Oudh.
„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for* 1889 *should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Trial of Civil Suits. In Urdu. 4*a.* (1*a.*)

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

***No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

Archæological Survey of India. Reports on the. By GENL. A. CUNNINGHAM, C.S.I. Super royal 8vo, full cloth. Vols. VI and XIX to XXIII only available. Rs. 6 (6*a*.) each. General Index to Volumes I to XXIII. Rs. 6 (6*a*.)

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 165A.

GENERAL.—*The 13th February* 1890.—Baboo Soshi Sikar Dutt, Deputy Magistrate and Deputy Collector, Kandi, Moorshedabad, is allowed leave for two months, under section 370 of the Civil Service Regulations, with effect from the date on which he availed himself of it.

Mr. C. Johnston, Assistant Magistrate and Collector, Moorshedabad, is appointed temporarily to have charge of the Kandi sub-division of that district, during the absence, on leave, of Baboo Soshi Sikar Dutt, or until further orders.

The 15th February 1890.—Mr. C. A. Wilkins, District and Sessions Judge, Bhagulpore, on leave, is appointed to act, until further orders, in the first grade of District and Sessions Judges, with effect from the 13th instant, *vice* Mr. J. R. Hallett.

Mr. C. S. Bayley, Joint-Magistrate and Deputy Collector, is promoted substantively *pro tempore* to the first grade of Joint-Magistrates and Deputy Collectors, with effect from the 28th January 1890, *vice* Mr. F. A. Slack, on deputation, but will continue to be seconded.

Mr. E. B. Harris, Joint-Magistrate and Deputy Collector, Mozufferpore, is promoted substantively *pro tempore* to the first grade of Joint-Magistrates and Deputy Collectors, with effect from the 28th January 1890, *vice* Mr. C. S. Bayley, on deputation.

Mr. W. R. Bright, Assistant Magistrate and Collector, on furlough, is appointed substantively *pro tempore* to be a Joint-Magistrate and Deputy Collector of the second grade, with effect from the 28th January 1890, *vice* Mr. E. B. Harris.

The 18th February 1890.—Mr. T. D. Beighton, District and Sessions Judge, Dacca, is allowed furlough for seven months, under article 340 of the Civil Service Regulations, with effect from the 21st March 1890, or such subsequent date as he may avail himself of it.

Mr. A. E. Staley, Joint-Magistrate and Deputy Collector, is posted temporarily to the Sudder station of the district of the 24-Pergunnahs.

Mr. Staley is appointed to act as District and Sessions Judge of Dacca, during the absence, on furlough, of Mr. T. D. Beighton, or until further orders.

The following officers are appointed provisionally under Statute 33 Vic., Cap. 3, to be Assistant Magistrates and Collectors:—

Rai Nund Kissore Das, Bahadoor, Assistant Superintendent, Tributary Mehals, Cuttack.

Mr. Taheiruddin Ahmed, Barrister-at-Law, Officiating Additional Munsif of Dacca.

Rai Nund Kissore Das, Bahadoor, will continue to act in his present appointment of Assistant Superintendent of the Tributary Mehals, Cuttack, until further orders.

Mr. W. Maude, Officiating Joint-Magistrate and Deputy Collector, Tajpore, Durbhunga, is posted temporarily to the Chota Nagpore Division.

Mr. S. L. Maddox, Assistant Magistrate and Collector, Patna, is appointed temporarily to have charge of the Tajpore sub-division of the Durbhunga district, with effect from the forenoon of the 14th instant.

Mr. J. Windsor, Assistant Magistrate and Collector, Chumparun, is vested with the powers of a Collector under Act X of 1870 in the Bettiah sub-division of that district.

POLICE.—*The 13th February* 1890.—Mr. W. F. S. Allen, Officiating Assistant Superintendent of Police, Hazaribagh, is transferred to the district of Lohardugga, with effect from the date on which he joined his appointment.

The 14th February 1890.—Mr. R. L. Ward, Assistant Superintendent of Police, in charge of the district police of Bogra, is transferred to Pubna, and appointed to have charge of the district police of that district until further orders.

Baboo Jadub Chunder Deb, Assistant Superintendent of Police, 24-Pergunnahs, is transferred to Bogra, and appointed to have charge of the district police of that district until further orders.

Inspector Jiunat Hossein Khan is promoted from the third to the second grade of Inspectors, with effect from the 19th December 1889, *vice* Mr. R. H. Conran, retired.

The 18th February 1890.—In modification of the order dated the 21st January 1890, Mr. C. E. Gouldsbury, District Superintendent of Police, Purneah, is transferred to Julpigoree.

The following reversions of Police Officers are sanctioned:—

With effect from the 23rd January 1890, consequent on the return from leave of Colonel W. L. N. Knyvett, Deputy Inspector-General—

Mr A. H. Giles, Officiating Deputy Inspector-General, to the first grade of District Superintendents.

Mr. W. H. Cornish, Officiating first grade District Superintendent, to the second grade.

Mr. J. B. Goad, Officiating second grade District Superintendent, to the third grade.

Mr. H. Munro, Officiating third grade District Superintendent, to the fourth grade.

Mr. G. B. Havelock, Officiating fourth grade District Superintendent, to the fifth grade.

Mr F. H. Tucker, Officiating fifth grade District Superintendent, to the first grade of Assistant Superintendents.

Mr. C. C. Plowden, Officiating first grade Assistant Superintendent, to the second grade.

With effect from the 25th January 1890, consequent on the return from leave of Mr. F. Wilcox, second grade District Superintendent—

Mr. A. E. C. Bolst, Officiating second grade District Superintendent, to the third grade.

Mr C. A. Fisher, Officiating third grade, to the fourth grade.

Mr I. H. W. D. Clark, Officiating fourth grade District Superintendent, and with him Mr. R. F. Guise, Officiating fourth grade District Superintendent, to the fifth grade.

Mr. A. S. Judge, Officiating fifth grade District Superintendent, to the first grade of Assistant Superintendents.

Mr. A. Shuttleworth, Officiating first grade Assistant Superintendent, to the second grade.

JAILS.—*The 18th February* 1890.—Mr. H. M. Owen, Assistant Superintendent of the Bhagulpore Central Jail, is allowed leave for six months, under article 370 of the Civil Service Regulations, with effect from the date on which he may avail himself of it.

REGISTRATION.—*The 15th February* 1890.—Baboo Hari Prasanna Gupta, acting Rural Sub-Registrar of Bhatiyari, in the district of Chittagong, is confirmed in that appointment.

EDUCATION.—*The 18th February* 1890.—Mr. N. L. Hallward, M A., is appointed to be a member of the Bengal Educational Service and is posted as Professor in the Dacca College.

Mr. H. R. James, M. A., is appointed to be a member of the Bengal Educational Service and is posted as Professor in the Patna College.

ZOOLOGICAL.—*The 18th February* 1890.—Colonel J. Waterhouse is appointed to be a member of the Committee of Management of the Zoological Gardens at Alipore.

MEDICAL.—*The 15th February* 1890.—Assistant Surgeon Gunga Gobind Sarkar is appointed temporarily to have medical charge of the civil station of Bogra, with effect from the forenoon of the 3rd December 1889.

The 17th February 1890.—Assistant Surgeon Tamizuddin Ahmed, of the Bengal Provincial establishment, is transferred to the Imperial establishment.

The following notification is republished from the *Assam Gazette*:—

No. 293R.—The 5th February 1890.—Under the provisions of section 127 of the Assam Land and Revenue Regulation, 1886, the Chief Commissioner invests Mr. H. LeMesurier, Assistant Commissioner, Cachar, with the power to attach and sell moveable property under section 69 of the Regulation.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT.—(FORESTS.)

NOTIFICATION.

The 4th February, 1890.—Whereas by the notifications severally specified below, the undermentioned forests, situated in the Darjeeling district, were declared to be Reserved forests under the sections of the Indian Forest Act (VII of 1878) recorded against each of them, and whereas the Lieutenant-Governor is not satisfied as to the manner in which enquiries regarding rights in the said forests have been recorded, he is pleased to appoint the Deputy Commissioner of Darjeeling to be the Forest Settlement Officer, who will, under the provisions of Chapter II of that Act, determine the boundaries to be finally laid down, and enquire into and determine the existence, nature, and extent of any rights alleged to exist in favor of any person in, or over, any land comprised within the boundaries specified below, or in, or over, any forest produce to be found therein in cases where claims to such rights are preferred by any individual or community under section 6 of the said Act; and will also himself ascertain, as far as possible, and enquire into the existence of any rights mentioned in sections 4 or 5 of the said Act, within the said boundaries, which are not claimed under section 6, so far as the same may be ascertainable from the records of Government and the evidence of any persons likely to be acquainted with the same; and will otherwise perform the duties of a Forest Settlement Officer under that Chapter.

The Lieutenant-Governor is further pleased, under section 16 of the Indian Forest Act, to appoint the Commissioner of the Rajshahye Division to hear appeals from the decisions of the Forest Settlement Officer as above appointed.

(1) GOOMPAHAR FOREST.

(Includes lands described in notifications under the Indian Forest Act:—Section 34, dated the 23rd January, 1879, as Goompahar forest, exclusive of area mentioned in notification dated the 24th November, 1884 under section 26; section 19, dated the 19th July, 1880, as Pograinbong forest, and section 19, dated the 16th December, 1883 as Goom forest)

Description of boundaries.

North.—The source of the Little Rangit river, (Nepal frontier pillar No. 21 at Mani Bhanjan), down that river till it meets the boundary of the Permaigiri khas land; then a demarcated line eastwards along the southern boundaries of the following lands:—Permaigiri khas land, Mim Tea Estate, Tumsong khas land, Lingia Tea Estate, Khail Tea Estate, Christina Tea Estate, Rishihat khas land, Burbattia khas land to the Kuhil Jhora; then the Kuhil Jhora to the Hill Cart Road.

East.—The Hill Cart Road; then a demarcated line passing round Batasidhara village to the north-west boundary point of the Goom Tea Company's location; along the boundary of that location to the Goompahar ridge; across that ridge to the old (Upper) Goompahar Cart road; along that road to the head of a small jhora tributary to the Bing jhora; and down the small jhora to the south boundary.

South—A demarcated line separating the forest from the following lands:—Tungsong and Pubong Tea Estates, Palongdong and Pagraingbong khas lands to the Nagri ridge at the head of the Kundongbong jhora; the Silimbong and Chamang Tea Estates, and the lands leased to Atchay Lall Moodi to the Nepal frontier.

West.—The Nepal frontier to the starting point.

(2) SENCHAL FOREST.

(Includes the Senchal, Rangirun, Pachim, Sonada and Rungbul blocks of the Rangnu Tukdah and Senchal forest, notified under section 34 in the notification of the 23rd January, 1879, and the Dooteria forest, notified under section 34 in the notification of same date.)

Description of boundaries.

North-West—From the boundary post on the Bing jhora, up that jhora to the saddle at Jor-bungalow, skirting and excluding the bazar and Raja of Burdwan's land; then down the Rangnu river to its junction with the Senchal jhora.

North-East—Up the Senchal jhora to the Pashok road; then along the Pashok road to the Sureil turning; then up the ridge to Tiger Hill and on to Senchal G. T. S.; then down the main Senchal ridge to the head of the Rishap (or Sureil) spur at the source of the Runum jhora; down that jhora to the old Military road.

South—The old Military road to the Pachim jhora; then a demarcated line to the old cart road trace; then along that trace to its junction with the Darjeeling-Himalayan Railway near the Rungmuk jhora; then the Darjeeling-Himalayan Railway (excluding road location) to the Dooteria spur at the top of Dooteria path; then the north boundary of the Dooteria Tea Estate to the starting point.

Note.—The Rinchintongdhara north and south blocks, which were declared to be Reserved forest in the notification, dated the 30th March, 1886, under section 19 of the Act, also form part of the Senchal forest.

(3) TUKDAH FOREST.

(Includes the Rangirun, Dawaipani, Tukdah, Hoom, Poomong, Runjo (part), Tiger hill, Rangbi and Rishap (part) blocks of the Rangirun, Tukdah and Senchal forest, notified under section 34 in the notification of the 23rd January, 1879, and parts of the additions made to that forest by the notifications under section 19, dated the 25th March, 1881 [parts of the Runjo and Rishap blocks.)]

Description of boundaries.

North—From the point on the Senchal jhora at the south of the land leased to Mr. Wilson, along the eastern boundary of the land so leased to the Rangnu river; the Rangnu river to its junction with the Kejok jhora; then along boundaries of the Charlesfield, mineral springs and Tukdah Tea Estates, and the Tukdah and Lopchu khas lands.

East—A demarcated line separating the forest from the Mangwa, Linding and Hoom khas lands; then from the Rangli Rangliot Tea Estate, and from the Poomong Government land to the Rangjo river; then a continuation of the line up to the Sureil road; then along that road to a point about a mile from the Sureil bungalow; then a line due south to the top of the Rishap spur.

South—Along the crest of the Rishap spur to the head of the Runum jhora.

West—From the Runum jhora to the Senchal jhora, along the eastern boundary of the Senchal forest.

(4) MAHALDERAM FOREST.

(Includes the Sepoydhura and Chattakpur blocks of the Rangirun, Tukdah and Senchal forest as notified in the notification under section 34, dated the 23rd January, 1879, and part of the additions to the same made by the notifications under section 19, dated the 25th March, 1881, [now known as the Suriel and Mamrim blocks.)]

Description of boundaries.

North—Senchal and Tukdah forests.

East—A demarcated line running due south from a point on the Rishap ridge to the Sureil-Kurseong road; then that road to a point a short distance south of the Reaing river; then a straight demarcated line across the Mamrim valley to a survey point (stone post No. 66) on the Mahalderam-Sitong spur.

South—The Mahalderam-Sitong ridge to the old Military road; then southwards along that road to the north demarcated boundary of the Raja of Burdwan's land; then along that demarcated boundary to the Darjeeling-Himalayan Railway.

West—The Darjeeling-Himalayan Railway to the Runum jhora, excluding locations along the Hill Cart Road.

(5) RANGIT FOREST.

(Includes lands described in notification, dated the 23rd January, 1879, under section 34, as the Badamtam and Seem forests, and the Sumbong and Pashok blocks of the Sumbong, Pashok and Giljong forests.)

Description of boundaries—Badamtam block.

North—The Rangnit and Great Rangit rivers.

East—The Rangnu river.

South—The Rangnu river and the Badamtam Tea Estate.

West—The Badamtam Tea Estate.

Seem block.

North—A demarcated line from the Pusongpung spur to the Sumbong spur.

East and South-east—A demarcated line along the Sumbong spur meeting the boundary of the Sumbong block.

South-West and West—A demarcated line along the Pusongpung spur.

The Sumbong and Pashok blocks.

North—The Great Rangit river.

East—The Teesta river.

South—The Rangiak jhora; then a demarcated line along the boundary of the Pashok Tea Estate; then the Rungbong jhora; then a demarcated line along the boundary of the Lopchu Tea Estate to the Sumbong spur, on which it meets the boundary of the Seem block.

West—A demarcated line following the boundaries of the Glenburn and Sumbong Tea Estate to the Great Rangit river.

(6) MANGWA FOREST.

(Part of the land included in the notification, dated the 23rd January, 1879, under section 34, as the Sumbong, Pashok and Giljong forest.)

Description of boundaries.

North—The Rangiak jhora.

East—The Teesta river.

South—The Rangnu river.

West—A demarcated line along the boundary of the Linding and Mangwa Government waste lands.

(7) REAING FOREST.

(Part of the land included in the notification, dated the 23rd January, 1879, under section 34, as the Sumbong, Pashok and Giljong forest, known as the Rangnu and Reaing blocks, and the Berrik block, forming part of the land so notified as the Sukna-Teesta forest.)

Description of boundaries.

North—The Rangnu river.

East—The Teesta river.

South—The foot-path from the Teesta valley to Mongpu, from the Teesta river to the Reaing river.

West—The Reaing and Rangjo rivers; then a demarcated line forming also the boundary of the lands in the occupation of the Teesta Valley Tea Company.

(8) SITONG AND SIBHOK HILLS FOREST.

(Part of the land included in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, and known as the Kundong (part), Sitikhola, Numbong, Sitong, Andera, Ruyem, Chawa, Gola and Upper Ghoramara blocks, and an addition to the Kundong block of that forest, notified under section 19 in the notification dated 30th April 1881.)

Description of boundaries.

North—The foot-path from Mongpu to the Teesta Valley, from the Reaing river to the Teesta river.

East—The Teesta river.

South—The Sibhok or Chawa river; then the spur or ridge drained on the north by that river to the Latpunjor spur; then up that spur to Latpanchor, and along the ridge to Sitong.

West—A demarcated line forming the boundary of the land in occupation of the Government Cinchona Department; then the Reaing river.

(9) RILLI FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Nazzeokh and Tunang forests, and part of the Teesta-Cuel forest, notified under section 19 in notification, dated the 17th June, 1881, now known as the Gooling and Poubu blocks.)

Description of boundaries.

North and West—The Rilli river and the Teesta river.

East—A demarcated line along the ridge from the junction of the Rere Oong with the Rilli river to Tunang; then along a ridge from Tunang to the junction of the Nuboong and Rey Oong rivers; then along the watershed between the Seth and Siok jhoras; then along the watershed between the Door and Siok jhoras to the trigonometrical station at Nazzeokh; then along the watershed between the Gooling and Runeyoth jhoras to the Runeyoth jhora, and southward across that jhora to the ridge forming the watershed between the Runeyoth and Peen jhoras, and along that watershed to Ramtik; then along a spur to the junction of the Ramtik and Pursum jhoras.

South—The Pursum jhora.

(10).—KALIMPONG FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Rinkinpung and Kalimpong forests.)

Description of boundaries.

North.—The Teesta river.

East.—The Tor Chu; then a demarcated line running nearly parallel to the Teesta river at a distance from about half to one mile to the head of the Seerjam Chu; then following a ridge to Rinkinpung trigonometrical station and another spur running in an easterly direction to the Rilli river; then the Rilli river to its junction with the Rere Oong.

South.—The Rilli river.

West.—The Teesta river.

(11).—DUMSONG FOREST.

(Includes the land described in the notification, dated the 23rd January, 1879, under section 34, as the Dumsong forest)

Description of boundaries.

North.—The Rungpo Chu.

East.—A demarcated line on a ridge from the Rungpo Chu passing by Kabu and Pedong hill to the road at Dochung; then along the road from Dochung towards Kalimpong.

South.—A demarcated line running from the Dochung-Kalimpong road to the watershed between the Teesta and Rilli rivers, meeting that watershed about three quarters of a mile south-west of Echa; then generally running first in a northerly and then in a westerly direction to the Tor Chu.

West.—The Tor Chu and the Teesta river.

(12).—RISSOOM FOREST.

(Includes the lands described in the notification dated the 23rd January, 1879, under section 34, notified as the Payong and Mayrong forests, and part [Rissoom and Khempung blocks] of the Khempung forest).

Description of boundaries.

North.—The Dumsong forest; then a demarcated line from the boundary of the Dumsong forest running from the old Pedong-Kalimpong road to the Pakathaw Monastery.

East and South.—A demarcated line along the watershed of the Mayroug Chu and Rushett Chu to a point near Ludam; then the same watershed for about one mile to the head of the Singkanim Chu; then the ridge at the head of the Rilli river to the Labah ridge.

South.—The watershed between the Rilli river and the Jeet Chu and Chumung Chu to the head of the Hool Chu.

West.—Down the ridge east of the Hool Chu to the Rilli river; then the Rilli river to its junction with the Singkanim Chu; then a demarcated line to the starting point.

(13).—LOOLAGAON FOREST.

(Includes the lands described in the notification dated the 23rd January, 1879, under section 34, as the Loolagaon forest and part [the Siehoor block] of the Khempung forest; also part [the Pemling, Bokhim, and Chumung blocks] of the Jeet and Chee Chu forest, which was declared to be a Reserved forest under section 19 by the notification of the 28th August, 1882.)

Description of boundaries.

North.—The Rilli river; then the Khempung block of the Rissoom forest to Nunkfoo trigonometrical station.

East and South.—Down the ridge southwards from the Nunkfoo trigonometrical station to a demarcated line continuing westwards from the south-west point of the boundary of the Labah block, Pankasari Reserved forest round the heads of the valleys of the Chumung Chu, Mahaka Chu, Purmagree jhora, and other streams running into the Ghees Nadi, and of the Turoo Oong, to a point on the watershed of the Rilli river on one side and the Jeet and Lessoo rivers on the other side.

West.—A demarcated line passing west of Rieun trigonometrical station to the Rere Oong, then to the Rungno Chu, and then northwards to the Rilli river, which forms part of the north boundary.

(14).—DHOBIJHORA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Dhobijhora forest, and the addition to the same gazetted under section 19 in the notification dated the 8th November, 1883.)

Description of boundaries.

North.—The Old Kurseong-Darjeeling Military road.

East.—A demarcated line separating the forest from Juman Sing's lands.

South.—A demarcated line separating the forest from the land known as Giddapahar.

West.—A demarcated line to the Old Kurseong-Darjeeling Military road, separating the forest from land of the Castleton Tea Estate; then the Old Kurseong-Darjeeling Military road, excluding the land demarcated out as the Dow Hill Government school location.

(15).—SIBA KHOLA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sibakhola forest.)

Description of boundaries.

North-East.—The Sibakhola river.

South.—A demarcated line separating the forest from the lands of the Gayabari Tea Estate and of the Maharajah of Burdwan known as Kurjung.

West.—The Hill Cart Road.

(16).—MANJUA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Manjua forest [excluding the land described in the notification under section 26 by the notification dated the 18th February, 1882], and the addition to that forest which was declared under section 19 in the notification dated the 10th August, 1883.)

Description of boundaries.

North.—A demarcated line separating the forest from the remainder of the land known as Pinglu Tar.

East.—The Balasan river.

South.—A demarcated line from the junction of the Kalijhora and the Balasan river, separating the forest from the lands in the occupation of the new Fallodhi Tea Estate.

West.—A demarcated line separating the forest from the lands in the occupation of the Singbulli and Murmah Tea Estates.

(17).—KOOHEIN FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Koohein forest.)

Description of boundaries.

North.—A demarcated line from the Mechi river to the south-east corner of the Rangdo Estate, separating the forest from the lands of that estate.

East.—A demarcated line separating the forest from the lands of the Phugurhi Tea Estate.

South.—The Kuhein jhora.

West.—The Mechi river (Nepal frontier).

(18).—MANJHA FOREST.

(Includes the lands describedin the notification, dated the 23rd January, 1879, under section 34, as the Khyrbani and Lohagurce forests; also the lands described in that notification as the Manjha forest with the modifications in the Manjha forest made by the following notifications:—Additions under section 19, by notifications dated 10th August 1883 [9 acres] and dated 26th May, 1886, [1·75 acres]; exclusions under section 26, by notifications dated 18th February, 1882, [34 acres]; 6th June, 1885, [1·75, acres]; 29th December, 1885, [3 acres], and 12th March, 1887, [1·75 acres].

Description of boundaries.

North.—A demarcated line separating the forest from the lands in the occupation of the Tingling Tea Estate; then to a stream tributary to the Potong jhora; then that stream to its junction with the Potong jhora; then the Potong jhora to where the demarcated line separating the lands in the occupation of the new Fallodhi Tea Estate from the forest takes off from that jhora; then the said demarcated line to the Balasan river.

East.—A demarcated line on the Balasan river.

South.—A demarcated line separating the forest from the Balasan block of the Balasan forest, and from the lands in the occupation of the New Terai Tea Association, Indian Terai Tea Company, and Manjha Tea Estate.

West.—The boundary of the Central and Upper Mechi blocks of the Mechi forest; then demarcated lines separating the forest from the lands in the occupation of the Mechi and Lohagarhi Tea Estates to the Mechi river; then the Mechi river.

(19).—MECHI FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Mechi forests [two areas] and a detached area [the Surjbur forest]; also the additions to the Mechi forest made by the notifications under section 19, dated the 12th August, 1880, of the areas named Nipania and Gurabadi).

Description of boundaries.

North.—A demarcated line starting from the Mechi river forming part of the west boundary of the lands in the occupation of the Mechi Tea Estate.

East.—The Lohagurhi block of the Manjha forest; then a demarcated line separating the forest from the lands in the occupation of the Manjha, Morapur and Nipania Tea Estates.

South.—A demarcated line following the boundaries of adjoining jote lands to the Mechi river (Nepal frontier).

West.—The Mechi river (Nepal frontier).

Surjbur block.

North, East and South.—A demarcated line following the boundaries of adjoining jote lands.

West.—The Mechi river (Nepal frontier).

(20).—BALASAN FOREST.

(Includes part of the lands described in the notification dated the 23rd January, 1879, under section 34, as the Balasan and Dulkajhar forest, [the areas now known as the Balasan and Tarabari blocks].

Description of boundaries.

North.—A demarcated line across the Balasan river from Panighatta to the New Terai Tea Company's godown.

East.—A demarcated line separating the forest from lands leased for tea cultivation and from jote lands.

South.—A demarcated line across the New and Old Balasan rivers to the right bank of the latter.

West.—A demarcated line following approximately the right bank of the Balasan river, and forming also the boundary of the Tirihana block of the Pantapari forest; M and M Terai Tea Estate and New Terai Tea Association lands.

(21).—DALKAJHAR FOREST.

(Includes part of the lands described in the notification dated 23rd January 1879, under section 34, as the Balasan and Dalkajhar forest [viz., the areas now known as the Khadma, Taipu, Dalka (part), Central, Lalfa Bagdogra (part), Harlia, Danhara (part), Bengdubi (part), and Rishabari (part) blocks]; also the additions to that forest made by the notifications under section 19, dated 12th August 1880, of the following lands:—Rishabari, Major Wardroper's and Kanoo Chowdry's jotes [forming parts of the areas now known as the Rishabari, Bagdogra and Bengdubi blocks]; Multa forest [forming the present Multa block and part of the Dalka block]; and the portions of the Bengdubi forest [forming parts of the present Danhara and Bengdubi blocks].)

Description of boundaries.

North.—A demarcated line from the Rakti Nadi forming the boundaries of Jabra Khadma, Ord-Terai and Tirihana Tea Estates; then by the Tirihana block of the Pantapari forest.

East.—The Pantapari and Boiranti blocks of the Pantapari forest; then the Harlia Nadi.

South.—A demarcated line to the Taipu Nadi; then the Taipu Nadi to its junction with the Kaldor Nadi on the boundary between Sanesi Than and Kishtapur Tea Estates; then the Kaldor Nadi; then a demarcated line to the junction of the Lalfa with the Multa Nadi.

West.—The Multa Nadi; then a demarcated line excluding Jhakuadhura jote and across the Multa Nadi to the Rakti Nadi; then the Rakti Nadi.

Note.—From the area included in the above boundaries, the following jotes are excluded by demarcation:—

(1). Shamlal; (2). Tepua Chamaru; (3). Ragho.

(22).—PANTAPARI FOREST.

(Includes part of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Balasan and Dalkajhar forest [the portion now known as the Tirihana block]; also part of the lands described in the notification of 12th August 1880 under section 19, as the Bengdubi forest [the portions now known as the Pantapari, Latua Boiranti and Barobhita blocks].)

Description of boundaries.

North.—The Tarabari block of the Balasan forest.

East.—The left bank of the Old Balasan river.

South.—A demarcated line from the left bank of the Old Balasan river to the Harlia Nadi, separating the forest from jote lands.

West.—The Bengdubi and Danhara blocks of the Dalkajhar forest; then a demarcated line separating the forest from the Tirihana and M and M Terai Tea Estates.

(23).—BAMONPOKRI FOREST.

(Includes the lands described in the notification dated the 23rd January, 1879, under section 34, as the Bamonpokri forest.)

Description of boundaries

North.—A demarcated line separating the forest from lands known as Mount Pereira.

East.—The Rakti Nadi.

South.—A demarcated line from the Rakti Nadi to the Rangichung Nadi, separating the forest from lands in the occupation of the Marionbari Tea Estate.

West.—The Rangichung Nadi.

(24).—Rakti FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Rakti Forest.)

Description of boundaries.

North.—The Silligori-Pankabari road.

East and South-East.—The eastern branch of the Rakti river.

West.—The Rangichung and Bissurbatti jhoras; then a demarcated line east to the Rangichung jhora; then that jhora; then another demarcated line east to the junction of the two branches of the Rakti river; then the Rakti river.

(25).—LAMAGUMBA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Lamagumba Forest.)

Description of boundaries.

North and East.—A demarcated line from the junction of the Chochi jhora with the Rohoni river separating the forest from the lands in the occupation of the Selim Hill Tea Estate.

South.—A demarcated line separating the forest from the lands in the occupation of the Lamagumba Tea Estate.

West.—The Rohoni river.

Note.—From the area described within the boundaries above given is excluded the location of 6 acres, 2 roods, 3 poles, held by the Selim Tea Company.

(26).—SUKNA FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1897, under section 34, notified as the Sukna-Teesta forest, now known as the Kuklong, Sukna, Rungdung, Kynanuka, Adulpur and Chamta blocks.)

Description of boundaries.

North.—A demarcated line starting from the point of the Gumti on the Hill Cart Road at the head of the Kuklong Nadi along the Hill Cart Road for a short distance, and then across the Rungdung valley to the junction of the Chibla Khola with the Punchanai river, the whole forming the boundary between the forest and the lands in the occupation of the Sepoydhura Tea Estate.

East.—The Panchanai river to the north-east point of the Kynanuka jote boundary; then a demarcated line along the boundaries of that jote round to the Sukna trigonometrical station on the Hill Cart Road; then the Hill Cart Road to a point near Methibari.

South.—A demarcated line separating the forest from Methibari and Chamta Tea Estates to the Chamta Nadi.

West.—The Chamta Nadi to the Sukna-Adulpur road; then a demarcated line to the Kuklong Nadi skirting the village lands of Kynanuka; then the Kuklong Nadi, which separates the forest from the lands in the occupation of the Terai Tea Company, Terai Tea Association, and Selim Hill Tea Estate.

(27) —MAHANADI FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, now known as the Pundig, Mahanadi, Mohurgong, Hatisurra and Panchanai blocks.)

Description of boundaries.

North.—A demarcated line from the Panchanai river to the Mahanadi river, separating the forest from the lands in the occupation of the Narbong Tea Estate.

East.—The Mahanadi river to the Sukna-Teesta road crossing.

South.—A demarcated line along that road to the Panchanai river.

West.—The Panchanai river.

(28).—CHAMPASARI FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, now known as the Gulma, Singimari, Upper Champasari and Lower Champasari blocks.)

Description of boundaries.

North.—The Sukna-Sibhok forest road from the Mahanadi river to the Gulma river.

East.—The Gulma river to the Sukna-Teesta road crossing at Champasari.

South.—A demarcated line along the Sukna-Teesta road to the Mahanadi river.

West.—The Mahanadi river.

(29).—CHOKLONG AND LATPANCHOR FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest now known as the Lower Ghoramara, Gulma valley, Choklong, Jogijhora, Kuhi, Bandarjhola, Mana (part) and Latpanchor blocks; also the lands gazetted under section 19, in the notification, dated the 12th August, 1880, as the Manering forest, now forming part of the Mana block)

Description of boundaries.

North.—A demarcated line along the Mamrim ridge from the north-east point on the boundary of the Mahalderam Tea Estate to Sitong Hill.

East.—The Mimbong and Sitong blocks of the Sitong forest, and the Upper Ghoramara and Chawa blocks of the Sibhok Hill forest; then the boundary between Darjeeling Hills and Terai pergunnahs to the Sukna-Sibhok forest road.

South.—The Sukna-Sibhok forest road, from the Ghoramara Nadi to the Mahanadi river.

West.—The Mahanadi river and Manajhora; then a demarcated line forming part of the east boundary of Mahalderam Tea Estate.

(30).—SIBHOK FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, now known as the Janaikuri, Somardanga, Sibhok North, Sibhok East, Sibhok West, and part of the Shilibhita blocks; also the lands gazetted under section 19, in the notification, dated the 12th August, 1880, as the Shilibhita forest, now forming part of the Shilibhita block)

Description of boundaries.

North.—The Sibhok or Chawa river.

East.—The Teesta river along the boundary between the Darjeeling and Julpigori districts.

South.—The Janaikuri Nadi; then a demarcated line to the junction of the Jial jhora with the Ghoramara Nadi; then the Ghoramara Nadi to its junction with the Gulma river.

West.—The Gulma river to the Sukna-Sibhok forest road; then the boundary between Darjeeling Hills and Terai pergunnahs to the Sibhok river.

P NOLAN,
Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT—(OPIUM).

NOTIFICATION.

The 17th February, 1890.—It is hereby notified that at the examination for admission into the Opium Department held simultaneously at Calcutta and Allahabad in January, 1890, in pursuance of the notification dated the 5th October, 1889, the following candidates passed and obtained the highest aggregate of marks :—

(1) Mr. Albert Datta.
(2) „ Alfred Burt.
(3) „ A. H. Biss.
(4) „ J E. Powell.

These gentlemen will be appointed to fill vacancies in the Opium Department as they occur, according to the order in which their names appear. The last named will, however, be appointed after the native gentleman to be selected by the Lieutenant-Governor has been appointed, as stated in paragraph 7 of the above-quoted notification.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 17th February 1890.—The Lieutenant-Governor directs, under section 101 of the Bengal Tenancy Act VIII of 1885, that a survey shall be made and a record of rights prepared in respect of all lands included in the boundaries of the following estate in the district of Nuddea :—

Name of estate.	Situation in pergunnah.
841, Chur Goalgram.	Shahanjial.

The particulars to be recorded in the survey and record of rights shall be the following :—

1. The name of each tenant.
2. The class to which he belongs : that is to say, whether he is a tenure-holder, ryot holding at fixed rates, occupancy ryot, non-occupancy ryot or under-ryot; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
3. The situation, quantity and boundaries of the land held by him.
4. The name of his landlord.
5. The rent payable.
6. The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.
7. If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.
8. The special conditions and incidents, if any, of the tenancy.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 17th February 1890.—With reference to the Government notification dated the 17th February 1890, published in the *Calcutta Gazette* of the 19th February 1890, the Subdivisional Officer of Kushtea is hereby appointed under rule 1, Chapter VI of the rules made by Government under the Bengal Tenancy Act, to be the Settlement Officer of Estate Goalgram, No. 841, in the district of Nuddea.

P. NOLAN,
Secretary to the Govt. of Bengal.

DECLARATION.

The 17th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the Sherpur Town Post Office in the village of Sherpur, pergunnah Sherpur, zillah Mymensingh, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigah 13 cottahs and 4 chittacks of standard measurement, bounded on the north by a ditch and unoccupied homestead land of Har Kumar Chaudhri; on the south by a drain and a road belonging to Krisna Chandra Patranavis; on the west by a Municipal tank and the school compound; and on the east by a drain and a road belonging to Krisna Chandra Patranavis, is required within the aforesaid village of Sherpur.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

P. NOLAN,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 166A.

The 12th February 1890.—Baboo Satkari Haldar, B.L., is appointed to act as a Munsif in the district of the 24-Pergunnahs, to be ordinarily stationed at the Sudder station of that district, during the absence, on leave, of Baboo Revati Churn Banerjee, or until further orders.

The 15th February 1890.—Baboo Amar Chunder Mukerjee, Munsif of Palamow, in the district of Lohardugga, is vested with the powers of a Magistrate of the second class.

The orders of the 22nd and the 25th January 1890, published in the *Calcutta Gazette* of the 29th idem, granting Baboo Gopi Krishna Banerjee, Munsif of Bagirhat, in the district of Jessore, leave on medical certificate for two months, and appointing Baboo Satkari Haldar, B.L., to act as Munsif of Bagirhat, are cancelled.

Baboo Ananta Ram Ghose, Munsif of Gya, is appointed to act as Subordinate Judge of Dinagepore, during the absence, on leave, of Baboo Hara Gobind Mukerjee, or until further orders.

Baboo Ananta Ram Ghose is vested with the powers of a Munsif, and with those of a Judge of a Court of Small Causes for the trial of suits cognizable by such a Court up to the value of Rs. 100 within the local limits of the Sudder Munsifi of Dinagepore.

Baboo Gopal Chunder Mukerjee, B.L., is appointed to act as a Munsif in the district of Gya, to be ordinarily stationed at the Sudder station, during the absence, on deputation, of Baboo Ananta Ram Ghose, or until further orders.

Baboo Shanta Nath Bhattacharjea is appointed to be an Honorary Magistrate of the Independent Bench at Nattore, in the district of Rajshahye, and is vested with the powers of a Magistrate of the third class.

Moulvie Obedullah is appointed to be an Honorary Magistrate of the Perozepore Bench, in the district of Backergunge, and is vested with the powers of a Magistrate of the third class.

The Lieutenant-Governor accepts the resignation tendered by Sayed Habibar Rahman of his appointment as an Honorary Magistrate of the Perozepore Bench, in the district of Backergunge.

Baboo Prosonno Chundra Chackravarti is appointed to be an Honorary Magistrate of the Gaibanda Bench, in the district of Rungpore, and is vested with the powers of a Magistrate of the third class.

Baboo Tulsi Dass Mukerjee, Sub-divisional Magistrate, Nilphamari, in the district of Rungpore, is vested, under section 407 of the Code of Criminal Procedure, with powers to hear appeals from convictions by Subordinate Magistrates of the second and third classes.

The 17th February 1890.—Baboo Monmohun Chakravarti, Temporary Deputy Magistrate and Deputy Collector, Pooree, is vested with the powers of a Magistrate of the first class.

The 18th February 1890.—Baboo Tara Prosonno Das, B.L., is appointed to act as a Munsif in the district of Midnapore, to be ordinarily stationed at the Sudder station, during the absence, on leave, of Baboo Kanti Chandra Bhaduri, or until further orders.

Baboo Jogesh Chunder Mookerjee, Officiating Sub-Deputy Collector, Madhubani, Durbhunga, is vested with the powers of a Magistrate of the third class.

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Moulvie Karam Hossein, Officiating Deputy Magistrate, Durbhunga, to take down evidence in criminal cases in the English language.

Baboo Amrita Lal Pal, Subordinate Judge of Gya, is allowed leave for two days under article 306(*b*) of the Civil Service Regulations, in extension of the leave granted to him under the order of the 4th April 1889.

GRANT OF LEAVE TO MUNSIFS.—*The 14th February* 1890.—Baboo Kanti Chandra Bhaduri, Munsif of Midnapore, is allowed leave for two months, under article 306 (*b*) of the Civil Service Regulations, with effect from the 1st February 1890.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION

The 18th February 1890.—It is hereby notified that under the provisions of section 641 of the Code of Civil Procedure (Act XIV of 1882), the Lieutenant-Governor exempts Maharajah Girija Nath Roy of Dinagepore from personal attendance in Civil Courts.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT, BENGAL.

IRRIGATION.

The 17th February 1890.

No 43.—*Notification.*—With reference to Bengal Government Resolution, No. 238*I.A*, dated the 11th February 1890, appointing a Commission to enquire into certain matters relating to the "Circular and Eastern Canals," and to notification No. 350, dated the 17th September 1889, imposing certain tolls at Khoolna on boats using that route, *it is hereby notified* that the last quoted notification above is cancelled. Final orders on the points under enquiry, which include "the boundaries within which tolls are levied," will be issued subsequently.

No 44.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for constructing a retired line of embankment in the village of Sreenagore, taruf Bansra, pergunnah Medunmull, zillah 24-Pergunnahs, it is hereby declared that for the above purpose a piece of land 2,140 feet long, 132 feet broad, measuring, more or less, 19 bighas 12 cottahs and 5 chittacks of standard measurement, bounded on the north and south by the Government embankment, and east and west by the paddy lands of Baboos Radha Mohun Banerjee and Tarruck Nath Banerjee, is required within the aforesaid village of Sreenagore.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

No. 45 —*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for constructing a retired embankment in the village of Jehanabad, taraf Bonomallypore, pergunnah Medunmull, zillah 24-Pergunnahs, it is hereby declared that for the above purpose a piece of land 820 feet long, 135 feet broad, measuring, more or less, 7 bighas 13 cottahs and 12 chittacks of standard measurement, bounded on the north and south by the lands of Baboos Bussonto Kumar Roy Choudry and others of Baripore, and east and west by the Government embankment, is required within the aforesaid village of Jehanabad.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

NOTICE TO MARINERS (No. 19).

CHINA SEA.

SINGAPORE, WESTERN APPROACH—SALAT SINKI.

Bell buoy withdrawn; and a light vessel moored on Ajax shoal.

THE British Admiralty has given notice (No. 23 of 1890) that on 1st February 1890 a light-vessel will be moored on Ajax shoal, west side of Salat Sinki, western approach to New harbour, Singapore:—

The light will be a *flashing* white light, showing a *flash every thirty seconds*; it will be elevated 38 feet above the sea, and should be visible in clear weather from a distance of 10 miles.

The light-vessel will be painted yellow, with the word *Ajax* in white letters on a black ground on her sides. She will carry a caged ball, painted red, at the masthead, as a day mark.

Position, lat. 1° 13′ 55″ N., long 103° 40′ 20″ E.

Also, that on the same date, the Bell buoy now marking Ajax shoal will be withdrawn.

A. CROFT, *Director of Public Instruction.*

NOTIFICATION.

IN accordance with the Government of Bengal Notification of the 23rd July 1887, notice is hereby given that the next half-yearly examination of compounders will be held at 11 A M. on Wednesday, the 2nd April 1890, and subsequent days, at the Campbell Medical School.

2. Every candidate must produce one of the following certificates—

(*a*). From the Superintendent of a Vernacular Medical School that he has attended regularly for one year the compounder class of the school.

(*b*). From the legally qualified Medical Manager of a Chemists' and Druggists' establishment, recognised by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment.

(*c*). From a Civil Surgeon, that he has assisted in the dispensing of drugs at the Sudder dispensary of a Civil station for a period of five years.

3. Applicants must register their names and submit their certificates, together with a fee of Rs 3, at least one week before the 2nd April 1890, at the office of the undersigned

NOTE.—The students belonging to the compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the school entrance fee.

4. Should any candidate fail to pass the required examination he will forfeit his fee.

N. B.—The attention of candidates is drawn to Rules in section (*b*) of the Government notification of the 23rd July 1887, or paragraph 2 (*b*) of this notification, from which they will observe that the Chemists' and Druggists' establishments, from the legally qualified Medical Managers of which they obtain their certificates, will have to be recognised by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

S. COULL MACKENZIE, M D,
Supdt., Campbell Medical School.

Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 17th February 1890.—It is hereby notified that, under section 19, Act III (B.C) of 1885, the Lieutenant-Governor is pleased to appoint Munshi Eshau Ali and Munshi Mosaheb Lal to be members of the Begusarai Local Board, in the district of Monghyr, *vice* Munshi Goorsahai Sing and Baboo Hari Pershad, resigned.

H J. S. COTTON,
Offg Secy. to the Govt. of Bengal.

NOTIFICATION.

The 17th February 1890.—It is hereby notified for general information that, in exercise of the power vested in the Local Government under section 351 of Act III (B.C) of 1884, the Lieutenant-Governor is pleased to confirm the proposal of the Commissioners of the Comillah Municipality, made at a meeting, to impose a penalty not exceeding Rs. 20 for the infringement, after notice, of bye-law No. 9 of the bye-laws framed by the Commissioners under section 350 of the Act, and published under Government notification, dated 12th November 1889, at page 246, Part IB of the *Calcutta Gazette* of the 20th idem.

The bye-law thus amended is as follows :—

" 9. Every owner or occupier of a house or premises living within the latrine area, except those who resort to public latrines, must construct a privy of his own within his premises, at least 1½ feet above ground, and must provide it with a proper moveable receptacle of metal or earthenware.

" The penalty for infringement, after notice, shall be a fine not exceeding Rs. 20."

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Ram Sadan Bhattacharjea to be a Commissioner of the Purulia Municipality, in the district of Manbhoom, *vice* Mr. C. F. Farewell, who has ceased to be a Commissioner under section 20 of the Act.

H J. S COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th February 1890 —It is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 4 of Act XX of 1887, the Lieutenant-Governor has been pleased to declare that the provisions of section 3 of the Act with respect to wild birds shall apply, so far as regards the rules framed for the cantonment of Dum-Dum, to deer and hares.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th February 1890.—The following rules framed by the Military authorities of the Dum-Dum Cantonment under section 3 of Act XX of 1887, for the protection of wild birds and game within the limits of the Cantonment, are hereby confirmed by the Lieutenant-Governor under clause (4) of the said section of the Act, and are published for general information under clause (5) of section 6 of the General Clauses Act I of 1887:—

Rules.

1. "Wild bird," for the purpose of these rules, shall include jungle fowl, peafowl, pheasants, partridges, quail, snipe, plover, wild duck, teal and ortolans.

2. The Local Government having, by notification of this date, declared that the provisions of section 3, Act XX of 1887, shall apply to hares and deer, the following rules will apply to those animals also as well as to wild birds.

3. The "breeding season" for the purposes of these rules shall extend from the 15th March to the 15th August.

4. Whoever, during the breeding season, has in his possession in the Cantonment of Dum-Dum any wild bird, deer or hare recently killed, or exposes for sale any such bird or animal living or dead, shall be liable to a fine not exceeding Rs. 5 for each bird or animal.

5. Whoever, during the breeding season, imports into the Cantonment the plumage of any kind of wild bird recently killed or taken, or the fur or skin of any hare or deer recently killed or taken, shall be liable to a fine not exceeding Rs. 5 for each bird or animal.

6. In the case of a second conviction, the fine may extend to Rs. 10 for each bird or animal.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

NOTIFICATION.

The 18th February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Ambica Charan Bose to be a Commissioner of the Moheshpore Municipality, in the district of Jessore, *vice* Baboo Jaminipati Roy Chowdhury, deceased.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal

DECLARATION.

The 18th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Ghatal Municipality for a public purpose, viz., for erecting houses for the municipal mehters as well as for the construction of a road to those houses, in the village of Konenagore, pergunnah Barda, district Midnapur, it is hereby declared that for the above purpose 3 plots of land, measuring 5 cottahs and 13 chattacks of standard measurement, are required. The lands are bounded as follows :—

1st Plot.—Measuring 4 cottahs and 13 chattacks, is bounded on the North and East by the lakheraj land of Rama Nath Roy; on the South by the embankment of Choudhury's tank; and on the West by the Choudhury's tank.

2nd Plot.—Measuring 10 chattacks, is bounded on the North by the lakheraj land of Rama Nath Roy; on the South by paddy land; East by a public drain; and the West by the lakheraj land of Rama Nath Roy.

3rd Plot.—Measuring 6 chattacks, is bounded on the North and East by the public drain; on the West by lakheraj land of Rama Nath Roy; and on the South by the paddy land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 17th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., widening Beny Madhub Nandan Brothers' 1st Lane, it is hereby declared that for the above purpose pieces of land Nos. 52, 51, 50, 49, 40, 39 and 4, Beny Madhub Nandan Brothers' 1st Lane, and No. 7, Russa Road North, in Bhowanipore, Dihi Punchannogram, district 24 Pergunnahs, measuring, more or less, 4 cottahs 18 chittacks and 8 square feet only, are required. The boundaries of the lands are as follows:—

Portion marked A on plan.—On the North, portion of No. 7, Russa Road North; on the South, Beny Madhub Nandan Brothers' 1st Lane; on the East, partly Russa Road North, and partly portion of No. 7, Russa Road North; and on the West, partly Beny Madhub Nandan Brothers' 1st Lane, and partly portion of No. 7, Russa Road North.

Portion marked B on plan.—On the North and East, Beny Madhub Nandan Brothers' 1st Lane; on the South, portion of No. 52, Beny Madhub Nandan Brothers' 1st Lane; and on the West, partly portion of No 52, Beny Madhub Nandan Brothers' 1st Lane, and partly a public drain.

Portion marked C on plan.—On the North and West, Beny Madhub Nandan Brothers' 1st Lane; on the South, portions of Nos. 50 and 51, Beny Madhub Nandan Brothers' 1st Lane; and on the East, a public drain.

Portion marked D on plan.—On the North and West, Beny Madhub Nandan Brothers' 1st Lane; and on the South and East, portion of No. 49, Beny Madhub Nandan Brothers' 1st Lane.

Portion marked E on plan.—On the North and East, portion of No. 4, Beny Madhub Nandan Brothers' 1st Lane; and on the South and West, Beny Madhub Nandan Brothers' 1st Lane

Portion marked F on plan.—On the North and East, Beny Madhub Nandan Brothers' 1st Lane; and on the South and West, partly portion of No. 39, Beny Madhub Nandan Brothers' 1st Lane, and partly portion of No. 40, Beny Madhub Nandan Brothers' 1st Lane.

Plan and specifications of the land are filed in the Office of the Commissioners for public inspection

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 15th February 1890.—The following gentlemen are appointed, under section 112 of Act IX (B C.) of 1880, to be members of the Lohardugga District Road Committee :—

Mr. T. F. Peppe. | Kumar Jogat Mohun Nath Sahi Deo.
Lal Iswar Nath Sahi Deo.

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 19, 1890.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of the Nizamut lakhiraj State lands situated in the district of Nuddea will be put up to sale at the Collectorate of Nuddea on the 13th March 1890, corresponding with 1st Chyte 1296 B.S.

The purchasers of the plots will be subject to the following conditions :—

I.—The plots will be sold revenue free to the highest bidders above the upset price.

II.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up for sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

V.—The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Dacca Collectorate, the 8th February 1890.

L. HARE, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below to the undermentioned estate, situate in the district of Maldah, will be put up to sale at the Maldah Collectorate on 26th March 1890, corresponding with 14th Chaitra 1296 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid at once.

4*th*—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Government revenue assessed.

In addition to the above, there are 1,464 estates with balances under Rs. 500 each, aggregating Rs. 1,70,199-13-3, the particulars of which may be learnt at this Office. The Official Assignee has received for remuneration for the quarter ending 30th September 1889 Rs. 4,798-3-6.

A. B. Miller,
Official Assignee.

Calcutta,
The 1st October 1889.

Notification.

TO be peremptorily sold pursuant to a decree and order of the Calcutta High Court, Original Jurisdiction, made in suit No. 257 of 1888 (wherein Punno Bibee is plaintiff and Denonauth Ghose is defendant), and dated, respectively, the 2 3rd of August 1888 and the 12th of September 1889, by the Registrar of the said Court, in his sale-room in the Court-house on Saturday, the 29th of March next, at the hour of 12 o'clock at noon, an undivided one equal third part or share of the defendant in the following properties, viz.—

Lot. No. 1.—Nos 32 and 33, formerly Nos. 74 and 75, College Street in Calcutta, being an upper-roomed brick-built house and the land appertaining thereto, the area of which is about two cottahs, and which property is bounded on the north by Arpooly Lane; on the south by the dwelling-house of Kannoy Loll Seal and brothers; on the east by the tenanted house of Kally Churn Ghose; and on the west by College Street.

Lot. No 2.—No. 17-1, Jhamapooker in Calcutta, being an upper-roomed brick-built dwelling-house, and the land appertaining thereunto, on part whereof the same is erected, the area of which is about 8½ cottahs, and which property is bounded on the north by the dwelling-house of Madhub Chunder Ghose and his brothers; on the south by a Government drain; on the east partly by the dwelling-house of Khetter Mohun Bose and partly by a Government drain; and on the west partly by a Government drain and partly by the dwelling-house of late Issur Chunder Bonnerjee and partly by the house of Madhub Chunder Ghose and his brothers.

The abstract of title and conditions of sale may be seen at the Registrar's Office in the Court-house, or at the office of Baboo Gonesh Chunder Chunder, the plaintiff's Attorney, at No. 5, Hastings Street in Calcutta, and will be produced at the sale.

R. BELCHAMBERS, Registrar

Gonesh Chunder Chunder, Plaintiff's Attorney.

High Court, Calcutta, Original Side, the 11th February 1890.

(3543—1)

Notification.

TO be peremptorily sold by the Registrar of the Calcutta High Court, Original Civil Jurisdiction, in his sale-room on the middle floor of the Court-house on Saturday, the 22nd of February next, at the hour of 12 o'clock at noon, pursuant to a decree and orders of the said Court, made in suit No. 113 of 1886 (wherein Maltee Bibee, widow and administratrix of the late Bhogoban Dass, Augurwallah, is the plaintiff, and Russick Laul Chunder and others are the defendants), and dated, respectively, the 10th January 1887 and the 27th of July 1889, the undivided three annas and four gundas share of the defendants in the following property:—

Lot No. 1.—No. 50, Moirahatta Street, in Calcutta, being a brick-built house and premise in block No. 18, holding No. 187, North Division, and a piece of land thereunto belonging, and on part whereof the same is built, the area of which is by estimation 11 chittacks and 1 square foot, be the same, a little more or less, paying the annual jumma of 13 annas eight gundas and three cowries, and butted and bounded as follows:—On the north by the tenanted house of Aukhoy Churn Mullick; on the south by the tenanted house of the late Rajkristo Khan and others; on the east by the public road called Moirahatta Street; and on the west by the tenanted house of Sreemutty Rani Dassee

The conditions of sale and abstract of title may be seen at the Office of Messrs. Sowton and Son, Attorneys for the plaintiff, at No. 2, Church Lane, in Calcutta, on any day before the sale, and will be produced at the sale.

R. BELCHAMBERS, Registrar.

Sowton and Son, Plaintiff's Attorneys.

Calcutta, High Court, Original Jurisdiction, the 12th February 1890.

(3547—1)

Register No 116.

DWARKANATH BHUTTACHARJEA, Subordinate Judge,
(3548—1) First Court

Excise.

NOTIFICATION.

1. The right of retail sale of the Liquors and Drugs specified below will be put up to auction at the Opium Sale-room, Board of Revenue, 2, Bankshall Street, on Tuesday, the 4th March 1890, and subsequent days, in the following order :—

Name of article.	Date of sale.
Ganja, Siddhi, Charas, Majum ...	Tuesday, the 4th March 1890.
Opium, Madak, Chandu	Wednesday, the 5th ditto.
Tari	Saturday, the 8th ditto.
Country Spirit, Rum and Imported Liquor by glass.	Monday, Tuesday, and Wednesday, the 10th, 11th and 12th March 1890.

2. A complete list of all the shops for which licenses will be offered and a copy of each form of license are open to general inspection at the Office of the Superintendent of Excise Revenue, 4, Bankshall Street, and the number of these shops is not under any circumstances to be increased during the term of three years ending the 31st March 1893, except under the Board's sanction in each case. The Superintendent of Excise Revenue, however, reserves to himself the right, in case of combination, or for other cause, to transfer (subject to there being no objection on police grounds), either before or after its settlement, any shop from the site specified in the list to some other site, provided that the new site, if it is more than 100 yards from the advertised one, does not bring the shop within a quarter of a mile of any other similar shop whose term of license is unexpired.

3 It is not at present intended to open any other shop during the term of the license ; but the Superintendent of Excise Revenue does not absolutely bind himself in this respect. On special cause shown, and with the sanction of the Board of Revenue in each case, the number of shops may be increased : provided, however, that, whenever a new shop is opened, it will be optional to the holder of a similar license for the sale of Liquor or Drugs, if his shop is within a quarter of a mile of the new shop, to surrender his license without forfeiting his advance, when the Superintendent of Excise Revenue is to re-settle the shop by auction or otherwise.

4. The right of retail sale of the Liquors and Drugs is to be put up to auction at the sanctioned upset prices.

5. The right of retail sale of the Liquors and Drugs is to be put up to auction in separate lots of one or more shops, either in the order specified in the list, or in such other order as the officer conducting the sale may deem fit. When one lot has been sold, the next lot is not to be put up until the sum payable in advance on account of the lot already sold has been actually paid : provided, however, that, where the sum payable exceeds Rs. 25, a promissory note may be taken from any respectable and well-known purchaser in lieu of cash payment.

6. The purchasers of the right of retail sale of Country Spirit, Rum, and Imported Liquors are entitled to sell Imported Liquors by the glass only, the liquor to be drunk *on* the premises.

7. The auction is to be held subject to the following conditions :—

(*a*)—That the Superintendent of Excise Revenue does not bind himself to accept the highest or any bid.

(*b*)—That the settlement with each accepted purchaser will, in Calcutta and the Suburbs, be contingent on the production by him of the usual Police certificate or license, as the case may be, viz.—

For Excise licenses for— Dossta ... ... Rum ... ... Imported Liquors by glass ... ... Tari ... ... Ganja ... ... Siddhi ... ... Charas ... ... Majum	If to be held in Calcutta, a Police certificate in the form prescribed by section 36, Act IV (B C.) of 1866, must be produced ; and if to be held in the Suburbs, a Police certificate in the form prescribed by section 19, Act II (B.C.) of 1866, must be produced.
For Excise licenses for— Opium ... ... Madak ... ... Chandu	If to be held in Calcutta, a Police license in the from prescribed by section 39, Act IV (B C.) of 1866, must be produced; and if to be held in the Suburbs, a Police license in the form prescribed by section 22 of Act II (B.C.) of 1866, must be produced.

(*c*)—That the person accepted as the purchaser is to state in writing, within seven days from the date of settlement, in what building he purposes to open his shop, and is at the same time to submit a plan showing clearly and distinctly what building or portion thereof he desires to be covered by the license, it being understood that the removal of shops to other premises than those named in the list attached to this notification will be contingent on the approval of both the Excise and Police authorities, and that any sum which has been paid as an advance of the license fee under the provisions of clause (*d*) of these conditions will be returned to any person to whom a license may be subsequently refused for Police reasons.

(*d*)—That the term of the license is to be for three years ending the 31st March 1893, and that, except in the case of Tari, the license fee for that period is to be paid in advance in the following instalments :—namely, the sum equivalent to the fee for two months, at the time of sale, and one month's fee on the date on which the currency of the license commences, and one month's fee on the 1st day of every succeeding month, until the whole of the fee due on the license shall have been paid. In the case of Tari only one month's fee

is to be paid in advance at the time of sale, and fifteen days' fee on the date on which the currency of the license commences, and the rest of the fee in half-monthly instalments, viz., on the 1st and 16th day of every month, until the whole of the fee due on the license shall have been paid. This condition is to be strictly enforced in future, and failure to comply with it is to be met by immediate cancelment of the license.

(*e*)—That the purchaser is not to be entitled to receive back any portion of his advance in the event of his shop being closed before the expiration of the term of the license on violation of any of the conditions of the license, or his being convicted of a non-bailable criminal offence, or of any offence against the Excise laws or rules; and in the case of the surrender of a license under Act VII (B.C.) of 1878, the licensee is to give fifteen days' previous notice in writing to the Superintendent of Excise Revenue, and pay a sum equal to the license fee for fifteen days, over and above the amounts already paid in advance; and in the case of the surrender of a license under Act I of 1878, the licensee is to give one month's previous notice in writing to the Superintendent of Excise Revenue, and pay such fine not exceeding six months' license fees as the Superintendent of Excise Revenue may adjudge, over and above the amounts already paid in advance.

(*f*)—That the currency of the license is to commence on the 1st April 1890, on which date the purchaser is to open his shop, in all respects prepared for the accommodation of customers, to be certified by an Excise Officer—failure to comply with this condition is to be met by the immediate cancelment of the license, the forfeiture of the deposit, and the levy of the fees for the month except in the case of delay caused by the non-issue of the Police certificate or Police license, for which a reasonable extension of time may be allowed upon application and cause shown to the Superintendent of Excise Revenue.

(*g*)—That where the amount of the sum payable in advance is required to be paid at once in cash, and the bidder fails to make such payment, the officer conducting the sale is either immediately to put up the lot again for sale, or after the other lots in the list have been disposed of, or he may postpone the sale to such future date as he shall then and there notify; and the defaulting purchaser is to be debarred from bidding for such lot, or for any other lot, and he is not to be allowed to remain in the auction-room; and that the defaulting purchaser will be liable for any loss that may accrue to Government in case it becomes necessary to re-sell a lot at a lower rate, either in consequence of his failure to deposit the sum payable at the time of sale, or to redeem his promissory note on or before 4 P.M. on the day following that on which the note was signed.

(*h*)—That the purchasers are to adhere to all the provisions of the Opium, Excise and Police laws, and of the rules which have been or may from time to time be prescribed by the Board of Revenue.

8. All sales subsequent to the date of the triennial sale in March are to be held subject to the conditions contained in this notification, so far as they may be applicable.

9. Any further information regarding the auction may be had on application at the Office of the Superintendent of Excise Revenue.

D. G. BONNERJEE,
Superintendent of Excise Revenue,
Calcutta, the Suburbs, Howrah, and Bally.

OFFICE OF THE SUPDT. OF EXCISE REVENUE; 4, BANKSHALL STREET, CALCUTTA, *the 14th February* 1890.

INSOLVENT NOTICES.

In the Court for the Relief of Insolvent Debtors at Calcutta.

In the matter of BUNSIDHUR SINGHANIA, lately carrying on business as piece-goods dealer and commission agent at No. 68, Cotton Street, in the town of Calcutta, under the name, style and firm of KRIPARAM SOOKDYAL, an insolvent.

On Wednesday, the 15th day of January last, it was, on the petition of Jumna Dhur, Joogulkissore, creditors of the said insolvent, adjudged that the said Bunsidhur Singhania hath committed an act of insolvency, under the provisions of the Act XI Vic., Chapter XXI, and by another order of the same date the estate and effects of the said insolvent were vested in the Official Assignee.

E. J. Fink, Attorney. (3538—2)

In the matter of SUJUN COOMAR AND BUNGSEEDHUR of No. 90, Cross Street, in the Town of Calcutta, lately trading in co-partnership as merchants and agents, under the style and firm of Himutram Sujun Coomar, insolvents.

On Monday, the 27th day of January last, it was, on the petition of Luchme Chand, a creditor of the said insolvents, adjudged that the said Sujun Coomar and Bungseedhur have committed an act of insolvency under the provisions of the Act XI Vic., Chapter XXI, and by another order of the same date the estate and effects of the said insolvents were vested in the Official Assignee.

C. F. Pittar, Attorney. (3539—2)

Chief Clerk's Office, the 11th day of February 1890.
